  - Architecture - Graduate 137
    - M.Arch (Path A) 138
    - M.Arch (Path B) 141
    - M.Arch (Path C) 144
    - Sustainable Building Technology MS 146
  - Architecture - Undergraduate 149
    - Architecture BS 149
    - Interior Design BS 154
    - Architecture History Minor 159
- Landscape Architecture 160

Landscape Architecture - Graduate ... 167
Advanced Standing Landscape Professional MLA ... 167
Advanced Standing MLA ... 170
First Professional MLA ... 173
Landscape Architecture - Undergraduate ... 177
Sustainable Urban Design BS ... 177
Public Affairs and Planning ... 181
Public Affairs and Planning - Graduate ... 195
Public Administration and Public Policy PhD ... 196
Urban Planning and Public Policy PhD ... 201
MCRP ... 205
City and Regional Planning MCRP (Advanced Standing) ... 210
Local Government Management MPA ... 213
Online MPA ... 217
Public Budgeting and Financial Management MPA ... 220
Strategic Human Resources Management MPA ... 223
Urban Nonprofit Agency Management MPA ... 226
Development Review Graduate Certificate ... 230
GIS Graduate Certificate ... 231
Public Budgeting & Financial Management Graduate Certificate ... 232
Transportation Planning and Policy Graduate Certificate ... 233
Urban Nonprofit Management Graduate Certificate ... 235
Public Affairs and Planning - Undergraduate ... 236
Environmental & Sustainability Studies Minor ... 236
Urban and Public Affairs Minor ... 237
College of Business ... 241
Accounting ... 245
Accounting - Graduate ... 252
Accounting BBA/BS to Accounting MS Fast Track ... 252
Accounting BBA/BS to Taxation MS Fast Track ... 254
Professional Accounting MPACC ... 255
Accounting MS ... 257
Taxation MS ... 259
Taxation Graduate Certificate ... 261
Accounting - Undergraduate ... 263
Accounting BBA ... 264
Accounting BS ... 266
Accounting Minor ... 269
Business Administration ... 269
Business Administration - Graduate ... 275
Accounting PhD ... 276
Finance PhD ... 279

Information Systems PhD 282
Management Science PhD 285
Management PhD 288
Marketing PhD 290
MBA 293
Executive MBA 295
Executive MBA (International) 297
STEM MBA 298
Health Care Administration MS 300
BBA/BS to MBA Fast Track 303
BBA/BS to STEM MBA Fast Track 305
Healthcare Administration Graduate Certificate 307
Graduate Advanced Studies Certificate 308
Business Administration - Undergraduate 309
International Business BBA (Chinese) 310
International Business BBA (French) 312
International Business BBA (German) 314
International Business BBA (Korean) 316
International Business BBA (Russian) 319
International Business BBA (Spanish) 321
Business Administration Minor 323
Economics 324
Economics - Graduate 331
Economic Data Analytics MS 331
BBA/BS to Economic Data Analytics MS Fast Track 332
Economics - Undergraduate 335
Economics BBA 335
Economics BS 338
Economics Minor 340
Finance and Real Estate 340
Finance and Real Estate - Graduate 347
Quantitative Finance MS 347
Real Estate MS 349
BBA/BS to Quantitative Finance MS Fast Track 351
Real Estate BBA to MS Fast Track 353
Real Estate Development Graduate Certificate 354
Finance and Real Estate - Undergraduate 355
Finance BBA 355
Real Estate BBA 358
Banking Certificate 362
Information Systems and Operations Management 363
Information Systems and Operations Management - Graduate 371

Business Analytics MS ... 372
Information Systems MS ... 373
BBA/BS to Business Analytics MS Fast Track ... 375
BBA/BS to Information Systems MS Fast Track ... 377
Business Analytics Graduate Certificate ... 379
Business Analytics Executive Certificate ... 380
Information Systems and Operations Management - Undergraduate ... 381
Information Systems BBA ... 381
Operations & Supply Chain Management BBA ... 384
Business Analytics BS ... 387
Information Systems BS ... 390
Business Analytics Minor ... 392
Information Systems Minor ... 393
Business Analytics Certificate ... 394
Management ... 394
Management - Graduate ... 401
Human Resources Management MS ... 401
BBA/BS to Human Resources Management MS Fast Track ... 403
Entrepreneurship Graduate Certificate ... 405
Management - Undergraduate ... 406
Entrepreneurship BBA ... 406
Hospitality Management BBA ... 409
Human Resource Management BBA ... 411
Management BBA ... 413
Hospitality Management BS ... 414
Entrepreneurship Certificate ... 416
Managing Diversity & Inclusion Certificate ... 417
Marketing ... 418
Marketing - Graduate ... 424
Marketing Research MS ... 424
BBA/BS to Marketing Research MS Fast Track ... 427
Marketing - Undergraduate ... 429
Marketing BBA ... 429
Sales Certificate ... 432
College of Education ... 434
Higher Education, Adult Learning, and Organizational Studies ... 434
HEALOS - Graduate Programs ... 447
Educational Leadership and Policy Studies PhD ... 447
Instructional and Learning Design Technology MEd ... 449
Mind, Brain, and Education MEd ... 452
Instructional and Learning Design Technology Graduate Certificate ... 454
Hispanic Serving Leadership Preparation Graduate Certificate ... 456

HEALOS - Undergraduate Programs ... 457
Interdisciplinary Leadership Certificate ... 457
Interdisciplinary Leadership Minor ... 458
Teacher and Administrator Preparation ... 458
TAP - Graduate Programs ... 473
Curriculum and Instruction MEd (Literacy Studies) ... 474
Curriculum and Instruction MEd (Math Education) ... 476
Curriculum and Instruction MEd (Open) ... 478
Curriculum and Instruction MEd (Science Education) ... 480
Educational Leadership and Policy Studies MEd ... 482
Special Education MEd (Advanced) ... 485
Special Education MEd (Initial) ... 486
Principal Certification Program ... 488
TAP - Undergraduate Programs ... 491
Education BA (4-8 Middle-Level English Language Arts/Social Studies Teacher Certification) ... 491
Education BA (EC-6 Bilingual Teacher Certification) ... 494
Education BA (EC-6 ESL Teacher Certification) ... 497
Education BS (4-8 Middle-Level Math/Science Teacher Certification) ... 500
Education BS (EC-12 Special Education and EC-6 Core Subjects Teacher Certification) ... 503
College of Engineering ... 506
Bioengineering ... 509
Bioengineering - Graduate ... 520
Biomedical Engineering PhD ... 520
Bioengineering MS ... 523
Bioengineering - Undergraduate ... 526
Biomedical Engineering BS ... 527
Biomedical Engineering BS to MS Fast Track ... 533
Biomedical Engineering Minor ... 536
Civil Engineering ... 537
Civil Engineering - Graduate ... 562
Civil Engineering PhD (BS Entry, Construction) ... 563
Civil Engineering PhD (BS Entry, Environmental) ... 565
Civil Engineering PhD (BS Entry, Geotechnical) ... 567
Civil Engineering PhD (BS Entry, Infrastructure) ... 569
Civil Engineering PhD (BS Entry, Smart) ... 571
Doctor of Philosophy in Civil Engineering (BS Entry, SSWEM) ... 573
Civil Engineering PhD (BS Entry, Structures) ... 575
Civil Engineering PhD (BS Entry, Transportation) ... 577
Civil Engineering PhD (BS Entry, Water) ... 579
Civil Engineering PhD (Masters Entry) ... 581
Construction Management M ... 583
Civil Engineering ME (Construction) ... 585

Civil Engineering ME (Environmental) 588
Civil Engineering ME (Geotechnical) 590
Civil Engineering ME (Infrastructure) 592
Civil Engineering ME (Smart) 594
Civil Engineering ME (Structures) 597
Civil Engineering ME (SSWEM) 599
Civil Engineering ME (Transportation) 601
Civil Engineering ME (Water) 604
Civil Engineering MS (Construction) 606
Civil Engineering MS (Environmental) 608
Civil Engineering MS (Geotechnical) 610
Civil Engineering MS (Infrastructure) 613
Civil Engineering MS (Smart) 615
Civil Engineering MS (Structures) 618
Civil Engineering MS (SSWEM) 620
Civil Engineering MS (Transportation) 623
Civil Engineering MS (Water) 625
Sustainable Engineering & Renewable Energy Graduate Certificate 627
Civil Engineering - Undergraduate 630
Architectural Engineering BS 631
Civil Engineering BS 633
Construction Management BS 636
Civil Engineering BS to ME/MS Fast Track 639
College of Engineering Programs 643
College of Engineering Programs - Undergraduate 643
Nuclear Engineering Minor 643
Sustainable Engineering Minor 644
Computer Science and Engineering 645
Computer Science and Engineering - Graduate 660
Computer Engineering PhD 660
Computer Science PhD 662
Computer Engineering MS 664
Computer Science MS 669
Data Science MS 674
Master of Software Engineering 676
Artificial Intelligence Graduate Certificate 679
Big Data Management and Data Sciences Graduate Certificate 680
Cybersecurity and Privacy Graduate Certificate 681
Deep Learning Graduate Certificate 682
Embedded Systems Graduate Certificate 683
FGPA and System on Chip Design Graduate Certificate 685
Real Time Systems Graduate Certificate 686

Unmanned Vehicle Systems Graduate Certificate (CSE) ... 687
Computer Science and Engineering - Undergraduate ... 688
Computer Engineering BS ... 690
Computer Science BS ... 692
Software Engineering BS ... 695
Cybersecurity Certificate ... 698
Embedded Systems Certificate (Computer Science and Engineering) ... 699
Unmanned Vehicle Systems Certificate (Computer Engineering) ... 700
Unmanned Vehicle Systems Certificate (Computer Science) ... 701
Computer Science Minor ... 702
Artificial Intelligence Certificate ... 703
Electrical Engineering ... 704
Electrical Engineering - Graduate ... 719
Electrical Engineering PhD (BS Entry) ... 720
Electrical Engineering PhD (MS Entry) ... 724
Electrical Engineering MS ... 729
Cyber-Physical Systems Graduate Certificate ... 731
Electric Propulsion Graduate Certificate ... 732
Photonic Devices & Systems Graduate Certificate ... 733
Power System Management Certificate ... 735
Real Time Systems Certificate ... 737
Unmanned Vehicle Systems Graduate Certificate (Electrical Engineering) ... 738
Electrical Engineering - Undergraduate ... 739
Electrical Engineering BS ... 740
Resource and Energy Engineering BS ... 744
Electrical Engineering BS to MS Fast Track ... 747
Unmanned Vehicle Systems Certificate (Electrical Engineering) ... 749
Electric Propulsion Certificate ... 750
Embedded Systems Certificate (Electrical Engineering) ... 751
Resource and Energy Engineering Certificate ... 753
Electrical Engineering Minor ... 754
Industrial, Manufacturing and Systems Engineering ... 755
Industrial, Manufacturing and Systems Engineering - Graduate ... 763
Industrial Engineering PhD ... 763
Engineering Management MS ... 766
Industrial Engineering MS ... 767
Decision Analytics Graduate Certificate ... 769
Industrial Applications Graduate Certificate ... 770
Logistics Graduate Certificate ... 771
Unmanned Vehicle Systems Graduate Certificate (IMSE) ... 773
Industrial, Manufacturing and Systems Engineering - Undergraduate ... 774
Industrial Engineering BS ... 775

Industrial Engineering BS to MS Fast Track 778
Unmanned Vehicle Systems Certificate (Industrial, Manufacturing, and Systems Engineering) 780
Industrial Engineering Minor 780
Materials Science and Engineering 781
Materials Science and Engineering - Graduate 787
Materials Science and Engineering PhD (BS Entry) 788
Materials Science and Engineering PhD (MS Entry) 791
Materials Science and Engineering ME 793
Materials Science and Engineering MS 796
Materials Science and Engineering - Undergraduate 798
Nanotechnology Certificate 798
Materials Science and Engineering Minor 800
Nanotechnology Minor 801
Mechanical and Aerospace Engineering 803
Mechanical & Aerospace Engineering - Graduate 821
Aerospace Engineering PhD (BS Entry) 833
Aerospace Engineering PhD (MS Entry) 835
Mechanical Engineering PhD (BS Entry) 838
Mechanical Engineering PhD (MS Entry) 841
Aerospace Engineering ME 843
Aerospace Engineering MS 846
Mechanical Engineering ME 848
Mechanical Engineering MS 851
Automotive Engineering Graduate Certificate 853
Electronic Packaging Graduate Certificate 854
Manufacturing Graduate Certificate 855
Unmanned Vehicle Systems Graduate Certificate (MAE) 857
Vertical Lift/Rotorcraft Graduate Certificate 859
Mechanical & Aerospace Engineering - Undergraduate 860
Aerospace Engineering BS 868
Mechanical Engineering BS 872
Aerospace Engineering BS to MS or ME Fast Track 875
Mechanical Engineering BS to ME/MS Fast Track 877
Mechanical Engineering BS to MS/ME in Materials Science and Engineering Fast Track 879
Automotive Engineering Certificate 881
Unmanned Vehicle Systems Certificate (Mechanical and Aerospace Engineering) 882
Aerospace Engineering Minor 884
Mechanical Engineering Minor 885
Space Systems Minor 886
College of Liberal Arts 889
Aerospace Studies 891
Applied Programs 893

Applied Programs - Graduate ... 897
Gender, Women and Sexuality Studies Graduate Certificate ... 897
Applied Programs - Undergraduate ... 898
Interdisciplinary Studies BA ... 898
Interdisciplinary Studies BS ... 900
Gender, Women & Sexuality Studies Minor ... 901
Law and Legal Studies Minor ... 902
Art & Art History ... 904
Art & Art History - Graduate ... 918
Art MFA ... 918
Art & Art History - Undergraduate ... 922
Art History BA ... 923
Art BFA ... 925
Art BFA (Teaching Certification) ... 928
Art BA ... 931
Cinematic Arts Production Certificate ... 934
Art History Minor ... 936
Commercial Film Production Minor ... 937
Drawing Minor ... 938
Film/Video Minor ... 939
General Art Minor ... 940
Glass Minor ... 940
Museum Studies Minor ... 942
Photography Minor ... 943
Printmaking Minor ... 944
UX/UI Design Certificate ... 945
Communication ... 946
Communication - Graduate ... 956
Communication MA ... 956
Communication - Undergraduate ... 959
Advertising BA ... 960
Broadcasting BA ... 962
Communication Studies Interpersonal Communication BA ... 964
Communication Studies Organizational Communication BA ... 967
Communication Technology BA ... 969
Journalism BA ... 971
Philanthropy BA ... 973
Public Relations BA ... 975
Digital Media Certificate ... 977
Fundraising and Nonprofit Management Certificate ... 978
Health Communication Certificate ... 979
Professional Communication Certificate ... 980

Advertising Minor 982
Broadcasting Minor 982
Communication Minor 983
Communication Studies Minor 984
Communication Technology Minor 985
Journalism Minor 986
Philanthropy Minor 987
Public Relations Minor 988
Criminology & Criminal Justice 989
Criminology & Criminal Justice - Graduate Program 994
Criminology and Criminal Justice MA 994
Criminology and Criminal Justice MA (Online Only) 996
Criminology and Criminal Justice - Undergraduate Programs 998
Criminology and Criminal Justice BA 999
Criminology and Criminal Justice Minor 1001
Forensic Applications Minor 1002
English 1003
English - Graduate Programs 1019
English PhD 1019
English MA 1022
English - Undergraduate Programs 1024
English BA 1024
English BA (Teaching Certification) 1027
Technical and Professional Writing Certificate 1029
Creative Writing Minor 1030
English Minor 1031
Rhetoric and Writing Studies Minor 1032
Sound Studies Minor 1033
Technical and Professional Writing Minor 1034
History & Geography 1035
History & Geography - Graduate 1049
History PhD 1049
History MA 1054
History MA (Archival Administration) 1056
History MA (Public History) 1059
Archival Administration Certificate 1061
Public History Graduate Certificate 1062
History & Geography - Undergraduate 1063
History BA 1063
History BA (Pre-Law) 1066
History BA (Social Studies Teaching Certification) 1068
History of Technology and Science Certificate 1071

Geography Minor ... 1073
History Minor ... 1074
History of Technology and Science Minor ... 1074
Military History Minor ... 1076
Liberal Arts Programs ... 1077
Liberal Arts Programs - Undergraduate ... 1079
Esports Certificate ... 1079
Global Studies Certificate ... 1080
Disability Studies Minor ... 1083
Global Studies Minor ... 1085
Linguistics & TESOL ... 1088
Linguistics & TESOL - Graduate ... 1096
Linguistics PhD ... 1096
Linguistics MA ... 1099
TESOL MA ... 1101
TESOL Graduate Certificate ... 1103
Linguistics & TESOL - Undergraduate ... 1104
Linguistics BA ... 1105
TESOL Certificate ... 1106
Linguistics Minor ... 1107
TESOL Minor ... 1108

Academic Year 2025 - 2026

The University of Texas at Arlington Online University Catalog is the official catalog of the University and takes precedence over any previously printed or online catalog. This version of the catalog was published in summer 2025 and supersedes the previously published 2024-2025 catalog. Students are governed by the catalog under which they were enrolled or, at a student's option, the catalog of any subsequent year in which that student was in residence. Please refer to the academic requirements and procedures sections for more information.

AVAILABLE FORMATS

The University Catalog is available in an online format only. This is part of the Mavericks Go Green Campus Sustainability program (http://www.uta.edu/sustainability/). Many of our previous catalogs are still available online. Catalogs that are no longer online are still available through the University Archives (https://rc.library.uta.edu/uta-ir/handle/10106/30076/).

About the Catalog

This catalog is an official bulletin of the University of Texas at Arlington and is intended to provide general information. In addition to program and course information, it includes university policies, procedures and fees in effect at the time of release.

Students are held individually responsible for complying with all requirements of the rules and regulations of the University and the Board of Regents of The University of Texas System. Failure to read and comply with policies, regulations and procedures will not exempt a student from being governed by and accountable to them. Many departments and programs issue program manuals, procedures and policy manuals, student handbooks and other informational publications for students and faculty in its programs. These publications provide detailed and useful information; however, they are not statements of official policy or binding contracts of The University of Texas at Arlington or of The University of Texas System. In all matters, the Rules and Regulations of the Board of Regents of The University of Texas System, the Handbook of Operating Procedures of The University of Texas at Arlington, and the University Catalog of The University of Texas at Arlington shall supersede departmental, program or college publications.

Note: The University Catalog is a general information publication only. The University Catalog is not intended to nor does it contain all regulations that relate to students. The provisions of this catalog do not constitute a contract, express, or implied, between any applicant, student or faculty/staff member and The University of Texas at Arlington or The University of Texas System. The University reserves the right to withdraw courses at any time, change fees, rules, calendar, curriculum, degree programs, degree requirements, graduation procedures and any other requirements affecting students. Changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

The catalog is published once annually. In the instance of important updates to policies and/or programs, the new information will be posted in a mid-year addendum. Any updated items will be effective and available at the beginning of the Spring semester. Please refer to the MID-YEAR ADDENDUM CATALOG PAGE (p. 1884) at that time for any changes implemented after the Fall publication date of this bulletin.

Catalog A-Z Index

The University of Texas at Arlington

University Profile

The University of Texas at Arlington, a Carnegie Research-1 Institution (Very High Research Activity), is a comprehensive teaching, research, and public service institution dedicated to the advancement of knowledge through scholarship and creative work. The mission statement affirms UT Arlington is committed to providing access and ensuring student success, and to a culture of innovation, entrepreneurship, and commercialization of discoveries by our community of scholars. The University promotes lifelong learning though its academic, continuing education, and experiential learning programs. The faculty, staff, and student community shares diverse cultural values that foster inclusivity and cultivate mutual respect.

The University of Texas at Arlington is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, master's, and doctoral degrees. The University of Texas at Arlington also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of the University of Texas at Arlington may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (https://www.sacscoc.org/).

Founded in 1895 as a private liberal arts institution, UT Arlington has evolved through a succession of names and missions. The institution achieved senior college status in 1959 and became part of The University of Texas System in 1965. The government of UT Arlington is vested in a nine-member Board of Regents of the UT System, nominated by the governor and approved by the Texas Senate. The Office of the Chancellor is the chief administrative office of the UT System and is located in Austin. The chief administrative officer of UT Arlington is the University president, under the authority of the Office of the Chancellor of the UT System and the Board of Regents. A complete statement of the authority and duties of the Regents and of the several officers, together with an account of the organization of the system, is published in the Rules and Regulations of the Board of Regents of The University of Texas System.

In addition, many of UT Arlington's academic departments and schools have received national accreditation from specific agencies. These accreditations are detailed under the individual listings for departments and schools in this catalog.

UT Arlington enrolls approximately 41,000 students annually. Our student body is drawn from almost every state in the United States and more than 100 countries. Since becoming a degree-granting institution at the baccalaureate, master's, and doctoral levels, UT Arlington has awarded more than 280,000 degrees.

UT Arlington is one of the nation's top universities for expanding access to higher education and helping graduates earn competitive wages, according to the Carnegie Classification of Institutions of Higher Education. Its R1 designation—denoting the highest level of research activity—places the University among the top 5% of research institutions nationwide, and its classification as an Opportunity University indicates it serves as a model for how campuses can advance student success.

In response to societal needs, UT Arlington has evolved into a renowned university within the state and one of emerging position nationally and internationally. The University's history of achievement can be attributed to its outstanding faculty, a strong student body, a record of success by graduates in their respective fields, and the growth of the Dallas/Fort Worth area as a nationally and internationally significant metropolis.

Mission Statement

The University of Texas at Arlington is a comprehensive teaching, research, and public service institution dedicated to the advancement of knowledge through scholarship and creative work.

The University is committed to providing access and ensuring student success, and to a culture of innovation, entrepreneurship, and commercialization of discoveries by our community of scholars.

The University promotes lifelong learning though its academic, continuing education, and experiential learning programs. The faculty, staff, and student community shares diverse cultural values that foster inclusivity and cultivate mutual respect.

Non-Discrimination Policy and Procedure

It is the policy of The University of Texas at Arlington (UTA) to provide an educational and working environment that provides equal opportunity to all members of the University community. In accordance with federal and state law, the University prohibits unlawful discrimination, including harassment, on the basis of race, color, national origin, religion, age, sex, sexual orientation, pregnancy, disability, genetic information, and/or veteran status. The University also prohibits discrimination on the basis of gender identity, and gender expression.

Retaliation against persons who oppose a discriminatory practice, file a charge of discrimination, or testify for, assist in, or participate in an investigative proceeding relating to discrimination is prohibited. Constitutionally protected expression will not be considered discrimination or harassment under this policy. It is the responsibility of all departments, employees, and students to ensure the University's compliance with this policy. The University's Equal Opportunity Services (EOS) and Title IX Office investigates allegations of discrimination affecting the UTA community. Complaints regarding unlawful discrimination should be brought to the Equal Opportunity Services and Title IX Office. Copies of this policy are also available in Equal Opportunity

Services and accessible at the EOS website. Periodic notices sent to students, employees, and supervisors about this Policy will include information about the complaint procedure.

In accordance with Texas Labor Code Section 21.010, all UTA employees, including faculty, are required to complete training regarding the University's procedures relating to employment discrimination, including its procedures regarding sexual harassment, no later than the 30th day after the date the employee is hired, and to complete supplemental training every two years. The University will generate an electronic acknowledgement after each individual completes his/her training and will retain the acknowledgement in the individual training records of the University.

Sexual Harassment and Misconduct, and Consensual Relationships Policy

The University of Texas at Arlington is committed to maintaining a learning and working environment that is free from discrimination based on sex in accordance with Title IX of the Higher Education Amendments of 1972 (Title IX), which prohibits discrimination on the basis of sex in educational programs or activities; Title VII of the Civil Rights Act of 1964 (Title VII), which prohibits sex discrimination in employment; and the Campus Sexual Violence Elimination Act (SaVE Act), Violence Against Women Act (VAWA), and Clery Act. Sexual Misconduct, Retaliation, and other prohibited conduct under this policy will not be tolerated and will be subject to disciplinary action.

The University will promptly discipline any individuals or organizations within its control who violate this policy. The University encourages individuals to promptly report incidents that could constitute violations of this policy to the Title IX Coordinator (as outlined in Section II.D. (https://policy.uta.edu/doctract/documentportal/08D89616FAD6C892494E12B4F3B285B5/) of this policy).

Read the full policy here (https://policy.uta.edu/doctract/documentportal/08D89616FAD6C892494E12B4F3B285B5/).

Publication Date

The date of publication of this catalog edition is June 2025.

Official University Academic Calendar

The academic calendar is a source for information about notable dates, including registration timelines, final exam dates and student holidays/campus closings. The University Academic Calendar (https://www.uta.edu/academics/academic-calendar/) includes important dates for all terms and sessions within the academic year. Dates on the academic calendar are subject to change

Specific calendars such as grade report schedules and dynamic course dates can be found on the UTA website in the calendar section of the Office of the Registrar (https://www.uta.edu/records/calendars/).

Morteza G. Khaledi, Ph.D., Dean, College of Science
James P. Grover, Ph.D., Dean, Graduate School
Sean Kelly, Ph.D., Dean, Honors College
Zheng “John” Wang, M.L.I.S., Dean, Libraries
Kirk A. Foster, Ph.D., Dean, School of Social Work

University Requirements & Policies

Students are held individually responsible for complying with all requirements of the rules and regulations of the University and the Board of Regents of The University of Texas System. Failure to read and comply with policies, regulations and procedures will not exempt a student from being governed by and accountable to them.

Many departments and programs issue program manuals, procedures and policy manuals, student handbooks and other informational publications for students and faculty in its programs. These publications provide detailed and useful information; however, they are not statements of official policy or binding contracts of The University of Texas at Arlington or of The University of Texas System.

In all matters, the Rules and Regulations of the Board of Regents of The University of Texas System, the Handbook of Operating Procedures of The University of Texas at Arlington, and the University Catalog of The University of Texas at Arlington shall supersede departmental, program or college publications.

Admissions

The Office of Admissions handles over 70,000 applications per year to the university's graduate and undergraduate programs. Admission to the university is open to qualified applicants regardless of race, color, gender, sexual orientation, creed, age, national origin or educationally unrelated handicaps. Once applications are received by the office, the applicant will be notified of the documents which must be submitted in order for an assessment to be made and admissibility determined. Determination of admission is made in the academic department for graduate applicants while undergraduate student's admissibility is determined by the Office of Admissions based on approved university admissions requirements. Students are notified of the admissions decision both by email and by a letter to the home address.

The department seeks to encourage life-long learners to become partners in the educational enterprise and provide a seamless transition throughout the application and enrollment process.

UTA does not admit incarcerated students. A student is considered to be incarcerated if serving a criminal sentence in a federal, state, or local penitentiary, prison, jail, reformatory, work farm or similar correctional institution (whether it is operated by the government or a contractor). A student is not considered to be incarcerated if in a half-way house or home detention or is sentenced to serve only on weekends.

Graduate Admissions (p. 26)

Undergraduate Admissions (p. 33)

Graduate Admissions

Admission

Basic admission requirements must be met before a student can be accepted. In meeting these requirements, an applicant 1) must have a bachelor's degree from a regionally accredited U.S. college or university or its foreign equivalent, with a satisfactory grade-point average; 2) must have an acceptable and current score on the aptitude tests of the Graduate Record Examination or the Graduate Management Admission Test, as specified by the department or program to which application is being made; 3) demonstrate potential for graduate work in the chosen field through previous academic performance; and 4) be approved for admission by the department in which a degree is sought. Certain programs require students to submit to and satisfactorily complete a background check review as a condition of admission and/or participation in education experiences. Students who refuse to submit to a background check or who do not pass the background check may be dismissed from the program. Applicants should examine departmental requirements with care.

The following sections detail the minimum standards required for admission to a graduate program at the University of Texas at Arlington. Meeting them does not guarantee acceptance into a departmental degree program because most departments have more stringent admission standards. The University may limit the number of students accepted in a program if the number of applicants exceeds the resources needed to support the educational objectives of that program. Admission to graduate programs is competitive. Therefore, students meeting admission requirements who are less well qualified than other applicants may be denied admission.

Applicants must complete the online application for admission (https://www.uta.edu/admissions/graduate/apply/index.php (https://www.uta.edu/admissions/graduate/apply/)). Since admission requirements vary and are program specific, go to http://www.uta.edu/admissions/graduate (http://www.uta.edu/admissions/graduate/) and look up current admission requirements in the current Graduate Catalog for the program or department to which admission is sought.

The admission policies of the academic departments of The University of Texas at Arlington comply with standards specified by the Texas Education Code, Section 51.842. Specifically, performance on a standardized test is not the sole criterion for consideration of an applicant for admission or the primary criterion to end consideration of the applicant for admissions. Relevant experience, commitment to the field of planned study, multilingual proficiency, and socioeconomic background (to the extent that it can be identified) may also enter into these decisions. This law does not apply to

standardized tests used to measure the English language proficiency of non-native English speakers without a bachelor's or master's degree from a regionally accredited U.S. institution.

Basic Admission Requirements

APPLICATION

Application for admission must be made on official application forms. Students may complete the application online by accessing our Web site http://www.uta.edu/admissions/graduate (http://www.uta.edu/admissions/graduate/). Please note, you may only submit one application, and be considered for admission to one program at a time.

APPLICATION EVALUATION CHARGES

A non-refundable application evaluation charge is required of all applicants. Payment must be received before processing can begin. There are no exceptions to this policy.

A non-refundable evaluation charge of $75 is required of all U.S. citizens and U.S. Resident Alien applicants who have attempted all of their college or university work at institutions located in the United States. A $90 evaluation charge is required of all U.S. citizens and U.S. Resident Alien applicants who have attempted some or all undergraduate or graduate coursework at an institution located outside of the United States.

All international students are required to pay a non-refundable $90 application evaluation charge.

Required Official Transcripts, Marksheets, and Diplomas

Application processing for admission to a graduate program requires receipt of official U.S. transcripts or foreign country transcripts or marksheets and diplomas. Notarized, student emailed or fax copies of U.S. transcripts, foreign country transcripts, marksheets, and diplomas/degree verification and other academic records are not acceptable for processing purposes. Acceptable transcripts, marksheets, and diplomas/degree verification from U.S. and international institutions are described below. Documents meeting the indicated criteria will be accepted by Graduate Admissions for admission purposes. Unacceptable documents will prevent or cause delays in admission processing.

U.S. TRANSCRIPTS

Official transcripts from U.S. institutions are those issued electronically or sent by mail directly from the Registrar or transcript issuing office of the college or university of enrollment. Currently or previously enrolled UT Arlington students do not have to request their UT Arlington transcript.

FOREIGN COUNTRY TRANSCRIPTS OR MARKSHEETS AND DIPLOMAS

Official foreign country transcripts or marksheets and diplomas/degree verifications are those issued electronically or sent by mail directly from the Registrar or transcript issuing office of the college or university of enrollment. A degree verification statement must accompany the transcript or marksheets if a degree was awarded but not stated on the transcript or marksheets. If not issued in English, an exact word for word original English translation bearing the original university or translation agency attestation must accompany the transcript or marksheets and degree verification.

Grade Point Average Calculation for Admission

STUDENTS WITH DEGREES FROM U.S. INSTITUTIONS

The grade-point average for admission to graduate school at The University of Texas at Arlington is calculated according to Texas law and the policies and procedures of Graduate Admissions. For applicants completing work in U.S. institutions of higher learning, calculation of the grade-point average for admission purposes is based on the last two years of courses from the bachelor's degree transcript, on a 4.0 scale. In practice, this grade-point average is based on approximately the last 60 semester hours or the equivalent in quarter hours (90 quarter hours) shown on an applicant's bachelor's degree transcript.

In cases in which an applicant's transcript shows repeated courses, the grade-point calculation includes all grades earned in those courses.

For an applicant who applies before official receipt of the bachelor's degree, the last 60 semester hours grade-point calculation will include senior college and university work completed to date. The grade-point average will not be automatically recalculated upon receipt of the degree.

An applicant wishing to have undergraduate courses completed after their degree degree has been awarded included in the grade-point calculation may submit a written request to Graduate Admissions at the time the application for admission is submitted.

An additional grade-point average is calculated for an applicant awarded or completing a master's or doctoral degree at the time application to UTA is made. For master's level students, the grade-point calculation will include all graduate level courses taken subsequent to the bachelor's degree at the institution from which the degree has been or will be awarded. For doctoral level students, the grade-point calculation will include all graduate level courses taken subsequent to the bachelor's and master's degree at the institution from which the doctoral degree has been or will be awarded. The grade-point average will be calculated on the basis of information provided at the time application to UTA is made and will not be automatically recalculated upon completion of on-going work or award of a degree.

International applicants and others with degrees earned outside the United States should see the grade-point calculation information under Admission of International Students and Resident Aliens.

The following are not included in grade-point calculations for admission purposes:

1. courses completed at junior or community colleges
2. courses completed by examination or correspondence
3. incomplete grades or withdrawals
4. pluses and minuses
5. personal improvement courses such as activity courses in physical education
6. graduate courses or any courses completed in graduate student status (a graduate grade-point average will be calculated and reported separately)
7. courses in which the grade is a P, pass, credit, satisfactory or other such designation

STUDENTS WITH DEGREES FROM INTERNATIONAL INSTITUTIONS

The calculation of the GPA for international applicants and U.S. resident aliens who have earned degrees from colleges or universities in the United States follows the policies and procedures for U.S. applicants. The diversity of marksheets and transcripts from foreign universities requires flexibility in calculating approximate equivalents of U.S. GPAs. Generally, GPAs for applicants with foreign degrees are calculated using the final grade for courses taken in the last two years of the applicants' undergraduate program. For an applicant who applies pending receipt of the bachelor's degree, the GPA calculation will include final course grades for the last two years of undergraduate work available at the time the application is submitted for processing. All grades are converted to the U.S. 4-point scale. Pluses and minuses, graduate courses, and personal improvement courses such as physical education are not included in these calculations.

UNDER THE ACADEMIC FRESH START STATUTE

Admission to Undergraduate Programs

Texas residents may seek to enter undergraduate programs at U.T. Arlington under provisions of the "academic fresh start" statute, Section 51.931 of the Texas Education Code. When applicants inform U.T. Arlington admissions officials in writing of their decision, U.T. Arlington will not consider in the admissions decision any academic course credits or grades earned 10 or more years prior to the starting date of the semester in which the applicant seeks to enroll. Applicants who decide to apply under this statute may not receive any course credit for courses taken 10 or more years prior to enrollment under academic fresh start.

Admission to Postgraduate/Professional Programs

Applicants who have earned baccalaureate degrees under the "academic fresh start" statute, Section 51.931 of the Texas Education Code, and who apply for admission to a postgraduate or professional program will be evaluated on only the grade-point average of the course of work completed for that baccalaureate degree and the other criteria stated herein for admission to the postgraduate or professional program.

Standardized Test Requirements

Official test score reports for the Graduate Record Exam (GRE), Test of English as a Foreign Language (TOEFL), and TOEFL iBT are issued by the Educational Testing Service (ETS) and sent by ETS directly to Graduate Admissions. Official test score reports for the Graduate Management Admission Test (GMAT) are issued by the Graduate Management Admission Council (GMAC) and sent by GMAC directly to Graduate Admissions. Current information about GRE, GMAT, TOEFL, and TOEFL iBT test dates, locations and registration procedures is published by ETS at www.ets.org. For current information about the GMAT including test dates, locations, registration procedures, and time frames for test score validity, access www.mba.com. Official test scores for the International English Language Testing System (IELTS) are reported on an IELTS issued Test Report Form (TRF) and sent directly to Graduate Admissions from IELTS. Current information about IELTS test dates, locations and registration procedures is published by IELTS at www.ielts.org.

GRE AND GMAT MINIMUM SCORES

The University of Texas at Arlington does not set minimum GRE or GMAT requirements that apply to all students. Individual programs or departments determine GRE and GMAT requirements for admission to their programs. Individual departments and programs may evaluate GRE or GMAT scores as one of several criteria to determine admissibility. Test scores do not constitute the sole or primary basis for admission or for ending consideration of an applicant. Applicants should refer to individual departmental or program section for test requirements.

TOEFL IBT, IELTS OR DUOLINGO SCORE MINIMUMS FOR ADMISSION

Official English language test scores are required from international students from non-native English-speaking countries. UTA accepts TOEFL, IELTS, and Duolingo official scores as part of the admission review process. Individual academic departments and graduate programs may give preference to students who exceed these minimums. Certain academic programs at UTA may still require English proficiency testing where higher language proficiency is critical to the program's success. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies.

Graduate master's and doctoral applicants are expected to submit a score of at least 6.5 on the IELTS or achieve a minimum TOEFL iBT total score of 79 or obtain a Duolingo score of 100. Further, when the TOEFL iBT is taken, sectional scores of at least 22 on the writing section, 21 on the speaking section, 20 on the reading section, and 16 on the listening section are preferred. Scores must be sent directly to UT Arlington from the testing service provider to be considered official. Student score reports are not used for admission processing. However, admission to any graduate program is limited and competitive. Meeting the minimum admission requirements does not guarantee acceptance and programs may give preference to students with higher scores. Information regarding program-specific preferences can be found in each graduate program's description of admission qualifications. International applicants may still be expected to submit a test score of English language proficiency to be eligible for a graduate teaching assistantship. See the section **TOEFL iBT or IELTS Requirements for Graduate Teaching Assistants** for more information.

Applicants from the following countries are exempt from submitting English language proficiency scores: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Liberia, Montserrat, New Zealand, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, United Kingdom, Botswana, Cook Islands, Falkland Islands, Federated States of Micronesia, Fiji, The Gambia, Ghana, Gibraltar, Guam, India, Kenya, Lesotho, Malawi, Marshall Islands, Mauritius, Nigeria, Philippines, Papua New Guinea, Saint Helena-Ascension-Tristan da Cunha, South Africa, Swaziland, Singapore, Tanzania, Uganda, U.S. Virgin Islands, Zambia, and Zimbabwe.

Applicants who have earned a bachelor's, master's, or doctoral degree from a U.S.-accredited institutions are also exempt.

Any other waivers of the score requirements must be recommended by the applicant's Graduate Advisor and approved by the college or school dean.

TOEFL IBT OR IELTS REQUIREMENTS FOR GRADUATE TEACHING ASSISTANTS

Before being appointed to an assistantship at UT Arlington, a student whose native language is not English must demonstrate acceptable skill with spoken English. An applicant who is a non-native speaker of English must submit a TOEFL iBT score of at least 23, or a score of at least 7 on the Speaking section of the IELTS, or take and pass the UTA Developmental English course to meet this requirement. Only official scores provided directly to UT Arlington by ETS or IELTS are acceptable. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor's degree from an accredited U.S. institution.

Application Deadlines

UNITED STATES CITIZEN APPLICANTS

A U.S. citizen student may complete the application online. Since admission requirements vary and are program specific, go to our Web site at http://www.uta.edu/admissions/graduate (http://www.uta.edu/admissions/graduate/) for admission criteria specific to each individual department and program. The application and following required credentials should be submitted preferably 90 days prior to the date of expected enrollment:

1. one set of official transcripts of all undergraduate and graduate college work; currently or previously enrolled UTA students do not have to request UTA transcripts
2. official GRE or GMAT test score as required by the intended program
3. official TOEFL or IELTS test score, if applicable
4. letters of recommendation as required by the intended program
5. essay or statement of general academic plans as required by the intended program
6. a nonrefundable application evaluation charge of $75, if no foreign college or university work or $90, if foreign college or university work

Some graduate programs may set deadlines for application or consideration of applicants for graduate assistantships that are earlier than general deadlines established by Graduate Admissions. Such deadlines will be included in descriptions of admission requirements provided by each department. Applicants should read those materials carefully and submit their application materials before a departmental deadline passes. If the department does not specify a deadline, applicants should meet the Graduate Admissions deadlines described above.

INTERNATIONAL AND U.S. RESIDENT ALIEN APPLICANTS

An International or U.S. Resident Alien applicant may complete the application online. Since admission requirements vary and are program specific, use this link http://www.uta.edu/admissions/graduate (http://www.uta.edu/admissions/graduate/) and look up current admission requirements in the current University Catalog for the program or department to which admission is sought. The application and following required credentials should be submitted preferably 120 days prior to the date of expected enrollment: 1) all international students must submit a nonrefundable application evaluation charge of $90. U.S. Resident Alien applicants WITH foreign college or university work must submit a non-refundable application evaluation charge of $90. U.S. Resident Alien applicant WITHOUT foreign college or university work must submit a non-refundable application charge of $75; 2) one set of official marksheets, diplomas or transcripts of all undergraduate and graduate coursework; 3) official GRE or GMAT test score as required by the intended program; 4) official TOEFL or IELTS test score, if applicable; 5) three letters of recommendation; 6) general academic plans; 7) financial and/or immigration documentation as specified in the application instructions.

Changes to a Submitted Application

STARTING SEMESTER, DEGREE PROGRAM, OR DEGREE LEVEL

Current applicants wishing to change the semester in which they plan to start study at UT Arlington, programs in which they wish to be considered for admission, or degree levels (e.g., master's or doctoral) for which they initially applied, may request that their application be reprocessed for possible admission by completing the form "Reactivate an Admissions Application". This form is completed online at our website (https://www.uta.edu/admissions/). Applicants may submit only one "Reactivate an Admissions Application" at a time. The initial admission decision does not automatically apply when an applicant requests these types of changes to their application. When a request is received, the appropriate non-refundable U.S. Citizen, Resident Alien or International Student application evaluation charge must be paid in order to begin processing the request. Once the fee is paid the application is thoroughly re-evaluated to ensure it is complete and current and a new admission decision will be made. This rule does not apply to an applicant who was admitted but did not enroll because of deployment as a member of the armed forces of the United States serving on active duty in a combative operation outside the United States. For an applicant requesting a change in their semester start date because of deployment in a combative operation outside the United States the initial program admit decision and standardized test scores submitted for admission to the initial program automatically apply to the change in semester start date and the application evaluation charge for the change is semester start date is waived (TEC Sec. 51.844).

RETENTION OF APPLICATION MATERIALS

Application materials become property of The University of Texas at Arlington and cannot be returned.

NOTIFICATION OF APPLICANTS REGARDING ADMISSIONS DECISIONS

While admission related information received from the graduate program to which an individual has applied may be important and useful, such information does not constitute official notice of admission into a graduate program at The University of Texas at Arlington.

Official notification of the admission decision is issued by Graduate Admissions and sent directly to the applicant. It is very important that applicants read this notice carefully because it describes any conditions or restrictions placed on admission that must be addressed. Many of these conditions must be satisfied before the end of the first semester of enrollment. If they are not, a student may be barred from enrolling in subsequent semesters. Thus applicants should read the notice and keep it for future reference. Admission conditions described in official notification letters are described in the following section.

Types of Admission Decisions

After an applicant's credentials have been evaluated by the Graduate Advisor in the applicant's major area the applicant will be notified by letter and email sent by Graduate Admissions of : 1) acceptance and admission under one of the categories of admission listed below; or 2) denial of application; or 3) deferral of application for reasons listed in the letter. If accepted, the acceptance notification will state conditions for admission, if any, and period of validity of the acceptance. Applicants who have not received an admission notification one week prior to the beginning of classes for the semester for which admission is sought should contact Graduate Admissions for information concerning the status of their application.

UNCONDITIONAL ADMISSION

An applicant who meets all requirements is normally considered for unconditional admission.

PROBATIONARY ADMISSION

An applicant who does not meet all requirements for unconditional admission nevertheless may show promise for successful graduate study and, upon recommendation of the Graduate Advisor, Committee on Graduate Studies and with approval of the academic dean may be granted probationary admission. Special course requirements or other conditions may be imposed by the advisor, Committee on Graduate Studies and/or dean.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission upon recommendation of the appropriate Graduate Advisor and Committee on Graduate Studies. Complete and satisfactory credentials must be received by Graduate Admissions before the end of the semester in which the student has registered in a provisional status. A student will not be permitted to enroll with a provisional status for more than one semester. Provisional admission does not guarantee subsequent admission on an unconditional basis. International applicants residing outside of the United States at the time of application are not admitted on a provisional basis. A student may not hold an assistantship while in provisional status.

DEFERRED ADMISSION

If an applicant is not able to supply required application materials or must complete additional preparatory work before their admissibility can be determined, the admission decision may be deferred until records are complete. The applicant will be sent an Admission Deferral Notice specifying the data that must be provided or the work that must be completed before the application will be reconsidered. The application may be reactivated for reprocessing by submitting the "Request to Reactivate Application." An application evaluation charge will be required for each reprocessing request unless the request in made for the original semester and program.

DENIED ADMISSION

Admission is typically denied if an individual fails to meet more than one of the admission standards of the department to which he or she applied and the admission committee feels that there is insufficient basis to justify a probationary, provisional or deferred admission recommendation. As the admission process is competitive, students meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

Applicants denied admission to a graduate program may not take or reserve graduate courses for graduate credit. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied. An application evaluation charge will be required for each reprocessing request. Applicants denied admission may ask the Graduate Advisor in the program to which they applied about the reasons for the denial.

Pathways Admission

Applicants who are admitted by the graduate advisor of their program but who do not meet the University of Texas at Arlington (UTA) English language requirements, may be granted admission to the Pathways Program run by the English Language Institute (ELI) in the Department of Linguistics and TESOL at UTA. Students admitted through Pathways will be required to take the ELI's Gateways to English Success Program (GESP) entrance exams prior to the beginning of the semester for which they have been admitted. The results of these exams are subdivided by English skill (writing, reading, listening, speaking) and determine the particular GESP courses (if any) that students must take in the Pathways Program to improve all of the skills in which they lack proficiency.

All students must meet UTA and any departmental English language requirements before enrolling in academic courses. Students who score a 6 or higher in all four skills of the GESP entrance exams meet the UTA English language requirements. However, individual departments may set a higher English language requirement. Students who meet the English language requirements for both UTA and their department will be allowed to register solely in academic courses. Students who do not meet both of these conditions will be required to enroll in GESP courses. Students must take the appropriate GESP courses for all skills in which they score a 4 or 5. Students who score a 6 in some skills but not others may be eligible to concurrently enroll in academic and GESP courses (with advisor approval). Students who do not meet these score requirements must enroll in full-time English language study and may not undertake any academic coursework until they complete the appropriate GESP course(s) at the required level. Further, students who score a 3 or lower in any skill will not be allowed to enroll in any academic courses and may be required to enroll in the ELI's English for Academic Purposes (EAP) program until they demonstrate sufficient proficiency to enter GESP courses.

Students complete and exit the Pathways Program by earning acceptable scores on the GESP entrance examinations or successfully completing GESP courses at required levels.

When students exit the Pathways program, they may begin full-time study in the academic program to which they were initially admitted at the start of the next available semester.

GESP tuition charges, important dates, and other information can be found at https://eli.uta.edu/GESP (https://na01.safelinks.protection.outlook.com/?url=https%3A%2F%2Feli.uta.edu%2FGESP&data=02%7C01%7C%7C4b0c3310157940738c1d08d6296ecec7%7C5cdc5b43d7be4caa8173729e3b0a62d9%7C0%7C0%7C636741953217891207&sdata=QN%2BNRd7yVmzZ0DjVKGfRM7R9lj3yFn1WnLUKppHjIEs%3D&reserved=0) or by contacting the GESP Coordinator at the English Language Institute, Box 19560, Arlington, Texas 76019. Email: atherton@uta.edu

Special Admissions Programs for UT Arlington Undergraduates

OUTSTANDING UT ARLINGTON UNDERGRADUATES

Upon the recommendation of the Graduate Advisor, outstanding graduates of The University of Texas at Arlington may be admitted to a master's degree program or B.S. to Ph.D. track by facilitated admission. To qualify, the student must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than one academic year prior to the semester for which admission to a graduate program is sought. A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, facilitated admission is conditional upon successful completion of the bachelor's degree.
2. The student's grade-point average must equal or exceed 3.5 in each of two calculations:
   a. the grade-point average in the last 60 hours of study as calculated in Graduate Admissions for admission purposes
   b. all work completed at UT Arlington to date

Students who qualify for facilitated admission will be admitted directly to graduate school without completing the application for admission, submitting an application evaluation charge or taking the GRE or GMAT. Students who believe they may qualify for this program should contact the appropriate Graduate Advisor. Some programs may require a higher grade-point average to qualify. Not all graduate programs participate in Facilitated Admission of Outstanding Undergraduates.

ADMISSION WITH GRADUATE RECORD EXAMINATION WAIVED

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates may qualify for waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor's degree.
2. The student's UT Arlington grade-point average must equal or exceed 3.0 in each of two calculations: (a) in the last 60 hours of study as calculated for admission by Graduate Admissions; (b) in all undergraduate coursework completed at UT Arlington.

Applicants qualifying for waiver of the GRE who do not qualify for facilitated admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission. The waiver of GRE program applies to applicants for master's degree programs only. Some programs may require higher grade-point averages to qualify. Not all graduate programs participate in the GRE waiver program.

FAST TRACK TO MASTER'S DEGREE

The Fast Track program is designed to encourage gifted UT Arlington undergraduate students to complete a master's degree at UT Arlington, by enabling them to complete their undergraduate studies without delay and reducing the time and the number of additional courses needed to complete a master's degree. It is available in some graduate programs to outstanding UT Arlington undergraduate students and admission to these programs is highly selective. Participating undergraduate students use a set of courses specified by their graduate program to satisfy both undergraduate bachelor degree and graduate master's degree requirements. Students must formally apply to and be accepted as a Fast Track student by a participating graduate program to receive the full benefits of the program. Admitted students going on to complete all program requirements successfully will be automatically admissible to the associated master's program when they receive their bachelor's degree. They will not have to submit the formal application for admission to Graduate Admissions, pay an application evaluation fee, or take the GRE. Students who do not complete the Fast Track program may apply for admission per regular means but must take all required tests and pay all required fees. Admission in such cases is not automatic and will be based on the published admission requirements of the program applied to all regular applicants. Not all programs offer a Fast Track option. Interested students should consult with their intended program's graduate advisor prior to their senior year for detailed information regarding requirements and application procedures.

Dual Master's Degrees

Students may seek admission to dual master's degrees programs which allow a limited amount of course credit to be shared between two master's degrees. This reduces the total number of credit hours required to complete both. Students in any dual degree program must be admitted to each participating program. Students in a graduate degree program who later decide to pursue a dual degree must be admitted to the second program prior to completing the degree requirements of the first (See Master's Degree Requirements (p. 55) for details).

Non-Degree Seeking (Special) and Graduate Certificate Applicants

A person holding a bachelor's degree from a regionally accredited U.S. institution or its foreign equivalent wishing to take graduate courses at The University of Texas at Arlington but not planning to pursue a graduate degree may be apply for admission as a special non-degree seeking student or graduate certificate student. In most cases, admission as a special non-degree seeking student is granted only for the purpose of participating in special graduate course offerings, or for taking courses to be transferred to another institution. A student who has been denied admission to or been dismissed from graduate studies may not be permitted to enroll as a special non-degree seeking or graduate certificate student.

Before submitting an application for admission, an applicant for special non-degree seeking student or graduate certificate should consult with the Graduate Advisor in the department or program in which the graduate course or graduate certificate is offered. Applicants may complete the application online. In addition to the application, applicants must submit an official transcript of previous college work showing evidence of an undergraduate degree and, if applicable, a graduate degree. Special non-degree seeking student admission status is granted for the semester for which the application is submitted. Further enrollment as a special non-degree seeking student must be approved on a semester-by-semester basis. Graduate certificate enrollment is limited to the courses and length of time required to complete the graduate certificate program. Special non-degree students and graduate certificates may not hold graduate assistantships or enroll in research, thesis, internship or dissertation courses.

Up to 12 graduate level (5000 and above) semester credit hours earned as a special non-degree seeking student may be applied to a graduate degree program, subject to the policies on grades and graduate credit described in the General Information and Regulations section of this catalog. Review and approval of the appropriate Committee on Graduate Studies and the approval of Graduate Admissions are required. All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade-point average.

A former or currently enrolled special student or graduate certificate student wishing to apply for admission to a graduate degree program must submit a graduate admissions application online, all supporting documents listed in the Admission section of this catalog, and the appropriate non-refundable

application evaluation charge. Admission as a special student or graduate certificate student in no way guarantees subsequent admission into a graduate program in graduate school.

NOTE: Immigration regulations do not generally permit international students to study as special non-degree seeking or certificate students. If you are an international student, please contact Graduate Admissions before submitting an application so that eligibility to apply as a special non-degree seeking or graduate certificate student can be determined.

Readmission

A student previously enrolled in graduate school at The University of Texas at Arlington, wishing to resume graduate work after an absence of a fall or spring term or longer (summer excluded) must submit an "Application for Readmission" form online and pay the required non-refundable application evaluation charge. This rule does not apply to a student who withdraws with an Approved Leave of Absence or to a student who withdraws from the university because of deployment as a member of the armed forces of the United States serving on active duty in a combative operation outside the United States. A student returning from an Approved Leave of Absence as scheduled will be automatically readmitted and will not be required to submit an application or pay an application fee. For a student withdrawing due to deployment in a combative operation outside the United States readmission will be granted upon request, the readmission fee waived, previously submitted standardized test scores will remain acceptable and credit toward for any work previously completed applied. (TEC Sec. 51.844). In addition, the student may be eligible for the same financial assistance provided before the student's withdrawal (TEC, Section 51.9242).

The "Application for Readmission" is completed online at our Web site http://www.uta.edu/admissions/graduate (http://www.uta.edu/admissions/graduate/). Students may submit only one "Application for Readmission" at a time. A $30.00 application charge is required of all U.S. Citizen and U.S. Resident Alien applicants who have attempted or completed all of their college or university work at institutions located in the United States. A $60 evaluation charge is required of all U.S. Citizen and U.S. Resident Alien applicants who have attempted or completed some or all of their coursework at an institution located outside of the United States. A $60 evaluation charge is required of all International students. Payment must be received before processing can begin. An application evaluation charge is required with each readmission application form submitted. International students and U.S. Resident Alien students should submit this form and pay the required non-refundable evaluation charge 120 days prior to their expected semester of enrollment, and U.S. Citizen students 90 days prior to their expected date of enrollment.

A former student wishing to apply for a dual degree program must complete the "Application for Readmission" form online.

An applicant for readmission should consult with the Graduate Advisor of the program, or the Graduate Advisors of the dual degree programs, before submitting the readmission form and fee to Graduate Admissions. This is particularly important when requesting readmission to a new program or requesting readmission to a dual degree program.

An applicant for readmission who has enrolled at other institutions during their absence from UT Arlington (including those in UT Arlington concurrent enrollment) must submit official transcripts showing such coursework to Graduate Admissions.

Change of Graduate Major, Program, or Degree Level for Current Students

Students wishing to change graduate major, program or degree level (master's or doctoral classification) from the one in which they are enrolled currently or in which they were enrolled during the most recent semester at UT Arlington, must initiate the change by completing the "Change of Program or Degree Level" form online. Students may submit only one "Change of Program or Degree Level" form at a time. Additional forms will not be processed until a final decision on any prior request has been made. Students intending to change majors should consult the Graduate Advisor of the new program regarding program admission and degree requirements before completing this form. Similarly, students wishing to change degree level should submit the request after discussing the matter with the appropriate Graduate Advisor.

Students wishing to change from one program to a dual degree program must complete the "Change of Program or Degree Level" form online available at https://www.uta.edu/records/graduation/enrollment-continuation.php

Master's, Doctoral and Certificate Programs

The University of Texas at Arlington offers numerous master’s and doctoral degrees and certificates in a wide spectrum of academic and professional programs. Many certificate programs are available for persons seeking to enhance their professional skills and careers which do not require admission in a particular master’s or doctoral degree program. In addition to typical classroom instruction suited to either full or part-time students, a number of degrees and certificates can be pursued through distance educational formats.

Undergraduate Admissions

Application for Admission

New students who wish to enroll at The University of Texas at Arlington must apply for admission. They should apply as early as possible. All application materials—submitted application, application fee or fee waiver documentation, official copies of transcripts of all high school and all college coursework attempted, and official test scores when appropriate—should be submitted by the priority deadlines. Completed applications will be accepted after the priority deadlines on a limited basis. Adherence to the deadlines ensures careful evaluation of credentials resulting in an admission decision and

notification of that decision to the student in time for orientation, academic advising, registration, and tuition/fee payment. Early admission also assists students seeking financial aid and scholarships.

All documents, including official transcripts submitted to the Office of Admissions, become the property of the University and will not be returned to the student nor will copies be made for the student by the University. Official transcripts must be currently dated with an issue date that closely corresponds to the date the admission application is submitted. An offer of admittance to UT Arlington is only valid for the semester indicated on the admission application. Applicants wishing to be considered for a future semester other than the one identified on their first application must submit a new application or request to update the application term. Although a new application may be completed, a second application fee will not be required if the application is being updated for the first time within the same academic year. If the second or subsequent admission application reflects a change in academic history, the student must provide the new official transcripts and test scores reflecting any new work completed since the first application was submitted. Once complete, the student's admission status will be re-evaluated. The application for admission can be found at www.CommonApp.org (https://www.commonapp.org/).

PRIORITY DEADLINES

Application Deadline	Fall Semester	Spring Semester & Winter Intersession	Summer Semester & Summer Intersession
Freshman	June 1	December 1	April 1
Transfer students	June 1	December 1	April 1
Former students	June 1	December 1	April 1
International students	May 1	October 1	March 1
Transient students	June 1	December 1	April 1

The above priority deadlines may not apply to some academic programs and particularly those offered exclusively online. Please consult the web site of the online program you will be participating in for application deadline information.

ADMISSION APPLICATION FEE

All new undergraduate applicants to UT Arlington must pay a non-refundable $75 application fee or receive an authorized fee waiver. The fee may be paid online using a credit card at the time the application is submitted. Undergraduate Admissions supports a Fee Waiver program for qualifying students. Please refer to our Admissions (https://www.uta.edu/admissions/freshmen/apply/) page for qualification information. Fee waivers are not available for students applying to the Accelerated Online programs. Admission decisions will not be made until the application, application fee and all official academic credentials are received and reviewed. Applicants who are not admitted or who do not enroll on the basis of their original admission application may receive one free update to a future term within the same academic year upon completion of an update application.

International Students

All prospective students from countries other than the United States who are not immigrants and have not been granted permanent residency must submit:

1. an International Student Admissions Application through The Common App.
2. the admission application fee of $75 U.S., which is not refundable.
3. **Entering freshmen** must present completed official secondary school transcripts, diplomas, certificates and/or national test examination scores as appropriate for the educational systems in their country. In order to be considered for freshman admission students must have completed secondary school studies equivalent to that of United States high school graduation. Transcripts and exam marks should be attested as true copies of the originals by the school you attended. Notarized copies are not used for admission. If documents are written in a language other than English, complete and official English translations must be provided with the original language transcripts, exam records and diplomas. Official SAT I or ACT scores are required for entering freshmen with less than 24 semester hours of university level course work (equivalent to one year of full time study). The minimum required SAT I (old format) score for entering freshmen educated in a country other than the U.S. is 900. The minimum required SAT I (redesigned format) score for entering freshmen educated in a country other than the U.S. is 980. The minimum ACT score is 19. International Freshman applicants educated in the U.S. must meet U.S. freshman admission standards regarding high school class rank and SAT I or ACT scores. Scores must be sent directly to UT Arlington from the Testing Service in order to be considered official. Student score reports are not used for admission processing.

4. **International Transfer Students** must submit official transcripts or mark-sheets of all college or university level course work showing subjects completed and grades (marks) earned. Transcripts and diplomas must be attested as true copies of the originals by the school you attended or UT Arlington. Notarized copies are not used for admission. If documents are written in a language other than English, complete and official English translations must be provided with the original language transcripts, exam records and diplomas.
5. Official English language test scores are required from international students from non-native English-speaking countries. UTA accepts TOEFL, IELTS, and Duolingo official scores as part of the admission review process. Applicants are expected to submit a score of at least 6.5 on the IELTS or achieve a minimum TOEFL iBT total score of 79 or obtain a Duolingo score of 100 (or a Duolingo score of 105 for applicants pursuing any Engineering undergraduate major). Scores must be sent directly to UT Arlington from the testing service provider to be considered official. Student score reports are not used for admission processing. Applicants from the following countries are exempt from submitting English language

proficiency scores: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Liberia, Montserrat, New Zealand, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, United Kingdom, Botswana, Cook Islands, Falkland Islands, Federated States of Micronesia, Fiji, The Gambia, Ghana, Gibraltar, Guam, India, Kenya, Lesotho, Malawi, Marshall Islands, Mauritius, Nigeria, Philippines, Papua New Guinea, Saint Helena-Ascension-Tristan da Cunha, South Africa, Swaziland, Singapore, Tanzania, Uganda, U.S. Virgin Islands, Zambia, and Zimbabwe. English proficiency testing will be waived for those undergraduate applicants:

a. who have an SAT I verbal score of at least 480 or an ACT I English score of 19, or

b. who have completed English Composition I and II with a grade of C or better, plus 24 additional transferable hours at a college or university located in the U.S.

c. who have completed an English-based International Baccalaureate (IB), Advanced Placement (AP), "American curriculum," or "British curriculum" (e.g., American School of Paris, British International School of Amsterdam). English is the primary language of instruction in these programs, and completion of these programs verifies the student's proficiency in English.

d. who have earned a bachelor's, master's, or doctoral degree from a U.S.-accredited institutions.

6. The applications of prospective students from countries other than the United States are reviewed on an individual basis, and admission decisions are based on the strength of the previous academic work, scores on the SAT if required, and the Test of English as a Foreign Language score. Academic background and curriculum are important considerations in decisions on admissibility.
7. International students who plan to attend UT Arlington on an F-1 (student visa) and who wish to be issued an I-20 must present a copy of their passport, I-94 card and evidence of sufficient financial support while studying in this country. Please see the latest Financial Statement Form at UT Arlington's Web site at www.uta.edu/admissions (http://www.uta.edu/admissions/) for the most current estimate to be documented and types of acceptable documentation.
8. International Students on any visa other than F-1 must present a copy of their passport and I-94 card.
9. Prior to course registration each prospective International student must clear through the Office of International Education. In addition, International students on the following visas are required to attend an International Orientation before registering for classes: A-2, e-2, F-1 (including transfer students) H-4, J-1, J-2, L-2, O-3, R-2, TD.
10. Prior to course registration each prospective International student must have a Tuberculosis screening and/or chest X-ray in order to enroll. The University of Texas Board Of Regents has passed Regents Rule 50402 (http://www.utsystem.edu/board-of-regents/rules-regulations/rules/50402-health-insurance-requirements-international-students/), which now requires only F1, F2, J1 and J2 students who are currently enrolled, to have medical insurance compliant with the federal Patient Protection and Affordable Care Act (PPACA). The UT Student Health Insurance Plan (UT-SHIP) meets these requirements. New students will have the opportunity to enroll in the UT-SHIP at international student orientation. The charge will be automatically added to your student MyMav account (https://www.uta.edu/mymav/) and paid when you pay your tuition and fees. The UT System has established criteria in which an international student can request a waiver from the UT-SHIP by providing alternate health insurance coverage. In order to be approved for a waiver, your alternate health coverage must meet or exceed the requirements as set in the System regulation and be PPACA compliant. Waivers must be submitted online and approved each semester to have the insurance charge removed from your student account.

Meningitis Requirement

Incoming Texas college students under 22 years old as of the first day of classes for the term in which they intend to enroll must be immunized against bacterial meningitis before they enroll in any Texas institution of higher education per SB 1107 (http://www.capitol.state.tx.us/BillLookup/History.aspx?LegSess=82R&Bill=SB1107). Students transferring from another institution and students who are re-enrolling following a break of at least one fall or spring semester must be inoculated against the illness. Students who plan to audit a course also must comply with the law. Students enrolling in programs offered only online are exempt from the legislation.

It is imperative that students who plan to enroll at UT Arlington be vaccinated as soon as possible. Under the law, new college students must have received the vaccine within the past five years. Proof of inoculation is required 10 days before the start of the semester as the vaccine is considered effective several days after it is administered. Additionally, the vaccine must have been administered within the past five years. Limited exemptions are specified in state law. Upon acceptance to the university, the student will receive detailed information sent to their UT Arlington email address concerning compliance with the law. Students enrolled in classes who must meet the requirement will be dropped from their classes the day prior to the first day of class if they have not completed the requirements as defined by the law.

Frequently asked questions (https://www.uta.edu/records/services/meningitis-requirement.php) regarding this requirement are available online at UT Arlington's web site.

Major Classifications

All entering students will be classified either as undeclared majors, intended-majors/meta-majors, or majors. All entering students who are not ready to declare a major will be admitted as undeclared majors. **Note:** Students interested in the Architecture or Interior Design programs will only be accepted for the Fall semester.

All first-time freshman students and freshman transfer students will be advised by the University Advising Center in Division of Student Success for their first year and then advised by departmental advisors thereafter. Undeclared majors beyond the first year will continue to be advised in the University Advising Center until they are ready to move into an intended-major/meta-major or major.

Transfer students will be advised by a departmental advisor for the intended-major/meta-major or major, unless admitted as an undeclared major and be advised by the University Advising Center.

A meta-major is a collection of academic majors that fit within a career area and have related or overlapping courses.

Enrollment as a Non-Degree Student

A student who holds a bachelor's degree from an accredited institution, including The University of Texas at Arlington, may choose to apply for admission as a non-degree student in one of the undergraduate colleges or schools and is subject to the rules that apply to other undergraduates. Students may, with the approval of the director of admissions and the academic dean, change to degree-seeking status in an undergraduate college.

Consideration for the non-degree option is made by submitting an admission application, application fee and an official transcript showing the awarding of at least a bachelor's degree. Materials must be submitted by the deadline for undergraduate admission.

Admission to a Degree Program

Admission to the University's degree programs is determined by application to the academic unit offering the degree. Before being admitted to a degree program, students must fulfill all departmental and college requirements. Degree programs may require students to complete additional courses or hours in residence prior to applying for admission to the degree program. Until students are admitted into a degree program, students will remain on intended-major/meta-major status.

Criminal Background Check

Some programs require a criminal background check as a condition of admission or program completion or licensure expectations concerning acceptable qualifications. Applicants should examine departmental requirements with care.

Academic Fresh Start

Section 51.931 of the Texas Education Code provides that a resident of Texas may apply for admission to the University as an undergraduate student without consideration of course credit or grades earned 10 or more years prior to the semester the applicant plans to enroll. To be admitted, the applicant must meet the admissions standards in effect at the time of application. Students admitted under the "fresh start" option may not receive credit for any course work taken 10 or more years prior to enrollment. The Academic Fresh Start provision does not affect Texas Success Initiative exemptions claimed on the basis of college credit earned prior to September 1989.

After enrollment, a message will be posted to the student's academic record at UT Arlington indicating admission has been granted through the Academic Fresh Start provision. Once this option has been claimed and the student has enrolled at any state institution, the provision cannot be reversed. An applicant may use the Academic Fresh Start provision only once at UT Arlington.

- Fresh Start must be requested at the time of application to UTA
- If previously accepted to UTA without applying for Fresh Start, it may be requested during readmission to the University if one calendar year has lapsed since last enrollment
- Students must demonstrate college readiness to enroll in courses subject to TSI standards
- Students who have earned a bachelor’s degree are not eligible for Fresh Start at UTA
- Courses removed by the Fresh Start program are not applicable to core curriculum requirements or course prerequisites
- Credit and GPA earned prior to the student’s Fresh Start will not be used to evaluate admission to graduate or professional programs
- All requests for Fresh Start should be made to the Office of Admissions by completing an Academic Fresh Start form (https://admissions.forms.uta.edu/view.php?id=36455)

NEW MAVERICK Orientation and Early Registration

Orientation and Early Registration is a program which includes placement testing, group sessions to prepare for the transition to UT Arlington, resources for academic success, and an introduction to social and extracurricular opportunities. A highlight of the program is early advising and registration.

Upon completion of the admission requirements and admittance to the University, students are sent information regarding orientation from the UT Arlington Division of Student Affairs. The orientation program is required for all first-time freshmen students.

For students starting UT Arlington in the fall semester, several orientation options are available. New freshman students may attend one of many sessions offered in June, July and August. Students have the option to stay overnight in the residence halls. Parents of freshman students are invited to attend a separate but concurrent program. There are limited accommodations for parents or guests on campus. Transfer students are also required to attend an orientation program. All Orientation programs include Academic Advising and Early Registration. For students starting in the other semesters,

Orientation and Early Registration is offered prior to the start of the semester. Please contact the UTA Division of Student Affairs for additional information regarding the orientation programs.

International Student Orientation

The New International Student Orientation provides new international students with information about immigration matters, health services and health insurance, registration procedures, academic rules and regulations, cultural adjustment, and Office of International Education programs and activities. Attendance at this orientation program is required for all non-immigrants who are new to UT Arlington, including transfer students. Orientations are offered on various days in the two weeks preceding each semester. Students are notified by letter of this New International Student Orientation at the time of notification of admission. The dates and details of orientation are included in this letter. Attendance at any other UT Arlington orientation does not substitute for attendance at the New International Student Orientation. Those who do not attend will not be allowed to register during regular registration and must attend a makeup orientation program before being allowed to register in late registration.

Credit for Prior Learning

Credit for Prior Learning (CPL) is the process of granting academic credit for knowledge and skills acquired outside of traditional college coursework. The University of Texas at Arlington recognizes CPL by awarding credit for demonstrated learning that has occurred beyond a conventional academic setting, provided it is at the post-secondary level and aligns with the university's curriculum. CPL does not include credit earned through traditional classroom experiences, such as dual credit or transfer credit. UTA awards CPL through the following methods:

Credit-by-Examination

UTA uses several examination programs to assess the prior academic achievement of undergraduate students. The following policies govern the awarding of credit by examination by UTA:

- Credit by examination is available to undergraduate students with a completed application on file, currently enrolled students, and formerly enrolled students who meet eligibility requirements. Credit by examination will not be given for a course the student has previously passed, received a grade of Z for, or received transfer credit for at UTA. Credit by examination is not eligible for grade forgiveness and will not replace grade(s) from previous course attempts (passed or failed).
- Prospective students may take examinations to establish their eligibility to receive credit, however, credit is awarded only to currently enrolled students or to former students who meet eligibility requirements. A prospective student may claim credit prior to enrollment but the credit will be posted as earned credit after Census day of the first enrolled semester.
- Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate, may appear on graduate student transcripts.
- Credit earned by examination satisfies degree requirements in the same way as credit earned by passing courses except it does not count as credit earned in residence. Credit by examination cannot be used to satisfy general degree requirements for: (a) 30 semester hours in residence, (b) at least 18 semester hours in residence of advanced course work (courses numbered 3000 and 4000), to include 12 hours of advanced course work in the major field. Credit by examination can be used to meet prerequisites for higher-level courses.
- Credit by examination does not award a grade or earn grade points.
- After the official Census Date, students may earn credit by examination for a course they are enrolled in only if the student drops the course with a W or upon written approval of the chair of the appropriate academic department. Once a grade is posted for the course the student may not petition for credit earned by exam.
- To have credit reported to Office of Admissions, official test scores must be sent to the Office of Admissions for credit by examination to be awarded. Students must complete a Petition to Record Credit by Examination at the Testing Services office. Unsuccessful attempts to earn credit by examination are not recorded on students' academic records.
- Credit by examination on a transcript from another institution of higher education is considered transfer work and will transfer to UTA, subject to the same conditions as corresponding resident course work from that institution. The Office of Admissions is responsible for posting all transfer work.
- UT Arlington awards credit by examination for the following:
  - Advanced Placement (AP) Program is a College Board initiative that enables high school students to take college-level courses and exams, potentially earning college credit and advanced placement in college. Information on AP examinations and the satisfactory scores required for course credit at UTA can be found at: Pre-College Credit by Examination. (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/precollege-credit/)
  - College Level Examination Program (CLEP) enables individuals to earn college credit by demonstrating mastery of college-level material through standardized exams. Information on CLEP examinations and the satisfactory scores required for course credit at UTA can be found at: CLEP Credit by Examination (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/clep/).
  - International Baccalaureate (IB) Diploma Program is an academically rigorous and comprehensive educational program typically designed for students in the final two years of high school. Information on IB examinations and the satisfactory scores requires for course credit at UTA can be found at: Pre-College Credit by Examination. (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/precollege-credit/)

- SAT II (SAT Subject Tests) are standardized exams administered by the College Board that assess students' mastery of specific academic subjects. Information on SAT II examinations and the satisfactory scores required for course credit at UTA can be found at: SAT II Credit by Examination. (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/satii/)
- DANTES Subject Standardized Tests (DSST) are college-level subject exams that allow students to earn course credit for knowledge acquired outside of a traditional classroom setting. Information on DSST examinations and the satisfactory scores required for course credit at UTA can be found at: DSST Credit by Examination. (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/dsst/)
- AVANT Language Exams are assessments administered by the Modern Languages Department for students with prior language experience, allowing them to earn college credit for certain modern language courses. The availability of AVANT examinations and the required scores for course credit at UTA can be found at: Modern Languages Testing. (https://www.uta.edu/academics/schools-colleges/liberal-arts/departments/modern-languages/testing-and-student-resources/testing/)
- Advanced Standing Exams (ASE) allow students to earn course credit by achieving a satisfactory score on an exam developed by the university's subject-matter faculty. The availability of these exams and the credits awarded vary by subject and are determined by the policies of the relevant academic unit. Academic units are responsible for reporting qualifying scores to the Office of the Registrar. Information on ASE examinations and the required scores for course credit at UTA can be found at: ASE Credit by Examination. (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/ase/)
- A/AS-Levels are subject-based qualifications typically undertaken during the final two years of high school to prepare students for university education. They are recognized by the Cambridge International Examinations (CIE) AICE program, an internationally advanced secondary curriculum and assessment system. Information regarding A/AS-Level examinations and the corresponding scores required for course credit at UTA can be found at: A/AS-Level Credit by Examination.

Further information regarding test dates, registration procedures and deadlines, fees, current eligibility criteria may be obtained from the Testing Services Office (https://www.uta.edu/student-success/resources/testing-services/).

Military Training

Students who were members of the U.S. Armed Forces may receive credit for their military training and education toward a postsecondary degree or credential. The Joint Services Transcript (JST) is an official academic record that documents a service member's military education, training, and occupational experiences, and provides college credit recommendation, approved by the American Council of Education (ACE). The JST is evaluated for all admitted students. Eligible former members of the Armed Forces admitted as an undergraduate or readmitted as an undergraduate (after having withdrawn to perform military service) will be given course credit for all physical education courses the institution requires for an undergraduate degree and for additional semester credit hours, not to exceed 12 unless otherwise allowed by the specific degree plan, to satisfy any elective course requirements for the student's degree program for courses outside of the student's major or minor. To be eligible, the student must have graduated from a public or private high school accredited by a generally recognized accrediting organization or from a high school operated by the U.S. Department of Defense and be an honorably discharged former member of the U.S. Armed Forces who completed at least two years of service or discharged because of a disability per Texas Education Code, Section 51.3042 *(*http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.51.htm#513042*)*. UTA will determine whether to award lower division academic course credit after a student is admitted to the university and has submitted the following to the Office of Admissions:

- An official JST that describes the substance of the training completed by the student and verifies the student's successful completion of that training, as well as the ACE credit recommendations.
- An official high school transcript from an accredited public or private high school or high school operated by the U.S. Department of Defense indicating the student's official graduation.
- The student's DD214 indicating that the student was honorably discharged AND completed at least two years of military service or was discharged because of a disability.
- A petition to award transfer credit for military training. This petition can be found on the Military and Veteran Services (https://www.uta.edu/student-affairs/veterans/forms/) forms website.

Portfolio

Students may earn college credit toward a certificate or degree by developing a portfolio that documents college-level learning through professional experience, training, and other activities, such as employment. Portfolio credit standards are proposed by academic units and approved through the regular shared governance process.

Professional Certification/Licensure

Students who have obtained select professional certifications or licenses may receive academic credit. The number of credits awarded depends on the certification, licensure, and policies of the relevant academic unit. Academic units must report standards to the Office of the Registrar.

Placement Examinations

Some academic departments offer (or require of) the student an exemption from taking courses based on departmental placement examinations. Such exemption does not grant credit for the course but permits the student to enroll in the next course in the subject area.

Modern Language Placement Examination

The Modern Language Department recommends that students who are native speakers, have high school credit, or equivalent knowledge of French, German or Spanish language take a placement exam prior to enrolling in certain lower-division language courses.

Texas Residency for Tuition Purposes

The Office of Admissions determines Texas residency status for all new and continuing UT Arlington students. A review of responses on the admission application is conducted by the residency determination official in accordance with Title 19, Chapter 21, Subchapter B of the Texas Administrative Code (http://www.sos.state.tx.us/tac/).

When incomplete, insufficient or conflicting information is presented on the admission application, the student will be sent a Core Residency Questionnaire. This should be completed and returned to the Office of Admissions (Box 19114, Arlington, TX 76019-0114) with the appropriate supporting documentation prior to registration. After the Core Residency Questionnaire has been reviewed, the student will receive a written response of the residency determination from the Office of Admissions.

Report of Medical History

A Report of Medical History form will be sent to students when they are accepted to the university.

First-time students: Prior to registration, a first-time student must submit a Report of Medical History to UT Arlington Health Services (http://www.uta.edu/healthservices/). It is the responsibility of the student to complete the health form and mail it to UT Arlington Health Services at least two weeks prior to registration. A Report of Medical History form will be sent to students when they are accepted for admission.

Students who are from countries other than the United States and who are not immigrants or have not been granted permanent residency: All students who are from countries other than the United States and who are not immigrants or have not been granted permanent residency must submit to UT Arlington Health Services an International Health Card issued within the past year. The International Health Card must note that the student has tested negative for tuberculosis. Once the card has been presented, the student will be cleared to register for classes. Students who do not present this card will not be permitted to enroll in classes.

International students: In addition to the International Health Card requirement, all international students must be tested by a U.S. medical facility for tuberculosis prior to the 25th class day. Failure to receive clearance from a U.S. medical facility will result in the removal from classes. Testing is available at UT Arlington Health Services.

First-time Non-U.S. Citizen/Non-Permanent Resident and Intensive English students: The University of Texas at Arlington requires all entering Non-U.S. Citizen/Non-Permanent Resident and Intensive English students to:

- Have a Tuberculosis screening and/or chest X-ray performed at UT Arlington Health Services upon arrival to the University for classes. TB screening or chest X-ray will be performed even if the student has been vaccinated with BCG (vaccine for TB usually administered to children and effective for 8-10 years-not widely used in the U.S.).
- Ensure that all documentation is complete and submitted to UT Arlington Health Services by the 25th class day or the student will be dropped from classes without reinstatement privileges. Students dropped from classes due to non-compliance will not be eligible for a refund of tuition or fees.

For the complete text of the UT Arlington policy concerning Tuberculosis screening, please visit UT Arlington Health Services (http://www.uta.edu/healthservices/).

A First-Year applicant to The University of Texas at Arlington must have graduated from an accredited high school or is on track to graduate from high school prior to enrollment at UT Arlington. Applicants must submit an application for admission, an application fee, and a high school transcript. Applicants are not required to submit official SAT or ACT scores, however are encouraged to do so to be eligible for scholarship opportunities. Students enrolled in dual credit courses at a college while in high school are encouraged to submit a college transcript. If an admission offer is made prior to high school graduation, a second official transcript that identifies the graduation date and final class rank will be required prior to the first day of classes.

FIRST-YEAR GUARANTEED ADMISSION REQUIREMENTS

Rank	GPA*	Test Scores** (Optional But Encouraged) SAT	Test Scores** (Optional But Encouraged) ACT	Advanced Credits Earned***
Any	3.25	no minimum	no minimum	no minimum
Top Quartile	no minimum	no minimum	no minimum	no minimum
2nd Quartile	any	1130	23	5
3rd Quartile	any	1250	26	9
No Rank	3.25*	no minimum	no minimum	no minimum
No Rank	3.0-3.24	1130	23	no minimum
No Rank	2.90-2.99	1250	26	no minimum

* Minimum unweighted on a 4.0 scale

** Scores listed are the minimum required scores. The SAT score is calculated by combining the highest Evidence-Based Reading, Writing, and Math scores. The ACT is the composite score, which includes the English, Reading, Math, and Science sections. UTA does not require an essay. If you apply for admission without these test scores, your application will be evaluated based on high school records.

*** Numbers listed are the minimum. Advanced credits include dual enrollment, AP, IB, and honors.

In addition to current university requirements for admission, Texas Education Code, Sections 51.803, 51.804, 51.804(2) require applicants to also have either:

1. successfully completed the Texas curriculum requirements for the Foundation High School Program or its equivalent; **OR**
2. satisfied ACT's College Readiness Benchmarks on the ACT assessment applicable to the applicant (minimum 18 on the English, 22 on Math, 21 on Reading, and 24 on Science) **OR** earned on the SAT assessment a score of at least 1,500 (Critical Reading + Math + Writing) out of 2,400 or the equivalent.

Applicants who meet the guaranteed admission requirements are automatically granted admission. Any applicant not meeting the guaranteed admission criteria above will be considered for admission under individual holistic review.

INDIVIDUAL HOLISTIC REVIEW

Applicants who do not meet guaranteed admissions requirements at UTA will automatically go through an individual review process. The individual review process at UTA will a holistic review of the high school academic record, academic achievements, advance credits pursued, GPA, test score, and a review of a personal statement to be requested on the application asking students to articulate any challenges or other extenuating circumstances experienced during their high school career and what they've done to overcome them. Students admitted under individual holistic review are admitted under conditional admission. Students conditionally admitted do not have a minimum level of enrollment and must achieve a 2.0 GPA at the end of their first term of enrollment at UTA.

CONDITIONAL OFFERS OF ADMISSION

Freshman applicants that don't meet admissions requirements may be offered admission to UT Arlington with the condition that they participate in the **MAVS RISE (p. 114)** or similar program.

ENTRANCE EXAMINATION

Freshman applicants for admission are not required, but are encouraged to take the Scholastic Assessment Test (SAT) or the American College Test (ACT). The SAT is given nationally in October, November, December, January, April, May and June. Any student graduating from high school in 2006 or later, must also submit the writing score from the new SAT or the writing score from the ACT. Students taking the ACT should make sure they sign up for the writing exam since it is an optional component of the regular ACT. Test applications and a sample test bulletin can be obtained from the Educational Testing Service, College Board ATP, CN 6200, Princeton, N.J. 08541-6200 or online at www.collegeboard.com/student/testing/sat/about.html (http://www.collegeboard.com/student/testing/sat/about.html). The ACT is given nationally in October, December, February, March and June. Test applications and a sample test bulletin can be obtained from American College Testing Program, P.O. Box 414, Iowa City, Iowa 52243 or online at www.actstudent.org (http://www.actstudent.org). Test applications can also be obtained from a local high school or from the Office of Testing Services at UT Arlington. Applications will not be accepted later than one month prior to the test date. The applicant should complete one of the examinations at least three months prior to the start of the semester for which admission is sought. Test scores are only considered official if they are received directly from the testing service or are included on an official transcript and are less than five years old.

Students age 25 or older as of the first day of classes for the term they wish to enroll are not required to submit SAT or ACT scores. Their admission will be determined by individual review.

HIGH SCHOOL PREPARATION

It is recommended that students complete the college preparatory program of study offered by their high schools. For purposes of admission as a freshman to the University, passing the General Educational Development Test (GED) is not considered to be the equivalent of graduating from high school. An applicant with a GED certification may be eligible for admission under the Individual Approval clause explained later in this section of the catalog.

In order for majors in architecture, engineering, biology, biochemistry, chemistry, mathematics, and physics, and B.S. candidates in geology and psychology to start their mathematics sequence with analytic geometry, applicants should have at least 3 1/2 units of high school mathematics. Those who made low scores on the mathematics part of the SAT or the ACT examination are required to take, without credit toward a degree, the necessary mathematics courses prerequisite to taking analytic geometry.

HONORS ACADEMY DUAL CREDIT PROGRAM

Honors Academy Dual Credit Program is designed for high school students who wish to earn college credit at UT Arlington while still attending high school. It is possible for students in some school districts to earn high school credit for their university course work. Students should contact their school district or one of the UTA dual credit programs for further information.

The Honors Academy Dual Credit Program offers on-campus and a limited number of online courses.

High School students can participate in UTA Dual Credit Programs by demonstrating college readiness through **one** of the following:

- Rank in the top 20% of your current class, **or**
- PSAT score of at least 480 on Evidenced-based reading and writing, and 530 on Math, **or**
- PLAN composite score of at least 23, **or**
- 3.5 unweighted grade point average (4.0 scale), **or**
- SAT score of at least 1070 in combined Critical Reading + Math (test taken prior to March 2016) or SAT score of at least 1140 in combined Evidence-based Reading + Math (redesigned test taken after March 2016), **or**
- ACT composite score of at least 23.

Additionally, students must satisfy the Texas Success Initiative requirement for college readiness (TSI) by achieving the minimum passing standards on the TSI Assessment Test or equivalent.
Equivalent methods to satisfy the TSI requirement include:

- Achieving an SAT score of at least 1070 in Critical Reading and Math (with a minimum score of 500 in Critical Reading and 500 in Math) if taken prior to March 2016, **or**
- An SAT score of 480 in Evidenced-based Reading and 530 in Math on the Redesigned SAT taken after March 2016; **or**
- An ACT composite score of at least 23 with scores of at least 19 in both Math and English.
- STAAR math score of at least 4000 for the Final Level II Score for Algebra II I exempts from the math requirement. STAAR English/language arts score of at least 2000 for the Final Level II Score for English III exempts from the reading and writing requirements.

Visit the UT Arlington TSI (https://www.uta.edu/student-success/tsi/) page for more information.

Students admitted into a dual credit program will be enrolled in regular University courses and will receive credit for the course work completed at the end of the semester.

A permanent academic record will be established for each student enrolled under a Dual Credit Program.

Granting of dual credit is subject to the policies of each independent school district under the guidelines of the Texas Education Agency.

Dual Credit Admission

To apply for the Honors Academy Dual Credit Program (https://www.uta.edu/student-success/path-to-graduation/dualcredit/applying/) students must submit the following:

- Online Apply Texas One Application (https://www.applytexas.org/)
- Application Fee: $75.00
- Official high school transcript (including any scores for admission/TSI)
- UT Arlington Dual Credit Admissions Agreement
- Course Selection form

Cost

The cost to participate in the Honors Academy Dual Credit Program is $50 per semester hour. Books and Parking are extra. Some courses have additional equipment and/or lab fees. Distance education courses are an additional $37.50 fee.

Upon completion of high school, an Honors Academy student who wishes to continue enrolling at UT Arlington must complete an Update Application for Admission and submit an official final high school transcript.

Admission to the Dual Credit Program does not guarantee acceptance to the university following high school graduation.

FERPA

Once the student attains the age of 18 **or** attends an institution of higher education, regardless of age, FERPA rights transfer from the parent to the student. Under FERPA, parents have no inherent rights of access to their students' education records.

Additional details are available at the FERPA website (https://www.uta.edu/administration/registrar/students/records/ferpa/).

Arlington, TX 76019-0222

817-272-7215

INDIVIDUAL REVIEW

Graduation from an accredited high school is a prerequisite for admission to the University for most individuals. However, freshmen with the following educational profiles may be considered for admission under certain circumstances and will be automatically reviewed by Admissions officials:

- Graduates from unaccredited high schools
- Graduates from home schools
- Graduates with a General Educational Development (GED) certificate
- Students who are high school graduates and are age 25 or older. These students are not required to submit ACT or SAT scores.
- Texas residents age 21 or older who did not graduate from high school but scored at least 1090 on the SAT or 22 on the ACT.

Applicants should submit an admission application, application fee or fee waiver documentation, official transcripts of all high school grades completed from all unaccredited or home schools, official transcripts of all partially completed grades from accredited high schools, GED test scores if applicable, and official SAT or ACT test scores. Admission will be based on the freshman criteria stated in the Freshman Admission section of this catalog with emphasis placed on each individual's academic preparation and readiness to begin a college-level curriculum. Applicants with exceptional circumstances are encouraged to discuss their educational plans with an admission counselor.

Individuals age 25 or older who have graduated from an accredited high school may be considered for admission without taking the SAT or the ACT. Such students may, however, be ineligible for federal student aid under the "Ability to Benefit" rules. An individual admitted under this waiver will be required to enroll as an undeclared major until 30 semester hours have been successfully completed. An application for admission, an official copy of the high school transcript, official transcripts of all attempted college work and the application fee will be required for admission consideration. The testing waiver does not apply to international students who must submit the results of the SAT and TOEFL for admission purposes.

An applicant seeking admission under the Individual Review provisions who has any course credit from previous college enrollment must meet the University transfer requirements for all college work attempted. Passing the General Educational Development (GED) Test is not recognized by UT Arlington as being equivalent to graduation from an accredited high school.

ADMISSION APPEAL

Students denied admission may appeal the decision by submitting an Admission Appeal form online to the Admissions Review Committee. Students should provide the committee with a personal statement explaining their academic strengths, educational goals at UTA, and any extenuating circumstances you would like the Admission Review Committee to know. Students should also submit two academic letters of recommendation. Students can appeal only once per term and can expect a decision from the committee within 14-21 days from the receipt of the appeal.

Transfer Admission Overview

Prospective students who have graduated from high school or earned a GED, earned college level credit following high school graduation or earning a GED, and attempted college-level courses beyond 24 hours are considered transfer students. An applicant who is not eligible to continue at another institution for academic or disciplinary reasons is not eligible for admission to The University of Texas at Arlington. Applicants, whether a new or former student, who have attended another collegiate institution may not disregard any part of their academic record except as permitted under the "fresh start" option described in this section. Applicants who fail to list all previously attended institutions on their application for admission are subject to disciplinary action, including expulsion, and possible loss of credit for subsequent work taken at the University.

All college-level courses except those determined to be developmental or pre-college-level courses are used to compute a transfer grade point average. Grades earned in every course attempted are part of this calculation with the exception of 10 hours of repeated courses. In the case of repeated courses, the second course attempt is counted and the first forgiven even if the second attempt is a withdrawal. Subsequent attempts after the second time a course is taken are counted toward the grade point average calculated for transfer admission. To be considered for admission, transfer applicants must have a minimum 2.25 GPA on all previous college work. Students with at least a 2.0 but less than a 2.25 overall GPA are encouraged to apply and may be considered on a space available basis.

Freshman Transfers

(less than 24 college hours completed)

Applicants who meet the transfer student definition above and who have completed fewer than 24 hours of transferable credit must have a grade point average of at least 2.25 to be admitted. In addition, they must meet the admission requirements for entering freshmen at UT Arlington. Freshman transfer students must submit: 1) an official score report from a national administration of the SAT I or ACT, 2) an official high school transcript showing

graduation and rank-in-class, 3) a completed undergraduate application form, 4) official transcripts of all college work attempted, and 5) the application fee or fee waiver documentation. Students taking college classes while still in high school will be considered freshmen instead of transfer students.

Transfers With Sophomore or Higher Classification

(24 or more college hours completed)

Applicants who meet the transfer student definition above and who have completed 24 or more hours of transferable credit must have at least a 2.25 grade point average to be admitted. Students taking college classes while still in high school will be considered freshmen instead of transfer students.

Prospective transfer students who have completed 24 or more transferable credit hours must submit: 1) an undergraduate application for admission, 2) an official transcript from each accredited college or community college attended, and 3) the application fee or fee waiver documentation.

Transfers With Degrees

An applicant who has received a degree from another accredited senior college or university will be admitted as a degreed undergraduate. Acceptance into specific academic programs will be subject to the criteria set by each academic department. Applicants seeking a second baccalaureate degree must submit an application for admission, application fee, and an official transcript from each college attended as an undergraduate student to the Office of Admissions. The applicant should submit required credentials for admission by the priority deadline date. Non-degree seeking applicants must submit an application for admission, application fee, and an official transcript from the degree-granting institution. An applicant who wishes to take graduate course work before gaining admission to the Graduate School should contact the Office of Admissions and the graduate advisor in the appropriate academic department.

Credit Evaluation

The Office of Admissions completes an evaluation of transfer credit for all admitted degree-seeking students. This evaluation does not constitute approval of the credit for use toward a degree. Decisions on which transferred courses satisfy degree requirements are solely within the jurisdiction of a student's academic department. Policies governing the evaluation of transfer credit include the following:

- Transfer credit is generally awarded for academic course credit earned from regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period.
- Occupational or some workforce courses from junior/community colleges, developmental courses, and courses classified as below freshman level by the sending institution are not transferable and will not count toward a degree.
- Workforce courses that are agreed upon in articulation agreements between accredited institutions of higher education and UT Arlington are transferable. In addition, where workforce courses support a degree program, the Dean of the college may approve those courses. Courses earned as part of an Associate of Applied Science program from a regionally accredited school are accepted, with some limitations, for the Bachelor of Science in University Studies degrees.
- Junior/community college courses transfer as lower-division (freshman or sophomore) credit. Undergraduate courses from senior colleges transfer at the same level, lower- or upper-division, as they were taken.
- Graduate level course work may be transferred as upper-division credit at the written request of the student. Any graduate courses transferred in as upper-division undergraduate work will not be eligible for use at a later date in the graduate school.
- No limit is placed on the total amount of course credit accepted in transfer from either junior or senior institutions. However, use of transfer credit toward a degree may be limited by the student's academic department.
- Credit-by-examination earned at other institutions is treated as transfer credit only if the sending institution posts such credit on the student's transcript with regular catalog course numbers and with a grade of at least C, with the symbol CR, or with a similar designation representing credit earned without letter grade.
- Evaluation of military transcripts that include ACE, AARTS, DD214, SMART, and the Defense Language Institute are evaluated for all admitted students (see the Credit for Prior Learning - Military Training (https://catalog.uta.edu/academicregulations/admissions/undergraduate/#text) section of the catalog for more information)
- Credit in which a grade of D was earned is not transferable and will not count toward a degree.
- Grade Point Averages earned at other institutions are not transferred to UT Arlington.
- Transfer credit evaluations.
- University course numbers may be modified in transfer credit evaluations to reflect differences in the number of credit hours. For example, if a course has 4 hours from the sending institution such as Mathematics “College Algebra,” the course will be brought in as MATHTRAN 1000, since UT Arlington’s “College Algebra” is a three-hour course.
- Courses taught at other institutions often have no direct UT Arlington equivalents, but may be accepted in transfer. If such a course is in a discipline offered at the University, credit without a specific course number is awarded in the appropriate academic department. General elective credit may be awarded if no equivalent department exists at the University; use of elective credit toward a degree may be restricted by the student's academic department.
- Courses taught at other institutions that are determined to be developmental are not accepted as transfer credit. Transfer credit of English courses taught at institutions in non-native English-speaking countries may be restricted or not accepted.

Transfer of Lower Division Course Credit

UT Arlington operates in accordance with Section 61.821, et seq., of the Texas Education Code. This statute recognizes that all lower division academic courses are fully transferable among public institutions and count toward the same degree at any public college or university in Texas. As such, any Texas Higher Education Coordinating Board approved core or field of study curricula are fully transferable to equivalent UT Arlington academic programs with the following stipulations:

- No institution shall be required to accept in transfer more credit hours in a major than the number set out in the applicable Coordinating Board-approved Transfer Curriculum for that major, as prescribed by the current issue of the Coordinating Board's guide, Transfer of Credit Policies and Curricula.
- In any major for which there is not a Coordinating Board-approved Transfer Curriculum, no institution shall be required to accept in transfer more lower division course credit in the major applicable to a baccalaureate degree than the institution allows their non-transfer students in that major.
- The university will only accept grades of C or higher in transfer credit.
- No university shall be required to accept in transfer or toward a degree more than sixty-six (66) semester credit hours of academic credits earned by a student in a community college. Universities, however, may choose to accept additional credit hours.

UT Arlington is also a participant in the Texas Common Course Numbering System (TCCNS), a voluntary, co-operative effort among 136 Texas community colleges and universities to facilitate transfer of freshman and sophomore level general academic coursework. In alignment with Texas Education Code, Section 61.830, TCCNS provides a shared, uniform set of course designations for students and their advisors to use in determining both course equivalency and degree applicability of transfer credit on a statewide basis. When students transfer between two participating TCCNS institutions, a course taken at the sending institution transfers as the course carrying the same TCCNS designation at the receiving institution. For additional information, visit https://www.tccns.org/.

Catalog Eligibility for Texas Community College Transfers

A student transferring from an accredited public community college in Texas has the same choice of catalog, designating degree requirements, that would have been possible if the student's dates of attendance at the University had been the same as the dates of attendance at the community college. However, the student's choice of major may affect whether or not transferable course work may be counted toward a degree.

Resolution of Transfer Disputes

If the University refuses to accept lower-division credit earned at another Texas public institution of higher education, students and the institution where the credit was earned will be given written notice that the transfer credit was denied. If the denial of transfer credit is contested, the University will attempt to resolve the issue with the student and the sending institution according to applicable rules and guidelines of the Texas Higher Education Coordinating Board. If the dispute is not resolved to the student’s satisfaction or to the satisfaction of the sending institution within 45 days of the initial notification, the University will notify the Coordinating Board of the denial of the transfer credit and the reason for the denial. The Coordinating Board will resolve the dispute and notify all involved parties of its findings. For more information contact the Office of Admissions at 817-272-6287.

Former and Continuing Students

A student who has attended UT Arlington previously, but has not been enrolled for one calendar year must reapply for admission by submitting an application for admission and application fee to the Office of Admissions. Continuing students, those who have been officially enrolled at UT Arlington during the calendar year, do not need to reapply for admission.

If a former student has attended another college or university since last enrolling at UT Arlington, the student must submit official transcripts from all institutions attended. Academic performance in such work may be factored into the enrollment/eligibility process. Former students on academic probation or suspension upon resigning from UT Arlington may be required to obtain special permission to re-enroll from the academic dean's office of their intended major or from the University Advising Center.

Any student who withdraws from the University to perform active military service (not including Texas National Guard training exercises) will not have to reapply for admission, but will be readmitted upon a request made within one year of being released from active military services and may be eligible for the same financial assistance provided before the student's withdrawal. This right to readmission is afforded under Section 51.9242, *Texas Education Code*.

Applicants cannot be re-admitted without required credentials. Former international students seeking readmission must refer to the catalog requirements for international students.

Transient Admission Overview

Undergraduate students who are pursuing degrees at other colleges and universities during the long session (fall and spring semesters) and wish to continue their studies at the University for one semester may be admitted to some undergraduate programs as transient students. Individuals who wish to enroll as a transient student must submit an admission application, application fee and official transcript from their home campus. Admittance requires good academic standing from the home institution. Transient students will be classified as non-degree seeking students and therefore are not eligible for Financial Aid through UT Arlington. Transient students may not enroll in two consecutive semesters at UT Arlington. A transient student who wishes to be admitted to the University on a regular basis must apply for admission in accordance with the procedures, criteria and deadlines governing transfer admission. All transcripts from previously attended institutions must be submitted. Students who attend the University as transient students and then

are admitted on a regular basis are immediately subject to the University's academic regulations as well as the rules of the Texas Success Initiative (see section below). In particular, such students will be placed on scholastic probation upon enrollment if their grade point average for work undertaken as a transient student at the University is below 2.0. All transient students are classified as non-degree seeking and therefore not eligible for Financial Aid.

Texas Success Initiative Overview

All new entering UT Arlington undergraduate degree-seeking students must meet the requirements of the Texas Success Initiative (TSI). (Texas Education Code, Section 51.3062 and 19 Texas Administrative Code §4.51, et seq. (p. 45))

The Texas Success Initiative has been developed by the state legislature to ensure student success at institutions of higher education. The two major steps of the program are (1) assessment of each student's academic skills in reading, writing, and math before enrolling and, (2) advisement into appropriate developmental coursework for any academic skills that need improvement. Under the Texas Success Initiative, all new incoming students must take the TSI Assessment test unless the student is exempt.

You are exempt if you:

- took the SAT I less than 5 years ago and scored: 1) at least 480 on the Evidence-Based Reading and Writing portion and 2) 530 on the math portion (There is no combined score.)
- took the ACT less than 5 years ago and made a qualifying score of 23 composite, with 19 English and 19 math.
- took the STAAR EOC exams less than 5 years ago and made a qualifying English III score of 4000+ and Algebra II score of 4000+.
- took the TAKS test less than 5 years ago and made a qualifying score of 2200 on the math subsection and/or 2200 on the English Language Arts subsection, with a score of at least 3 on the writing subsection.
- have a bachelor's or associate degree from an institution of higher education.
- are serving on active duty as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States and have been serving for at least three years preceding enrollment.
- were honorably discharged, retired or released from active duty on or after August 1, 1990 as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States.
- a student who has previously attended any institution and has been determined to have met readiness standards by that institution.
- a student who is enrolled in a certificate program of one year or less (Level-One certificates, 42 or fewer semester credit hours or the equivalent) at a public junior college, a public technical institute, or a public state college.
- are a non-degree seeking or non-certificate-seeking student.

Taking the TSI Assessment

UT Arlington requires incoming students who are not exempt to take the TSI Assessment Exam. The UT Arlington Testing Services (https://www.uta.edu/student-success/resources/testing-services/) office offers the opportunity for students to take this exam.

If you took the TSI Assessment and did not have the scores sent to UT Arlington, please contact Testing Services. (https://www.uta.edu/student-success/resources/testing-services/)

If you attended a Texas public college for dual credit while you were in high school or are transferring from a Texas public college, your test scores should be listed on the transcript you submit to UT Arlington. It is your responsibility to ask your community college to send an official transcript to the UT Arlington Office of Admissions.

If you do not pass (https://www.uta.edu/student-success/directory-uac/) a section of the TSI Assessment, you are required to enroll in developmental coursework for the failed areas. You should speak with your advisor to ensure that you are enrolled in the right courses.

Degree Requirements

General Core Requirements (p. 46)

Undergraduate Degree Requirements (p. 49)

Graduate Degree Requirements (p. 55)

Students are responsible for requesting the preparation of a degree plan through their departmental academic advisor during the semester following admission to a degree program. No deviation from a degree plan will be allowed except with the written approval of the departmental advisor. Students should follow the graduation procedures described in the Graduation section of this catalog (p. 112) in order to be eligible for degree conferral.

Each student must complete degree requirements in accordance with the Catalog in force at the time the student entered the program in which the degree will be awarded or, at the student's option, the catalog of any subsequent year in which the student was in residence. If a student chooses to complete degree requirements in accordance with the catalog of a year subsequent to that in which he/she entered the degree program.

Please note that changes in University regulations and policies become effective for all enrolled students in the year for which the catalog is in force, regardless of the year of initial enrollment. Thus, students may choose to satisfy degree requirements specified in an earlier catalog, but all must observe University regulations and follow graduation procedures prescribed in the Catalog in force in the intended semester of graduation.

General Core Requirements

GENERAL CORE CURRICULUM FOR A BACHELOR'S DEGREE

The University requires the following courses for each degree:

COMMUNICATION

Select two of the following:		6
COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	
COMS 2302	PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING	
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
THEA 1303	FUNDAMENTALS OF PRESENTATION	
Total Hours		**6**

CREATIVE ARTS

Select one of the following:		3
ARCH 1301	INTRODUCTION TO ARCHITECTURE AND INTERIOR DESIGN	
ART 1301	ART APPRECIATION	
ART 1309	INTRODUCTION TO ART HISTORY I: PREHISTORIC THROUGH 16TH CENTURY	
ART 1310	INTRODUCTION TO ART HISTORY II: 17TH CENTURY TO THE PRESENT	
DNCE 1300	DANCE APPRECIATION	
ENGL 1375	INTRODUCTION TO CREATIVE WRITING	
JOUR 2340	PHOTOJOURNALISM I	
MUSI 1300	MUSIC APPRECIATION	
MUSI 1302	JAZZ APPRECIATION	
MUSI 1304	HISTORY OF ROCK MUSIC	
MUSI 2300	INTRODUCTION TO WORLD MUSIC	
MUSI 2301	APPRECIATION OF MUSIC IN FILM	
THEA 1342	THEATRE AND FILM APPRECIATION	
THEA 1343	INTRODUCTION TO THEATRE	
Total Hours		**3**

GOVERNMENT/POLITICAL SCIENCE

POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3
Total Hours		**6**

LANGUAGE, PHILOSOPHY AND CULTURE

Select one of the following:		3
ANTH 2322	GLOBAL CULTURES	
ARAB 2310	ARABIC CULTURE IN THE WORLD	
ARAB 2314	INTERMEDIATE ARABIC II	
ARCH 2300	MASTERWORKS OF WESTERN ARCHITECTURE	
ART 1317	INTRODUCTION TO ART HISTORY III: AFRICA, ASIA, AMERICAS	
ASL 2314	INTERMEDIATE AMERICAN SIGN LANGUAGE II	
CHIN 2310	CHINESE CULTURE IN THE WORLD	
CHIN 2314	INTERMEDIATE CHINESE II	
CLAS 1300	INTRODUCTION TO CLASSICAL MYTHOLOGY	
DIVR/GWSS 2315	INTRODUCTION TO LGBTQ+ STUDIES	

ENGL 1350	WRITING ABOUT FILM
ENGL 2303	TOPICS IN LITERATURE
ENGL 2309	WORLD LITERATURE
ENGL 2319	BRITISH LITERATURE
ENGL 2329	AMERICAN LITERATURE
FREN 2310	FRENCH AND FRANCOPHONE CULTURES IN THE WORLD
FREN 2314	INTERMEDIATE FRENCH II
GERM 2310	GERMAN CULTURE IN THE WORLD
GERM 2314	INTERMEDIATE GERMAN II
GLOBAL 2301	INTRODUCTION TO GLOBAL ISSUES
GREK 2314	GREEK LEVEL IV
GWSS 2310	INTRO TO WOMEN'S & GENDER STUDIES
HIST 2377	FLIGHT CULTURE AND THE HUMAN EXPERIENCE
INTS 1310	INTRODUCTION TO POPULAR CULTURE
KORE 2310	KOREAN CULTURE IN THE WORLD
KORE 2314	INTERMEDIATE KOREAN II
LATN 2314	LATIN LEVEL IV
LING 2371	LANGUAGE IN A MULTICULTURAL USA
MAS 2300	INTRODUCTION TO MEXICAN AMERICAN STUDIES
PHIL 1304	CONTEMPORARY MORAL PROBLEMS
PHIL 2300	INTRODUCTION TO PHILOSOPHY
RUSS 2310	RUSSIAN CULTURE IN THE WORLD
RUSS 2314	INTERMEDIATE RUSSIAN II
SOCI/INTS 1310	INTRODUCTION TO POPULAR CULTURE
SPAN 2314	INTERMEDIATE SPANISH II
SPAN 2310	HISPANIC CULTURE IN THE WORLD
SPAN 2315	SPANISH FOR NATIVE/HERITAGE SPEAKERS II
Total Hours	**3**

LIFE AND PHYSICAL SCIENCE

Select two of the following:	6
ANTH 2307	BIOLOGICAL ANTHROPOLOGY
ASTR 1345	INTRODUCTORY ASTRONOMY I
ASTR 1346	INTRODUCTORY ASTRONOMY II
BIOL 1333	BIOLOGY FOR NON-SCIENCE MAJORS: CELLS AND DISEASE
BIOL 1334	BIOLOGY FOR NON-SCIENCE MAJORS: LIFE ON EARTH
BIOL 1441	BIOLOGY I FOR SCIENCE MAJORS: CELL AND MOLECULAR BIOLOGY
BIOL 1442	BIOLOGY II FOR SCIENCE MAJORS: ECOLOGY AND EVOLUTION
BIOL 2457	HUMAN ANATOMY AND PHYSIOLOGY I
BIOL 2458	HUMAN ANATOMY AND PHYSIOLOGY II
BIOL 2460	MICROBIOLOGY FOR NON-SCIENCE MAJORS
CHEM 1345	CHEMISTRY IN THE WORLD AROUND US
CHEM 1346	SEX, DRUGS, AND ARTIFICIAL INTELLIGENCE
CHEM 1400	INTRODUCTORY CHEMICAL PRINCIPLES
CHEM 1441	GENERAL CHEMISTRY I
CHEM 1451	CHEMISTRY FOR HEALTH SCIENCES
ENVR 1301	INTRODUCTION TO ENVIRONMENTAL SCIENCE
ENVR 1330	GLOBAL WARMING
ENVR 2314	THE GLOBAL ENVIRONMENT AND HUMAN HEALTH
GEOG 2301	PHYSICAL GEOGRAPHY
GEOL 1301	EARTH SYSTEMS
GEOL 1302	EARTH HISTORY

GEOL 1330	GLOBAL WARMING
GEOL 1340	WEATHER AND CLIMATE
GEOL 1350	INTRODUCTION TO OCEANOGRAPHY
GEOL 1360	GEOLOGIC HAZARDS
PHYS 1300	INTRODUCTION TO MUSICAL ACOUSTICS
PHYS 1301	PHYSICS FOR NON SPECIALISTS I
PHYS 1302	PHYSICS FOR NON SPECIALISTS II
PHYS 1351	ENERGY AND ENVIRONMENT
PHYS 1441	GENERAL COLLEGE PHYSICS I
PHYS 1442	GENERAL COLLEGE PHYSICS II
PHYS 1443	GENERAL TECHNICAL PHYSICS I
PHYS 1444	GENERAL TECHNICAL PHYSICS II
Total Hours	**6**

MATHEMATICS

Select two of the following:	6
DATA 1301	INTRODUCTION TO DATA SCIENCE
MATH 1301	CONTEMPORARY MATHEMATICS
MATH 1302	COLLEGE ALGEBRA
MATH 1303	TRIGONOMETRY
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS
MATH 1309	STATISTICAL LITERACY
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS
MATH 1324	ALGEBRA AND TRIGONOMETRY
MATH 1325	ANALYTIC GEOMETRY
MATH 1327	ARCHITECTURAL CALCULUS WITH ANALYTIC GEOMETRY
MATH 1330	ARITHMETICAL PROBLEM SOLVING
MATH 1331	GEOMETRICAL INFERENCE AND REASONING
MATH 1332	FUNCTIONS, DATA, AND APPLICATIONS
MATH 1402	COLLEGE ALGEBRA
MATH 1421	PREPARATION FOR CALCULUS
MATH 1426	CALCULUS I
PHIL 2311	LOGIC
Three (3) semester credit hours must be selected from the Mathematics list above. The remaining required 3 semester credit hours can be selected from the Mathematics list above or from the following courses: MATH 2425 Calculus II, MATH 2326 Calculus III.	
Total Hours	**6**

SOCIAL AND BEHAVIORAL SCIENCE

Select one of the following:	3
AAST 2300	INTRODUCTION TO AFRICAN AMERICAN STUDIES
ANTH 1306	INTRODUCTION TO ANTHROPOLOGY
ANTH 2339	INTRODUCTION TO ARCHAEOLOGY
CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM
ECON 2305	PRINCIPLES OF MACROECONOMICS
ECON 2306	PRINCIPLES OF MICROECONOMICS
ECON 2337	ECONOMICS OF SOCIAL ISSUES
EDAD 2330	THEORIES IN LEADERSHIP
FINA 2330	MONEY, FINANCE AND THE MODERN CONSUMER
GEOG 2302	HUMAN GEOGRAPHY
GEOG 2303	WORLD REGIONAL GEOGRAPHY
IE 2308	ECONOMICS FOR ENGINEERS

KINE 2350	PUBLIC HEALTH: PRINCIPLES AND POPULATIONS
LING 2301	INTRODUCTION TO THE STUDY OF HUMAN LANGUAGE
MANA 1301	BUSINESS IN A GLOBAL ENVIRONMENT
MANA 2302	COMMUNICATIONS IN ORGANIZATIONS
MODL 2301	INTRODUCTION TO WORLD LANGUAGES
PSYC 1315	INTRODUCTION TO PSYCHOLOGY
SOCI 1311	INTRODUCTION TO SOCIOLOGY
SOCI 2312	SOCIAL PROBLEMS
SOCW 2302	HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT
SOCW 2361	INTRODUCTION TO SOCIAL WORK
SPAN 2300	SPANISH IN THE UNITED STATES
Total Hours	**3**

U.S. HISTORY

Select two of the following:		6
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
or HIST 1331	TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, I	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
or HIST 1332	TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, II	
Total Hours		**6**

COMPONENT AREA OPTION

Select one of the following:		3
Any course listed above (a course may count in only one area)		
MATH 2425	CALCULUS II	
MATH 2326	CALCULUS III	
Total Hours		**3**

TOTAL CORE HOURS

All Components	
Total Hours	**42**

Undergraduate

Undergraduate Admission to a Degree Program

Admission to the University’s degree programs is determined by application to the academic unit offering the degree.

Degree Plan

Students are responsible for requesting a degree plan through their major department advisor during the semester following admission to a degree program. No deviation from a degree plan will be allowed except with the written approval of the department advisor, the chair of the major department and the academic dean.

Multiple Undergraduate Degrees at UT Arlington

While a student should carefully consider with an academic advisor if obtaining multiple undergraduate degrees is necessary for a given career path, it is possible for students to earn more than one undergraduate degree under the certain conditions and limitations.

DOUBLE MAJOR

A student who fulfills the specified requirements for two different majors under a single degree, simultaneously prior to graduation, completes a double major. For example, a student may complete a Bachelor of Arts in History and a Bachelor of Arts in Political Science – both B.A. degrees - or a Bachelor of Science in Psychology and a Bachelor of Science in Biology – both B.S. degrees. Prerequisite and field of study courses are required to complete both majors.

When applying for graduation, a student should note on the application that he/she will be completing an additional major. One diploma is issued and both majors are recorded on a student's transcript and diploma. Also, upon graduation, a student can attend multiple commencement ceremonies if the majors span across different colleges, though both majors are announced at any ceremony and college-specific policies apply for each ceremony.

DUAL DEGREE

A student who fulfills the specified requirements for two different majors from different degrees, simultaneously prior to graduation, will complete a dual degree. For example, a student may complete a Bachelor of Science in Biology and a Bachelor of Arts in Public Relations – a B.S. degree and a B.A. degree. The student must complete a minimum additional 30 credit hours beyond the degree plan with the greater required credit hours and also complete all prerequisite and field of study courses for both degrees.
Upon graduation, the student must complete two graduation applications (one application for each degree) and pay the processing fee for each degree. Upon graduation a student can attend multiple commencement ceremonies if the majors span across different colleges, though both degrees are announced at any ceremony and college-specific policies apply for each ceremony.

SECOND BACCALAUREATE DEGREE

A student who earns a bachelor degree subsequent to receiving the first bachelor degree will complete a second baccalaureate degree. The student must complete at least 30 credit hours in residence, above and beyond the minimum number of hours to complete the first degree. One diploma is issued and the new degree is added to the student's transcript.

Academic Advising and Limitations

Students seeking a double major or dual degree must:

- seek regular advising for each degree program from the department offering the major.
- understand the requirements to remain in and graduate from each degree program.
- adhere to proper course sequencing and complete the proper prerequisite and field of study courses for each degree program.

All requirements to enter a major in a given department must be met in order to pursue that major/degree. Students who are not meeting the requirements to remain in a particular degree program can be removed from that major/degree and prohibited from further enrolling in coursework to earn the additional undergraduate degree.

A student can only work on two major/degree programs simultaneously. Some degree programs may limit or not permit the pursuit of a double major or dual degree. Students should discuss possible limitations with both departmental advisors to determine what limitations may apply. Additional major degrees cannot be added to students' degree plans until they have completed at least 30 hours of college coursework. It is also important to note that once a degree has been conferred and applied to a student's transcript the degree cannot be removed from the academic record.

Graduate Course Credit in Undergraduate Degree Programs

Graduate-level course work may be used to satisfy up to 4 hours of upper-division undergraduate credit at the written request of the student with the approval of the graduate advisor of the program offering the graduate course. Any graduate courses transferred in as upper-division undergraduate work cannot be applied to a UT Arlington graduate degree plan unless the student has been admitted to a fast-track program prior to enrolling in graduate-level course work. Fast-track students may apply up to 9 graduate credit hours to both their undergraduate degree and a UT Arlington graduate master's degree program.

Fast tRacks

Fast-track programs allow exceptional undergraduates an accelerated path to a master's degree. When an enrolled bachelor's degree student is within 30 hours of graduation, they may apply for admission to the fast track. Upon satisfaction of program-specific GPA and coursework requirements, the student may take up to 9 credit hours of specified graduate courses. If completed successfully, these courses will count for credit in both the undergraduate program and the affiliated master's program, and the studentwill be automatically admitted to graduate study.

Minor Field of Study

A minor requires at least 18 semester hours in a given program, including six hours of advanced work. Specific course sequences for a minor are determined by the program offering the minor. Since some undergraduate degree programs do not offer minors, students should consult an advisor in their program of study.

In a case where the student wishes to pursue a minor comprised of courses within the same college as that which offers his/her major program of study, the student and his/her advisor will propose a program of study/list courses for approval by the dean of the college.

In a case where the student wishes to pursue a minor which includes one or more courses offered by a different college from that which offers his/her major program of study, the student and his/her advisor will propose a program of study/list of courses for approval by both (a) the dean of the college which offers his/her major, and (b) the dean of the college which offers the minor courses.

In either case, the approved minor program of study will be forwarded to the Office of the Registrar for verification and notation on the student's transcript.

The Core Curriculum

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum must ensure that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. Therefore, with the assistance of the Undergraduate Education Advisory Committee and pursuant to *Texas Education Code*, Section 61.821, the Texas Higher Education Coordinating Board approved a 42 semester credit hour core curriculum for all undergraduate students in Texas, including a statement of purpose, six core objectives, and common component areas.

STATEMENT OF PURPOSE

Through the Texas Core Curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for all learning.

CORE OBJECTIVES

- **Critical Thinking Skills** - to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
- **Communication Skills** - to include effective development, interpretation and expression of ideas through written, oral and visual communication
- **Empirical and Quantitative Skills** - to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
- **Teamwork** - to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal
- **Personal Responsibility** - to include the ability to connect choices, actions and consequences to ethical decision-making
- **Social Responsibility**: to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities

The UT Arlington Core Curriculum is comprised of the following component areas:

- Communication
- Mathematics
- Life and Physical Sciences
- Language, Philosophy and Culture
- Creative Arts
- American History
- Government/Political Science
- Social and Behavioral Sciences
- Foundation Area Option

Click here (p. 46) for the requirements and approved courses.

Core Complete: Students who transfer from a Texas public community college or public university and are certified as core complete shall have satisfied the core requirements of UT Arlington. Academic departments may, in some instances, require specific courses outside their major as prerequisites for major course work. (See "Credit Evaluation" and "Transfer of Lower Division Course Credit" under Undergraduate Admission section, p.15-16.)

Transcript Codes: The Transcript Codes identify specific core requirements on a student's transcript. For further information on core transferability, consult with an academic advisor, or refer to the Texas Administrative Code.

Field of Study: Students who complete an approved field of study curriculum in whole or in part will receive academic credit for the equivalent courses within their selected field of study at UT Arlington. View the field of study curriculum approved by the Texas Higher Education Coordinating Board (https://www.highered.texas.gov/our-work/supporting-our-institutions/institutional-resources/workforce-transfer-resources/programs-of-study/).

Note: Consult a specific academic department in this catalog regarding further requirements for a degree in your area of interest.

Competence in Computer Use

Graduating students should be proficient in the use of computers. Proficiency is understood as the ability to use word-processing, database/spreadsheet and representative software of one's major discipline. Each student should be able to tap the communications, analytical and information-retrieval potential of computers to solve research problems and be able to evaluate the results. Students should consult their departmental, school or college advisors to determine the mechanisms by which they can demonstrate proficiency. An examination or completion of a department- or college-designated course may be required.

Competence in Communication

Students should have proficiency in communication skills including interaction in classroom settings to meet the needs of course work and the use of acceptable grammar and pronunciation in formal presentations. Students should consult their individual department, school or college advisors to determine the mechanisms by which they can demonstrate this competency. A proficiency examination or completion of a department- or college-designated course may be required.

Tuition for Excessive Undergraduate Hours

Pursuant to state law, students who first enrolled in any college or university in Fall 1999 or a later semester may be required to pay a higher tuition rate if attempted undergraduate credit hours exceed a designated limit. Students who first entered a college or university in Fall semester 1999 through Summer semester 2006 may be required to pay a higher tuition rate when the credit hours attempted at publicly-funded Texas colleges or universities exceed by 45 or more the hours required for the student's declared baccalaureate degree. Students who first entered a college or university in Fall semester 2006 and thereafter may be required to pay higher tuition rates when the credit hours attempted at publicly-funded Texas colleges or universities exceed by 30 or more the hours required for the student's declared baccalaureate degree. This requirement applies only to the first baccalaureate degree earned; students already holding one baccalaureate degree are exempt when enrolled in a second baccalaureate degree program.

This requirement applies to **all credit hours attempted at any publicly-funded Texas institution, including courses with a grade of D, F, W, or Q** as well as courses serving as a grade replacement and courses that have been grade replaced, grade excluded, grade forgiven, or repeated. This also includes hours excluded from a student record that was a result of Academic Fresh Start.

Exclusions from Excessive Hour calculation:

- Credit hours earned at a private or an out-of-state institution
- Credit earned prior to high school graduation (i.e. dual credit)
- Credit earned through examination (AP, CLEP, IB, SATII)
- Credit earned in remedial and developmental courses

Degree plan hours include the total number of hours required for a student to complete their primary declared degree plan. Additional majors/degrees/minors does not extend the maximum attempted hours limit.

For more information about this state law, see www.statutes.legis.state.tx.us (http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.54.htm#54014) (Texas Education Code, secs. 54.014 and 61.0595).

Texas Three Course Repeat Rule

The 3-Peat Rule was passed by the State of Texas to discourage students from repeating courses, limiting undergraduate students to three grade-bearing attempts for any specific class. This provision is outlined in the Texas Higher Education Coordinating Board Rules (TAC Chapter 13, Subchapter F, Rule 13.108 (https://texas-sos.appianportalsgov.com/rules-and-meetings/?$locale=en_US&interface=VIEW_TAC_SUMMARY&queryAsDate=06%2F17%2F2025&recordId=128007)). A student attempting the same class for the third time will be charged an additional per credit hour fee for that course; this fee is in addition to the regular in-state per semester credit hour tuition rate.

If a student enrolls in a course and decides to drop the course, any hours that were attempted will count toward the limit imposed by the 3-Peat Rule. If the student drops the course prior to the official census day of the given term/session, the hours will not be counted against the limit imposed by the 3-Peat Rule.

Attempted hours calculated in 3-Peat include:

- Repeated courses
- Earned hours and unearned hours (non-passing grades)
- Withdrawn courses (includes administrative/non-academic)
- Dual credit courses

Hours excluded from 3-Peat include:

- Up to 18 hours of remedial and developmental courses; Developmental coursework in excess of 18 hours is subject to additional charges
- Courses where hours can be repeated for credit (special topics/seminar/independent)
- Vocational/Technical/Workforce Education courses

Residency Requirements

The degree requirements for graduation in specific divisions of the University are explained at the beginning of each division in the catalog. In addition:

- The University of Texas at Arlington (UT Arlington) requires that each candidate for an undergraduate degree must complete and receive credit earned in residence at UT Arlington for a minimum of 25 percent of the semester credit hours required for a degree. The term "in residence" is defined as in residence at the U.T. System component which ultimately grants the degree. Types of credit that do not meet UT Arlington's credit-in-residence requirement are:
  - Transfer work of any kind
  - Credit by examination
  - Advanced placement credit
  - International Baccalaureate credit
  - High school dual enrollment credit
  - Military training
  - Foreign study credit that appears on the student's transcript as transfer credit
- Each candidate for an undergraduate degree must complete and receive credit in residence for at least 18 semester hours of advanced (3000/4000 level) course work, to include 12 hours of advanced courses in the major subject
- Successful completion of a course of study prescribed by the major department, including a minimum of 36 advanced hours, is required for an undergraduate degree at UT Arlington. Courses numbered with a first digit of 3 or 4 are classified as advanced courses.
- A minimum overall grade point average of 2.000 (C average) is required for an undergraduate degree. In addition, a minimum grade point average of 2.000 in the major is required. Individual units will determine the specific courses to be included in the calculation of the GPA in the major, and may have higher overall GPA requirements for graduation than a 2.000. (The College of Business requires a 2.000 overall grade-point average, 2.000 on all course work taken in the college, and 2.000 within the major and concentration area for those majors having a concentration.)
- Transfer credit is generally awarded for academic course credit earned from regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period. At the undergraduate level, no more than 30 of the semester hours required for any degree may be completed by correspondence and/or extension, but may include online course work or other coursework approved by the Dean of the academic department. This includes coursework from non-regionally-accredited institutions and Workforce Education courses. Workforce courses that are agreed upon in articulation agreements between accredited institutions of higher education and UT Arlington are transferable. In addition, where workforce courses support a degree program, the Dean of the college may approve those courses. Courses earned as part of an Associate of Applied Science program from a regionally accredited school are accepted, with some limitations, for the Bachelor of Science in University Studies degrees.
- Only the first four semester hours of exercise and sport activity (EXSA) and dance activity (DNCA) courses may be counted toward graduation. Additional activity courses taken will not be calculated in the student's grade point average. Each college, school or department will determine if activity courses satisfy degree requirements. Consult department academic advisor.
- Graduate courses (numbered 5000 and above) cannot be used to fulfill undergraduate degree requirements except in programs approved by the Undergraduate Assembly.
- To qualify for a second bachelor's degree, a student must complete all the degree requirements as stated in the catalog for that degree and must complete no fewer than 30 semester hours beyond those of the bachelor's degree program requiring the greater number of hours. The additional hours must be taken in residence at UT Arlington.

The Office of the Registrar conducts automated degree audits for each undergraduate candidate for graduation to ensure that no less than 25 percent of degree requirements were completed in residence at UT Arlington.

UT Arlington's credit-earned-in-residence regulations allow colleges and departments to impose additional residence requirements, but no college or department can override the minimum residency requirement [1].

To qualify for a second bachelor's degree, a student must complete all the degree requirements as stated in the catalog for that degree and must complete no fewer than 30 semester hours beyond those of the bachelor's degree program requiring the greater number of hours. The additional hours must be taken in residence at UT Arlington.

Transfer credit is generally awarded for academic course credit earned from regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period. At the undergraduate level, no more than 30 of the semester hours required for any degree may be completed by correspondence and/or extension, but may include online course work or other coursework approved by the Dean of the academic department. This includes coursework from non-regionally-accredited institutions and Workforce Education courses.

Two-Year Transfer Programs

The course offerings of the University are sufficient in the following fields for a student to complete the first two years of study toward a baccalaureate degree. The student must transfer to another institution to complete their studies. Information about the programs may be obtained from the Allied Health Coordinator in Life Sciences.

Program Options

- Gerontology
- Dietetics
- Occupational Therapy
- Pharmacy
- Dental Hygiene
- Rehabilitation Science
- Prosthetics and Orthotics

Professions

HEALTH PROFESSIONS

Medicine and Dentistry

In general, medical and dental school admission committees do not state a preference about an undergraduate major field, leaving the student free to choose a degree program suited to individual abilities and interests. Therefore, the student may choose any major, after conferring with an advisor, if the minimum requirements stated by the professional schools are met.

Admission Requirements for The University of Texas Medical and Dental Schools

- **English**
  - 6 semester hours of college English.
- **Biology**
  - 14 semester hours (12 semester hours of lecture & 2 semester hours of formal lab) of Biological Sciences.
- **Mathematics**
  - Statistics (MATH 1308) is required. Some school may accept Calculus in place of Statistics, however you will need to confirm with the Health Professions Advisor.
- **Physics**
  - 8 semester hours, as required for college science majors, including the corresponding laboratory experience are required.
- **Chemistry**
  - 8 semester hours of General Chemistry AND 8 semester hours of Organic Chemistry.

Testing

The Medical College Admission Test (New MCAT) or Dental Aptitude Test (DAT) as required.

It is strongly recommended that students taking the 2015 MCAT complete Biochemistry I, Into to Psychology, and Intro to Sociology. These courses will be covered on the new MCAT.

These requirements are representative of admission requirements for most other American medical and dental schools.

Health Professions Counseling and Advising

The Health Professions Advising Center, located in Room 107, Life Science Building, provides advice for students interested in medicine, physician assistant, dentistry, optometry, pharmacy and veterinary medicine. All pre-professional students should contact the office upon entering the University. The services provided include new student orientation, supplemental academic and career advising, and assistance in applying to professional school. In addition, numerous career materials including catalogs, applications and testing information are available in Room 106, Life Science Building. The health professions advisor coordinates the Health Professions Advisory Committee's evaluation recommended for each pre-medical and pre-dental student before applying to professional school. Students applying to professional schools should contact the health professions advisor at least one year prior to applying.

The Health Professions Advisory Committee, which is responsible for recommending students for medical and dental schools, bases evaluations on three factors: a student's academic record, resume, and personal qualities. The ideal applicant will demonstrate strength in all three areas. The committee may decline to recommend students who have not completed at least a portion of his/her pre-medical or pre-dental sciences at The University of Texas at Arlington, or may be unable to recommend students because their personal qualities are not known. Therefore, it is important that a student actively participate in health profession programs involving medical schools and the pre-health related student organizations. Also, students should interact with the faculty and pre-medical advisor for at least one year prior to medical school application so the advisors will have an opportunity to become familiar with the students' individual background.

THE LEGAL PROFESSION

Students are free to choose the degree program that best suits their interests and abilities; law schools do not require any particular major, degree plan, or courses. Students at UTA who are considering law school may take one of two routes, either: (1) selecting any major and minor, or (2) pursuing a major or minor that is specified as pre-law. Students wishing to focus on law-related courses at the undergraduate level should consider the pre-law degree plans in political science, criminal justice, philosophy, and history. Students who do not follow a pre-law degree track should choose any major and consult the advisor for that major's department. They also should confer with an advisor in the UTA Pre-Law Center with regard to recommended

additional courses, depending on their degree plans. Law schools look favorably on students with diverse academic interests. UTA graduates not only in the liberal arts and business but also in math, biology, and engineering, for example, have been successful in law school and beyond.

30 Hours to Major Requirement

30 HOURS TO UNDERGRADUATE MAJOR POLICY

1. Each student enrolled in a a bachelor's degree program at UT Arlington shall file a degree plan no later than the end of the second regular semester immediately following the semester in which the student earned a cumulative total of 30 or more semester credit hours for coursework successfully completed by the student, including transfer courses, international baccalaureate courses, dual credit courses, and any other course for which the institution the student attends has awarded the student college course credit, including course credit awarded by examination.
2. A student transferring to UT Arlington who begins their first semester with 30 or more semester credit hours of course credit for courses shall file a degree plan no later than the end of the student's second regular semester (fall or spring term). A student whose first term is summer will have through the end of his/her fall term to file the degree plan. Students who are unable to be admitted to a major of their choosing must see an academic advisor in the University Advising Center for special permission to enroll.
3. At each registration for a semester, a student who is required to have filed a degree plan before that semester shall verify that:
   a. the student has filed a degree plan; and
   b. the courses for which the student is registering are consistent with that degree plan
4. If a student does not timely file a degree plan as required, will be notified that the degree plan is required by law under Senate Bill 25 and require the student to consult with an academic advisor for that purpose during the semester in which the student receives the notice. The student may not obtain an official transcript from UT Arlington until they have filed a degree plan.

REVERSE ARTICULATION REQUIREMENT

Legislation passed as part of House Bill 3025 established a reverse articulation program for the awarding of an associate'a degree. Students who transferred from, or previously attended, a lower-division institution of higher education, earned at least 30 semester credit hours for coursework at the lower-division institution, and have completed 90 semester credit hours while enrolled at a general academic institution, will be contacted by their general academic institution to provide permission to send the lower-division institution the student’s transcript. The lower-division institution will evaluate the transcript to see if the student is eligible to receive an associate’s degree.

UT Arlington applies the Texas timely completion policy (https://www.uta.edu/records/courses/policies/timely-completion.php).

Graduate

Each graduate student must complete degree requirements in accordance with the catalog in effect at the time the student entered the graduate program in which the degree will be awarded or, at the student's option, the catalog of any subsequent year in which the student was in residence.

Please note that changes in University regulations and policies become effective for all enrolled students in the year for which the catalog is in effect, regardless of the year of initial enrollment. Thus, students may choose to satisfy degree requirements specified in an earlier catalog, but all must observe University regulations and follow graduation procedures prescribed in the catalog in effect in the intended semester of graduation.

Enrollment Requirements

All students must be enrolled in their graduate program in any term in which they are completing graduate degree requirements including taking the final master's exam, conducting research, or defending a thesis or dissertation. Enrollment in courses outside the major field will not satisfy enrollment requirements. Enrolled students who do not complete all requirements by the beginning of the next long semester must enroll to complete remaining degree requirements.

Students who are completing their final semester of study must be enrolled and receive an acceptable grade in the appropriate internship, project, thesis research or dissertation research course in order to graduate.

FUNDED STUDENTS

Funded students are normally expected to be enrolled as full time students while holding an assistantship or associateship. However, master's or doctoral students who need fewer hours to complete their degrees may petition for a waiver of full time enrollment as described in the Assistantship/ Associateship Policy (p. 83) section of this catalog.

Credit Toward Degrees and Certificates

Only courses completed with a grade of A, B, C, or P can satisfy graduate degree or certificate requirements. However, courses in which grades of D or F are earned will affect a student's grade-point average. A student must have a B (3.000) grade-point average in courses included in their degree plan and a B (3.000) average in all work undertaken as a graduate student to have credits applied toward a graduate degree or certificate.

CREDIT FOR REPEATED COURSES

A student may repeat a course only if that course is specifically designated in this catalog as one that can be repeated for credit. A student who fails to receive credit (earns a grade of D or F) may repeat the course in order to obtain credit, in which case the grades for both attempts will count in computing the student's overall grade-point average. No student will be allowed to repeat a course in order to change a passing grade of C or higher.

COURSE CREDIT APPLIED TO MORE THAN ONE DEGREE

No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs. The amount of shared credit between degrees in dual degree programs is limited and varies with the total number of hours needed to complete both degrees. Similarly, the amount of credit that can be shared in fast track programs is also limited. Details may be found in descriptions provided by participating programs elsewhere in this catalog.

CREDIT FOR ADVANCED UNDERGRADUATE COURSEWORK

Up to nine hours of advanced undergraduate credit from UT Arlington or another institution may be applied to a master's degree program if the hours have not been used to earn a previous degree and have the approval of the appropriate Graduate Studies Committee and the Academic Dean. Approved fast track programs may allow dual credit. Credit hours from undergraduate coursework may not be used to satisfy doctoral degree requirements.

GRADUATE COURSE CREDIT IN UNDERGRADUATE DEGREE PROGRAMS

Graduate-level course work may be used to satisfy up to 4 hours of upper-division undergraduate credit at the written request of the student with the approval of the graduate advisor of the program offering the graduate course. Any graduate courses transferred in as upper-division undergraduate work cannot be applied to a UT Arlington graduate degree plan unless the student has been admitted to a fast-track program prior to enrolling in graduate-level course work. Fast-track students may apply up to 9 graduate credit hours to both their undergraduate degree and a UT Arlington graduate master’s degree program.

ADVANCED UT ARLINGTON UNDERGRADUATES (CURRENT SENIORS)

An undergraduate student at the University of Texas at Arlington may not use graduate courses (numbered 5000 and above) to fulfill undergraduate degree requirements except as part of an approved fast-track program. However, an undergraduate needing no more than 12 hours in one term (six semester hours in one summer session) to complete all the requirements for a bachelor's degree may register for graduate courses and apply them toward a master's degree at UT Arlington under the following conditions:

1. In no case may a student previously dismissed from or denied admission to a graduate program enroll in graduate courses or reserve courses for graduate credit.
2. All work for undergraduate credit must be completed during that term in which the student initially enrolls in graduate courses.
3. Total registration for all work may not exceed 15 semester hours in a term (or 12 semester hours in the summer sessions).
4. The student must submit to the graduate advisor a "Reservation of Courses for Graduate Credit by Undergraduate Students" form (available from graduate advisors). The reservation must be approved by the graduate advisor and the Academic Dean. The Office of the Registrar must certify that the reserved credit will not be applied to the student's undergraduate degree requirements.
5. The student must have at least a 3.000 undergraduate GPA to be eligible to enroll in a graduate course and to reserve it for graduate degree credit.
6. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
7. Credit is officially accepted for application to a graduate program when a student is unconditionally admitted to UT Arlington.
8. A maximum of 12 semester hours of graduate level courses may be reserved.

STUDENTS HOLDING BACHELOR OR HIGHER DEGREES ENROLLED AS DEGREED UNDERGRADUATES

Students who have completed their undergraduate studies and have been awarded their bachelor's degree may enroll as degreed undergraduates in graduate-level course work and receive graduate credit at UT Arlington under the following conditions:

1. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
2. No more than 12 semester hours of credit earned while a degreed undergraduate may be applied for credit toward a master's degree. Students must file a request, approved by the graduate advisor, the Committee on Graduate Studies, and the Academic Dean to apply such credits toward a graduate degree.
3. All courses that are applied to a master's degree must have been completed no more than five years before enrollment in a graduate program at UT Arlington. If the student has completed more than 12 semester hours of graduate courses in undergraduate status, only graduate courses completed within five years of enrollment in a graduate program at UT Arlington will become part of the graduate record and considered in computing the student's grade-point average.

4. A student may elect to apply all graduate courses completed in the last five years toward their degree or to apply none of this work. Selective application of courses is not permitted. If any courses are applied for credit toward a master's degree, all courses completed within the last five years will become part of the graduate record.

CREDIT FOR COURSES TAKEN AS A NON-DEGREE SEEKING GRADUATE STUDENT

Up to 12 graduate level (5000 and above) semester credit hours earned as a special non-degree seeking student may be applied to a graduate degree program, subject to graduate grading practices (p. 92). Review and approval of the appropriate Committee on Graduate Studies and the approval of Graduate Admissions are required. All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade-point average.

GRADUATE CREDIT FOR EXTENSION CLASSES

Work done in extension classes may be applied toward an advanced degree under the same conditions that apply to transfer work, except that credit for extension work is limited to six credit hours.

COURSES THAT DO NOT PROVIDE GRADUATE CREDIT

- Personal Improvement Courses: Personal improvement individual or group music or art lessons and exercise and sports activities courses can not be used for the following: 1) to satisfy graduate degree requirements; 2) meet enrollment requirements; 3) in computation of graduate grade-point averages or determination of academic probation or academic good standing; 4) in calculation of grade-point averages for the purpose of admission to a Graduate Program or for certification for graduation from a Graduate Program.
- Audited Classes: University credit is not granted for audited classes and audited classes will not satisfy enrollment requirements.
- Correspondence Courses: Correspondence courses are not accepted for graduate credit.
- Credit by Examination: Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate may appear on graduate student transcripts.

Transfer Credit and Course Waivers

TRANSFER CREDIT APPLIED TO MASTER'S DEGREES

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's degree program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

No more than nine hours of transfer credit will be granted except in the professional master's programs that require more than 36 hours of coursework. In such programs, the number of transfer hours is limited to 25 percent of the total program hours. This rule does not invalidate agreements that are stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate graduate advisor and Committee on Graduate Studies. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington. A list of approved credit must be sent to the Office of Admissions to be posted to the student's university record.

WAIVING COURSES REQUIRED FOR DOCTORAL DEGREES

Graduate-level coursework completed in the student’s major area of doctoral study at institutions of recognized standing that grant doctoral degrees in those subject areas may serve to establish the student’s competency in equivalent UT Arlington courses. Competency demonstrated by successful completion of equivalent courses may provide a basis for waiving some UT Arlington course requirements and the credit hours associated with those courses.

Waivers must be recommended by the student’s graduate advisor and current supervising professor and their recommendation must be approved by both the Committee on Graduate Studies of the student’s major area. Only courses in which the student has earned a B (3.0) or better (or a P if the UTA course is also graded P/F) will be considered for purposes of a waiver. In no case will final semester Dissertation course (6x99 or 7399) requirements be waived. An approved list of waived courses must be sent to the Office of the Registrar to be posted to the student's university record.

TRANSFER CREDIT APPLIED TO GRADUATE CERTIFICATES

Equivalent coursework completed at other institutions of recognized standing may be transferred to a certificate program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements stated elsewhere in this catalog. Transfer credit will

be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate graduate advisor and Committee on Graduate Studies. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington. A list of approved credit must be sent to the Office of the Registrar to be posted to the student's university record.

Departmental, Program and College Program Manuals for Students

Many departments and programs issue program manuals, procedures and policy manuals, graduate student handbooks, and other informational publications for students and faculty in graduate programs. These publications may provide detailed and useful information; however, they are not statements of official policy of the University of Texas at Arlington nor of the University of Texas System. In all matters the *Rules and Regulations* of the Board of Regents of The University of Texas System, the *Handbook of Operating Procedures* of the University of Texas at Arlington and the University of Texas at Arlington Catalog shall supersede departmental, program or college publications.

Master's Degree Requirements

Degree requirements and academic performance standards given in this section are the minimum required. Satisfying these general requirements and standards, however, does not imply that all degree and program requirements have been met. Many programs set special course requirements and may require higher grade-point averages or other academic standards than those given in this section. Such program requirements and standards are included in individual program descriptions in this catalog and in departmental and college program manuals or policy statements. These special requirements shall not be considered in conflict with this catalog and shall have the same force as this catalog.

Degree Plans and Required Hours

Three degree plans (thesis, thesis substitute and non-thesis) may lead to the master's degree. While some programs offer all three options, other do not and students should go to the information in this Catalog on each program to learn what choices are available. All degree plans require at least 30 semester hours of study. Some require more.

The **thesis degree plan** requires a minimum of 30 hours which include at least 6 hours of thesis course credit and at least 24 hours of other prescribed and elective course work. Student are expected to conduct research for their theses and defend the final version of their thesis while enrolled in theses courses. Students receiving advice and assistance from a faculty member in the preparation of a thesis must register for the appropriate thesis research course even if they are not on campus. Once the student is enrolled in the thesis course, continuous enrollment is required. The student must be enrolled in an appropriate thesis course during the term in which the thesis is defended and the final Master's Examination is unconditionally passed. The degree candidate must defend the thesis in a final oral examination open to the public.

The **thesis substitute degree plan** requires successful completion of required and elective coursework which generally consist of lectures and seminars. However, this degree plan also includes a project, research or internship course which may involve internship experiences, reports or projects prepared in certain graduate seminar, conference or research courses or preparation of a design thesis in Architecture. Thesis substitute students must complete and pass a Final Master's Examination devised by their degree program.

The **non-thesis degree plan** does not require a thesis or a thesis substitute activity. Students complete a number of required and elective courses and must pass a Final Master's Examination devised by their degree program.

Time Limit

Programs for the master's degree must be completed within six years (time in military service excluded) from initial registration in a graduate degree program. Students who exceed the published time limits for completing the graduate degree but wish to graduate, must petition the Academic Dean for an exception to the time limit policy.

Residence

All degree seeking graduate students must meet residency goals reflecting scholarly engagement and immersion in research, scholarship, creative work and professional development in his or her degree program. Residency requirements can be met through one of three mechanisms:

- The equivalent of two terms of full-time enrollment: Students completing residency via enrollment should understand that the goals of residency are focused effort in activities related to their degree.
- Program-specific alternative residency plan: Academic degree programs may have alternative methods by which enrolled students achieve residency goals. These alternatives, if any, are described in an academic program’s description of its degree requirements. Such plans must have prior approval by the Graduate School Dean.
- Individual alternative residency plan: Proposals for alternative residency from individual students can be submitted for approval by the Graduate School Dean.

Foreign Language Requirement

A reading knowledge of at least one foreign language (classical or modern) is required by some departments or programs for master's degree candidates. Specific language requirements, if any, are given in the individual departmental and program degree descriptions.

Supervising Committees

The Academic Dean will appoint for each master's student a supervising committee upon recommendation by the graduate advisor and the appropriate Committee on Graduate Studies. The supervising committee conducts the final thesis examination for thesis degree plan candidates and determines scope, content and form of the final master's comprehensive examination for thesis substitute and non-thesis degree plan candidates. The committee will normally consist of at least three members of the graduate faculty and will be responsible for the design of the student's program. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Graduate Dean. A student may request that more than one external members participate on the supervising committee. However only one of these may vote. Non-voting members must be in addition to the three voting members and must be approved by the Graduate Dean.

Final Master's Examination

A final program examination is required for all master's degree candidates. The final master's examination can result in: 1) an unconditional pass with a recommendation to the Academic Dean that the candidate be certified to receive the earned degree; 2) a conditional pass with the requirement that additional conditions be met, which may include further work on the thesis or thesis substitute, additional coursework with a minimum specified grade-point average, or both (in all cases, the final master's examination must be repeated within a specified period); 3) failure, with permission to be re-examined after a specified period; or 4) failure, with recommendation to the Academic Dean that the candidate be dismissed from the program. The Final Examination Report must filed with the Office of the Registrar's regardless of the outcome. Most programs limit to two the number of repeats of the final master's examination.

For **thesis degree plan** candidates, the examination will be an oral defense of the thesis. The examination will be conducted by all members of the student's supervising committee but will be open to all members of the faculty and the public. The thesis examining committee must have copies of the thesis at least two weeks prior to the thesis defense. Thesis degree plan candidates must submit an copy of the unconditionally passed thesis to the Library following the procedures for electronic submission.

For **thesis substitute** or **non-thesis degree plan** candidates, the final examination will be a examination that is written, oral or both. The scope, content and form of the examination(s) is to be determined and administered by all members of the student's supervising committee. Some programs require successful completion of a specified course in the final term of study to satisfy this requirement.

Master's Thesis

All master's students in the thesis option must be aware of requirements, components and deadlines associated with the thesis, final defense, and submission of the thesis to the Library. The thesis must be accepted by the Library by published deadlines in order to graduate from UT Arlington.

ENROLLMENT REQUIREMENT

All students are required to enroll in a total of at least 6 thesis hours prior to graduation. Additionally, thesis students must be enrolled in a thesis course in which the grade of P can be assigned in the term in which the thesis is defended. Social work students will enroll in SOCW 6393 to conduct thesis research and SOCW 6398 in the term in which the thesis is defended.

THESIS DEFENSE

The thesis defense will be a public oral examination open to all members of the faculty. Questioning of the candidate will be directed by the student's thesis supervising committee. All members of the student's committee must be present at the defense.

Although the defense is concerned primarily with the thesis research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the thesis problem. The thesis defense may result in a decision that the candidate has 1) passed unconditionally; 2) passed conditionally with remedial work specified by the committee; 3) failed, with permission to be re-examined after a specified period; or 4) failed and dismissed from the program. The thesis must be approved unanimously by the student's thesis supervising committee and by the Academic Dean. Regardless of the outcome of the defense, the results must be submitted on the Final Examination report to the Office of the Registrar.

THESIS MANUSCRIPT FORMAT, FINAL SUBMISSION AND ARCHIVING

Students must submit an acceptably formatted thesis manuscript to the UTA Library before the master's degree can be conferred. Details regarding thesis formats can be found on the UT Arlington Library website (http://library.uta.edu/).

The format of all thesis manuscripts must be reviewed and approved by the student's supervising committee. When the final committee- approved copy of the thesis is submitted to the Library via the University's electronic submission process, it will be archived as submitted. Therefore, care must be taken by the student, supervising professor and thesis committee that the final document meets appropriate academic and professional standards. Students submitting the final copy of their thesis must also complete and submit the Intellectual Property Statement form. Forms related to permissions

to use work contributed by others in the thesis will be required if the reported research was conducted jointly with other people or when content included in the thesis is the intellectual property of another person and requires permission before it can be used in the manuscript. The final thesis is University property and a student may make no private agreements with employers, funding sources, or others that restrict or infringe upon University rights. Thesis copyrights, where applicable, are held by the student author. The thesis will be archived by the Library and be available to interested members of the public. Under some circumstances a student may request to delay publication of the thesis for a limited period of time. Dissertation-related fees are explained in the Tuition and Fees section of the Catalog.

Dual Degrees

Students may pursue dual degree programs other than those specifically defined in the catalog with prior approval of the appropriate Committees on Graduate Studies and the Academic Dean.

Students in any dual degree program must be admitted to each participating program. Unless otherwise stated under the dual degrees programs specified elsewhere in this catalog, the number of hours that may be used jointly will be determined by the total number of hours required by both degree programs if completed separately. For purposes of dual degree programs, the total number of semester hours required for both degrees if completed separately is defined as the number of semester hours required for a student to complete all advanced degree requirements (excluding deficiency, leveling and prerequisite courses) for both degrees.

1. Six semester hours may be used jointly when the total number of hours required for both degrees is 60;
2. Six to 12 semester hours may be used jointly when the total number of hours required for both degrees is between 60 and 72 hours;
3. Six to 18 semester hours may be used jointly when the total number of hours required for both degrees exceeds 72 hours.

All grades earned in dual degree status are used for purposes of determining academic good standing, academic probation and graduate requirements.

Students in a graduate degree program who decide to pursue a dual degree must be admitted to the second program prior to completing the degree requirements of the first.

All dual degree students must complete the second degree within three academic years following completion of the first degree. Students may apply to graduate and receive both degrees in the same semester. However, a student may choose to receive each degree in different semesters. When all requirements for one of the degrees in the dual degree program are completed, the student may apply to have that degree conferred and will be able to continue in the unfinished degree program until its requirements are completed or until the 3-year time limit runs out.

Students must be in good standing in both programs to continue in a dual degree program. Students who are dismissed from either program are no longer considered to be in a dual degree program. These students may enroll in and use courses for credit toward the degree program in which they are in good standing only. Students may not take courses in the program from which they have been dismissed and may not use such courses for dual degree credit.

Dual degree programs are available at the master's level only. Not all graduate programs participate in dual degrees.

Doctoral Degree Requirements

The Doctor of Philosophy (PhD) is the highest degree offered by The University of Texas at Arlington. The degree is awarded only for academic work of distinction through which the student demonstrates superior scholarship and capacity for original work. Requirements for the doctoral degree listed below are the minimum required. Meeting all of these requirements does not result automatically in the awarding of the doctoral degree. All departments and programs have additional requirements for a high level of scholarly achievement that must be met by successful doctoral candidates. In all doctoral programs, the basic requirements are that a student 1) attain mastery of a field of knowledge as determined by the appropriate Committee on Graduate Studies and demonstrated in a general examination; and 2) present evidence of a capacity to complete a significant program of original research by preparation of a dissertation.

To be admitted to a doctoral program, an applicant must have completed a master's degree or at least 30 semester credit hours of graduate coursework. Students who do not meet these requirements but who intend to complete a doctoral degree should apply as a "BS/BA to PhD" or "Doctoral Bound" student if the program offers such options.

Doctoral Degree Plans and Required Hours

The doctoral degree cannot be earned solely by passing certain courses and accumulating a specified number of credit hours; however, a department or program may require a core group of courses for all of its doctoral students. Courses are generally concentrated in the student's major field, but some are normally taken in one or more complementary areas. In interdepartmental programs, the major work may be divided among two or more primary fields.

The University imposes no specific semester-hour requirements for the doctoral degree except for hours that are required to meet residency requirements.

Time Limit

All requirements for the doctoral degree must be completed within four years after the student unconditionally passes the comprehensive exam. Students who exceed the published time limits for completing the graduate degree but wish to graduate, must petition the Academic Dean for an exception to the time limit policy.

Residence

All degree seeking graduate students must meet residency goals reflecting scholarly engagement and immersion in research, scholarship, creative work and professional development in his or her degree program. Residency requirements can be met through one of three mechanisms:

- The equivalent of two terms of full-time enrollment: Students completing residency via enrollment should understand that the goals of residency are focused effort in activities related to their degree.
- Program-specific alternative residency plan: Academic degree programs may have alternative methods by which enrolled students achieve residency goals. These alternatives, if any, are described in an academic program's description of its degree requirements. Such plans must have prior approval by the Dean of the Graduate School.
- Individual alternative residency plan: Proposals for alternative residency from individual students can be submitted for approval by the Dean of the Graduate School.

Foreign Language Requirement

Prior to scheduling the doctoral comprehensive examination, the University requires evidence that the student has a reading knowledge of one foreign language applicable to the student's field of study or has attained proficiency in a research-tool area such as computer sciences or experimental statistics.. The foreign language requirement may be met by 1) successfully passing an examination prepared by an appointee of the Academic Dean; 2) making an acceptable score on the Educational Testing Service Graduate School Foreign Language Test; or 3) earning a grade of B or higher in French, German or Russian 4331 and 4332, or equivalents. The foreign language substitute research tool requirement may be met by a method determined by the appropriate Committee on Graduate Studies and approved by the Academic Dean. Other suitable substitutes may be approved by the Committee on Graduate Studies and Academic Dean.

Diagnostic Evaluation

During the student's first year of doctoral program work the student must demonstrate potential to successfully complete a degree program. The method of assessing the student's potential will be determined by the appropriate Committee on Graduate Studies and may be in the form of a written or oral examination, personal interviews with faculty members, successful completion of certain courses in the first semester of residence, or by any combination of these methods. Results of the diagnostic evaluation may be 1) approval to continue in the doctoral program; 2) approval to continue with specified remedial work; 3) failure, but with permission for assessment through a second diagnostic evaluation after a specified period; or 4) failure and termination in the program. The student must be enrolled in the graduate program in the term in which he/she completes the diagnostic evaluation.

The results of the diagnostic evaluation must be filed in the Office of the Registrar no later than after completion of 18 semester hours of coursework while enrolled in a doctoral program at UT Arlington .

After the student successfully completes the diagnostic evaluation, the Academic Dean will approve an examining committee. Members for the committee are recommended by the graduate advisor and appropriate Committee on Graduate Studies. The committee will consist of no fewer than 3 voting members, at least two of whom must be from the student's major area. Committees in interdisciplinary programs must include at least four voting members with two members coming from each discipline. Individual programs may require the committee to have more members and students must conform to such requirements. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Graduate Dean. A committee may have more than one external member but only one may have voting privileges. Students should consult with their program's graduate advisor to make sure their committees have sufficient membership to meet program requirements.

The committee is responsible for design and direction of the student's program.

Comprehensive Examination

Students are eligible to take the comprehensive examination after giving evidence to their doctoral committee of adequate academic achievement by having completed all or most coursework requirements for a degree. The comprehensive examination usually marks the end of formal coursework and the beginning of concentrated work on dissertation research and preparation. The student must be enrolled in the term in which he/she takes the comprehensive examination.

The comprehensive examination may be written, oral, or both. Its scope, content, and form are determined by the student's examining committee with approval of the appropriate Committee on Graduate Studies.

In some departments and programs comprehensive examinations are given semiannually so students should consult their graduate advisor in that program for appropriate regulations and procedures.

The comprehensive examination may result in 1) unconditional pass and recommendation to proceed to the next phase of the program; 2) approval to remain in the program, but required to meet certain specified additional criteria; 3) failure, but with permission to retake the examination after a period specified by the examining committee; or 4) failure and dismissal from the program.

Dissertation

The dissertation represents the culmination of the student's academic efforts and so is expected to demonstrate original and independent research activity and be a significant contribution to knowledge.

All doctoral students must be aware of requirements and deadlines associated with the dissertation, final defense, and submission of the final copy of the dissertation.

ENROLLMENT REQUIREMENTS

1. Registration in an independent study, research, or similar course implies an expected level of effort on the part of the student that is at least equivalent to that of an organized course of the same credit value.
2. Doctoral students will not be required to register for more than nine credit hours during any term with these exceptions:
   a. Doctoral students who are enrolled in nine credit hours of organized courses and who are also doing research related to their dissertation may be required to register for up to three hours of research for a total of 12 credit hours.
   b. Doctoral students supported as a graduate research or teaching assistants may be required to register for 12 credit hours (no more than nine credit hours to be in organized courses), as determined by the students' graduate program.
3. Doctoral students who are required to register solely to satisfy the continuous enrollment requirement may register 3 credit hours during each term.
4. Doctoral students may not register for more than 12 semester hours in a term unless such registration is approved by the student's graduate advisor.
5. A doctoral student working on a dissertation should be enrolled in an appropriate 6X99 or 7399 dissertation course. Once the student is enrolled in a dissertation course, continuous enrollment is expected. A student receiving advice and assistance from a faculty member in the preparation of a dissertation must register in the course even if the student is not on campus. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken two times. If a student does not complete their doctoral degree and graduate during the second attempt in 7399, they must enroll in 6699 in subsequent terms to complete the requirements for their degree..

DISSERTATION COMMITTEE

After the student has passed the comprehensive examination, the doctoral supervising committee may be altered or expanded to accommodate the dissertation research needs of the student. The supervising committee is responsible for providing feedback regarding the student's dissertation, attending the defense, and determining the results of the student's defense. The committee will consist of no fewer than 3 voting members. Individual programs may require the committee to have more members and students must conform to such requirements. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Graduate Studies Office. All voting and non-voting external members of the committee must be approved by the Graduate Dean. Students should consult with their program's graduate advisor to make sure their committees have sufficient membership to meet program requirements.

DISSERTATION DEFENSE

Doctoral students must be enrolled in the appropriate Dissertation course in the term in which he/she defends the dissertation (see Enrollment Requirements above).

The dissertation defense will be a public oral examination open to all members (faculty, students and invited guests) of the University community. Questioning of the candidate will be directed by the student's dissertation supervising committee. All members of the student's committee must be present at the defense.

Although the defense is concerned primarily with the dissertation research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the dissertation problem. The dissertation defense may result in a decision that the candidate has 1) passed unconditionally; 2) passed conditionally with remedial work specified by the committee; 3) failed, with permission to be re-examined after a specified period; or 4) failed and dismissed from the program. The dissertation must be approved unanimously by the student's dissertation supervising committee. Regardless of the outcome of the defense, the results of the defense must be submitted to the Office of the Registrar.

DISSERTATION MANUSCRIPT FORMAT, FINAL SUBMISSION AND ARCHIVING

Students pursuing a doctoral degree must submit an acceptably formatted manuscript to the UTA Library before the degree can be conferred. Details regarding dissertation formats can be found on the UT Arlington Library website (http://library.uta.edu/).

The format of all dissertation manuscripts must be reviewed and approved by the student's supervising committee. When the final committee-approved copy of the dissertation is submitted to the Library via the University's electronic submission process, it will be archived as submitted. Therefore, care must be taken by the student, supervising professor and the other committee that the final document meets appropriate academic and professional

standards. Students submitting a final copy of their dissertation must also complete and submit the Intellectual Property Statement form and the Survey of Earned Doctorates. Forms related to permissions to use work contributed by others in the dissertation will be required if the reported research was conducted jointly with others or when content included in the dissertation is the intellectual property of another person and requires permission before it can be used in the manuscript. The final dissertation is University property and a student may make no private agreements with employers, funding sources, or others that restrict or infringe upon University rights. Dissertation copyrights, where applicable, are held by the student author. The Dissertation will be archived by the Library and be available to interested members of the public. Under some circumstances (https://libraries.uta.edu/services/thesis-dissertation/) a student may request to delay publication of the dissertation for a limited period of time. Dissertation-related fees are explained in the Tuition and Fees section of the Catalog.

Credit Toward Certificates

Generally, only courses completed with a grade of A, B, C, or P can satisfy graduate certificate requirements. A student must have a B (3.000) grade-point average in courses included in their degree plan and a B (3.000) average in all work undertaken as a graduate student to have credits applied toward a graduate certificate. However, some certificate programs require that a student earn a B or higher in each required course. Courses in which a student earns an unacceptable grade will none-the-less affect that student's grade-point average. . Students should examine requirements carefully and ask the program advisor for clarification if needed.

GRADE POINT AVERAGE

All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade point average.

TRANSFER CREDIT APPLIED TO GRADUATE CERTIFICATES

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's certificate program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade point average.

The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate graduate advisor and Committee on Graduate Studies. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington. A list of approved credit must be sent to the Office of the Registrar to be posted to the student's university record.

Registration

To attend The University of Texas at Arlington any given term, a student must register and pay fees. All registration at UT Arlington may be done online in MyMav (http://www.uta.edu/mymav/). The current term's Registration Timetable (https://www.uta.edu/administration/registrar/calendars/registration/) gives the exact dates and times for registration. General requirements are below.

Scheduled courses and syllabi can be found on the Schedule of Classes in MyMav (https://www.uta.edu/mymav/). Faculty profiles (https://www.uta.edu/academics/faculty/) of regular instructors can be found on the UTA website.

Undergraduate Student Registration Requirements (p. 68)

Graduate Student Registration Requirements (p. 71)

Advising Prior to Registration

Students new to UT Arlington, many continuing students and readmitted former students must be advised by their major department academic advisor prior to registration each term. Undeclared students should meet with their academic advisor in the University Advising Center. Students can check to see if they need to be advised by checking their Student Center using MyMav (http://www.uta.edu/mymav/), the computerized, high-security student records system used by UT Arlington. If advising is required, a service indicator (enrollment hold) will appear on the student's record. The service indicator must be released by the academic advisor before the student can register.

Typically, the advising period for the Spring term opens in October, and for the Summer and Fall terms in March. Meeting with an academic advisor is strongly recommended even if the student is exempted from advising.

Registrant Responsibilities

- The student must know and abide by all University policies and deadlines.
- UT Arlington's **Student Responsibility Statement** includes specific information on registrant responsibilities.

- Students must drop courses prior to the first class day for a given term to avoid financial responsibility.
- A student's registration is not automatically cancelled for non-attendance. A student should either pay tuition and fees in full by the designated deadline or take the appropriate steps to withdraw.
- Students must apply for financial aid using the Free Application for Federal Student Aid (FAFSA).

Tuition and Fee Refund Appeals

If you experienced extraordinary events during a semester that caused you to be academically unsuccessful during that term, you may be eligible for a one-time tuition refund appeal.

Effective September 22, 2014, appeal requests must be made within **90 days of the end of the semester** which you are appealing and must include appropriate supporting documentation.

Appeals older than 90 days or those submitted without supporting documentation will not be reviewed.

There are significant academic and financial consequences that may result when a tuition refund appeal is granted. If you have financial aid for the semester you are appealing, **you will have to return the financial aid received in full** if you are approved.

Extraordinary events include serious illness of the student or an immediate family member, death of an immediate family member, military deployment that was not previously scheduled or other similar unforeseen event.

The University will approve a refund appeal for one semester only during your entire academic career at UT Arlington. This includes all voluntary and involuntary separations. In particular, if the event is related to a medical condition, then it is your responsibility to make an informed decision, which may require consultation with a physician, prior to enrolling in future coursework since an appeal is granted on a one-time basis for a given medical condition. While you will not be granted a second tuition and fee refund, you may have the opportunity to withdraw from coursework with a grade of W or Q in future semesters, assuming you meet all appropriate deadlines and regulations related to withdrawal.

Decisions by the appeals committee are final.

Financial Aid Impact

- There are significant academic and financial consequences that may result when a tuition refund appeal is granted. If you have financial aid for the semester you are appealing, **you will have to return the financial aid received in full** if you are approved.

Supporting Documentation

Appropriate supporting documentation includes but is not limited to:

- **Medical** - A dated and signed letter from the physician explaining your illness on letter head, medical bills or other pertinent medical documentation must be provided.
- **Death in the family** - A death certificate or an obituary from the newspaper must be provided. Pamphlets from the funeral will not be accepted. The death must be from your immediate family.
- **Deployment -** Deployment papers for Active Duty must be provided. They must state Active Duty, not training.
- **University Error:** A memo on UT Arlington letter head from the appropriate administrator at chair level or higher stating the situation and identifying University error must be provided.

If documentation is not in English, it will not be accepted. If you are providing copies, it must be translated.

Additional Information

- If you are appealing for medical reasons and you have been granted a refund for a prior semester on the basis of the documentation provided, then your request will not be considered for a second semester. Medical refunds are given on a one time basis.
- Appealing fees (departmental, library, etc.) is out of the appeal committee's purview and your request will not be reviewed.
- Charges for all other university services such as housing, meal plans, and parking are not included in this appeal. You should contact the appropriate university office for questions regarding these charges.
- If you are appealing due to work-related issues or failure to receive expected funding such as loans, Veterans Affairs funding, sponsorships, etc., your request will not be considered.
- Appealing grades received is out of the appeal committee's purview. Please speak with the appropriate department or refer to the Undergraduate Catalog regarding grade appeals or grievances.

- Tuition refund appeals are for all courses taken within a term, not for individual courses. If you are appealing one class only, you should contact your academic department.
- Classes must be dropped/withdrawn prior to submission of the appeal request.

Terms and Sessions

There are three terms and seven regularly scheduled sessions in the academic calendar year at UT Arlington. The three terms are Fall, Spring and Summer.

A session called Dynamic Dated Session is associated with all three terms. This session has classes scheduled outside of the normally scheduled time periods and is used for special programs known as Accelerated Online programs. Only students associated with these programs can enroll in the Dynamic Dated Sessions.

Fall Term

The Fall term has six sessions. The regular 16 week session typically begins the fourth week in August and ends the second week in December. There are also two 8 week sessions and three 5 week sessions. Final grades are posted at the end of each session. Academic standing is posted in the third week of December.

Commencement exercises for the Fall term are typically held the second week of December, following the conclusion of the term.

Spring Term

The Spring term has seven sessions. The first session is Intersession Winter (ISW). It begins the week after the Fall term ends and concludes the week before the start of the Spring term regular session. Final grades are posted the following week; however, academic standing is not run until the end of the Spring term.

The Spring term regular 16 week session typically begins the Tuesday after the Martin Luther King Memorial Holiday and ends the second week in May. There are also two 8 week sessions and three 5 week sessions. Final grades are posted at the end of each session. Academic standing is posted in the third week of May.

Commencement exercises for the Spring term sessions are typically held the second week of May, following the conclusion of the Spring regular session.

Summer Term

The Summer term has seven sessions. The first session is Intersession Summer (ISS). It typically begins the week after the Spring regular session concludes and ends the Friday before the Memorial Day Holiday weekend.

The second session of the Summer term is the Summer 14-Week Session (14W). It begins currently with the Intersession Summer and concludes the second week of August.

The third session of the Summer term is the First 5-Week Session (5W1). It typically begins the first week of June and generally ends the first week of July.

The fourth session of the Summer term is the Summer 11-Week Session (11W). It begins concurrently with the First 5-Week Session and typically ends the second week of August.

The fifth session of the Summer term is the First 7-Week Session (7W1). It begins concurrently with the First 5-Week Session and typically ends the last week of June.

The sixth session of the Summer term is the Second 7-Week Session (7W2). It typically beings immediately after the Fourth of July holiday and ends currently with the Summer 11-Week Session.

The seventh session of the Summer term is the Second 5-Week Session (5W2). It typically begins the week after the Fourth of July and ends concurrently with the Summer 11-Week Session in the second week of August.

Final grades are posted following each of the sessions. Academic standing for grades earned in all summer sessions is run in the third week of August.

Commencement exercises for the Summer term are typically held the second week of August, following the conclusion of the Summer sessions.

Enrollment Requirements

A student’s enrollment status is determined by the number of credit hours for which the student is enrolled in residence in a semester.

The way credits are counted in summer terms and the depiction of summer term enrollment requirements shown in the table require some explanation. In the summer, the credits taken in the Summer Intersession, the two 5-week, the two 7-week, and the one 11-week terms are added together to

determine a student's summer enrollment status. The table shows how many summer credits in total have to accumulate across these terms to meet criteria for less than, half-time, half-time and full-time. For example, if a graduate student accumulates 3 credits in each of the two 5 week terms he or she will have been enrolled in 6 credits in the summer and will be considered a Full-Time student throughout the summer.

Immigration policy requires international students be enrolled full-time during the Fall and Spring terms. They are not required to enroll in Summer or intersession semesters unless it is their first term of enrollment (more information regarding international student enrollment requirements can be found at www.uta.edu/oie/ (https://nam05.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Foie%2F&data=02%7C01%7Ccekydd%40uta.edu%7C2abd5fbbfaeb4038c07608d7f0340a1a%7C5cdc5b43d7be4caa8173729e3b0a62d9%7C0%7C0%7C637241978610207453&sdata=cgCjV3IxpCbqXcvaW8JZyj1PzM3QH%2B0BNzs24j21atU%3D&reserved=0)) . Graduate teaching or research assistants must meet minimum enrollment in each semester in which he or she holds a graduate assistantship. Assistantship enrollment requirements are described elsewhere in the Assistantship/Associateship Policy section (https://nam05.safelinks.protection.outlook.com/?url=http%3A%2F%2Fcatalog.uta.edu%2Facademicregulations%2Ffinancialaid%2F&data=02%7C01%7Ccekydd%40uta.edu%7C2abd5fbbfaeb4038c07608d7f0340a1a%7C5cdc5b43d7be4caa8173729e3b0a62d9%7C0%7C0%7C637241978610212443&sdata=xsYL5eWZrST%2BmoAc6BKiAZOwXeAOmmcVsSyjVPSGmq4%3D&reserved=0) of this catalog.

The amount of financial aid a student may receive in any given semester is based on the number of credits he or she takes. To receive financial aid, students must be enrolled at least half-time. The following table shows how credit hours related to full, half and less than half-time enrollment.

Undergraduate[1]

Credit Hours Required for Half-Time or Full-Time Status	Less Than Half-Time	Half-Time	Full-Time
Long Semester (fall or spring)	5 or less	6	12
A 5-Week Session	5 or less	6	N/A
A 7-Week Session	5 or less	6	N/A
11-Week Session	5 or less	6	12
Intersession winter or summer[3]	3	N/A	N/A

Graduate[2]

Credit Hours Required for Half-Time or Full-Time Status	Less Than Half-Time	Half-Time	Full-Time
Long Semester (fall or spring) other than Graduate Nursing	4 or less	5	9
Long Semester (fall or spring) Graduate Nursing	2	3	6
A 5-Week Session	2	3	6[3]
A 7-Week Session	2	3	6[3]
11-Week Session	2	3	6[3]
Intersession winter or summer[3]	3	N/A	N/A

1 For undergraduate students, 12 semester credit hours equal full-time status for any term and can be achieved by adding the total hours for each session within a term.

2 For graduate students, 9 semester credit hours equal full-time status for any long term (Fall and Spring) However, 6 semester credit hours equals full-time status during the Summer and can be achieved by adding the total hours for each session within a term. For graduate nursing students, 6 semester credit hours is full time enrollment.

3 For all students, Winter intersession hours are combined with the Spring session, and Summer intersession hours are combined with the total hours taken in the summer 5-week I, 5-week II, 7-week I, 7-week II, and 11-week sessions.

Class Meeting Times

On-campus class meeting times are typically scheduled Monday through Friday, 8 a.m. to 10 p.m. Class meeting times can vary; consult the Schedule of Classes (https://www.uta.edu/administration/registrar/students/registration/schedules/) for specific days and times.

Course Descriptions & Syllabi

Course information, including the course syllabus when available, can be found online at Instructor and Course Syllabus Information (https://www.uta.edu/academics/courses-and-schedules/courses/).

Enrollment

To attend UT Arlington in any given term, a student must accept financial responsibility for any enrollment transactions, register and pay tuition and fees. Registration at UT Arlington is done online using MyMav (http://www.uta.edu/mymav/). The current term's Registration Timetable gives the exact dates

and times for registration. The Schedule of Classes (https://www.uta.edu/administration/registrar/students/registration/schedules/) is updated for the Spring term in mid-October, and in mid-March for the Summer and Fall terms. Students log in to MyMav (http://www.uta.edu/mymav/) to register.

For payment of tuition and fees information, refer to Tuition, Fees, and Charges (p. 77) section of this catalog for registration billing and payment.

Students who are no longer eligible for enrollment at the start of the term will have their registration canceled and their tuition and fees refunded.

Late Registration

Late registration is held each term for students who are unable to register during the regular registration period. Late registration at UT Arlington is done online using MyMav (http://www.uta.edu/mymav/). Late registration fees are assessed for enrollment transactions made during the late registration period.

Scheduling Changes

Students can elect to make changes to their course schedules on MyMav (http://www.uta.edu/mymav/).

- **Adding Classes:** Students can add classes through self-service in MyMav or in person in the major academic department (or the University Advising Center for undeclared students) from the beginning of the registration period through the late registration period. A student will not be permitted to add a course for credit or make a section change after the last day of late registration.
- **Dropping Classes:** Students can drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop (withdrawal). After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. In a long (fall or spring) term, this point is through the tenth week of classes.
- No grade or withdrawal is posted if a student drops a course before 5:00 pm Central Standard Time on the Census Date of that term.
- For additional information on withdrawing from classes**,** see the Withdrawals section on the Undergraduate and Graduate tabs.
- Although unusual, a section may be cancelled due to low enrollment or staffing considerations. The department that cancels the class should notify any students already enrolled and assist with alternate arrangements. At the beginning of the term, students should always check for changes regarding class meeting times or classroom locations.

Bacterial Meningitis Documentation Requirement

As of January 1, 2012, Texas college students new to the institution, including transfer students, and students returning to UT Arlington after an absence of at least one fall or spring term who are under 22 years old must submit documentation of immunization against bacterial meningitis. Documentation includes a copy of the immunization record or a certificate signed by a health practitioner. Under the law, students must have received the vaccine *within the past five years and no less than 10 days before the start of the first session* of enrollment at UT Arlington. Limited exemptions are specified in the state law (https://www.highered.texas.gov/bacterial-meningitis/), including opting out for reasons of conscience. Students who fail to meet this requirement will be dropped from courses.

Details for submitting proof of vaccination are emailed to students' UT Arlington email address, as well as available on the registrar website (https://www.uta.edu/administration/registrar/students/policies-procedures/meningitis/).

Students planning to move into campus housing (http://www.uta.edu/housing/applications/meningitis.php) must comply with the meningitis vaccination requirements at least 10 days from a housing contract offer or 10 days before move in, whichever is earliest. Students will not be allowed to move in to campus housing without submitting timely proof that they have complied with the meningitis vaccination law.

For additional information regarding UT Arlington's administration of the Texas meningitis vaccination law, please visit the Registrar's Office meningitis web page (https://www.uta.edu/administration/registrar/students/policies-procedures/meningitis/) or THECB Meningitis (https://www.highered.texas.gov/bacterial-meningitis/). The legal codes supporting this requirement include *Texas Education Code*, Section 51.9191; *Texas Education Code*, Section 51.9192; and 19 (https://texreg.sos.state.tx.us/public/readtac$ext.ViewTAC/?tac_view=5&ti=19&pt=1&ch=21&sch=T&rl=Y)*Texas Administrative Code* 21.610 et seq.

Ineligibility to Register

Students who are no longer eligible for enrollment at the start of the term will have their registration canceled and their tuition and fees refunded. Additionally, violation of several academic policies can result in a student's inability to register without permission or action.

Obtaining Documents and Data Originating from Another Agency or Institution

UT Arlington does not release documents that have become the property of the institution through a legal release to a third party (UTA). In addition, the university does not release or verify other pieces of personal information such as visa numbers, social security numbers, passport numbers, health conditions, etc. We are not the official, legal custodian of record for any data that was not assigned by the institution or for documents that did not originate at UT Arlington and therefore do not have the authority to release them. This includes documents such as high school records and transcripts,

ACT/SAT scores, AP/IB/A-Level scores or degree information and college transcripts from other institutions. These records are the property of the university and are for our internal college purposes only. Please contact the originating agency, organization or institution that produced the original records to obtain a legal copy.

Note: UT Arlington cannot certify, verify or validate documents as "original" - "authentic" - "verified" - "certified" (etc.) with the university seal and official signatures unless they originate at UTA. This includes copies of diplomas, transcripts or other documents previously released to the student or a third party. Students who require an additional certified or notarized diploma, transcript or other official UTA document, should contact us to order one.

Undergraduate Registration

Eligibility to Enroll

An undergraduate student must maintain a minimum cumulative grade point average (GPA) at UT Arlington to remain academically eligible to register for the subsequent term or session. The minimum average required varies with the total number of college credit hours attempted at UT Arlington and is shown in the Table of Academic Standards, in the Grades and Grading Policies section of the Catalog.

Texas Success Initiative (TSI)

Undergraduate students who have not fulfilled testing or exemption requirements of the Texas Success Initiative (TSI) will be unable to register for courses until the requirements have been met. See requirements listed at Texas Success Initiative (http://www.uta.edu/admissions/successinitiative/). Some students may be exempt from the TSI requirement. For a list of exemptions, go to Texas Success Initiative Exemptions (http://www.uta.edu/tsi/).

Before students can take the TSI Assessment, they must complete a Pre-Assessment Activity to prepare for the test, as a State of Texas requirement. UT Arlington's Pre-Assessment Activity and additional information on TSI testing is available through the Academic Testing Services (https://www.uta.edu/student-success/resources/testing-services/) office.

Students classified as TSI Not Complete will be advised and required to enroll in TSI coursework at UTA in the first available semester of enrollment. TSI coursework will be advised and required in each subsequent semester until the student is classified as TSI Complete.

For additional information regarding TSI, students can visit www.uta.edu/tsi (http://www.uta.edu/tsi/) or email questions to tsi@uta.edu.

Maximum Course Load

Without permission from the appropriate academic dean, an undergraduate student may not register in a fall or spring term for more than 19 hours at UT Arlington or concurrently at UT Arlington and another institution. Likewise, a student may not register in summer term for more than 14 hours, with no more than 7 hours in any 5- or 7-week session. Any student who violates this regulation may be required to drop hours to comply with the maximum-hour rule or may be denied transfer credit for those hours in excess taken at another institution. A student may register for a maximum of three hours during the Winter Intersession and Summer Intersession terms. Refer to the Enrollment Requirements section of this catalog to view the table indicating Full-Time and Part-Time Enrollment (http://catalog.uta.edu/academicregulations/registration/) for the combinations of coursework for which undergraduate and graduate students may enroll to stay within the maximum loads in combined summer sessions and in long terms.

Schedule Changes (Adds, Drops and Swaps)

Adds, drops and swaps (adding and dropping a class concurrently) may be made through late registration by an undergraduate either in MyMav (http://www.uta.edu/mymav/) or in person by contacting their major academic department (or the University Advising Center for undeclared or freshman students). Drops may continue in person until a point in time two-thirds of the way through session or term. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop (withdrawal).

- A student may not add a course after the end of the late registration period.
- No grade is posted if a student drops a course before 5:00 p.m. on the Census Date of that term.
- Students who enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. This limit includes all transfer work taken at a Texas institution of higher education and to second baccalaureate degrees. This statute was enacted by the State of Texas in spring 2007 (Texas Education Code 51.907, and Texas Administrative Code §4.10). Any course that a student drops is counted toward the six-course limit if: "(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student's transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution." A UT Arlington student affected by this statute who has attended or plans to attend another institution of higher education should become familiar with that institution's policies on dropping courses. This statute applies across all Texas public institutions, but procedures for implementation may vary between institutions. Students affected by this policy may request an exemption to the policy by submitting a "Petition for Exemption to 6-Course Drop Policy" form. Students who enroll in coursework at more than one institution of higher education may not exceed the six dropped course limit based on all undergraduate enrollment in Texas public colleges and universities.

- A student may drop a course with a grade of “W” until the two-thirds point of the term, session, or course offering period. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop (withdrawal).
- A student may drop a course after the two-thirds point of the term, session, or course offering period (Last Drop Date) only with the approval of the dean of his/her college or school.

Exceptions to this policy may be entertained because of extraordinary non-academic circumstances. Under such circumstances, approval must be received from the instructor of the course, the department chair of the student's major, and the dean.

Students wanting to drop all courses for which they are enrolled must withdraw from the University for that term. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop. Students should follow the procedure in the Withdrawal section below.

Withdrawals

A student may withdraw from all courses for the current session/term from the first class day until a point two-thirds of the way through the session or term by contacting their major academic department (or the University Advising Center for undeclared students) for appropriate advisement and removal from the coursework. A student who elects to withdraw on the first day of classes or thereafter will incur financial responsibility to the University as regulated by Student Financial Services.

A student may withdraw from the University with grades of "W" until the two-thirds point in the term. A student may be removed from a course after that point only upon approval of the academic dean in the student's college or school.

Students who have enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. When an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student’s six-drop limit.

Withdrawal as a Result of Military Service

Students who withdraw from the University to perform active military service (not including National Guard training exercises) will not have to reapply for admission, but will be readmitted upon a request made to the Office of the Registrar within one year of being released from active military service. Active military service as defined by *Texas Government Code, Chapter 437, Subchapter A* as state active duty service, federally funded state active duty service, or federal active duty service; the term does not include service performed exclusively for training, such as basic combat training, advanced individual training, annual training, inactive duty training, and special training made available to service members.

A student who must withdraw from the University as a result of military service will receive the following considerations according to Section 54.006 of the Texas Education Code: (1) receive a refund of tuition and fees (2) if eligible, be assigned a grade of incomplete (I) or (3) as determined by the instructor, receive a final grade or credit in courses where the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material.

Six Course Drop Limit

Students who have enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. This limit includes all transfer work taken at a Texas institution of higher education. This statute was enacted by the State of Texas in spring 2007 (Texas Education Code 51.907). Any course that a student drops after Census Day is counted toward the six-course limit if "(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student’s transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution."

If an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student’s six-drop limit.

Students in pursuit of a 2nd baccalaureate degree, a post-baccalaureate certificate program, or any graduate level program are exempt from the provisions of the six-drop rule.

The limit on dropped courses is subject to the following conditions:

- Students dropping a course for academic reasons will receive a “W.” Students withdrawing from the university or who received an approved non-academic exception will receive a course notation of Q on the transcript. Courses denoted with Q do not count toward the 6-course drop limit.
- Dropped developmental courses do not count toward the limit.
- Dropped dual credit courses earned prior to a student graduating from high school do not count toward the limit.
- If an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student’s 6-drop limit. During the course of the same term, if some courses are dropped prior to final full withdrawal, all courses will be converted to ‘withdrawn’ status, regardless of the timing. (Example: Student A is enrolled in four courses and drops two and completes two. The two courses will be counted against the 6-drop limit. Student B is enrolled in four courses and drops two courses following Census Date. These two drops are counted against the 6-drop limit. Prior

to the last drop date, Student B withdraws from school (drops final two courses). The final two courses are coded as “withdrawn” and do not count against the 6-drop limit. The two courses previously counted as “dropped” are reclassified as “withdrawn” and the student’s drop limit is readjusted).

- This drop policy overrides the limit of 15 hours W previously in place at UT Arlington. Students who entered UT Arlington between Fall 2006 and Summer 2007 and were subject to the 15-hour W policy will no longer be held to the limits of that institutional policy.
- Students should be aware that dropping a course or courses may result in reducing them to part-time status which can affect financial aid, scholarships, and insurance coverage.

Change of Major Program of Study

Undergraduate students who wish to change their major program of study must consult with the proposed major department to process the program change.

An academic unit may require students to change their major program of study if the students do not meet the academic standards or the professional conduct standards of the unit. For information concerning specific standards in a program of study, students should contact the office of the appropriate academic dean's office

Auditing

Final arrangements to audit an undergraduate course may be made during the late registration period only, although the permission process can begin prior. The required form, obtained from the Office of Office of the Registrar, must be completed and taken to the instructor for approval. This form can be accepted and processed by the Office of the Registrar only during the late registration period only, and approval is based in part on space availability. After obtaining the instructor’s approval and approval from the Office of the Registrar, the applicant pays a fee at Student Accounts of $20 per course if enrolled for course work at UT Arlington or $100 per course if not enrolled for course work in residence at UT Arlington. Persons 65 years of age or older may audit courses without paying an audit fee.

The auditor has the privilege of hearing and observing only; no University credit is granted for auditing. An academic department or the Office of the Registrar may place restrictions on the privilege of auditing or may deny permission to audit certain courses. Activity classes, labs, etc., are generally not auditable.

Students auditing a course are required to comply with Texas state legislation that mandates those who have not been continuously enrolled at UT Arlington must have received the bacterial meningitis vaccine (http://www.uta.edu/records/services/meningitis-requirement.php) within the past five years.

Cooperative Programs Between University of Texas System Components

A student concurrently enrolling at two or more University of Texas System components may register and pay tuition and fees for all courses through the student’s home institution. Detailed procedures may be obtained from the registrar or records office of the student’s home institution. At UT Arlington, this is the Office of the Registrar. The concurrent enrollment agreement and waiver of specified fees applies only to students following the concurrent enrollment procedures specified by the home institution.

The charges for the following will be assessed and collected at the home institution for the other institution(s):

- Tuition at an appropriate rate
- Applicable laboratory fees and special course charges
- General Use Fee at the appropriate rate
- Any other fees that are required at the host institution that are not charged at the home institution

Student services at the second institution will be made available to concurrently enrolled students paying the appropriate student service fees at the second institution.

Some institutions have a reciprocal agreement for honoring parking permits. Details may be obtained from the police departments on each campus.

Concurrently enrolled students should report any problems concerning registration, payment of fees or other matters related to concurrent enrollment procedures to the registrar or records office of the home institution.

Concurrent students wishing to add or drop courses must do so in compliance with the host institution’s policy. On or before the host institution’s Census Date, schedule changes may be done through the home institution’s records office. After the Census Date, drops must be done at the host institution.

All paperwork must be turned in two weeks prior to the host institution’s first class day.

For more information, refer to the webpage http://www.uta.edu/records/courses/policies/concurrent-enrollment.php.

Students Receiving Financial Aid

To qualify for most forms of financial aid administered through the Office of Financial Aid, students must enroll in and complete a certain number of credit hours each term to meet the Satisfactory Academic Progress requirements to receive future financial aid. Details are available on the Financial Aid website (https://www.uta.edu/administration/fao/).

Other Public Institutions of Higher Education

When students register at more than one public institution of higher education in Texas, they shall pay the full tuition charges to the first institution at which they are registered. A student who is first registered at another institution must present a copy of the fee receipt from that institution to Student Accounts when registering at UT Arlington. Any reduction in tuition per the following guidelines will be refunded to the student approximately one month after the beginning of the term.

- If the minimum tuition at the first institution is the same as or greater than the UT Arlington minimum, the amount charged for tuition will be the UT Arlington hourly rate.
- If the minimum tuition at the first institution is lower than the UT Arlington minimum, the amount charged for tuition will include the difference in the minimum charges. In no case will the amount charged be less than the UT Arlington hourly rate.
- All other applicable fees will be charged.

Graduate Registration

Eligibility to Enroll

A graduate student must maintain a minimum cumulative grade point average (GPA) of at least 3.0 at UT Arlington to remain academically eligible to register for the subsequent term or session.

Full-Time Enrollment and Assistantship Enrollment Requirements

Full-time enrollment at UT Arlington in Fall and Spring Terms is 9 SCH and a total of 6 SCH (total) in Summer Terms. Students supported on full assistantships (20 hours/week), either teaching or research assistantships, must meet enrollment requirements described in the Graduate Assistantship Policy (p. 83).

Credit hour enrollment to be eligible for graduate assistantships is not always equivalent to credit hour enrollment required for full-time enrollment status at the university. Under some circumstances, a student can be eligible to hold an assistantship while enrolled in fewer hours than needed to be considered full-time enrolled as defined above. The Assistantship Policy (p. 83) found in the Financial Aid section of this catalog details the enrollment required for an assistantship.

The enrollment requirements related to full-time enrollment as opposed to enrollment required to hold an assistantship is especially important to students on assistantship who have financial aid, scholarships, and/or loans, and International students. Students should contact the Office of Financial Aid and the Office of International Education, if applicable, before enrolling in 6 or fewer hours.

Continuous Enrollment Policy

Graduate students must enroll in at least one credit hour of work related to their degree each long semester (Fall and Spring) in order to remain classified as an enrolled student. Some programs may specify a higher minimum enrollment requirement in their Handbook for Graduate Students or other published documents. Enrollment in Summer Sessions is not required, and students who do not enroll in summer will not be considered in violation of the continuous enrollment policy. However, students are required to register for appropriate courses in every term in which they expect to receive assistance, use the facilities of the university, take diagnostic or comprehensive examinations or defend theses or dissertations. The minimum enrollment requirements for holding graduate assistantships or fellowships or the requirements of the enrollment requirements of other programs, offices and agencies such as the Veterans Administration. U.S. Citizenship and Immigration Services, and federal financial aid and certain loan programs, must be met. It is the student's responsibility to determine the enrollment requirements of such entities. Students who have completed all degree requirements or who will complete degree requirements must submit an application for graduation by the deadline for graduation for the next available graduation date. They must also pay the appropriate graduation fees. Enrolled students who do not complete all requirements by the beginning of the next long semester must enroll to complete remaining requirements.

Maximum Course Load:

The maximum course load for full-time graduate students is 15 semester hours in a regular term and 12 hours in the summer term. Registration in excess of these limits in exceptional circumstances must be approved by the student's graduate advisor.

Schedule Changes (Adds, Drops and Swaps)

Graduate students who wish to change a schedule by either dropping or adding a course must first consult with their graduate advisor. Regulations pertaining to adding or dropping courses are described below. A student’s registration is not automatically cancelled for non-attendance. A student should either pay fees in full by the designated deadline or take the appropriate steps to withdraw. To avoid financial responsibility to the University,

this cancellation of enrollment must be completed as soon as possible, but no later than the day before the first official University class day. Prompt notification also helps to free up class space for other students who are interested in the same classes.

A student wishing to drop all classes will be considered to have withdrawn from the University and must reapply for admission in order to resume studies unless granted a leave of absence. Adds and drops may be made through late registration either on the Web at MyMav or in person through the student's academic department. Drops may occur until a point in time two-thirds of the way through the term. The last day to drop a course is listed in the Academic Calendar (http://www.uta.edu/uta/acadcal/).

1. A student may not add a course after the end of the late registration period.
2. No grade is posted if a student drops a course before 5:00 p.m. on the Census Date of that term.
3. A grade of W may be assigned if a student chooses to withdraw from a class after Census date but prior to the last date to drop posted in the University's Academic Calendar. However, the grade of W is not automatically awarded. Graduate students must consult with their graduate advisor about their reasons for withdrawal before withdrawing from a class. Further, the student must secure the permission of the class instructor to withdraw. The instructor shall determine whether the student will be granted a W or will receive a grade for the course commensurate with the proportion of the course requirements that have been completed successfully. The grade decision is based on the instructor's judgment, The instructor will inform the student of the grade decision before finalizing the request. Students who have withdrawn from a course must re-enroll in it to receive credit.
4. Students dropping their last class on or after the first day of classes must meet with their graduate advisor to make the last class drop (withdraw). A student desiring to drop all courses in which he or she is enrolled is reminded that such action constitutes withdrawal (resignation) from the University unless an approved leave of absence has been obtained.
5. In most cases, a student may not drop a graduate course or withdraw (resign) from the University after the two-thirds point of the course offering period (Last Drop Date). Under extreme circumstances, the academic dean of the student's college or school may consider a petition to withdraw (resign) from the University after the Last Drop Date. Students should use the Petition to Withdraw for this purpose. See the section titled Withdrawal (Resignation) From the University for additional information concerning withdrawal.

Withdrawals

A student who wishes to withdraw (resign) voluntarily from the University may do so by withdrawing from ***all*** graduate and undergraduate classes prior to the last day to drop date, a point of time corresponding to two-thirds of the duration of the term. The last day to drop a course is listed in the Academic Calendar (http://www.uta.edu/uta/acadcal/). After this deadline has passed, a graduate student or undergraduate student enrolled in a graduate course is not permitted to withdraw or to selectively drop courses. In exceptional cases, however, a graduate student may request to withdraw after the deadline by obtaining a Petition to Withdraw form (https://cdn.web.uta.edu/-/media/project/website/social-work/documents/forms/forms-and-resources/withdrawal_and_drop_exception_form_fillable-revised_7-11-2019.ashx?revision=db36ba87-a488-423f-af57-e4615eb53be1) and submitting it to the Dean of the college or school in which they are enrolled. If the petition is not approved, the student remains responsible for all coursework requirements. Therefore, students should not discontinue class attendance or course assignments unless they have been notified in writing that their academic dean has approved the Petition to Withdraw.

Withdrawal as a Result of Military Service

Students who withdraw from the University to perform active military service (not including National Guard training exercises) will not have to reapply for admission, but will be readmitted upon a request made to the Office of the Registrar within one year of being released from active military service. Active military service as defined by *Texas Government Code, Chapter 437, Subchapter A* as state active duty service, federally funded state active duty service, or federal active duty service; the term does not include service performed exclusively for training, such as basic combat training, advanced individual training, annual training, inactive duty training, and special training made available to service members.

A student who must withdraw from the University as a result of military service will receive the following considerations according to Section 54.006 of the Texas Education Code: (1) receive a refund of tuition and fees (2) if eligible, be assigned a grade of incomplete (I) or (3) as determined by the instructor, receive a final grade or credit in courses where the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material.

Leave of Absence Policy

A graduate student may apply for a Leave of Absence in order to respond to exceptional circumstances that will prevent him or her from meeting the continuous enrollment requirement. A Leave of Absence will be granted only for good cause, such as health-related issues, major financial or employment issues, significant family concerns such as pregnancy, childbirth, child care or elder care, or other major personal circumstances that interfere with a student's ability to undertake graduate study. Leaves may only be granted for up to two long semesters (spring or fall semesters). The student must have been enrolled in the previous long semester and be in Good Standing (at least a 3.0 cumulative gpa) in order to utilize the Leave of Absence Policy. Students returning from leave as scheduled will be automatically readmitted and will not be required to submit an application or pay an admission fee. Students who do not return at the end of their approved Leave of Absence must reapply for admission by the published application deadlines, pay all relevant evaluation fees, and are not assured of readmission to the University. Students may not submit another Leave of Absence request to extend the leave beyond two long semesters. The student must return to continue his or her studies or reapply for admission. During the time of the leave of absence, the student may not use University facilities or resources, receive an assistantship or fellowship, continue academic work with

faculty, take a diagnostic or comprehensive examination, or defend a thesis or a dissertation. Time taken on an approved Leave of Absence will not count against degree completion time limits.

An approved Leave of Absence does not exempt students from the enrollment requirements of other programs, offices, and agencies such as the Veterans Administration, US Customs and Immigration Services, and federal financial aid and certain loan programs. It is the student's responsibility to determine what effect a Leave of Absence will have on his or her status with such entities. For example, International students approved for a Leave of Absence must inform the Office of International Education so that requirements of the US Customs and Immigration Services can be addressed.

A student requesting leave should complete the Leave of Absence Request form and obtain the approval of his or her graduate advisor who will forward the request to the Office of the Registrar for final review and approval. This form is available online (https://www.uta.edu/administration/registrar/forms/). Requests must be made no later than Census day of the semester that the student is requesting leave. Leave of Absence will not be granted retroactively for a semester after the Census day has passed. Students who miss this deadline must withdraw from the University and apply for readmission when they wish to return to their studies.

Change of Graduate Major, Program or Degree Level

Students wishing to change graduate major, program or degree level (master's or doctoral classification) from that in which they are enrolled currently, or in which they were enrolled during their most recent term at UT Arlington, must initiate the change by completing the Request for Change of Graduate Program or Degree Level form. The Request For Change of Graduate Program or Degree Level form can be found online (https://www.uta.edu/administration/registrar/forms/). Students intending to change majors should consult the graduate advisor of the new program regarding program admission and degree requirements before completing this form. Similarly, students wishing to change degree level should submit the request after discussing the matter with the appropriate graduate advisor.

Students wishing to change from one program to a dual degree program must complete the Request for Change of Graduate Program or Degree Level form and mark the box stating Request to Change to Dual Degree Program (master's level only).

Students wishing to change from a dual degree program to single degree program program must complete the Request For Change of Graduate Program or Degree Level form and mark the box stating Request to Change to New Graduate Program.

Students wishing to change from Doctoral to Masters degree level for conferral of the masters degree must complete the Request for Change of Graduate Program or Degree Level form and mark the box stating Request to change form PhD to Masters Status (for conferral of the master's degree). Students will remain in masters status until award of the masters degree. Upon award of the masters degree, students will be automatically changed back to doctoral status.

The Dean of the college or school will make the final decision regarding the request(s) for change.

Auditing Courses

Final arrangements to audit an undergraduate course may be made during the late registration period only, although the permission process can begin prior to it. The required form, obtained from the Office of the Registrar, must be completed and taken to the instructor for approval. This form will only be accepted and processed by the Office of the Registrar during the late registration period and approval is based in part on space availability. After obtaining the instructor’s approval and approval from the Office of the Registrar, the applicant will be obliged to pay an audit fee at Bursar Services of $20 per course if enrolled for course work at UT Arlington or $100 per course if not enrolled for course work in residence at UT Arlington. Persons 65 years of age or older may audit courses without paying an audit fee.

The auditor has the privilege of hearing and observing only; no University credit is granted for auditing. An academic department or the Office of the Registrar may place restrictions on the privilege of auditing and may deny permission to audit certain courses. Activity classes, labs, etc., are generally not auditable.

Students auditing a course are required to comply with Texas state legislation that mandates those who have not been continuously enrolled at UT Arlington must have received the bacterial meningitis vaccine (https://www.uta.edu/administration/registrar/students/policies-procedures/meningitis/) within the past five years.

Audited courses do not meet enrollment requirements applying to graduate students.

Cooperative Programs Between University of Texas System Components

A student concurrently enrolling at two or more University of Texas System components may register and pay tuition and fees for all courses through the student’s home institution. Detailed procedures may be obtained from the registrar or records office of the student’s home institution. At UT Arlington, this is the Office of the Registrar. The concurrent enrollment agreement and waiver of specified fees applies only to students following the concurrent enrollment procedures specified by the home institution.

The charges for the following will be assessed and collected at the home institution for the other institution(s):

- Tuition at an appropriate rate
- Applicable laboratory fees and special course charges

- General Use Fee at the appropriate rate
- Any other fees that are required at the host institution that are not charged at the home institution

Student services at the second institution will be made available to concurrently enrolled students paying the appropriate student service fees at the second institution.

Some institutions have a reciprocal agreement for honoring parking permits. Details may be obtained from the police departments on each campus.

Concurrently enrolled students should report any problems concerning registration, payment of fees or other matters related to concurrent enrollment procedures to the registrar or records office of the home institution.

Concurrent students wishing to add or drop courses must do so in compliance with the host institution's policy. On or before the host institution's Census Date, schedule changes may be done through the home institution's records office. After the Census Date, drops must be done at the host institution.

All paperwork must be turned in two weeks prior to the host institution's first class day.

For more information, refer to the webpage http://www.uta.edu/records/courses/policies/concurrent-enrollment.php.

Funded Student Enrollment Requirements

Students are normally expected to be enrolled as full-time students while holding a funded assistantship or associateship. Master's students who must enroll in a 3 or 6-hour Thesis course or doctoral students who must enroll in a six or nine-hour Dissertation Course or three-hour Dissertation Completion Course because they have not completed the required number of thesis or dissertation hours and/or have not earned a grade of P in the appropriate course in their final semester. However, master's students who need fewer hours to complete their degrees may petition for a waiver of full time enrollment as described in the Assistantship/Associateship Policy section (p. 83) of this catalog.

Teaching and Research Assistants

Students receiving graduate teaching or research assistantships must meet enrollment requirements during the term in which they are supported. Assistants should complete no more than 12 semester hours and no fewer than 9 semester hours per term. They may register for 3 semester hours during the summer sessions. See the section titled Graduate Assistantship/Associateship Policy (p. 83) for exceptions to these rules and other requirements that Assistants and Associates must meet.

Students Receiving Financial Aid

To qualify for most forms of financial aid administered through the Office of Financial Aid, students must enroll in and complete a certain number of credit hours each term to meet the Satisfactory Academic Progress requirements to receive future financial aid. The Satisfactory Academic Progress policy may be found at www.uta.edu/fao (http://www.uta.edu/fao/). Students enrolling in 9 or more credit hours at Census Date must complete at least 6 of these hours whereas students enrolling in 6-8 credits hours at Census Date must complete 4 hours to qualify for financial aid. Students enrolling in 5 hours must complete 3 hours. If a student does not complete the required minimum number of hours, they will lose eligibility for aid in the next academic year of enrollment. Students enrolling in fewer than 5 hours at Census do not meet the enrollment requirements for financial aid. Contact the Office of Financial Aid for additional information and guidance on enrollment and eligibility requirements

Doctoral Student 99-hr Rule

The "99 hour rule" refers to the implementation of Senate Bill 961, passed by the Seventy-fifth Legislature. Under this policy, graduate students at UT Arlington who are Texas residents and nonresidents who normally would be entitled to pay resident tuition by virtue of residency, work appointments or fellowships who have attempted more than 99 doctoral hours may be subject to the payment of nonresident tuition. This rule does not apply to students enrolled before August 1999. A student who has completed more than 99 hours of doctoral level study at UT Arlington will not be obligated to pay non-resident tuition unless they have also completed a total of 14 long semesters of master's and/or doctoral study. Programmatic or individual exceptions for students exceeding the 99-hour and 14 long semester limit may be considered.

International Students

International students must be enrolled for a minimum of 9 semester hours during each regular semester (Fall and Spring). International students should refer to the International Student section of this catalog for additional registration information.

Course Designation System

Courses at UT Arlington are designated by a combination of letters and numbers. The letters indicate the department, or the area within a department, that offers the course. The numbers furnish information such as level, credit and hours of theory or practice. A complete list of course abbreviations is outlined below.

Examples demonstrating UT Arlington's Course Designation System:

Undergraduate example: CHEM 1301 (3-0) 3 hours credit

- "CHEM" indicates that the course is offered by the Chemistry Department.
- The first digit (1 in the example above) denotes the level of the course: 1 and 2 indicate lower division (freshman and sophomore) courses; 3 and 4 indicate upper division (junior and senior) courses; and 5 and 6 indicate graduate courses.
- The second digit (3) denotes the semester hour credit the student is attempting to earn by taking the course.
- The third and fourth digits (0 and 1) distinguish the individual course. Course numbers 90 through 99 indicate individual or small group instruction.
- The first figure in parentheses (3) indicates the clock hours per week in the long (spring and fall) terms devoted to theory or lecture. Theory includes recitations and lectures.
- The second figure in parentheses (0) indicates the clock hours per week in the long (spring and fall) terms devoted to practice. Practice includes work done in the laboratory, shop, drawing room or field.
- The final figure is the credit value of the course. The unit of credit is the "semester credit hour," which involves one hour of theory and/or from two to four hours of practice per week for a 16-week term.

Graduate example: GEOL 5313 (2-3) 3 hours credit

1. "GEOL" indicates that the course is offered by the Geology Department
2. The first digit (5) in the above example denotes the level of the course. Graduate courses are designated 5 or 6.
3. The second digit (3) denotes the semester hour credit the student is attempting to earn by taking the course.
4. The third and fourth digits (1 and 3) distinguish the individual course.
5. The first figure in parentheses (2) indicates the clock hours per week in the long (spring and fall) terms devoted to theory or lecture. Theory includes recitations and lectures.
6. The second figure in parentheses (3) indicates the clock hours per week in the long (spring and fall) terms devoted to practice. Practice includes work done in the laboratory, shop, drawing room or field.

List of Course Abbreviations (https://catalog.uta.edu/coursedescriptions/)

Accelerated Online Programs

REGISTRATION INFORMATION

Students must be in an accelerated online program major to take the approved courses listed on the program web pages.

If you are not an accelerated online program student registered in an accelerated program (Dynamic Dated session) course you will be dropped from the unauthorized course. You will be notified via your UTA MyMav email after you have been dropped.

If you are an accelerated online program student registered in a non-accelerated program (Regular session) course you will be dropped from the unauthorized course. You will be notified via your UTA MyMav email after you have been dropped.

If a student did not pass a class for the currently enrolled term and would like to retake the same class within the same term at a later start date, this cannot be done through student self-service in MyMav unless the course is setup to allow for this exception. Students' academic advisor would have to perform the enrollment request on the students' behalf. For this exception to be approved, final grades for the original class must be officially posted in MyMav prior to the late registration deadline for the requested class start date. If grades are not posted in MyMav before the late registration deadline for the next start date, students will need to request a registration exception for the next available start date with open registration. If the next available start date is in the next term, students can enroll themselves through student self-service in MyMav.

REGISTRATION AND DROP/WITHDRAW REQUESTS

Please contact your major academic advisor via your MyMav email if you have any questions regarding registration or dropping/withdrawing from a course(s). Any requests received after 4 PM CT, weekends or holidays will be processed effectively on the following business day. Backdating to the previous business day is not allowed. If a request to register or drop a course(s) is received by your major advisor after 4 PM CT prior to the late registration deadline or last day to drop deadline, your request may not be reviewed or processed.

To drop a course before the first day of class

- It is the student's responsibility to drop a course before the first day of class.
- If a student has decided to drop a course before the first day of class it is advised that they attempt to drop the course before 4 pm (CT) on the Friday before the course starts. This is so that they can contact their academic advisor if they have any difficulties dropping the course.
- If a student waits until after 4 pm (CT) prior to the first day of class and has difficulties dropping the course then they cannot contact their academic advisor before the first day of class. Since it is the student's responsibility to drop they will be subject to the refund policy when their advisor drops them from the course on Monday.

- For directions on how to drop a course please click here (https://uta.service-now.com/selfservice2/?id=utassp01_kb_article&sys_id=a32a4e47db14441cd48b5e65ce96192c&catid&pageid=utassp02_kb_public_knowledge_base).

To drop a course on or after the first day of class

- Fill out the drop eForm for the Accelerated Online Nursing students: Click here for instructions (https://uta.service-now.com/selfservice2/?id=utassp01_kb_article&sys_id=a32a4e47db14441cd48b5e65ce96192c&catid&pageid=utassp02_kb_public_knowledge_base) (Students in the Accelerated Online Education and Master of Public Administration Programs, please contact your advisors via email).
- Save the form and email it to your academic advisor
- To locate your Accelerated Online Nursing academic advisor's contact information click here (https://www.uta.edu/academics/schools-colleges/conhi/student-resources/).
- Drops can only be requested through email. Do not call! If you call you will be instructed to email in your request using your MyMav email only (personal email will not be accepted). This is because dropping is a serious matter and we need documentation that (a) you understand the consequences of dropping and (b) are sure you want to drop the course.
- After the registration deadline, once a drop request has been submitted and/or processed, students are not eligible to be added back to the course in which they requested to be dropped from. All drops are final.
- Drop requests **must** be submitted by **4:00 PM CT** in order for a drop to be processed the **same day**. If a drop request is submitted after 4:00 PM CT, on weekends or holidays, it will be processed the next business day. Students who submit a drop request after 4:00 PM CT will be subject to the next business day's refund and drop deadline policies. If a request to drop a course is received after 4:00 PM CT on the last day to drop, your request may not be reviewed or processed.

LATE REGISTRATION

Starting Fall 2017, the accelerated online programs have new registration deadlines. See Important Dates Information below for the registration deadlines for each start date session.

There is a late registration deadline that begins at 12:00 AM CT on the specified dates listed below for each start date session. Students will register thru their MyMav Student Service Center (self-service) until the late registration deadline ends at 11:59 PM CT on the specified dates listed below. If you need clarification on this policy or need to discuss what options you may have for future registration, please contact your major academic advisor.

Any requests received after 4 PM CT on the late registration deadline, weekends or holidays will be considered received as of the following business day. Backdating to the previous business day is not allowed. If a late registration request is received by your major advisor after 4 PM CT on the 1st day of class (the start date) your request may not be reviewed or processed.

REINSTATEMENT INFORMATION FOR NON-PAYMENT DROPS

Students in the accelerated online program that are dropped for non-payment on the 1st day of class, can re-register themselves using their MyMav Student Service Center (self-service) if there are seats still available in the course. The non-payment reinstatement deadline is 11:59 PM CT on the 1st day of class (the start date). Payment is due by 11:59 PM CT the same day. If a student is dropped for non-payment a second time, reinstatement will not be allowed.

Any requests received after 4 PM CT on the non-payment reinstatement deadline, weekends or holidays will be considered as received as of the following business day. Backdating to the previous business day is not allowed. If a reinstatement request is received by your major advisor after 4 PM CT on the 1st day of class (the start date) your request may not be reviewed or processed.

REINSTATEMENT APPEALS FOR NON-PAYMENT DROPS

As of May 24, 2010, reinstatement appeals for nonpayment of tuition drops for accelerated online program students will not be allowed. Due to the length of the accelerated online courses and the time it takes for reinstatement appeals to be processed; it is not advantageous to students, faculty or the administration to allow reinstatements. If you are dropped for non-payment, you will need to register for the next start date that the course is available. If you need clarification on this policy or want to discuss what options you may have for future registration, please contact your major academic advisor.

CHANGE OF MAJORS

Students that enrolled/dropped within the current term can change their majors (to or from) an accelerated online program once the current term has ended and prior to enrolling in a course for the following term. If you never enrolled in the current term and you would like to change your major, you can do so at any time. Please contact an academic advisor in the major you would like to change into if you have any questions.

ACADEMIC STANDING INFORMATION

Academic standing for accelerated online program students is official once the last grades for a term (last grades in the sessions, see charts below for dates) have been posted. If you are on academic dismissal once grades have been posted, you will be dropped from any course(s) for the current term and future term(s) that are not in progress. Please contact your academic advisor within your major with any questions.

Tuition & Fees

Overview

Tuition and fees are subject to change by legislative or regental action and become effective on the date enacted. The Texas Legislature does not set the specific amount for any particular student fee. The student fees are authorized by state statute; however, the specific fee amounts and the determination to increase fees are made by the university administration and The University of Texas System Board of Regents. (General Appropriations Act 2010-2011, Article IX, §6.16). Visit www.uta.edu/fees (http://www.uta.edu/fees/) for current tuition, fees, and charges.

To comply with Senate Bill 1304, passed by the 81st Texas Legislature the University of Texas at Arlington is required to report to each student the amount of tuition paid by the student that must be set aside to provide financial assistance to qualified students. UT Arlington will notify students by email of the set aside amount.

Undergraduate students who enrolled under the fall 1999 or subsequent catalogs may be required to pay non-Texas resident tuition rates when they exceed 45 hours more than is required for completion of the degree program for which the student is enrolled. For more information and specific rates for excessive hours please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

The "99 hour rule" refers to the implementation of Senate Bill 961, passed by the 75th Legislature. It is the rule that students admitted during the fall semester of 1999 and thereafter who complete more than 99-hours of *doctoral* level study may be required to pay out-of-state tuition for every subsequent semester. For more information and specific rates for excessive hours please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

Resident undergraduate students who enroll in a course that is substantively identical to a course for which he/she has previously completed may be required to pay a higher tuition rate, not to exceed the rate charged to non-resident undergraduate students. For more information and specific rates for excessive hours please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

Failure to pay tuition, fees, and charges by the term/session payment due date does not constitute voluntary withdrawal from the term/session.

Description of Tuition, Fees, and Charges

Tuition, fees, and charges are assessed to students based on session credit hours (SCH), a set charge per term and/or session, or for specific services. They are required of all students, charged to everyone taking specific courses or anyone receiving specific services, or charged only for voluntary products or services.

A Guaranteed Tuition Plan is offered to undergraduate students, including undergraduate students that transfer to UT Arlington per Section 54.017 of the Texas Education Code. The Guaranteed Tuition Plan offers a fixed tuition price plan under which the institution agrees not to increase tuition charges per semester credit hour for a participating student for at least the first 12 consecutive semesters that occur after the date of the student's initial enrollment at any public or private institution of higher education, regardless of whether the student enrolls at any institution in those semesters, and subject to any restrictions or qualifications adopted by the governing board. For additional information on the Guaranteed Tuition Plan, please refer to our website at Guaranteed Tuition Plan (https://www.uta.edu/admissions/afford/guaranteed-tuition/).

For more information and specific rates please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

Exemptions and Waivers

State law provides for several exemptions or waivers of tuition, fees, and charges. Students qualified for a reduced rate in any of the following categories must have that eligibility certified prior to the due date of the session/term. For a complete description and eligibility requirements, please go to https://www.uta.edu/business-affairs/student-accounts/tuition-waviers (https://www.uta.edu/business-affairs/student-accounts/tuition-waviers/). This web site will also provide department contact information and a list of tuition, fees, and charges that are exempt or waived. Additional information may be found in the Texas Education Code.

Tuition Rebate for Baccalaureate Graduates

Texas residents enrolling for the first time in a Texas public institution of higher education may be eligible for a tuition rebate up to $1,000 when the baccalaureate degree is completed (Texas Education Code, Section 54.0065). The student must have attempted all course work at a Texas public college or university and have been entitled to pay resident tuition at all times while pursuing the degree. The requested rebate must be for course work related to a first baccalaureate degree received from a Texas public university. No more than three hours may be attempted in excess of the minimum number of semester hours required for the degree under the catalog which the student is graduating. (Hours attempted include transfer credits, credit earned exclusively by examination, courses dropped after the official census date, for-credit developmental courses, optional internship and cooperative education courses, and those repeated exclusively by examination.)

An application form and any other requirements pertaining to the tuition rebate may be obtained from the Graduation section of the Office of the Registrar. Interested students should apply for the rebate when filing for graduation prior to registration for the final semester. To be eligible, a student must apply for the rebate before degrees are awarded for that semester.

This rebate is not part of the UT Arlington Guaranteed Tuition Plan, but you may qualify for it, in addition to qualifying for the Guaranteed Tuition Plan, and earn rebates from both programs if you meet eligibility requirements.

Payment of Tuition, Fees, and Charges

Please go to www.uta.edu/fees (http://www.uta.edu/fees/) for information on due dates, deadlines, refunds and penalties. Students will be given notice of the amount of his/her tuition charges that were required to be set aside to provide financial assistance for students enrolled at the institution (Texas Education Code, Section 56.014).

Refunds of Registration Charges (Withdrawals and Drops)

Please go to www.uta.edu/fees (http://www.uta.edu/fees/) for information about a specific term/session.

Payment Options

Please go to www.uta.edu/fees (http://www.uta.edu/fees/) for deadlines and payment options for a specific session.

- Per Texas Education Code 54.007, **"A student who fails to make full payment of tuition and fees, including any incidental fees, by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester."**
- Payment Plans: Additional Payment Plan options are available online via TouchNet or at the Office of Student Accounts, Room 130, University Administration Building. Please visit our Web site, Tuition Payment Plans (https://www.uta.edu/business-affairs/sfs/installment-payment-plan.php), for options, specified dates, and requirements. Payment Plans are not available to Accelerated Online students.
- Financial Aid: Please read the Financial Aid section of this catalog or visit www.uta.edu/fao (http://www.uta.edu/fao/) for information.

Questions may be directed to the Office of Student Accounts, 817-272-2172 or by email at studentaccounts@uta.edu. Detailed student account information may not be released to anyone other than the student without the student's written permission in the Office of Student Accounts.

Payment Methods and Locations

The University accepts cash, checks, traveler's checks, money orders, wires, and the following credit cards: MasterCard, Visa, Discover, Diner's Club, and American Express. Any form of payment that is returned unpaid can result in enrollment withdrawal and additional penalties.

- **Online:** Pay by credit card at Make a Payment (https://www.uta.edu/business-affairs/sfs/make-payment.php).
- **In Person:** Payments can be made in person at Student Accounts, Room 130, University Administration Building.
- **Mail:** Please include your 10-digit student ID number and do not mail cash or traveler's checks. Check or money order payments can be mailed to:

  UT Arlington Office of Student Accounts

  P.O. Box 19649

  Arlington, TX 76019-0649

- **Traveler's Check:** Traveler's checks must be signed in the presence of a cashier and should be presented in person at the Student Accounts window during their regular business hours.
- **International Wires:**

  UT Arlington has partnered with Flywire (formerly peerTransfer) to streamline the international payment process. Flywire allows you to pay securely from any country and any bank, typically in your home currency. By making your payment with Flywire, you can:

  - Track your payment from start to finish
  - Save on bank fees and exchange rates
  - Contact their multilingual customer support team with any questions, day or night.

  To get started, please visit https://www.flywire.com/school/uta (https://www.flywire.com/school/uta/). For additional questions about making your international payment with Flywire, please visit https://help.flywire.com/hc/en-us (https://help.flywire.com/hc/en-us/).

  Please note, Bank to Bank wires are not accepted.

- **Kiosks:** Payments can be made at kiosks across campus using credit cards, debit cards, and checking or savings accounts.

Concurrent Enrollment

Cooperative Programs Between University of Texas System Components

A student concurrently enrolling at two or more University of Texas System components and participating in a joint cooperative program may register and pay tuition, fees, and charges for all courses through the student's home institution. The concurrent enrollment agreement and waiver of specified fees and charges applies only to students following the concurrent enrollment procedures specified by the registrar of the home institution. Detailed procedures may be obtained from the registrar of the student's home institution. UT Arlington students will find additional information by going to www.uta.edu/fees (http://www.uta.edu/uta/tuition.php) and selecting Concurrent Enrollment from the Special Programs page. Applicable tuition, fees and charges will be assessed and collected at the home institution for the other institution(s). The charges for the following will be assessed and collected at the home institution for the other institution(s):

- Tuition and Mandatory Fees at an appropriate rate
- Applicable laboratory fees and special course charges
- Enhanced Designated Tuition
- Any other fees and charges that are required at the host institution that are not charged at the home institution

Student services at the second institution will be made available to concurrently enrolled students paying the appropriate student service fees at the second institution. Some institutions have a reciprocal agreement for honoring parking permits. Details may be obtained from the police departments on each campus. Concurrently enrolled students should report any problems concerning registration, payment of tuition, fees, and charges or other matters related to concurrent enrollment procedures to the registrar of the home institution.

Concurrent students wishing to add or drop courses must do so in compliance with the host institution's policy. On or before the host institution's Census Date, adds or drops may be done through the home institution's registrar. After the Census Date, drops must be done at the host institution.

Sponsored Students/ Texas Tomorrow Fund Participants

It is the student's responsibility to contact the Office of Student Accounts, Room 130, University Administration Building, 817-272-2172, each session prior to the payment deadline date to confirm that an authorization has been received and is sufficient to secure the current session registration.

Average Cost and Financial Aid Opportunities

Annually, the Office of Financial Aid, Scholarships, and Veteran's Affairs estimates the average expenses for a full-time student for two semesters at UT Arlington, which includes the estimated cost of books, transportation, living expenses plus tuition and fees. Current information may be found at www.uta.edu/fao (http://www.uta.edu/fao/). Navigate to the Average Cost option under the Financial Aid menu for detailed information. (Texas Education Code, Section 61.0777).

Academic Common Market

The Academic Common Market is an interstate agreement for sharing academic programs through an exchange of students across state lines. Fifteen southern states take part in the Academic Common Market. Texas, Florida and North Carolina participate at the graduate level only. Selected out-of-state programs that are not offered in a student's home state can be accessed through the Academic Common Market at in-state tuition rates.

For information on the graduate programs at The University of Texas at Arlington that are available through the Academic Common Market and the states that have access to those programs, contact the Office of Financial Aid or the Academic Common Market coordinator in the home state.

Further information on the Academic Common Market may be obtained from the Texas State Coordinator for the Academic Common Market: Texas Higher Education Coordinating Board, P.O. Box 12788, Austin, Texas, 78711. Phone: 512-427-6525. E-mail: ACMrequests@thecb.state.tx.us.

State Law - Excessive Hours

Texas Education Code §54.014 specifies that resident undergraduate students who initially enrolled as an undergraduate student in an institution of higher education fall semester 1999 and later may be subject to a higher tuition rate for attempting excessive hours at any Texas public institution of higher education while classified as a resident student for tuition purposes.

- Undergraduate students who enrolled initially in the fall 1999 semester or subsequent semesters cannot exceed more than 45 hours of the number of hours required for completion of the degree plan in which they are enrolled. Any hours beyond 45 are considered excessive and may result in additional tuition charges.
- Undergraduate students who enrolled initially in the fall 2006 semester or subsequent semesters cannot exceed more than 30 hours of the number of hours required for completion of the degree plan in which they are enrolled. Any hours beyond 30 are considered excessive and may result in additional tuition charges.

Texas Education Code §54.012 specifies that resident doctoral students who have more semester credit hours of doctoral work than allowed for purposes of state funding may be charged tuition at the rate charged nonresident doctoral students.

The purpose of these policies is to encourage students to complete their degree programs in an efficient, timely manner.

For more information and specific rates for excessive hours please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

For additional information regarding the UT Arlington's administration of the Texas excessive hours policy, please visit http://www.uta.edu/records/courses/policies/excessive-hours.php.

3-Peat Courses

As outlined in Texas Education Code §54.014 of the *Texas Education Code*, an institution may charge a resident undergraduate student a higher rate when enrolling in a course that the student has previously completed. An undergraduate student who registers for a course three or more times may be charged up to the non-resident tuition rate.

For more information and specific rates for repeated courses, please refer to our website at https://www.uta.edu/business-affairs/student-accounts/about-tuition (https://www.uta.edu/business-affairs/student-accounts/about-tuition/).

Important Tax Information

As an eligible education institution, UT Arlington is required to file a 1098-T Tuition Statement to report enrollment and other identifying information for each U.S. resident student who was billed for any qualified tuition and related expenses (http://www.irs.gov/instructions/i1098et/ar02.html) during the tax year, as defined by the IRS. Universities are *not* required to file a 1098-T for students who are Nonresident aliens for U.S. income tax purposes. As a result, Nonresident Alien Students may not receive a 1098-T.

1098-T Tuition Statement

Students meeting the following criteria will be eligible to receive a 1098-T Tuition Statement:

1. Incurred charges for qualified tuition and related expenses AND
2. Have a valid SSN or TIN (Taxpayer Identification Number) in MyMav (http://www.uta.edu/mymav/) AND
3. Have a valid Mailing, Home, or Campus address in MyMav (http://www.uta.edu/mymav/) (Please log on to your MyMav (http://www.uta.edu/mymav/) Student Service Center and verify your SSN/TIN and address information.)

In addition, UT Arlington will file the 1098-T forms with the IRS.

UT Arlington cannot determine if you qualify for a tax credit. The financial data provided is to assist you in computing amounts that may be eligible for certain tax benefits. Students and parents should obtain IRS publication 970 Tax Benefits for Higher Education or contact their personal tax advisor for assistance. The IRS website for obtaining forms and publications is http://www.irs.gov (http://www.irs.gov/), or you can call the IRS at 1-800-829-1040.

Due to a change to institutional reporting requirements under federal law, beginning with the tax year 2018, we report in Box 1, the amount you *paid* during the year for qualified tuition and related expenses.

When and Where the 1098-T Forms Will Be Available

Your 1098-T Tuition Statement will be available online in MyMav Self Service and may also be postmarked to your designated mailing address by January 31st. If a valid mailing address is not designated in MyMav, it will be mailed to your valid home or campus address. Please take a moment to verify that your addresses are accurate and make any necessary changes in your MyMav (http://www.uta.edu/mymav/) Self Service Student Center. It is also extremely important that the University has your name as it appears on your social security card.

Other Fees

INTERNATIONAL STUDENT HEALTH INSURANCE

International students are required to purchase The University of Texas at Arlington Student Health Insurance Plan while enrolled at the University. In order to be approved for a waiver, your alternate health coverage must meet or exceed the requirements as set in the System regulation and be PPACA compliant. **Waivers must be submitted and approved each semester to have the insurance charge removed from student accounts.**

- **Criteria to submit a waiver request, must meet one of the following:**
  - Sponsored Plan (US Government, Foreign Government, Embassy)
    - Must guarantee payment of all health care expenses in writing
    - Must be ACA compliant
  - UT Employee Group Health Plan
  - US Employer Plan
  - US Individual Plan
- **If you meet one of the above criteria, then your alternate health insurance coverage must meet the following minimum requirements:**

- Unlimited maximum on benefits
- No Pre-existing condition limitation
- $500 or less deductible per condition
- Must be Patient Protections and the Affordable Care Act (PPACA) compliant.
- Must meet mandatory coverage period for your academic period as outlined on the website.

MAV EXPRESS CARD FEATURES AND CHARGES

The Mav Express Card is used for accessing controlled facilities, checking books from the Library, gaining admission to various University activities such as athletic events and for other situations where personal identification is required.

A student may choose to deposit money on the Mav Express Card. This debit feature is called Mav Money. Students may use Mav Money at Dining Services, Office of Student Accounts, University Center, University Bookstore, and many other locations on and off campus. Deposits may be made and account activity reviewed online.

The Mav Express Card is a permanent card. As a student registers for a semester, the card is automatically validated. It is not necessary to obtain an additional Mav Express Card unless the student loses or destroys the card. Fees associated with the Mav Express Card (ID Card Replacement Fee) can be found at Description of Tuition and Fees: www.uta.edu/fees (http://www.uta.edu/fees/).

For additional information, visit www.uta.edu/mavexpress (http://www.uta.edu/mavexpress/) or call 817-272-2645.

PARKING PERMIT CHARGE

All students who drive a vehicle on campus need a permit to enter or park legally on campus (Texas Education Code, Section 51.207 (http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.51.htm#51207)). Please order your permit online through the registration screen from your student service center on the web. All permits are ordered by selecting *obtain a permit* link on the Parking and Transportation Services webpage www.uta.edu/pats. Once the permit is ordered and the appropriate vehicle information entered, the permit becomes valid. Student and resident permits expire August 31 of the current academic year.

Per Texas Transportation Code, Section 681.008 (http://www.statutes.legis.state.tx.us/Docs/TN/htm/TN.681.htm), Vehicles displaying a disabled veteran license plate are allowed to park in any person with disability parking space without displaying a University of Texas at Arlington parking permit. This exemption does not apply to parking in non-ADA designated spaces

Beginning **November 1** of the academic year, permit refunds will be prorated by the month, and no refunds will be made after the close of business on the Spring Census date as indicated in the current University Academic Calendar. All outstanding parking fines with Parking and Transportation Services must be paid in full prior to refund issuance. Proper identification must be provided in order to receive a refund.

Students are responsible for picking up a copy or visiting the web site for the Rules and Regulations booklet that contains campus parking policies. For additional parking information, pricing information, or hours of extended service during registration, call 817-272-3907 or visit the web site www.uta.edu/parking (http://www.uta.edu/parking/).

GRADUATION CHARGES

A graduation charge must be paid by each baccalaureate degree candidate when application is made for graduation. If graduation is delayed past the stated semester, the student must reapply for graduation and repay the graduation charge. An additional charge to cover the cost of cap and gown is assessed to each candidate who plans to attend any graduation ceremony.

COST OF BOOKS

Cost of books depends upon the courses selected. Generally, books for technical subjects are somewhat higher than those for other academic subjects. In certain technical, scientific and fine arts fields, there are extra expenses for equipment and supplies.

The University Bookstore has both new and used textbooks available. The bookstore will purchase used textbooks which are in good condition at any time during the year provided such textbooks continue to be used by the academic departments and if needed by the bookstore. “A student of this institution is not under any obligation to purchase a textbook from a university-affiliated bookstore. The same textbook may also be available from an independent retailer, including an online retailer.” (Texas Education Code, Section 51.9705; 19 TAC 4.215 et seq.)

Information about required and recommended course textbooks, including titles, authors, other publisher information and price, can be found at the UT Arlington Bookstore’s website, accessible via http://www.uta.edu/bookstore (http://www.uta.edu/bookstore/). Further information about required course materials is available by reviewing individual course syllabuses at UT Arlington’s Instructor and Course Syllabus Information (https://www.uta.edu/academics/courses-and-schedules/courses/) website.

TRANSCRIPTS

The Registrar's Office will mail an official copy of an academic transcript at the written request of a student upon receipt of payment of $10.00 for each copy requested. When working conditions permit, the office will provide one-day transcript service if requested. An official transcript will not be issued unless all financial obligations to the University have been satisfied.

HOUSING AND FOOD EXPENSES

Information about University housing may be found in the Student Housing section of this catalog. Information about campus food service may be found in the University Center section of this catalog.

Refunds

DROPPING COURSE(S) BUT CONTINUING ENROLLMENT

Students who drop a course/s while remaining enrolled in the session are refunded in full for drops completed by the published session census date. However, because of the approved tuition rates, not every drop will result in a credit to your account. The student is financially responsible for the full cost of the course/s dropped after the published session census date. (Texas Education Code, Section 54.006). Please refer to Refund of Registration Charges for additional information.

TOTAL WITHDRAWAL FROM SCHOOL

A student who officially withdraws from a session (drops all hours of a specific session) will receive a refund according to the schedule below.

1. A student who withdraws prior to the first official university class day will receive a 100 percent refund.
2. Students who withdraw as a result of military service may choose to receive a full refund of tuition and fees, an incomplete (if eligible) or final grade at institution discretion. (Texas Education Code, Section 54.006.)
3. If the foregoing condition is not met, then the refund shall be as shown below. Class days noted are official university class days. They are not the individual student's class meeting days.

FALL REGULAR, SPRING REGULAR, SUMMER 14 -WEEK AND SUMMER 11-WEEK SESSIONS

During class days 1 through 5—80%

During class days 6 through 10—70%

During class days 11 through 15—50%

During class days 16 through 20—25%

After 20th class day—no refund

FALL 1ST 8-WEEK AND 2ND 8-WEEK, SPRING 1ST 8-WEEK AND 2ND 8-WEEK SESSIONS

During class days 1 through 3—80%

During class days 4 through 6—50%

After sixth class day—no refund

FALL 1ST 5-WEEK, 2ND 5-WEEK AND 3RD 5-WEEK; SPRING 1ST 5-WEEK, 2ND 5-WEEK AND 3RD 5-WEEK; INTERSESSION; SUMMER I 5-WEEK AND SUMMER II 5-WEEK SESSIONS

On first class day—80%

On second class day—50%

After second class day—no refund

Applicable dates and deadlines are available at www.uta.edu/fees (http://www.uta.edu/fees/).

4. Parking refunds must be applied for separately at the Parking Office, 1225 W. Mitchell.

RETURN OF TITLE IV AND OTHER AID FUNDS

If a student receiving financial assistance withdraws (resigns) from all courses at the University of Texas at Arlington, then UT Arlington and/or the student may be required to return all or some of the federal, state, and/or institutional funds awarded to the student. These funds would be returned to the grant, scholarship, or loan fund from which the assistance was received.

The federal Return of Title IV Funds policy requires that a portion of federal aid be returned if the student withdraws on or before completing 60% of the semester for which student received federal aid. Students receiving all grades of F or a combination of all Fs and Ws are subject to the Return of Title IV Funds Calculation. Federal financial aid includes the Federal Pell Grant, Federal Academic Competitiveness Grant (ACG), Federal SMART Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), LEAP Grant (formerly SSIG), Federal Perkins Loan, Federal Stafford Loan (subsidized and unsubsidized), and the Federal Parent Loan for Undergraduate Students (PLUS).

Depending on the types and amounts of aid received, UT Arlington may be required to return a certain portion of funds, and the student may be required to repay a portion of the funds. If the student owes a repayment of grant funds as a result of the calculation, he/she cannot receive future federal financial aid funds at any school until repayment has been made. Any federal loan amount owed by the student is to be repaid under the terms of the promissory note (see example below). The student may owe an outstanding balance to UT Arlington once we return funds required through the federal Return of Title IV Funds calculation. Complete details of the policy can be found at www.uta.edu/fao (http://www.uta.edu/fao/), click Financial Aid on the top menu under policies, then Return of Funds Policy. Contact the Office of Financial Aid for additional information.

DISBURSEMENT OF REFUNDS

For your convenience, direct deposit of your refund is available. Information about direct deposit is published at www.uta.edu/fees (http://www.uta.edu/fees/).

Inquiries concerning refunds should be directed to Student Accounts, Room 130, University Administration Building, 817-272-2172, or by email at studentaccounts@uta.edu.

Residency Regulations

Resident classifications are determined in accordance with Title 19, Part 1, Chapter 21, Subchapter B of the Texas Administrative Code and the rules of the Texas Higher Education Coordinating Board for determining residence status. Except as specifically provided by law, an individual classified as a nonresident student must pay tuition, fees, and charges required of nonresident students. Students may access these rules at the Texas Administrative Code web site (http://www.sos.state.tx.us/tac/).

To be considered a Texas Resident a person must establish a domicile in Texas not later than one year before the census date of the academic term in which the person is enrolled in an institution of higher education, and maintain that domicile continuously for the year preceding the census date. Generally, a person enrolling in an institution of higher education prior to having established a domicile in Texas for 12 consecutive months immediately preceding the census date will be classified as a nonresident student.

Additionally, a person is eligible to be classified as a Texas Resident if the person: maintained a domicile in Texas for at least 36 months prior to graduation from a Texas high school or receipt of the equivalent to a Texas high school diploma, graduated from a Texas high school or received the equivalent of a Texas high school diploma, and maintained a residence in Texas for the 12 months preceding the census date at an institution of higher education. The domicile of a dependent's parents is presumed to be the domicile of the dependent unless the dependent meets all the requirements of this paragraph.

If while attending an institution of higher education a person classified as a nonresident meets the requirements to domicile in Texas, the nonresident student may reclassify as a Texas Resident if business and personal facts or actions are unequivocally indicative of a fixed intention to domicile permanently in Texas. A nonresident classification is presumed to be correct as long as the residence of the individual in Texas is primarily for the purpose of attending an educational institution. Students wishing to reclassify will need to complete a set of the Core Residency Questions and turn them into the Undergraduate Admissions Office with supporting documentation.

Generally, a student attending The University of Texas at Arlington who is not classified as a Texas Resident will be charged nonresident tuition. Certain nonresident students, however, are entitled to pay tuition and other fees at the Texas Resident rate. For example, military personnel assigned to duty in Texas, and their spouses and dependent children, are entitled to pay the same tuition as a Texas resident if certain documentation is provided. Similarly, students who hold a competitive academic scholarship of $1,000 per year or more awarded through The University of Texas at Arlington are entitled to pay resident fees and charges. Other exceptions to the requirement that nonresident students pay nonresident tuition, fees, and charges are included in the Texas Higher Education Coordinating Board rules for determining residence status (https://texreg.sos.state.tx.us/public/readtac$ext.TacPage/?sl=T&app=9&p_dir=P&p_rloc=181016&p_tloc=&p_ploc=1&pg=6&p_tac=&ti=19&pt=1&ch=21&rl=21).

The responsibility of registering under and maintaining the proper residence classification rests on the student. If there is any question concerning the student's classification at the time of registration, or any time thereafter, it is the student's obligation to consult with the Residency Determination Official in the undergraduate school and have the student's classification officially determined. All requests for reclassification should be submitted to the undergraduate school at least 30 days prior to the census date of the term in question. Residency appeals are made to the Residency Appeals Committee. Decisions of the committee are final.

Financial Aid

Many sources of student financial aid exist at The University of Texas at Arlington. Any interested student should apply for assistance each year, as eligibility and funding availability can vary from one year to the next. Financial aid is generally limited to U.S. citizens or permanent residents. A minimum of half-time enrollment (as defined in the Registration (p. 63) section of the catalog) with the intent of obtaining a degree or certificate and the

maintenance of satisfactory academic progress are required to participate in most aid programs. Students subject to selective service registration will be required to file a statement that the student has registered or is exempt from selective service registration to be eligible for financial aid.

Unless otherwise noted in this section of the Catalog, financial aid is available through the Office of Financial Aid in Room 252, University Administration Building, 817-272-3561. Information is also available on the financial aid Web site: www.uta.edu/administration/fao (https://www.uta.edu/administration/fao/).

Students subject to selective service registration will be required to file a statement that the student has registered or is exempt from selective service registration to be eligible to apply for state or federal financial aid including tuition waivers and exemptions provided through legislative action by the State of Texas.

Federal and State Programs

The University participates in most of the federal student financial aid programs offered through the U.S. Department of Education. In addition, several state and institutional programs are available for students with exceptional financial need. Among the programs in which the University participates are Federal Pell Grants, Federal Work-Study, Federal Supplemental Educational Opportunity Grants, Federal TEACH Grants, Federal Perkins Loan, Federal Direct Stafford Loan, Federal Direct PLUS, Texas Public Education Grants and TEXAS Grants. Award amounts are subject to funding levels set by the appropriate federal or state legislature. Information regarding eligibility and application procedures for these programs is available from the Office of Financial Aid. The Texas Education Coordinating Board administers various tuition assistance programs including programs for teachers and vocational nursing students.

Aid applicants may check the status of their financial aid applications on the Web through their MyMav (http://www.uta.edu/mymav/) accounts. A list of missing documents may be found in the To Do List in the Student Center. Award information can be viewed on the same page.

Students wishing to participate in the federal and state need-based student financial aid programs should complete a Free Application for Federal Student Aid (FAFSA) as early as possible prior to their actual enrollment at the University. The awarding process requires 2 – 3 weeks for completion once all required documents are received and is governed by the availability of funds. The FAFSA can be obtained online at the Federal Student Aid website (https://studentaid.gov/h/apply-for-aid/). The school code for UT Arlington is 003656.

With the exception of post-baccalaureate students seeking certification in the following areas: early childhood - grade 6, middle level, secondary and all level, non-degree seeking students in stand-alone certificate programs awarded by UT Arlington are not be eligible to receive need-based financial aid.

Grant Assistance for International Students

A limited number of TPEG grants are available to international students. Please contact the Financial Aid Office to complete an International TPEG form during the month of June. This funding is limited to international students paying the non-resident tuition rate.

Loan Programs

The Federal Perkins Loan, Federal Stafford Loan (subsidized and unsubsidized), and College Access Loan (CAL) are the primary sources of long-term loans available at UT Arlington. These programs include deferred repayment provisions that permit students to repay the loan after termination of at least half-time studies at the University. Interest will not accrue on the loans while the borrowers are enrolled on at least a half-time basis. Information regarding loan amounts and terms can be obtained from the Financial Aid Office.

Federal PLUS (Parent Loan for Undergraduate Students) loans are available to parents to finance their dependents' educational costs. Information and an application are available at https://studentaid.gov/plus-app/parent/landing (https://studentaid.gov/plus-app/parent/landing/). Students whose parents wish to borrow through the Federal PLUS must complete the FAFSA and have the results sent to UT Arlington prior to loan certification. Grad PLUS loans are available to graduate students. This loan also requires completion of the FAFSA although the loan is not based on financial need.

Federal Work-Study Program

A student who needs a job to help pay for college expenses may be eligible for employment through the Federal Work-Study Program. Eligibility is based on financial need as determined by the FAFSA. Most participants are employed in positions with various University departments, but limited off-campus jobs with certain approved agencies are also available. You may view available on and off-campus student employment positions at Handshake (https://www.uta.edu/student-affairs/careers/students-alumni/services-offerings/handshake/) provided by the Career Development Center (https://www.uta.edu/student-affairs/careers/students-alumni/student-employment/).

Financial Counseling

The Financial Aid Office provides financial aid counseling for any and all students regardless of whether they qualify for other types of financial assistance. Students may also wish to contact the Student Money Management Center at 817 272-2353 for assistance with developing a personal budget or other money management tools.

Out-of-State Student Assistance

Several states offer aid to their students attending schools in other states. Amounts and requirements for this assistance vary greatly. Further information can be obtained from the home-state aid agency.

Veterans' Assistance

Contact the Registrar's Office for information concerning eligibility for and payment of VA benefits and other matters for veterans attending or planning to attend UT Arlington.

Fellowships and Scholarships

252 University Administration Building | Box 19199 | 817.272.2197 | www.uta.edu/administration/fao (https://www.uta.edu/administration/fao/)

The University of Texas at Arlington provides a variety of scholarship programs for students who have demonstrated exceptional academic achievement. UT Arlington also offers a number of endowed scholarships that are administered by a school, department or program. Graduate scholarships are awarded on the basis of scholastic excellence and adequate preparation for graduate study in the student's chosen field, as shown by the student's academic record. Scholarship eligibility criteria include admission into a degree program, enrollment in coursework leading to the degree, reasonable progress in the degree program, good academic standing, GPA, and in some cases, test scores, references and personal statements. Test scores are not used as the sole criterion for awarding scholarships or the primary criterion for denying scholarship to applicants. There are additional specific qualifications for scholarships in various areas of study. Students are encouraged to contact their school dean or department/program office to obtain information about eligibility criteria and scholarships awarded in the student's area of study.

In addition to the specific qualifications required for various competitive scholarships awarded by the University, the committee responsible for selection of a given scholarship may consider such factors as leadership, community involvement and financial need. State law and the Rules and Regulations of the Board of Regents of The University of Texas System require that any scholarship and/or fellowship be approved by the appropriate scholarship, loans and awards committee (graduate or undergraduate). Scholarship funds have been contributed by individual donors, UT Arlington alumni, corporations, government agencies and other entities to recognize and reward academic excellence.

TOP 10% SCHOLARSHIP

Per *Texas Education Code*, Section 51.933, students who graduated in the top 10% of their graduating class may be eligible for a scholarship provided by the Texas Higher Education Coordinating Board. For eligibility and application information visit College for All Texans (http://www.collegeforalltexans.com/?objectid=411AAFBE-0E6E-5B28-593FFA55A73ED3BE) website.

TEACHING AND RESEARCH ASSISTANTSHIPS

Teaching and research assistantships are available in most graduate programs. Since the number and type of such positions depends on program needs and availability of funding, students should contact their program to indicate interest in an assistantship and to learn about how to apply for available positions.

Assistantships can be held only by new students admitted unconditionally or on probation. Students admitted with provisions are not eligible to hold an assistantship. However, all Enhanced GTA and STEM Fellowship appointees must be admitted unconditionally. Enrolled students who do not maintain a 3.0 overall GPA are not are not eligible for assistantships and must raise their overall GPA to 3.0 or higher to continue as a teaching or research assistant or to receive a new assistantship appointment. Continuation of an appointment also requires that the student performed assigned duties satisfactorily in the preceding semesters as determined by the respective department. Consult the catalog section on General Graduate School Regulations and Information for regulations regarding registration and responsibility of graduate assistants.

Before being appointed to an assistantship at UT Arlington, a student whose native language is not English must demonstrate English proficiency. The preferred method to demonstrate English proficiency is to submit an acceptable score of at least 23 on the TOEFL speaking subtest, or a score of at least 7 on the speaking section of the IELTS, or take and pass the UTA Developmental English course. The TOEFL or IELTS score should be sent directly to UT Arlington by ETS or IELTS. Score reports submitted directly by the student or those marked "Student Copy" or "Applicant's Copy" are not considered official and will not be accepted by the University. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor’s degree from an accredited U.S. institution. The TOEFL and IELTS are administered at test centers around the world.

GRADUATE ASSISTANTSHIP POLICY

Graduate teaching and research assistantships are funded through state appropriations and federal, state, local and private grants for at least three principal reasons. First, employment of graduate students in teaching and in research positions during their graduate education encourages and supports their participation in these two major functions of a university and thereby strengthens the quality of the students' educational experience. Second, assistantships provide direct financial support to outstanding students who are essential to the development of quality graduate programs. Third, graduate students provide valuable and necessary services to the University in their roles as teaching and research assistants and associates. It must be kept in mind, however, that graduate assistants are first and foremost students. As such, their most important task is to complete their degree requirements in a timely fashion; this is the primary expectation of the University as well.

In alignment with the "Resolution Regarding Graduate Scholars, Fellows, Trainees, and Assistants (https://cgsnet.org/resources/for-current-prospective-graduate-students/april-15-resolution/)" of The Council of Graduate Schools in the United States, UTA will provide applicants until April 15 to consider offers of admission that also include financial support. A copy of the resolution and list of signatory institutions can be viewed at the link above. To assure the appointment of highly qualified students and to best realize the principal objectives for which graduate assistants are employed, The University of Texas at Arlington has adopted the following policies and regulations, applicable to all graduate assistantships.

Admission Status

A student must be admitted to a degree program to be eligible to hold a graduate assistantship. Students admitted as Provisional students may not be considered for an assistantship until all provisional requirements have been resolved. New students, admitted with probationary conditions, may be considered for an assistantship, subject to the requirement that they earn and maintain a 3.0 grade-point average while enrolled as a graduate student, conform to admission conditions specified by the admitting department or the University and meet assistantship enrollment requirements. See Admissions (p. 26) for more information.

English Proficiency

Before being appointed to a teaching assistantship at UT Arlington, a student whose native language is not English must demonstrate English proficiency. The preferred method to demonstrate proficiency is to submit an acceptable score of at least 23 on the Speaking Section of the TOEFL, or a score of at least 7 on the Speaking Section of the IELTS, or take and pass the UTA Developmental English course. The TOEFL and IELTS scores should be sent directly to UT Arlington by ETS or IELTS. Score reports submitted directly by the student or those marked "Student Copy" or "Applicant's Copy" are not considered official and will not be accepted by the University. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor's degree from an accredited U.S. institution. See Graduate Admissions (p. 26) for more information.

Developmental English Program

Students who do not achieve scores on the TOEFL or IELTS high enough to satisfy the English proficiency requirements for graduate teaching assistants must enroll in the Developmental English Program and be certified for English proficiency before becoming eligible to hold a teaching assistantship. This 10-week program, offered by the UT Arlington English Language Institute, emphasizes oral presentation skills and accent reduction. Registration is in 402 Hammond Hall, and the charge for course is payable at the time of registration. Contact the English Language Institute at 817.272.2730 for details, including the current class schedule and charges.

Continuation or Renewal of Appointment

Although a student may be appointed initially to a graduate assistantship for a full academic year, continuation of the appointment beyond the first semester is subject to the following conditions:

1. To continue or renew an appointment, the student must be in good standing in the University. A student on academic probation is not in good standing, and therefore, will automatically lose his or her assistantship. However, Graduate Advisors, with the written endorsement of their department's or program's Graduate Studies Committee, may petition the Academic Dean to allow a one-time exception, granting one additional semester of assistantship support in the next semester of enrollment if they judge the student is capable of raising his or her GPA to the required minimum by the end of that semester and believe that the student is making satisfactory progress in all other aspects of their studies. If granted, the student will be considered to be in good academic standing for one semester for purposes of continuing their assistantship. This broadened definition of academic good standing for a student with a GPA below 3.00 applies only in cases where a program wishes to continue or renew a student's teaching or research assistantship during the semester of enrollment following the one in which his or her GPA dropped below 3.00. Programs may not request this exception on behalf of students who will hold any other type of employment.

   A student granted one semester of good academic standing for purposes of continuing their assistantship must improve his or her UT Arlington graduate grade-point average to 3.00 and return to good academic standing as normally defined in the next semester of enrollment in order to qualify for assistantship support in subsequent semesters. Requests to extend this form of good standing beyond one semester will not be approved. Further, students who have previously received a one-semester extension of academic good standing for purposes of continuing their assistantship will not be eligible for this exception again.

2. The student must be making satisfactory progress toward an advanced degree.
3. The student must have performed assigned assistantship duties satisfactorily in the preceding semester(s) as determined by the department in which the assistantship is held.

A department may limit the number of semesters during which a graduate student may hold an assistantship.

Resident Tuition Rates

Graduate teaching and research assistants employed at least 20 hours per week in positions related to their degree programs are entitled to Texas resident tuition rates. Eligibility for the resident rate must be certified prior to registration otherwise, full tuition will be assessed. Non-resident students receiving appointments after a term's published Census date will not be eligible for resident tuition rates in that term.

Non-resident or international students holding less than full assistantships (full meaning 20 hours employment per week) are not eligible for Texas resident rates.

Course Load

Full Assistantships

Graduate students appointed to full assistantships (20 hours per week) must enroll in and complete a minimum of 9 SCH during a long term (Fall/Spring) and 3 SCH the Summer term in which they are employed. Students appointed to a partial assistantship (10 hours of employment per week or less) in a long Term must enroll in and complete at least 6 SCH that term and those employed in any Summer Term must enroll in and complete a total of 3 SCH

during the Summer terms. Students may meet enrollment requirements by taking any courses required to complete their degree. All graduate students, whether funded or unfunded, must follow UT Arlington policies concerning required enrollment in the final semester.

The above enrollment requirements for holding a full assistantship may be reduced under the following circumstances:

1. Doctoral students who have completed their Comprehensive Examinations and who will devote most or all of their efforts to completing their dissertations are eligible for assistantships in Fall or Spring Terms if they enroll in at least 6 SCH in the Term(s) in which they are employed by the university in an assistantship, and may hold an assistantship in Summer by enrolling in at least a total of 3 SCH during the Summer Terms.
2. Doctoral students who have completed or will complete a total of at least nine hours of dissertation research in 6399, 6699, 6999 and/or 7399 courses prior to graduation may meet minimum registration requirements in the term they intend to defend their dissertations and graduate by enrolling in 7399.The 7399 course may be repeated no more than two times. If a student does not graduate after enrolling in 7399 or repeating 7399, he or she must enroll in 6699 or 6999 until graduation. International students#must obtain permission to enroll only in 7399 from the Office for International Education (OIE).
3. Master's degree seeking students in their final semester needing 3-6 SCH to complete their degree are eligible to hold an assistantship if the enroll only in the courses needed to complete their degree requirements or are enrolled in thesis or dissertation research only. Students defending their thesis must enroll in a six-hour thesis course.

Enrollment required to hold an assistantship may differ from credit hours required to be considered a full-time student (see Full Time Enrollment (https://catalog.uta.edu/academicregulations/registration/#text) in the Registration section of this Catalog). Students enrolled in 6 or fewer SCH may be eligible for an assistantship but are not considered full-time enrolled students which may affect their ability to qualify for financial aid, scholarships, loans, or meet visa requirements. Note the following:

- Students must be enrolled in at least 6 SCH in Fall or Spring Terms or 3 SCH in Summer to be eligible for aid offered through the Office of Financial Aid during those Terms.
- Some loan and scholarship programs require full-time enrollment each term and will not fund part-time students. Some may require part-time enrolled students to begin to repay loans.
- International students must obtain written permission from the Office for International Education for less than full-time enrollment.# Hiring departments must have a copy of this permission in order to offer an assistantship to International students who are not enrolled full-time.

Students may not petition for a course load reduction below these requirements.

Partial Assistantships

Graduate Teaching Assistants or Graduate Research Assistants who have a 25% (10 hours of employment per week) or less appointment must be enrolled for at least 6 SCH during a long semester and 2 SCH during the summer. This enrollment requirement covers both organized courses and dissertation and thesis hours. However, all graduate students, whether funded or unfunded, must follow UT Arlington policy concerning required enrollment in their final semester of study.

Assignment of Duties

Graduate assistants are under the direction of the department chair with regard to assistantship responsibilities and assignments.

ADDITIONAL EMPLOYMENT WHILE AN ASSISTANT

All Students

In accepting a graduate assistantship, students agree to devote their efforts to graduate studies and assistantship responsibilities. In some circumstances, however, additional employment may be justified. Immigration policies severely restrict the amount that an international student may work.

U.S. Citizen Students

Full-time (20-hour) graduate assistants wishing to hold additional assistantships or accept additional on or off-campus positions must obtain the approval of their Graduate Advisor. Approval will only be given if the additional work will not impact the student's academic progress negatively or exceed employment limits allowed by law.

International Students

During the fall and spring semesters, international students may work on campus only 20 hours per week unless authorized for additional employment through Curricular Practical Training (CPT). During vacation and the summer, international students may work more that 20 hours per week on-campus without additional authorization. At anytime during the year, employment with an off-campus employer must be authorized by either BCIS or by the International Office in the case of CPT. The Office of International Education must grant approval prior to taking on additional employment if that employment is to be authorized by CPT. Students holding a UT Arlington assistantship wishing to work off-campus in addition to the assistantship, must 1) meet and maintain the enrollment requirements for holding an assistantship 2) meet the immigration requirements for CPT 3) work only part-time (20 hours or less) off-campus 4) be employed in off-campus work that is clearly connected to his or her assistantship. If these requirements are not met, a student will be obliged to give up either the assistantship or the off-campus employment.

Satisfactory Academic Progress

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, undergraduate recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (http://www.uta.edu/fao/). Click on the Satisfactory Academic Progress tab.

Grades and Grading Policies

Grades that may be assigned in courses at the University of Texas at Arlington (Valid Grades) for undergraduate courses consist of A, B, C, D, F, I, P, R, Q, P, Z. Grades assigned in graduate courses are limited to A, B, C, D, F, P, I, R, W. Instructors only assign grades listed on the MyMav grade roster for a given course. Students uncertain about the grading policy in a course should consult their instructor at the beginning of the term for information. Valid grades for independent study, conference, seminar, and readings courses vary widely among departments; therefore, a statement on valid grades and special grading policies, if any, is given at the beginning of the course descriptions for each program in this catalog.

COMPUTATION OF THE GRADE POINT AVERAGE

Computation of the Grade Point Average: The cumulative University grade point average for an undergraduate student is calculated on the basis of all work undertaken at UT Arlington, including credit by examination, correspondence and extension, for which a letter grade is given, unless the course is repeated under the Grade Replacement Policy or Grade Forgiveness Policy, or removed from the calculation under the Grade Exclusion Policy or Grade Forgiveness Policy. Courses in which the symbol I, P, Q, W or Z is recorded are excluded in calculating the grade point average. These grades appear on the student's official transcript.

Grades earned at any institution other than UT Arlington are not used in calculating the University grade point average, but semester hours of transfer credit accepted by UT Arlington are added to hours taken at the University to determine the total college hours undertaken.

The following grades are used at UT Arlington:

Grade	Description	Grade Points Per Semester Hour
A	Excellent	4
B	Good	3
C	Fair	2
D	Passing, Below Average	1
F	Failure	0
I	Incomplete	0
W	Withdrawn	0
Q	Withdrawn - No Penalty (does not count toward Six-Course Drop Policy)	0
P	Pass	0
R	Research	0
Z	No Credit	0

UNDERGRADUATE GRADING POLICIES

- **D's:** Although a grade of D may be sufficient for an undergraduate to earn credit in a course, a cumulative University grade point average of at least 2.00 is necessary for satisfactory progress toward a degree.
- **I's:** A grade of I (Incomplete) may be assigned for a course if, in the opinion of the instructor, there are extenuating circumstances which prevent the student from completing the required work within the term of enrollment for the course. The Incomplete must be removed by the end of the final examination period of the following term, excluding the summer sessions, for the student to receive credit for the course. If the Incomplete is not removed during the allotted time period, it will convert automatically to an F. As long as the grade is carried as an I, it will not be used in the calculation of the student's grade point average. A student should not re-enroll in a course for which an I is the grade of record. Students in Canvas courses that receive an incomplete grade automatically retain their enrollment in the course and section in which they received the incomplete until the incomplete is resolved.
- **Grades that do not count toward GPA:** A course for which the symbol I, P, Q, W or Z is given does not count as hours undertaken for the purpose of calculating the grade point average, and no grade points are earned. A course taken and passed on the pass/fail basis counts as hours undertaken, but no grade points are earned.
- **Pass/Fail Program (Engineering, Liberal Arts, Science, Nursing):** Students who are majors in the colleges of Engineering, Liberal Arts, Science, or Nursing may take courses on a pass/fail basis subject to differing rules established by these academic units. This policy is intended to offer

students an opportunity to take courses that will broaden their education with less immediate emphasis on the need to achieve grade points. However, an F received in a pass/fail course (except developmental courses) will be evaluated the same as an F received on a regular basis, adversely affecting the grade point average. Students must inform the instructor of their intention to take a course on a pass/fail basis by the Census Date of the term. Complete details and requirements of each college are available in the offices of the academic deans and in the departmental offices of the colleges.

- **Developmental Course Grades:** Students assigned to developmental courses, as a result of TSI status will be graded on a pass/fail basis. This policy is intended to offer students an opportunity to take courses that will broaden their education with less immediate emphasis on the need to achieve grade points. Therefore, an F received in a preparatory or developmental course will be not evaluated the same as an F received in a credit-bearing course and will not be factored into the student's GPA.

EFFECT OF GRADES IN REPEATED COURSES

A student may repeat any course except as limited by individual colleges and schools, provided the student's grade earned in an earlier term is below C. Courses transferred for credit to UT Arlington from another college or university may not be repeated for credit. A student may not repeat a course for additional hours toward a degree unless the catalog description specifically states that the course may be repeated for credit.

Courses originally taken or repeated at another college will not affect a student's grade point average at UT Arlington. If a student earned a grade of less than C in a course taken at UT Arlington, the student may take that course or its equivalent at another college or university for transfer to UT Arlington only with the prior written approval of the student's major department chair or academic dean.

GRADE EXCLUSION POLICY

The grade exclusion policy may be utilized by students subject to the policy except as otherwise noted. Grade Exclusion is available to students whose initial enrollment at UT Arlington was Fall 2006 through Summer 2013. Upon receiving a D or F in a course, a student may file a request with the Office of the Registrar for grade exclusion. All Grade Exclusion requests submitted during the term must be submitted by the last day to drop a course in that term to be processed during that term. Students have to be enrolled on Census Date for their Grade Exclusion petition to be processed in that term. See the academic calendar (http://www.uta.edu/uta/acadcal.php) for Census Date and Last Drop Date information. Students who had already completed a grade replacement for one or more courses at UT Arlington are not eligible to utilize the grade exclusion policy. The following conditions apply:

- Students seeking grade exclusion must receive counseling from the following as appropriate: Academic Advisor to determine effect on completion of degree requirements and probation requirements, Financial Aid Office if receiving a scholarship or financial aid administered by that office, Athletic Department if a student athlete, International Office if an international student
- Grade exclusion requests must be made using a grade exclusion form available from the Office of the Registrar. The request must be approved by the academic dean from the student's major College/School.
- The course grade will be removed from the academic GPA; although the grade received will remain on the student's transcript.
- This policy will apply to a maximum of three courses at UT Arlington and will not apply to courses taken on a pass/fail basis. Of the three courses, only one course may be at the 3000/4000 level.
- This policy is not applicable to graduate students.
- Individual colleges and schools may limit this policy.
- Students may not apply this policy to grades of D or F which result from disciplinary action.
- Students who are dismissed from the University for academic reasons cannot use a grade exclusion until their dismissal period is completed.
- Excluded grades will be included in the calculation of GPA for determining graduation with Latin Honors.
- Excluded hours will count toward the 30 hour/45 hour policy for Tuition for Excessive Undergraduate Hours.
- Tuition and fee refunds, rebates or other financial consideration will not be given for courses for which grade exclusion is granted.
- Once a course has been excluded, a student may not later have the exclusion removed.
- Excluded courses cannot be used to satisfy degree requirements.
- Students must be enrolled at UT Arlington on Census Day of the term that the grade exclusion, if approved, is processed.

GRADE FORGIVENESS POLICY

Grade Forgiveness is available to incoming freshman and transfer students whose initial enrollment at UT Arlington was Fall 2013 or thereafter. For students who entered UT Arlington before the Fall 2013 and who have not utilized the Grade Replacement policy, the Grade Exclusion policy remains in effect. Students enrolled in their second baccalaureate or a graduate program are not eligible for Grade Forgiveness.

Upon receiving a grade of D or F in a 1000 or 2000 course at UT Arlington, students subject to the Grade Forgiveness policy may elect to have the grade forgiven. Students subject to this policy must contact their academic advisor, who files the Grade Forgiveness petition on their behalf. All Grade Forgiveness requests submitted during the term must be submitted by the last day to drop a course to be processed that term. Students have to be enrolled on Census Date for their Grade Forgiveness petition in that term to be processed during that term. See the academic calendar (http://www.uta.edu/uta/acadcal.php) for Census Date and Last Drop Date information. A student is limited to a total of two Grade Forgiveness opportunities under the following conditions:

- **Grade Omission:** A student may elect the **grade omission option** for one of the two Grade Forgiveness opportunities if the student is changing their major and the course is not required for the new major. In addition, a student electing grade omission may not re-enter that major. Grade omission may only be applied to one course. If electing to use grade omission, the student is not required to retake the course.
- **Grade Substitution:** A student may elect the **grade substitution option** for one or both of the Grade Forgiveness opportunities. In this case, the course(s) must be retaken, even if it is not required for the student's current major. This policy may be used to forgive a grade earned the first time a course is taken and the course must be retaken at UT Arlington. A grade substitution petition should be filed after the grade for the second attempt is known.
- Students must file their petition to substitute or omit the grade earned in a course with the aid of their academic advisor. Students must be enrolled at UT Arlington on Census Day of the term that the Grade Forgiveness, if approved, is processed.
- Students MAY apply for Grade Forgiveness for any term (after final grade posting of the previous term but before the Last Drop Day of the current term) before the final semester PRIOR to graduation. Students may not apply for Grade Forgiveness AFTER graduation.
- Courses transferred for credit to UT Arlington from another college or university may not be forgiven under this policy.
- For courses in which the topic may change from term to term, this policy may only be used if the topic for the repeated course is the same as the initial course topic.
- Grade Substitution is not eligible for courses that are no longer offered.
- This policy does not apply to courses taken on a pass/fail basis.
- Individual colleges and schools may limit this policy.
- Students may not apply this policy to grades of D or F which resulted from disciplinary action.
- Students seeking Grade Forgiveness must receive counseling from the following as appropriate: Academic Advisor, to determine the effect on completion of degree requirements and probation requirements; Financial Aid Office, if receiving a scholarship or financial aid administered by that office; Athletic Department, if a student athlete; and International Office, if an international student.
- The grade(s) for the forgiven course(s) will be removed from the grade point average, although the grade(s) received will remain on the student's transcript.
- A course that has been "grade omitted" or "grade substituted" may not be used to satisfy degree requirements.
- Once Grade Forgiveness has been applied to a course, the student may not have the action reversed.
- Students who are dismissed from the University for academic reasons cannot use Grade Forgiveness until they have completed their dismissal period.
- Forgiven grades will be included in the calculation of the grade point average for determining graduation with Latin Honors.
- The credit hours earned in courses where the grade is forgiven will count toward the 30 hour/45 hour policy for Tuition for Excessive Undergraduate Hours.
- Tuition and fee refunds, rebates or other financial consideration will not be given for courses for which Grade Forgiveness is granted.
- A student may not use credit by exam to receive credit for a course once a student has received a grade for that course even if it has been omitted.
- Students must be enrolled at UT Arlington on Census Day of the term that the forgiven grade, if approved, is processed.

PROGRESS REPORTS

Early Progress Reports (4th Week): Students with 30 hours or fewer semester credit hours (freshmen) and athletes will receive early progress report grades in or by the fourth week of the fall and spring terms.

Midterm Progress Reports: Freshmen, first term transfers, athletes, undergraduates with a cumulative GPA of 2.25 or lower, and undeclared students will receive an interim grade report in or by the ninth week of the fall and spring terms.

These progress report grades are not recorded on the student's official record. They are for information purposes only and are intended to benefit the student as an early alert. The grade reported at the end of a term is the official and permanent evaluation of a student's performance in a given course. Notifications are sent to students' UTA email boxes when progress reports are available, and students are urged to frequently review their progress report grades in MyMav (https://www.uta.edu/mymav/) during the grade collection period. For the purpose of progress reports, a grade of I indicates that no grade data was available at the time. Students are encouraged to consult their instructor for progress report grade data if an I is reported or if no grade is reported.

FINAL GRADES

Final grades are available in MyMav (https://www.uta.edu/mymav/). Grades are posted at the end of each regular, summer, and intersession session, and academic standing is posted at the end of each term. The grade reported at the end of a term is the official and permanent evaluation of a student's performance in a given course. Official transcripts are available through the Office of the Registrar for those students who need official verification for tuition reimbursement and other reasons. Students with transcript holds will not be able to access their official transcript.

FINAL EXAMINATIONS

Final examinations are scheduled at the end of each session or term and identified in the University's academic calendar (http://www.uta.edu/uta/acadcal.php). All forms of examinations (quizzes, take-home exams, etc.) are prohibited on scheduled class or reading days during the calendar week

prior to the week final examinations begin, or after final exams week. All form of examinations must be completed by the end of exam week. Specific exceptions for certain courses may be given by obtaining approval from the appropriate academic unit head and academic dean. Students shall be informed of any such exceptions prior to the end of the fourth week of classes, as published in the University General Catalog.

FINAL REVIEW WEEK

A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabi. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week.

OFFICIAL TRANSCRIPTS

Official transcripts are available through the Office of the Registrar. Students with transcript holds will not be able to access their official transcript.

GRIEVANCE PROCEDURES RELATED TO GRADES

In attempting to resolve any student grievances regarding grades, it is the student's obligation first to make a serious effort to resolve the matter with the individual with whom the grievance originated. Individual course instructors retain primary responsibility for assigning grades. The instructor's judgment is final unless compelling evidence shows preferential treatment or procedural irregularities. If students wish to appeal, their request must be submitted in writing—on an appeal form available in departmental or program offices—to the department chair or program director. The student has one calendar year from the date the grade is assigned to initiate the grievance. The normal academic channels are department chair or program director and then academic dean. However, before considering a grievance, the department chair or program director will refer the issue to a departmental or program committee of faculty. If the student does not find the committee's decision acceptable, the student may appeal to the academic dean. The decision of the dean is final. Information specific to the procedures to be followed in each academic unit is available in the office of the academic dean.

The dean of the college or school in which a student is enrolled, or the Associate Vice Provost of the Division of Student Success if the student has not declared a major, has jurisdiction over the student's program of study, degree requirements and all other academic matters including grievances. However, students taking a course in a college or school other than the one in which they are primarily registered are subject to the dean of the college or school in which the course is offered concerning the course and academic grievances regarding the course.

Information regarding grievances for matters other than grades is available in the Student Rights (p. 107) section of the catalog.

FRESHMAN Distinction ROLL

First-time, first-year freshman students with less than 30 credit hours earned with excellent grades will be recognized by being listed on the Freshman Distinction roll. The Freshman Distinction roll will include those students who have both:

- Less than 30 semester credit hours earned in residence at UT Arlington with a cumulative GPA of not less than 3.50, and
- 12 semester credit hours earned in the current term, not including pass/fail work, with a GPA for the semester of not less than 3.50

In addition to this official recognition, the Division of Student Success will be recognizing new students with a 3.0 and 3.49 grade point average, as well as those in the Freshman Distinction roll and All A's (4.0 GPA), with special recognition from the Associate Vice Provost for Student Success.

DEAN'S LIST

Students with excellent grades will be recognized by being listed on the Dean's List. Dean's List is awarded by each college to students in that college's majors. The Dean's List will include those students who have both:

- 30 semester credit hours earned in residence with a cumulative GPA of not less than 3.50, and
- 12 semester credit hours earned in the current term, not including pass/fail work, with a GPA for the semester of not less than 3.50.

President'S LIST

Students with exceptional grades will be recognized by being listed on the President's List. President's List is awarded to all eligible undergraduate students regardless of major. The President's List will include those students who have both:

- 30 semester credit hours earned in residence with a cumulative GPA of not less than 3.50, and
- 12 semester credit hours earned in the current term, not including pass/fail work, with a GPA for the semester of not less than 4.00.

GRADUATE GRADING POLICIES

GRADE OF I

The grade of I designates the grade of incomplete. A graduate student unable to complete all assigned work in a class in the term in which it was taken may, at the discretion of the instructor, receive an I grade. *This grade is not given automatically* when a student does not complete all assigned work. It is the responsibility of the student to make arrangements with the instructor to secure a grade of I before the term ends. The grade of I will remain as part of the student's academic record until the work is completed and a final grade awarded. To change a grade of I to another grade, the instructor must submit a change of grade form. A grade of I does not carry credit value. This grade is not awarded in research, internship, thesis or dissertation courses. Students in Canvas courses that receive an incomplete grade automatically retain their enrollment in the Bb course and section in which they received the incomplete until the incomplete is resolved.

GRADE OF R

The grade of R designates the grade of research in progress and is given only in research, internship, thesis or dissertation courses. A graduate student unable to complete assignments in one of these courses may, at the discretion of the instructor, receive an R grade. The R grade is a permanent grade and indicates dissertation continuation. To receive academic credit in an R-graded course, a student *must re-register for and successfully complete the course* earning a valid passing grade for the course. Grading policy in some courses may change during the period covered by this catalog. Grading policy for each course each term is included in the course syllabus. Students should verify the grading policy with the instructor at the beginning of each term.

GRADE OF W

A grade of W may be assigned if a student chooses to withdraw from a class after Census date but prior to the last date to drop posted in the University's Academic Calendar. *However, the grade of W is not automatically awarded.* Graduate students must consult with their graduate advisor about their reasons for withdrawal before withdrawing from a class. Further, the student must secure the permission of the class instructor to withdraw. The instructor shall determine whether the student will be granted a W or will receive a grade for the course commensurate with the proportion of the course requirements that have been completed successfully. The grade decision is based on the instructor's judgment, The instructor will inform the student of the grade decision before finalizing the request. Students who have withdrawn from a course must re-enroll in it to receive credit.

Grade of Z

The grade of Z designates the grade of clinical in progress and is given only in clinical courses. A graduate student unable to complete assignments in one of these courses may, at the discretion of the instructor, receive an Z grade. The Z grade is a permanent grade and does not carry credit value. To receive academic credit in an Z-graded course, a student *must re-register for and successfully complete the course* earning a valid passing grade for the course. Grading policy in some courses may change during the period covered by this catalog. Grading policy for each course each term is included in the course syllabus. Students should verify the grading policy with the instructor at the beginning of each term.

Research or Internship Course Grades

The only grades awarded in most research or internship courses are P (pass), R (research in progress) , F (fail) or W (withdrawn).

THESIS (5398, 5698) GRADES

R (research in progress), F (fail), W (withdrawn) or, if program policy permits, P (pass) may be awarded in 5398. Grades of R (research in progress) F (fail), W (withdrawn) or P (pass) are awarded in 5698. The grade of P can only been awarded when the thesis defense is passed unconditionally and the final version of the thesis is accepted by the supervising committee..

DISSERTATION (6399) GRADES

Only R (research in progress), F (fail) or W (withdrawn) are awarded in this course.

DISSERTATION (6699, 6999 AND 7399) GRADES

The grades P (pass), (R) research in progress, F (fail) and W (withdrawn) may be awarded in these courses. The grade of P can be awarded when the dissertation defense is passed unconditionally and the final version of the dissertation is accepted by the supervising committee. R, F, or W grades are assigned otherwise.

EFFECT OF GRADES IN REPEATED COURSES

A student may repeat any course except as limited by individual colleges and schools, provided the student's grade earned in an earlier term is below C. Courses transferred for credit to UT Arlington from another college or university may not be repeated for credit. A student may not repeat a course for additional hours toward a degree unless the catalog description specifically states that the course may be repeated for credit.

Courses originally taken or repeated at another university will not affect a student's grade point average at UT Arlington. If a student earned a grade of less than C in a course taken at UT Arlington, the student may take that course or its equivalent at another university for transfer to UT Arlington only with the prior written approval of the student's major department chair or academic dean.

GRADUATE GRADE FORGIVENESS POLICY

Graduate Grade Forgiveness is available to graduate students enrolled in a master's degree plan beginning Fall 2023. BS-to-PhD students are eligible provided that the student has not completed 30 hours of graduate course work. Students enrolled in a doctoral program are not eligible for Graduate Grade Forgiveness.

All Master's degree-seeking students who began their program prior to Fall 2023 may be eligible for grade forgiveness provided that the course was attempted only once prior to Fall 2023; courses attempted two or more times prior to Fall 2023 are not eligible.

Students may use the Graduate Grade Forgiveness policy if they receive a grade of C, D, or F in a graduate course at UT Arlington, by electing to repeat the course(s). Students must contact their academic advisor, who files the Grade Forgiveness petition on their behalf. All Grade Forgiveness requests submitted during the term must be submitted by the last day to drop a course to be processed that term. Students must be enrolled on Census Date for their Grade Forgiveness petition in that term to be process during that term. See the Academic Calendar (http://www.uta.edu/uta/acadcal.php) for Census Date and Last Drop Date information. A student is limited to a total of two Graduate Grade Forgiveness petitions, regardless of major/degree or any changes to major/degree, under the following conditions:

- Students seeking grade forgiveness must receive counseling from the following as appropriate: Academic Advisor, to determine the effect on completion of degree requirements and probation requirements; Financial Aid Office, if receiving a scholarship or financial aid administered by that office; Athletic Department, if a student athlete; and International Office, if an international student.
- A student may elect to use both Graduate Grade Forgiveness opportunities by repeating the same course up to two times or by repeating two different courses at UT Arlington.
- Grade Forgiveness may be applied to the lesser grade(s) attempted at UT Arlington, and only the better of the eligible grades will be used in the calculation of the student's grade point average.
- The grade(s) for the forgiven course(s) will be removed from the GPA calculation, although the grade(s) received will remain on the student's transcript.
- Only the course(s) and affiliated credit hours retaken in conformity with the Graduate Grade Forgiveness policy will apply to degree requirements. Earlier attempts, including the course credit hours, leading to grades that are forgiven under this policy will not count towards degree requirements.
- Students must file their petition for forgiveness of a grade earned in a course with the aid of their academic advisor. Students must be enrolled at UT Arlington on Census Day of the term that the Grade Forgiveness, if approved, is processed.
- Students MAY apply for Grade Forgiveness for any term (after final grade posting of the previous term but before the Last Drop Day of the current term) before the final semester PRIOR to graduate degree conferral. Students may not apply for Grade Forgiveness AFTER their degree is conferred.
- Courses transferred for credit to UT Arlington from another college or university may not be forgiven under this policy nor be used towards grade forgiveness for grades earned at UT Arlington.
- A current topics course may not be retaken for purposes of grade forgiveness if its content differs from that presented in the course which was taken previously.
- Grade Forgiveness is not eligible for courses that are no longer offered.
- The policy does not apply to courses taken on a pass/fail basis.
- Students may not apply this policy to grades awarded as a result of disciplinary action.
- Tuition and fee refunds, rebates, or other financial consideration will not be given for courses for which Grade Forgiveness is granted.
- Once Grade Forgiveness is applied to a course, the student may not have the action reversed.
- Students who are dismissed from the University for academic reasons cannot use Grade Forgiveness until they have completed their dismissal period.
- A student may not use credit by exam to receive credit for a course once a student has received a grade for that course, even if it has been forgiven.

FINAL GRADES

Final grades are available in MyMav (https://www.uta.edu/mymav/). Grades are posted at the end of each regular, summer, and intersession session, and academic standing is posted at the end of each term. The grade reported at the end of a term is the official and permanent evaluation of a student’s performance in a given course. Official transcripts are available through the Office of the Registrar for those students who need official verification for tuition reimbursement and other reasons. Students with transcript holds will not be able to access their official transcript.

FINAL EXAMINATIONS

Final examinations are scheduled at the end of each session or term and identified in the University's academic calendar (http://www.uta.edu/uta/acadcal.php). All forms of examinations (quizzes, take-home exams, etc.) are prohibited on scheduled class or reading days during the calendar week prior to the week final examinations begin, or after final exams week. All form of examinations must be completed by the end of exam week. Specific

exceptions for certain courses may be given by obtaining approval from the appropriate academic unit head and academic dean. Students shall be informed of any such exceptions prior to the end of the fourth week of classes, as published in the University General Catalog.

FINAL REVIEW WEEK

A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabi. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week.

OFFICIAL TRANSCRIPTS

Official transcripts are available through the Office of the Registrar. Students with transcript holds will not be able to access their official transcript.

GRIEVANCE PROCEDURES RELATED TO GRADES

In attempting to resolve any student grievances regarding grades, it is the student's obligation first to make a serious effort to resolve the matter with the individual with whom the grievance originated. Individual course instructors retain primary responsibility for assigning grades. The instructor's judgment is final unless compelling evidence shows preferential treatment or procedural irregularities. If students wish to appeal, their request must be submitted in writing—on an appeal form available in departmental or program offices—to the department chair or program director. The student has one calendar year from the date the grade is assigned to initiate the grievance. The normal academic channels are department chair or program director and then academic Dean. However, before considering a grievance, the department chair or program director will refer the issue to a departmental or program committee of faculty. If the student does not find the committee's decision acceptable, the student may appeal to the academic Dean. The decision of the Dean is final. Information specific to the procedures to be followed in each academic unit is available in the office of the academic Dean.

Information regarding grievances for matters other than grades is available in the Student Rights (p. 107) section of the catalog.

COURSE CREDIT AND DEGREE OR CERTIFICATE REQUIREMENTS

CREDITS COUNTED TOWARD DEGREE OR CERTIFICATE REQUIREMENTS

In general, only courses completed with a grade of A, B, C, or P can satisfy graduate degree or certificate requirements. However, courses in which grades of D or F are earned will affect a student's grade-point average. A student must have a B (3.0) grade-point average in courses included in their degree plan and a B (3.0) average in all work undertaken as a graduate student to have credits applied toward a graduate degree or certificate. However, some certificate programs require that students earn at least a B in each course in order to earn the certificate.

COURSE CREDIT APPLIED TO MORE THAN ONE DEGREE

No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs. The amount of shared credit between degrees in dual degree programs is limited and varies with the total number of hours needed to complete both degrees. See Dual Degree Programs in the Advanced Degrees and Requirements section of this catalog for details. Similarly, the amount of credit that can be shared in fast track programs is also limited. Details may be found in descriptions provided by participating programs elsewhere in this catalog.

CREDIT FOR REPEATED COURSES

A student may repeat a course only if that course is specifically designated in this catalog as one that can be repeated for credit. A student who fails to receive credit (earns a grade of D or F) may repeat the course in order to obtain credit, in which case the grades for both attempts will count in computing the student's overall grade-point average. No student will be allowed to repeat a course in order to change a passing grade of C or higher.

CREDIT FOR ADVANCED UNDERGRADUATE COURSEWORK

Up to nine hours of advanced undergraduate credit from UT Arlington or another institution may be applied to a master's degree program if the hours have not been used to earn a previous degree and have the approval of the appropriate Graduate Studies Committee and the academic Dean. Approved fast track programs may allow dual credit.

CREDIT FOR EXTENSION CLASSES

Work done in extension classes may be applied toward an advanced degree under the same conditions that apply to transfer work, except that credit for extension work is limited to six credit hours.

GRADUATE CREDIT EARNED IN UNDERGRADUATE STATUS

UT Arlington undergraduates may be allowed to take graduate courses and have the credits earned apply to a master's degree.

- An undergraduate student may not use graduate courses (numbered 5000 and above) to fulfill undergraduate degree requirements except as part of an approved fast track program.
- Courses taken in undergraduate status may not be applied directly to a doctoral program.
- Some departments do not permit students to enroll in graduate courses unless they have been admitted as degree seeking graduate students. Others allow students enrolled as undergraduates to take a limited amount of graduate coursework under the conditions described below.
- All undergraduate students should consult with the appropriate graduate advisor before attempting to register for graduate courses.

An undergraduate needing no more than 12 hours in one term (six semester hours in one summer session) to complete all the requirements for a bachelor's degree may register for graduate courses and apply them toward a master's degree at UT Arlington under the following conditions:

1. In no case may a student previously dismissed from their graduate program or denied admission enroll in graduate courses or reserve courses for graduate credit.
2. All work for undergraduate credit must be completed during that term or session in which the student enrolls in graduate courses.
3. Total registration for all work may not exceed 15 semester hours in a term (or 12 semester hours in the summer sessions).
4. The student must submit to the graduate advisor a "Reservation of Courses for Graduate Credit by Undergraduate Students" form (available from graduate advisors). The reservation must be approved by the graduate advisor and the academic Dean of the college in which the course is taken. The Office of the Registrar must certify that the reserved credit will not be applied to the student's undergraduate degree requirements.
5. The student must have at least a 3.0 undergraduate GPA to be eligible to enroll in a graduate course and to reserve it for graduate degree credit.
6. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
7. Credit is officially accepted for application to a graduate program when a student is unconditionally admitted as a graduate student..
8. A maximum of 12 semester hours of graduate level courses may be reserved.

CREDIT EARNED IN DEGREED UNDERGRADUATE STATUS

Students who have completed their undergraduate studies and have been awarded their bachelor's degree may enroll as degreed undergraduates in graduate-level course work and receive graduate credit at UT Arlington under the following conditions:

1. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
2. No more than 12 semester hours of credit earned while a degreed undergraduate may be applied for credit toward a master's degree. Students must file a request, approved by the graduate advisor, the Committee on Graduate Studies, and the academic Dean to apply such credits toward a graduate degree. The form is available online.
3. All courses that are applied to a master's degree must have been completed no more than five years before enrollment in a graduate program at UT Arlington. If the student has completed more than 12 semester hours of graduate courses in undergraduate status, only graduate courses completed within five years of enrollment in a graduate program at UT Arlington will become part of the graduate record and considered in computing the student's grade-point average.
4. A student may elect to apply all graduate courses completed in the last five years toward their degree or to apply none of this work. Selective application of courses is not permitted. If any courses are applied for credit toward a master's degree, all courses completed within the last five years will become part of the graduate record.

TRANSFER CREDIT IN MASTER'S PROGRAMS

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's degree program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

No more than nine hours of transfer credit will be granted except in the professional master's programs that require more than 36 hours of coursework. In such programs, the number of transfer hours is limited to 25 percent of the total program hours. This rule does not invalidate written articulation agreements that have been approved by all appropriate parties, including the Dean, Provost, and/or President. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B (3.0) or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate Committee on Graduate Studies and is reviewed by the dean of the college or school in which the student's current graduate degree program is located. . All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington.

To request transfer credit, students must complete the Transfer of Graduate Credit form and obtain approvals from the appropriate graduate advisor and chair of the Committee on Graduate Studies and final approval from the dean of the student's college or school. The form is available online (https://www.uta.edu/administration/registrar/students/transfer/graduate/).

TRANSFER CREDIT IN CERTIFICATE PROGRAMS

Equivalent coursework completed at other institutions of recognized standing may be transferred to a graduate certificate program after evaluation and approval of the graduate advisor, the appropriate Committee on Graduate Studies and the Dean of the College or School in which the student is currently enrolled. The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements between graduate certificate programs and the Office of Graduate Studies or agreements that are stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a graduate certificate program at UT Arlington must be approved in advance by the graduate advisor, the appropriate Committee on Graduate Studies and the Dean of the College or School in the student's current graduate degree program is located. The form is available online (https://www.uta.edu/administration/registrar/students/transfer/graduate/).

Grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

WAIVER OF COURSES IN DOCTORAL PROGRAMS

Graduate-level coursework completed in the student's major area of doctoral study at institutions of recognized standing that grant doctoral degrees in those subject areas may serve to establish the student's competency in equivalent UT Arlington courses. Competency demonstrated by successful completion of equivalent courses may provide a basis for waiving some UT Arlington course requirements and the credit hours associated with those courses. Waivers must be recommended by the student's graduate advisor and current supervising professor and their recommendation must be approved by both the Committee on Graduate Studies of the student's major area and the Academic Dean. Only courses in which the student has earned a B (3.0) or better (or a P if the UTA course is also graded P/F) will be considered for purposes of a waiver. In no case will final semester Dissertation course (6x99 or 7399) requirements be waived. Waived courses must be shown on the student's academic plan.

COURSES THAT DO NOT PROVIDE GRADUATE CREDIT

Audited Classes: University credit is not granted for audited classes and audited classes will not satisfy enrollment requirements.

Personal Improvement Courses: Personal improvement individual or group music or art lessons and exercise and sports activities courses can not be used for the following: 1) to satisfy graduate degree requirements; 2) meet enrollment requirements; 3) in computation of graduate grade-point averages or determination of academic probation or academic good standing; 4) in calculation of grade-point averages for the purpose of admission to a Graduate Program or for certification for graduation from a Graduate Program.

Correspondence Courses: Correspondence courses are not accepted for graduate credit.

Credit by Examination: Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate may appear on graduate student transcripts.

Credit Used to Earn Another Degree: No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs.

Academic Standing

Academic standing is determined by students meeting departmental and University standards as described in the following sections.

- Undergraduate Academic Standing
- Graduate Academic Standing

Good Academic Standing is defined differently for graduate and undergraduate students and may affect a student's ability to register for a subsequent term, ability to receive scholarships, fellowships or assistantships, and eligibility for graduation.

Classification

Students at UT Arlington are classified in accordance with the number of hours earned. Hours earned are interpreted as hours passed at UT Arlington plus hours accepted in transfer from other institutions and/or credit by examination.

- Freshman: One who has earned fewer than 30 hours.
- Sophomore: One who has earned 30 hours but fewer than 60 hours.
- Junior: One who has earned 60 hours but fewer than 90 hours.
- Senior: One who has earned 90 hours or more.
- Degreed: One who has earned a bachelor's degree or higher and is enrolled as an undergraduate.
- Masters Student: One who is enrolled in a master's degree program.
- Doctoral Student: One who is enrolled in Doctor of Philosophy (Ph.D.) degree program.

Academic standing regulations apply to all undergraduate students. Additional regulations may apply to provisionally- and conditionally-admitted students until they have met the requirements for regular admission.

Academic standing is determined when grades are reported at the end of each fall and spring term and at the end of the entire summer session. A student's cumulative grade point average may change between these grade-reporting periods (e.g., by recording a final grade in place of an incomplete, or another grade change), and the student's academic standing status may change when the grade change is processed.

Academic standing is differentiated from Satisfactory Academic Progress (p. 99), and from Scholastic Dishonesty (p. 100) which are discussed elsewhere in this catalog.

The academic standing policies of UT Arlington are designed to encourage students to make academic and life adjustments that promote academic progress and lead to degree completion. Students who fail to maintain the minimum requirements of Good Standing as defined below may be required to participate in student success activities, meet term GPA requirements, and may be restricted in course load and/or course selection until they return to Good Standing.

Students who are not in Good Standing cannot hold office in any club or organization, represent UT Arlington at any official or social event, or make any University trip without the permission of the appropriate dean of the University Advising and Engagement Center (UAEC). Academic standing is determined solely by UT Arlington coursework. Coursework from another institution cannot be used to improve a student's academic standing at UT Arlington.

Good Standing

Academic good standing for undergraduates studying at UT Arlington is defined as a cumulative University grade point average (GPA) of 2.00 or higher. A University GPA of at least 2.00 is necessary for satisfactory progress toward a degree. Individual programs may have additional requirements to be in good standing within that program.

Academic Probation 1

A student whose cumulative GPA falls below 2.00 will be placed on Academic Probation 1.

Academic Probation 1 is designed to support students as they make adjustments needed to return to Good Standing and achieve academic success. Students should recognize the significant nature of academic probation and intentionally make a plan for success. The University requires certain protocols and standards to provide support for degree progression and in an effort to bring a student back to Good Standing.

A student on Academic Probation 1 must meet the following requirements in the next term of enrollment following Probation 1:

- Meet with an advisor or staff member designated by the University and participate in student success activities are determined by the Division of Student Success or College
- Earn a semester GPA of 2.20
- Enroll in a minimum of 3 credit hours
- Enroll in no more than 14 credit hours

If a student's cumulative GPA meets the 2.00 minimum requirement, the student will return to Good Standing.

If the student meets the requirements of Academic Probation 1, but does not meet the minimum requirement for Good Standing, the student will continue on Academic Probation 1.

If the student does not meet the requirements of Academic Probation 1 and does not meet the minimum GPA for Good Standing, the student will be placed on Academic Probation 2.

Academic Probation 2

A student will be placed on Academic Probation 2 immediately following a Probation 1 term in which the student does not return to Good Standing or meet the term requirements.

Academic Probation 2 is the final category of academic standing prior to suspension and requires urgent action on the part of the student to make the life and significant academic adjustments needed to return to Good Standing. The University requires certain protocols and standards to provide support for degree progression and in an effort to bring a student back to Good Standing.

A student on Academic Probation 2 must meet the following requirements in the next term of enrollment following Probation 2:

- Meet with an advisor or staff member designated by the University and participate in student success activities are determined by the Division of Student Success or College
- Earn a semester GPA of 2.20

- Enroll in a minimum of 3 credit hours
- Enroll in no more than 14 credit hours

If a student's cumulative GPA meets the 2.00 minimum requirement, the student will return to Good Standing.

If the student meets the requirements of Academic Probation 2, but does not meet the minimum requirement for Good Standing, the student will continue on Academic Probation 2.

If the student does not meet the requirements of Academic Probation 2 and does not meet the minimum GPA for Good Standing, the student will be placed on Academic Suspension 1.

Academic Suspension 1

Undergraduate students placed on Academic Suspension 1 are eligible to continue enrollment after not attending UT Arlington for one regular term (fall or spring) without having to reapply to the University.

In the first enrolled semester following the period of non-enrollment, a student will retain Academic Suspension 1 status and will be subject to the term requirements of Academic Probation 2 and any further probationary conditions placed by the student's program of study.

If the student meets the term requirements but does not meet the minimum GPA for Good Standing, the student will be placed on Academic Probation 2.

If the student does not meet the term requirements and does not meet the minimum GPA for Good Standing, the student will be placed on Academic Suspension 2.

Academic Suspension 2

A student will be placed on Academic Suspension 2 if the student does not meet requirements in the first enrolled semester following the period of non-enrollment resulting from an Academic Suspension 1 or Suspension 2 standing.

A student placed on Academic Suspension 2 is eligible to apply for readmission to the University after not attending UT Arlington for a minimum 12-month period. A student returning from a 12-month suspension must reapply for admission and complete the University readmission process. To begin the readmission process, the student must contact uaec@uta.edu at least 30 days prior to the first day of class.

A student readmitted to the University must meet all published academic requirements to re-declare a major program of study. A returning student is not guaranteed readmission into the previously declared major or intended major choice. Students must first meet with the intended major advisor to discuss eligibility to declare a major.

In the first enrolled semester following the period of non-enrollment, a student will retain Academic Suspension 2 status and will be subject to the term requirements of Academic Probation 2 and any further probationary conditions placed by the student's program of study.

If the student meets the term requirements but does not meet the minimum GPA for Good Standing, the student will be placed on Academic Probation 2.

If the student does not meet the term requirements and does not meet the minimum GPA for Good Standing, the student will be placed back on Academic Suspension 2 and suspended for another 12-month period.

EARLY READMISSION: APPEAL FOR WAIVER OF ACADEMIC SUSPENSION

Some schools/colleges may waive the one long term period of non-enrollment for students who experienced extenuating circumstances during the term that resulted in Academic Suspension 1. A student who wishes to seek an appeal of a one-term suspension must complete the following steps:

- Meet with an academic advisor to determine viability of appeal and complete an enrollment contract detailing terms of readmission should the appeal be accepted.
- Write an appeal letter describing the general reasons for academic struggles, changes made and ongoing plans to address issues impacting academic success, and any additional information pertinent to appeal.
- Submit appeal though the Office of the Dean (associate or assistant dean) who will, on behalf of the student, submit complete appeal packet to the Assistant Vice Provost for Academic Advising. Submission of completed appeals must be received by the AVPAA at least ten days prior to the start of the term the student wishes to attend.

A student who has been approved to return early after being placed on Academic Suspension 1 will retain the Suspension 1 standing and will be subject to the requirements of Probation 2 and any further probationary conditions placed by the program of study.

Appeals for academic continuance and financial aid continuance are handled separately; approval of one does not ensure approval of the other or that enrollment is guaranteed in the event the student has been suspended. Refer to the Academic Standing webpage (https://www.uta.edu/student-success/advising/academic-standing/) for additional information. Academic probation and suspension standing is reflected on the student's transcript and academic record.

Students in Degree Programs

Students on academic probation who have been accepted into a degree program are subject to all additional rules governing the definition and terms of admission and enrollment established by the program in which they are enrolled. Students dismissed from a degree program or leaving a degree program voluntarily may transfer to another major or pre-major with the permission of the dean of the receiving college/school, or to undeclared status or the University Studies degree program with the approval of the Associate Vice Provost of the Division of Student Success.

Satisfactory Academic Progress (SAP)

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, undergraduate recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (http://www.uta.edu/fao/). Click on the Satisfactory Academic Progress tab.

Good Standing and Satisfactory Scholastic Progress

Graduate students are considered to be in good academic standing and making satisfactory progress in a degree or certificate program if they 1) meet all admission conditions within the time required 2) have a B (3.000) or better grade point average on all coursework undertaken while enrolled as a graduate student at UT Arlington and 3) have a B (3.000) or better grade point average in courses needed to satisfy degree requirements by the end of the semester in which they intend to graduate. Departments may specify additional requirements that students must meet in order to be in good standing or to be considered to be making satisfactory progress. Students should understand and follow those requirements because failure to meet them may lead to dismissal (see Dismissal, below). Students must be in good academic standing by the end of their final semester in order to receive an advanced degree or certificate from UT Arlington. Refer to the section **Courses That Do Not Provide Graduate Credit** for an explanation of courses that do not provide graduate credit and will not be used to determine academic standing or to satisfy degree requirements.

Academic Probation

A graduate student whose cumulative grade point average falls below a 3.000 in all graduate courses, be they graduate or undergraduate level taken while enrolled as a UT Arlington graduate student, will be placed on academic probation. The student must attain a cumulative grade point average of at least 3.000 in the next semester he or she is enrolled or be subject to dismissal. Undergraduate courses or graduate courses graded P, R, I or W or courses that do not provide graduate credit (see **Courses That Do Not Provide Graduate Credit**) cannot be used to remove the condition of academic probation.

Dismissal

Students have the initial responsibility to recognize when they are having academic difficulties and are expected to initiate steps to resolve the problem. When a student is in academic difficulty, and dependent upon the severity of the problem, the student may receive an oral warning and/or written statement of the problem and required corrective actions from his or her program. Failure to take these corrective actions can result in termination from the degree program.

Graduate courses or undergraduate graduate courses graded P, R, I or W or courses that do not provide graduate credit (see **Courses That Do Not Provide Graduate Credit (p. 92)**) cannot be used to remove the condition of academic probation. If a student is on academic probation and earns only grades that do not provide graduate credit, he or she will be dismissed.

A student who has been dismissed from their program for failure to remove the condition of academic probation by meeting the 3.00 grade-point average requirement may be readmitted for further graduate study in the same or different program only if a petition has been approved by the Committee on Graduate Studies and the Academic dean of the program in which readmission is sought.

A student can be dismissed from a degree program not only for failure to maintain an adequate grade point average but also for such reasons as unsatisfactory progress toward a degree as defined by the department or program inability to pass a comprehensive examination, failure to prepare or to defend a thesis or dissertation in a satisfactory manner or complete thesis or dissertation work in an acceptable amount of time. In such cases, students will receive a written warning which will include a statement of the problem, the corrective actions that need to occur.

Termination due to inadequate academic progress is a decision made by the student’s examination/supervising committee and/or the program's or department's graduate advisor and Graduate Studies Committee. Their decision will be based on whether the student has addressed the issue as required in the warning. Such decisions to terminate a student must be communicated to the academic dean by the Chairman of the Graduate Studies Committee with required justification. The academic dean will review the case and finalize the termination decision within 60 days. The student may continue enrollment while the dean considers the matter, but they will not be allowed to graduate with a graduate degree or certificate unless the dean decides in favor of the student's appeal.

APPEAL PROCEDURES RELATED TO DISMISSAL

The academic dean's judgment is final unless compelling evidence shows differential treatment or procedural irregularities. Students may appeal to the dean of the Graduate School for review of a decision to dismiss by the academic dean if there is evidence that differential treatment or procedural irregularities were not properly considered. Students must submit the appeal in writing to the dean of the Graduate School. The dean of the Graduate School does not review objections to state certification/licensure preparation program dismissals.

Satisfactory Academic Progress (SAP)

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (http://www.uta.edu/fao/). Click on the Satisfactory Academic Progress tab.

Student Conduct & Academic Integrity

All students are expected to obey the civil and penal statutes of the State of Texas and the United States, the Regents' Rules and Regulations of The University of Texas System, the rules and regulations of the University, and the orders or instructions issued by an administrative official of the University or The University of Texas System in the course of his/her duties and to observe standards of conduct that are compatible with the University's functions as an educational institution. Any student who engages in conduct that is prohibited by the Regents' Rules and Regulations or the rules of the University, or by federal, state, local law or regulation is subject to disciplinary action regardless of whether such conduct takes place on or off campus, or whether civil or criminal penalties are also imposed for such conduct. Individuals who are not currently enrolled at UT Arlington remain subject to the disciplinary process for conduct that occurred during any period of enrollment and for statements, acts, or omissions related to application for enrollment or the award of a degree.

Information about the rules of conduct and due process procedures can be found in the UT Arlington Handbook of Operations Procedures (https://www.uta.edu/policy/hop/).

University Honor Code

All students are expected to live by the University of Texas at Arlington's honor code:

I pledge, on my honor, to uphold UT Arlington's tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence. I promise that I will submit only work that I personally create or that I contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.

It is the policy of The University of Texas at Arlington to uphold and support standards of personal honesty and integrity for all students consistent with the goals of a community of scholars and students seeking knowledge and responsibility. Furthermore, it is the policy of the University to enforce these standards through fair and objective procedures governing instances of alleged dishonesty, cheating and other academic/non-academic misconduct. Students found responsible for dishonesty in their academic pursuits are subject to sanctions that may range from disciplinary probation, suspension and expulsion from the University.

STUDENT TRAVEL POLICY

Before any student organization travels, it is beneficial to come to the Office of Student Governance and Organizations to receive information about liability and to consider using release forms that are available (Texas Education Code, Section 51.950).

However, if the trip is funded by the University (including Program Assistance Funds), is more than 25 miles from the University, and the vehicle is owned or leased by the University, or if attendance is required by a student organization, then the organization must submit the Student/Group Travel Form and the University Request for Travel Authorization at least 10 days prior to the date of travel. All forms and additional information are available in the Office of Student Governance and Organizations. For additional information, see the UT Arlington Handbook of Operating Procedures, Part II, Subchapter 6-600.

Academic Integrity

What Constitutes Scholastic Dishonesty?

Scholastic Dishonesty includes, but is not limited to, cheating, plagiarism, and collusion on an examination or an assignment being offered for credit. Each student is accountable for work submitted for credit, including group projects.

Cheating

• Copying another's test or assignment.

• Communication with another during an exam or assignment (i.e., written, oral or otherwise).

• Giving or seeking aid from another when not permitted by the instructor.

• Possessing or using unauthorized materials during the test.

• Buying, using, stealing, transporting, or soliciting a test, draft of a test, or answer key.

Plagiarism

• Using someone else's work in your assignment without appropriate acknowledgement.

• Making slight variations in the language and then failing to give credit to the source.

Collusion

• Without authorization, collaborating with another when preparing an assignment.

In accordance with the Rules and Regulations of the Board of Regents of The University of Texas System (Rule 50101 (https://www.utsystem.edu/board-of-regents/rules/50101-student-conduct-and-discipline/)), institutional procedures regarding allegations of scholastic dishonesty are outlined in Part Two, Chapter 2, of the UT Arlington Handbook of Operating Procedures (https://www.uta.edu/policy/hop/). Students found responsible for dishonesty in their academic pursuits are subject to penalties that may range from disciplinary probation to suspension or expulsion from the University.

Any student who registers to attend classes at UT Arlington and is ineligible to attend for disciplinary reasons will be dropped automatically from the rolls of the University. This information may be obtained by accessing the website for Community Standards within the Office of the Dean of Students at http://www.uta.edu/conduct (http://www.uta.edu/conduct/).

Responsibility for Academic Misconduct

There are two ways in which students are held responsible for their academic behavior. First, students are responsible for their own actions. Those that violate the principles of academic integrity, scholastic honesty, or engage in activities prohibited by the Student Conduct and Discipline Policy must assume responsibility for their behavior and accept the consequences. You can assume responsibility in two ways. First, if you choose to take the risk associated with scholastic dishonesty and any other violation of the Student Conduct and Discipline Policy, you must assume responsibility for your behavior and accept the consequences. In an academic community, the standards for integrity are high. Second, students who become aware of if you are aware of scholastic dishonesty and any other conduct violations on the part of others, you have the responsibility to report it to the relevant professor or Community Standards within the Office of the Dean of Students. The decision to do so is another moral dilemma to be faced as you define who you are.

Student Conduct

Office of the Dean of Students, Community Standards

All students are expected to obey the civil and penal statutes of the State of Texas and the United States, the Regents' Rules and Regulations of The University of Texas System, the rules and regulations of the University, and the orders or instructions issued by an administrative official of the University or The University of Texas System in the course of his/her duties and to observe standards of conduct that are compatible with the University's functions as an educational institution. Any student who engages in conduct that is prohibited by the rules of the University, or by federal, state, local law or regulation is subject to disciplinary action regardless of whether such conduct takes place on or off campus or whether civil or criminal penalties are also imposed for such conduct. Individuals who are not currently enrolled at a component institution of The University of Texas System remain subject to the disciplinary process for conduct that occurred during any period of enrollment and for statements, acts, or omissions related to application for enrollment or the award of a degree.

Information about the rules of conduct and due process procedures can be found on these Web sites:

- UT Arlington Handbook of Operations Procedures (https://www.uta.edu/policy/hop/)

Unauthorized Distribution of Copyrighted Material

Unauthorized distribution of copyrighted material may subject students to disciplinary action and civil and criminal penalties. Information concerning the legal consequences of such violations may be found in *Copyright Law of the United States of America and Related Laws Contained in Title 17 of the United States Code , Circular 92* (http://www.copyright.gov/title17/92chap5.html#504). The University's policies on copyrighted materials (ADM 5-200 and 5-300) can be found at http://www.uta.edu/policy/hop (http://www.uta.edu/policy/hop/).

Hazing

Hazing is prohibited by state and federal law. **Hazing** is defined as engaging in any intentional, knowing, or reckless act, occurring on or off campus of an educational institution, by one person alone or acting in concert with others, directed against another person or persons regardless of the willingness of such other person or persons to participate, committed in the course of pledging, being initiated to, affiliating with, holding office in, or maintaining membership in any university student organization whose members are or include students at UTA, and causes or creates a risk, above the reasonable risk encountered in the course of participation in the student's education at UTA or the university organization, of physical or psychological injury.

The term **organization** means a fraternity, sorority, association, corporation, order, society, corps, club, or student government, a band or musical group or an academic, athletic, cheerleading, club sports team, or dance team (including both varsity and junior varsity), including any group or team that participates in National Collegiate Athletic Association competition, or a service, social, or similar group, in which two or more of the members are students enrolled at the University regardless of whether the organization is established or recognized by the University.

The term hazing includes, but is not limited to, any type of physical brutality, physical activity, activity involving consumption of food, liquid, drugs, or alcohol; activity that intimidates or threatens the student; any activity that induces, causes, or requires the student to perform a duty or task which involves a violation of the law; any activity that subjects the student to extreme mental stress, shame, or humiliation; any activity that adversely affects the mental health or dignity of the student or discourages the student from entering or remaining registered in the university; or that may reasonably be expected to cause a student to leave the organization or the university rather than submit to acts described in this section. Examples may include, but are not limited to:

1. Any type of physical brutality, such as whipping, beating, striking, electronic shocking, placing of a harmful substance on someone’s body, or similar activity;
2. Causing, coercing, or otherwise inducing sleep deprivation, exposure to the elements, confinement in a small space, extreme calisthenics, or other similar activity;
3. Causing, coercing, or otherwise inducing another person to consume food, liquid, alcohol, drugs, or other substances;
4. Causing, coercing, or otherwise inducing another person to perform sexual acts;
5. Any activity that places another person in reasonable fear of bodily harm through the use of threatening words or conduct;
6. Any activity against another person that includes a criminal violation of local, state, tribal, or federal law; and
7. Any activity that induces, causes, or requires another person to perform a duty or task that involves a criminal violation of local, state, tribal, or federal law.

Hazing with or without the consent of a person, whether on or off campus, is prohibited, and a violation of that prohibition renders both the person inflicting the hazing and the person submitting to the hazing subject to discipline. Knowingly failing to report hazing can subject one to discipline. Initiations or activities of organizations may include no feature that is dangerous, harmful, or degrading to the person, and a violation of this prohibition renders both the organization and participating individuals subject to discipline.

Hazing is prohibited by federal law (20 USC § 109 (https://uscode.house.gov/view.xhtml/?req=granuleid:USC-prelim-title20-section1092&num=0&edition=prelim)) and by Texas state law (Tex. Ed. Code § 51.936 (https://statutes.capitol.texas.gov/Docs/ED/htm/ED.51.htm#51936) and §§ 37.151 - 37.157 (https://statutes.capitol.texas.gov/Docs/ED/htm/ED.37.htm#37151)).

The University of Texas at Arlington regards hazing as a serious issue and is committed to the removal of any such practice. Community Standards within the Office of the Dean of Students is prepared to assist any organization with a review of its activities to ensure they do not violate hazing laws and policies.

Sexual Harassment and Sexual Misconduct

The safety and security of all students is of the utmost importance. Instances of sexual harassment and sexual misconduct impact the entire community and disrupt the academic progress of all involved. The University of Texas at Arlington’s Handbook of Operating Procedures, Procedure 14-1 states the following:

Definition of Sexual Harassment:

Sexual harassment is defined by the Equal Employment Opportunity Commission (EEOC) and the courts to be any unwelcome sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature, when:

- submission to such conduct is made either explicitly or implicitly a term or condition of employment (or a student's status in a course, program, or activity);
- submission to, or rejection of such conduct by an employee is used as a basis for employment decisions affecting the individual. In the case of a student, it is used as a basis for academic or decisions affecting a student; or,
- such conduct has the purpose or effect of unreasonably interfering with the individual's employment (or the student's educational experience) or creating an intimidating, hostile, or offensive academic environment.

Definition of Sexual Misconduct:

Sexual misconduct includes sexual advances, requests for sexual favors, or verbal or physical conduct of a sexual nature directed towards another individual that does not rise to the level of sexual harassment but is unprofessional and inappropriate for the workplace or classroom. Examples of behavior that could be considered sexual harassment or sexual misconduct includes, but is **not limited** to, the following:

- physical contact of a sexual nature including touching, patting, hugging, or brushing against a person's body;
- explicit or implicit propositions of offers to engage in sexual activity;
- comments of a sexual nature including sexually explicit statement, questions, jokes or anecdotes, remarks of a sexual nature about a person's clothing or body, remarks about sexual activity, speculation about sexual experience;
- exposure to sexually oriented graffiti, pictures, posters or materials;
- physical interference with or restriction to an individual's movements.

If a person believes they have been the subject of sexual harassment or sexual misconduct, it should be reported immediately to the Equal Opportunity Services Director, the University Police Department and/or the Office of Student Conduct.

The University offers various educational opportunities, campus resources and avenues for support to community members. More information can be found at the following links:

- University of Texas at Arlington's Handbook of Operating Procedures www.uta.edu/policy/hop (https://www.uta.edu/policy/hop/)
- Relationship, Violence and Sexual Assault Prevention www.uta.edu/rvsp (http://www.uta.edu/rvsp/)
- Equal Opportunity Services www.uta.edu/eos-title-ix/equal-opportunity-services (https://www.uta.edu/eos-title-ix/equal-opportunity-services/)
- *Be MavReady* www.uta.edu/campus-ops/emergency-management/be-mavready (https://www.uta.edu/campus-ops/emergency-management/be-mavready/)

Campus Solicitations

"Solicitation," as defined in Rule 80103, Section 3 of the Rules and Regulations of the Board of Regents of The University of Texas System, means the sale, lease, rental or offer for sale, lease or rental of any property, product, merchandise, publication or service, whether for immediate or future delivery; an oral statement or the distribution or display of printed material, merchandise or products that is designed to encourage the purchase, use or rental of any property, product, merchandise, publication or service; the oral or written appeal or request to support or join an organization other than a registered student, faculty or staff organization; the receipt of or request for any gift or contribution; or the request to support or oppose or to vote for or against a candidate, issue or proposition appearing on the ballot at any election held pursuant to state or federal law or local ordinances. All solicitations on the UT Arlington campus must conform to the Regents' Rules and Regulations, copies of which are available in the offices of the president, vice presidents, academic deans, numerous other administrative offices and the Central Library. The Regents' Rules and Regulations also may be accessed at the following Web site: www.utsystem.edu/offices/board-of-regents/regents-rules-and-regulations (https://www.utsystem.edu/offices/board-of-regents/regents-rules-and-regulations/).

Use of Campus Facilities

The property, buildings or facilities owned or controlled by The University of Texas at Arlington are not open for assembly, speech or other activities as are the public streets, sidewalks and parks. No person, organization, group, association or corporation may use property, buildings or facilities owned or controlled by UT Arlington for any purpose other than in the course of the regular programs or activities related to the University's role and mission unless authorized by the Rules and Regulations of the Board of Regents of The University of Texas System. Any authorized use must be conducted in compliance with the provisions of the Regents' Rules and Regulations (Regents' Rules and Regulations, Rule 80101), the approved rules and regulations of UT Arlington, and applicable federal, state and local laws and regulations.

Photo Identification Cards

Students are strongly urged to retain possession of their photo identification cards at all times. Misuse of University identification is an offense, which subjects students to discipline. Students lending their photo identification cards for fraudulent purposes, as well as those making use of them, will be disciplined. The student photo identification card is the property of the University, and a student may be asked to surrender the card for appropriate reasons.

Student Responsibilities

While University faculty and staff members give students academic advice and assistance, each student is expected to take responsibility for his or her education and personal development. The student must know and abide by the academic and disciplinary policies given in this catalog, including rules governing quantity of work, the standard of work required to continue in the University, scholastic probation and dismissal, and enforced withdrawal. The student must also know and meet the requirements of his or her degree program, including the University's core education requirements; must enroll in courses appropriate to the program; must meet prerequisites and take courses in the proper sequence to ensure orderly and timely progress; and must seek advice from appropriate University representatives about degree requirements and other University policies when necessary. The student must also know and adhere to all University deadlines.

Sources of Information on Academics, Deadlines, and Rules

All students are expected to be familiar with the following sources of information. Students will not be relieved of their responsibility to know the policies, deadlines and rules of the University on the grounds that they were not told. If students have questions regarding these materials, it is the University's expectation that the student will consult his/her academic advisor for guidance and resolution.

Dean's Offices

Students are responsible to the appropriate Dean of a College or School. Undeclared and freshman students are responsible to the Director of the University Advising Center. In each college/school, the office of the assistant or associate dean serves as a central source of information about academic affairs and student services.

Academic Advising

The student is responsible for seeking academic advice, for enrolling in appropriate courses to insure progress toward a degree, for timely completion of his or her academic program, for familiarity with the appropriate catalog, and for maintaining University standards. Assistance from an academic advisor is not a substitute for the personal responsibility of the student.

Undergraduate Student Advising

Academic advisors guide students to develop educational plans that are compatible with their strengths, goals, and interests. While monitoring their progress and guiding students to academic success, advisors also help students understand their responsibilities toward academic success. Academic advisors also serve as a key resource and advocate for students regarding the interpretation of University policies and procedures and referral to campus resources that to aid student success (Menezes, 2005; National Academic Advising Association Clearinghouse).

The student should consult the advising office in his or her department or, if he or she is an undeclared or freshman student, the University Advising Center. A student who is in doubt about any University regulation should always seek clarification before proceeding.

Academic advisors may limit the number of hours and overall difficulty of the students' schedules, require students to take specific courses deemed necessary to their education, prevent students from taking unsuitable courses, require students to attend advising sessions, and otherwise restrict enrollment or take other actions approved by the dean of their college/school or the Director of the University Advising Center to assure the student's best academic interest. Failure to enroll in courses as prescribed/contracted by academic advisor without consultation and consent can lead to disciplinary actions through Student Conduct.

Undergraduate advising locations can be found at https://www.uta.edu/student-success/advising/.

Graduate Student Advising

Each graduate program has a graduate advisor. The graduate advisor represents the academic dean and the Committee on Graduate Studies in matters pertaining to advising graduate students in their academic areas. The graduate advisor's functions include clearing of students for registration, acting upon requests for drops, adds, section changes and special examinations; maintaining graduate student records; and advising graduate students about their degree plans. The name and contact information for graduate advisors can be found in the Graduate Advisors directory. (https://www.uta.edu/academics/schools-colleges/gradschool/resources/academic/advisors/)

Drug-Free Schools and Communities Act Notification

The Drug-Free Schools and Communities Act amendments of 1989 (the DFSCA) requires institutions of higher education receiving any form of federal funding (IHEs) to meet requirements pertaining to the prevention of illegal use of alcohol and other drugs (AOD) on campus and at campus-sponsored events. These requirements include developing and implementing an AOD-prevention program to prevent the unlawful possession, use, or distribution of illicit drugs and alcohol by students and employees. Furthermore, IHEs are required to conduct biennial reviews of their AOD-prevention programs and publish subsequent reports of those reviews. The purpose of the biennial review is twofold: 1) for an IHE to determine the effectiveness of, and to implement any needed changes to, its AOD-prevention program; and 2) to ensure that IHEs enforce the disciplinary sanctions for violating standards of conduct consistently.

The University of Texas at Arlington (UTA) is a community that cares about the well-being of its students, faculty, and staff, and as such, UTA continually strives to create and maintain a safe, secure, and supportive campus environment. As part of this effort, UTA prohibits the illegal use of AODs on its campus and at campus-sponsored events, has developed an AOD-prevention program (Program), conducts biennial reviews of its Program, publishes a Drug-Free Schools and Communities Biennial Review (this Report), and strictly complies with the requirements of the DFSCA. As such, we are required to provide the information below to each employee and student on an annual basis.

Health risks associated with drug and alcohol abuse

- Alcohol and Drug Awareness (https://www.uta.edu/student-affairs/health-services/health-promotion/substance-misuse-prevention/)

Enrollment & Attendance

Managing Enrollment

Once a student registers for classes, the University commits resources to provide registered students with instruction by qualified faculty and sufficient class space for the course. Thus, upon registration, a student assumes full responsibility for either paying fees in full by a prescribed due date, or notifying the University in an appropriate time frame that he/she will not attend and take all appropriate action as prescribed to drop a course(s) or officially withdraw from the University. The student must verify his or her schedule of classes each term, must see that necessary corrections are made, and must keep documentation of all schedule changes and other transactions.

Class Attendance, Tardiness and Make-Up Work

The University is not required by an outside entity to take attendance; however, regular attendance at all class meetings is expected. Individual class attendance and tardiness regulations will be established by instructors and published in the course syllabus or announced to their classes. At the discretion of the instructor, such regulations may not include provisions for making up work missed by the student as a consequence of an absence. Special regulations of colleges and schools required by the unique nature of their programs of study may be enacted through the normal approval process. These special regulations may not conflict with University regulations on class attendance and absence. An instructor is under no obligation to accommodate students who are absent or miss work without prior notification and make-up arrangements.

A student's registration is not automatically cancelled for non-attendance. A student should pay fees in full by the designated deadline or take the appropriate steps to withdraw. To avoid financial responsibility to the University, cancellation of enrollment must be completed no later than the day before the first official University class day. Prompt withdrawal notification helps to free up class space for other students.

University Authorized Absences

The Office of the Vice President for Student Affairs provides lists of students who have absences authorized by the University (e.g., participation in athletic events or scholastic activities that are officially sponsored University functions--those are primarily activities that are funded by the University).

The student must notify the instructor in writing at least one week in advance of the start of the excused absence and arrange with the instructor to make up missed work or missed examinations. Instructors will allow students an opportunity to make up the work and examinations within a reasonable time period following the absence or otherwise adjust the grading to ensure that the student is not penalized for the absence, provided that the student has properly notified the instructor. Students who have properly notified the instructor, will not be penalized for the absence. However, the instructor may respond appropriately if the student fails to complete the assignment or examination satisfactorily within the time limit following the absence set by prior arrangement.

If there is disagreement between student and faculty member regarding what constitutes a reasonable amount of time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the Office of the Vice Provost for Academic Analytics and Operations. The decision of the Vice Provost is final.

Absence for Military Service

In accordance with Section 51.911 of the Texas Education Code, under certain circumstances, a student who is required to participate in active military service is excused from scheduled classes or other required activities and will be allowed to complete an assignment or exam within a reasonable time after the absence. The excused absence is permitted only if the student will miss no more than 25% of the total number of class meetings or the contact hour equivalent (not including the final examination period) for the specific course or courses in which the student is enrolled at the beginning of the period of active military service.

Withdrawal as a Result of Military Service

A student who must withdraw from the University as a result of military service will receive the following considerations according to Section 54.006 of the Texas Education Code: (1) receive a refund of tuition and fees (2) if eligible, be assigned a grade of incomplete (I) or (3) as determined by the instructor, receive a final grade or credit in courses where the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material.

Observance of Religious Holy Days

A student who misses an examination, work assignment or other project because of an observance of a religious holy day will be given the opportunity to complete the work missed within a reasonable time after the absence.

Checking Email

E-mail serves as the primary means for communication at UT Arlington. Therefore, the University has the right to send communications to students via University-issued e-mail and the right to expect that those communications will be received and read in a timely fashion. The Office of Information Technology (OIT) will assign all students an official University e-mail address. Students are expected to check their official University e-mail account on

a frequent and consistent basis to stay current with University communications. The University recommends checking e-mail daily; in recognition that certain communications may be time-critical.

Maintaining Current Contact Information

While most of University business and communications is handled through official University email or through MyMav, on occasion the University will need to contact students by phone or mail. The student must give current and correct local and permanent addresses and telephone numbers to the University through self-service in MyMav. Official correspondence may be mailed, versus e-mailed, to the appropriate address depending upon the nature of the correspondence and the academic calendar; if the student has moved and failed to correct this address, he or she will not be relieved of responsibility on the grounds that the correspondence was not delivered.

For the purposes of state authorization compliance and disclosure requirements for licensing and certification programs, the University will consider the state listed in the Mailing Address in MyMav as students' location. Students must report any change in their Mailing Address through self-service in MyMav.

Requirement to Update Academic Records

UT Arlington students who also enroll at other institutions of higher education have an obligation to ensure that UT Arlington has a complete and accurate academic record. Students who enroll in coursework at other institutions must transfer a record of that coursework to UT Arlington's Office of the Registrar at the conclusion of each term completed externally.

Student Rights & Security

Rights Under Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. 1232g and 34 CFR Part 99, also known as the Buckley Amendment, are federal laws and regulations that provide students with the following rights with respect to their education records:

1. To inspect and review the student's education records;
2. To consent to disclosure of the student's education records to third parties, except to the extent that FERPA authorizes disclosure without consent;
3. To request amendment of the student's education records to ensure that they are not inaccurate or misleading, or otherwise in violation of the student's privacy rights under FERPA;
4. To be notified of the student's privacy rights under FERPA; and
5. To file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

At UT Arlington, FERPA rights apply to a student. A student is a person who has been admitted and is registered, regardless of the person's age. It is the policy of The University of Texas at Arlington to protect the privacy and records access rights of its current and former students.

The Clery Act

In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (the "Clery Act"), the University of Texas at Arlington publishes its Security and Fire Safety Report (the "Report") annually. The Report is available for review and includes crime statistics for the prior three calendar years. These statistics include crimes that occurred on campus, in non-campus properties owned or controlled by UTA and frequented by students, and on public property within or immediately adjacent to campus. The Report also includes information on fire statistics for campus residential properties for the prior three calendar years and current fire safety systems in these properties. In addition, the Report includes UTA policies related to the safety and security of our campus community. You may access the annual Report by clicking the following link: Annual Campus Security and Fire Safety Report (https://www.uta.edu/campus-ops/police/public-info/annual-reports/). You may request a paper copy of the Report by contacting the University's Office of Legal Affairs (https://nam05.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.uta.edu%2Flegalaffairs%2F&data=02%7C01%7Cjimmerson%40uta.edu%7C2bf1305400b3466acf9108d6b849f9a8%7C5cdc5b43d7be4caa8173729e3b0a62d9%7C0%7C0%7C636899025187717626&sdata=cvUufaFVkos4C2tcTE9pX%2F8hchtn0Nngs6438gGgRA%3D&reserved=0) or emailing campus_safety_report@uta.edu.

Student Complaints and Appeals

UT Arlington is committed to addressing student complaints in a fair, consistent, and professional manner. In attempting to resolve a complaint, the student must first make a serious effort to resolve the matter with the individual with whom the grievance originated.

Complaints involving academic matters other than grades can be filed with the academic department chair then appealed to the dean. If the complaint originates within a school/college or an academic department, then a student should contact the school/college or academic department for instructions and complaint/appeal filing requirements.

Non-academic complaints can be filed with the office director then appealed to the unit head/vice president, The dean of students' File a Complaint webpage (https://www.uta.edu/student-affairs/dos/file-a-complaint/) contains direct links to the various offices' complaint processes and office contact information and can be used to determine where and how to file a complaint that originated outside of a college/school or academic department.

All complaints/appeals must be submitted in writing either on an appeal form or through the documentation process required by the office or unit where the complaint originated.

Students may formally appeal to the dean of students a decision made by a school/college dean or unit head/vice president only when the student can present evidence of differential treatment or procedural irregularity (https://www.uta.edu/student-affairs/dos/file-a-complaint/). The dean of students' UTA Student Formal Appeal Form (https://www.uta.edu/student-affairs/dos/file-a-complaint/filing-process/) is available on the dean of students' File A Complaint webpage.

Complaint and appeal procedures are applicable to all classifications of UTA students enrolled in academic courses and programs in all locations or online.

Information on procedures related to grade grievances is available in the Undergraduate Grade and Grading Policies (p. 88) and Graduate Grade and Grading Policies (p. 92) sections of the catalog.

Seeking Exceptions to Graduate Policy

A student may petition for exceptions to published graduate policy by submitting a petition. The Graduate Advisor and the departmental Committee on Graduate Studies Chair will evaluate the petition and send it to the Dean for final decision. Limited exceptions to some rules may be approved if the facts presented by the petitioner are fully justified in the views of the Graduate Advisor, Committee on Graduate Studies Chair, and Dean. See Petition for an Exception to a Graduate Policy (https://common.forms.uta.edu/view.php?id=5066) for additional information about petitioning for an exception to graduate policy.

GRIEVANCES OTHER THAN GRADES

Refer to *Student Complaints and Appeals* section above.

Student Right-to-Know and Campus Security Act

Campus security and safety guidelines: In case of emergency or to report a crime in progress, contact the UT Arlington Police at (817) 272-3003. For all other security and safety issues, dial (817) 272-3381 or visit the Campus Police homepage (https://police.uta.edu/).

Campus security policies: In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, formerly the Student Right-to-Know and Campus Security Act (P.L. 101-542, as amended), the University of Texas at Arlington publishes specified campus crime statistics and campus security policies through the Office of the Chief of the University Police.

Campus security policies include:

- Procedures for reporting criminal actions or other emergencies occurring on campus.
- Policies concerning security of and access to campus facilities, including campus residences; campus law enforcement authority and responsibilities.
- A description of programs designed to inform students and employees about the prevention of crimes, and campus security procedures.
- The policy of monitoring and recording of students' criminal activity occurring at off-campus locations of student organizations officially recognized by the institution.
- The policy regarding the possession, use and sale of alcoholic beverages and illegal drugs, and enforcement of federal and state drug and drinking laws.
- A description of drug or alcohol-abuse education programs.
- Sexual assault programs to prevent sex offenses, and procedures to follow when a sex offense occurs.
- Policy on emergency response and emergency notification procedures involving immediate threat and campus evacuation.
- Missing student information
- Fire and life safety policies and procedures
- Gang free zones and consequences of engaging in organized criminal activities in these zones
- Campus-wide emergency notification procedures in case of immediate threat or campus evacuation (MavAlert (https://www.uta.edu/campus-ops/emergency-management/emergency/))

To learn more how to prevent crime or to respond to emergency situations, visit the website www.uta.edu/campus-ops/emergency-management/be-mavready (https://www.uta.edu/campus-ops/emergency-management/be-mavready/).

Crime statistics may be accessed on the University Police Web site at https://police.uta.edu/public-info/index.php (https://police.uta.edu/public-info/).

Gang-free zones: To promote campus safety and deter crime, premises owned, rented or leaded by The University of Texas at Arlington, and areas within 1,000 feet of the premises are "gang-free" zones. Certain criminal offenses, including those involving gang-related crimes, will be enhanced to the next highest category of offense if committed in a gang-free zone by an individual 17 years or older. See Texas Penal Code, Section 71.028 (http://www.statutes.legis.state.tx.us/Docs/PE/htm/PE.71.htm#71028).

Missing student notification policy: If a member of the University community has reason to believe that a student who resides in on-campus housing is missing, he or she should immediately notify the UT Arlington Police Department at 817-272-3381. Students residing in on-campus housing have the option to identify confidentially an individual to be contacted by UT Arlington in the event the student is determined to be missing for more than 24 hours. Contact information will be accessible only to authorized campus officials and law enforcement and will not be disclosed outside of a missing person investigation. To designate a confidential contact, contact Apartment and Residence Life (https://www.uta.edu/campus-ops/housing/) at (817) 272-2926. More details can be found in the Annual Campus Fire and Safety Report (https://police.uta.edu/public-info/annual-reports/).

False alarms reports: Since Sept. 1, 2013, Section 42.06(b) of the Texas Penal Code (https://statutes.capitol.texas.gov/Docs/PE/htm/PE.42.htm) mandates that the penalty for the offense of making a false alarm or report involving a public or private institution of higher education is a state jail felony.

Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. 1232g and 34 CFR Part 99, also known as the Buckley Amendment, are federal laws and regulations that provide students with the following rights with respect to their education records:

1. To inspect and review the student's education records;
2. To consent to disclosure of the student's education records to third parties, except to the extent that FERPA authorizes disclosure without consent;
3. To request amendment of the student's education records to ensure that they are not inaccurate or misleading, or otherwise in violation of the student's privacy rights under FERPA;
4. To be notified of the student's privacy rights under FERPA; and
5. To file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

It is the policy of The University of Texas at Arlington to protect the privacy and records access rights of its current and former students .

UT Arlington’s official FERPA policy statements are available in the Handbook of Operating Procedures (https://www.uta.edu/policy/hop/13-1100/) and the University Catalog (http://catalog.uta.edu/). Additional details are available at the FERPA website (http://www.uta.edu/records/about/ferpa.php).

STUDENT RIGHTS UNDER FERPA

At UT Arlington, FERPA rights apply to a student. A student is a person who has been admitted and is registered, regardless of the person's age.

The University will not disclose education records or personally identifiable information from an education record without prior consent of the student to a third party, except as authorized by FERPA and its policies.

The University provides an Annual Notice to each enrolled student of his or her rights under FERPA, as well as the procedures for exercising these rights, information about the Directory Information Exception, and the process by which a student may elect to opt out of the release of the student's directory information.

DIR ECTORY INFORMATION

The following information about a student has been designated by the University as Directory Information:

1. Name
2. Local and permanent postal addresses
3. Email address
4. Telephone number
5. Place of birth
6. Field of study; dates of attendance
7. Enrollment status
8. Student classification (example: freshman, first year law school student)
9. Degrees awarded
10. Certificates and awards (including scholarships) received
11. Photographs
12. Participation in officially recognized activities and sports
13. Weight and height of members of athletic teams
14. Most recent previous educational agency or institution attended

The University may publish or publicly disclose directory information without the student's consent, unless the student, using MyMav (http://www.uta.edu/mymav/), has notified the University that s/he wishes to opt out of such disclosures. If no elections are made, UT Arlington will allow release of the student's directory information.

Any restriction will remain in effect until it is revoked. UT Arlington allows former students to make changes to the disclosure status in effect at the time of their last term of attendance.

WHEN DISCLOSURE IS PERMITTED WITHOUT PRIOR CONSENT OF THE STUDENT

FERPA permits the disclosure of personally identifiable information (PII) from students' education records without consent of the student if the disclosure meets certain conditions found in Section 99.31 of the FERPA regulations. Except for disclosures to University Officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information and disclosures to the student, Section 99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures.

The University Official exception permits disclosure without consent and disclosure to University officials with legitimate educational interests. A University Official is:

- Any person employed by the University in an administrative, supervisory, academic, or support staff position, including law enforcement unit and health staff;
- A person or company with whom the University has a contract to provide services on behalf of the University or an affiliation (such as a System attorney or auditor, or a clinical facility where a student is participating in an internship) for the provision of services;
- A member of the University of Texas System Board of Regents; or
- A person employed by The University of Texas System Administration; or another person assisting another University Official in performing his or her tasks (such as a System attorney or auditor, or a clinical facility where a student is participating in an internship).

A University Official has a "legitimate educational interest" in an education record if that person or contractor requires access an education record in order to fulfill his or her official duties on behalf of the University.

The University may also disclose PII from a student's education records without obtaining prior written consent of the student in the following situations as permitted by FERPA:

- To officials of another school in which a student seeks or intends to enroll or is already enrolled if the disclosure relates to purposes of enrollment or transfer.
- To The University of Texas Board of Regents, the Comptroller General of the United States, the Attorney General of the United States, the Secretary of Education and other state and local educational authorities who are authorized by law to audit and evaluate Federal or State supported education programs, or to enforce Federal law which relates to such education programs may access an Education Record as required for the audit, evaluation or enforcement purpose, or their authorized representatives .
- To organizations conducting studies for or on behalf of the school to: develop, validate, or administer predictive testing; administer student aid programs; or improve instruction.
- To accrediting organizations to carry out accrediting functions.
- To parents of an eligible student if the student is a dependent for IRS tax purposes and the student has notified the University that the student agrees to the release of his/her education records under this exception.
- To comply with a judicial order or lawfully issued subpoena.
- To appropriate individuals in connection with a health or safety emergency.
- To a victim of an alleged perpetrator of a crime of violence or non-forcible sex offense. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense.
- To the general public, the final results of a disciplinary proceeding, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and has committed a violation of the school's rules or policies with respect to the allegation.
- To parents of a student regarding the student's violation of any Federal, State, or local law, or of any rule or policy of the school, governing the use or possession of alcohol or a controlled substance if the school determines that the student committed a disciplinary violation and is under the age of 21.
- If the disclosure concerns sex offenders and other individuals required to register under section 17010 of the Violent Crime Control and Law Enforcement Act of 1994.
- Under the Directory Information exception as explained below.
- To defend the University against litigation or complaints filed by the student against the University.

For additional information on exceptions to the consent requirement, see the UT Arlington Handbook of Operating Procedures. (https://www.uta.edu/policy/hop/13-1100/#section-3-4)

Research papers, theses, and dissertations authored by students are available to interested members of the public.

FERPA AND PARENTS

Once the student attains the age of 18 or attends an institution of higher education, regardless of age, FERPA rights transfer from the parent to the student. Under FERPA, parents have no inherent rights of access to their students' education records.

Students can give express written permission for their parents' access to their education record by completing the UT Arlington Delegated Access/Guest Access (https://www.uta.edu/administration/registrar/parents/family-access/) authorization process.

Records may be released to parents without a signed consent from the student under certain exceptions. These include:

- In a health or safety emergency.
- Where the student has violated a law or the school's policies governing alcohol or substance abuse, if the student is under 21 years old.
- By submission of evidence that the parents declare the student as a dependent on their most recent Federal Income Tax form.

Parents who wish to access their student's education records without the express written permission of the student may provide a copy of the previous year's tax form demonstrating that the student is a dependent for tax purposes to the Office of the Registrar, University of Texas at Arlington, Room 129 University Administration Building. Income data on the tax record can be redacted.

In a legal separation or divorce situation, biological parents have equal standing as custodial parents to gain access to the student's education records.

PARENTS OF DUAL-CREDIT STUDENTS

For parents of dual-credit students: Students who are enrolled in both high school and courses at a postsecondary institution provide a unique situation. While the rights under FERPA belong to the parents with respect to high school records, they belong to the student with respect to the postsecondary records. In this case, FERPA's provisions allowing disclosure of information to parents of students who are dependents for income tax purposes would apply, allowing the postsecondary institution to share grades and other information from the student's education records with parents upon presentation of income tax records demonstrating the student is a tax dependent. Students can give express written permission for their parents' access to their education record by completing the UT Arlington FERPA Release Authorization Form and submitting it with UTA identification to the Office of the Registrar, Room 129 University Administration Building.

Additionally, the high school and postsecondary institution may share information from records of dual-enrolled students.

UT Arlington strongly encourages parents of dual-credit students to respect the student's ownership of his or her education record at the college level and seek ways to gain that information while safeguarding the student's rights and responsibilities. Faculty teaching dual-credit courses will make every attempt to communicate with and through the student, as an important maturation point for college students.

ADDITIONAL UT ARLINGTON BUSINESS PRACTICES RELATED TO FERPA

It is the policy of UT Arlington that it will maintain the FERPA disclosure code in effect at the time of a student's last term of enrollment for former students. Furthermore, the University will honor a request from a former student, not re-enrolled, to change a privacy election. FERPA protection excludes records that contain information about an individual after he or she is no longer a student.

FERPA rights cease upon death. However, it is the policy of UT Arlington that no records of deceased students be released for a period of 25 years after the date of the student's death, unless specifically authorized by the executor of the deceased's estate or by next of kin. The University notifies students annually of their FERPA rights through the online university catalog and by annual email notification.

- Appendix A, Notice of Student Rights under FERPA and Notice Concerning Directory Information

Additional details are available at the FERPA website (https://www.uta.edu/administration/registrar/parents/ferpa/).

Graduation

Degree Conferral and Commencement Ceremonies

Degrees are awarded at the end of the fall semester (December), spring semester (May) and summer session (August).

Formal commencement ceremonies are held every May and December; each School and College convenes their own commencement ceremony and reception for their graduates, as well as their families and guests. The official last day of the term, as published in the Academic Calendar (https://catalog.uta.edu/aboututa/calendar/), is the graduation and degree conferral date listed on all diplomas. Students should contact the Office of the Dean of their department for information concerning the commencement ceremonies.

Doctoral students must submit the Dissertation Defense Report showing the dissertation has been defended successfully to the Office of the Registrar no later than one week before the first scheduled university Commencement ceremony in order to participate in any college/school ceremony. The Office of the Registrar will send a list of all doctoral students who have not defended their dissertations to each academic dean immediately after this deadline has passed. The Dean will inform these students that they will not be allowed to participate and the Dean will invite them to participate in a Commencement Ceremony taking place in a later semester after they have met all requirements for their degree. Doctoral students who do not participate in Commencement may still graduate and receive their degrees in that term if they complete their defenses and other requirements by deadlines set by the Office of the Registrar.

Application for Graduation

All graduating students must file an Application for Graduation through their Student Center in MyMav (http://www.uta.edu/mymav/) by the published deadlines for the semester of graduation. Students are encouraged to meet with their academic advisor to insure that they will meet degree plan requirements in a timely way to allow graduation. Neither the graduation application nor graduation fees are transferable to a subsequent semester; therefore, if a student does not graduate in the semester indicated in the initial application, a new application must be filed for the semester of graduation and the appropriate fees paid again. Additional information on graduation processes is available on the Office of the Registrar's Graduation website (https://www.uta.edu/administration/registrar/students/graduation/).

Students who fail to apply for graduation by the specified deadlines may apply late by completing the Application for Graduation and paying a late fee. Applications for graduation will be accepted with a late fee for 30 calendar days after the deadline for applying for graduation. After that date, no applications will be accepted and students must apply for graduation for a subsequent semester. Applicants for graduation will be billed the Graduation Application fee and, as appropriate, the late graduation application fee. Again, graduation charges are non-transferable and non-refundable. See the section titled Tuition, Fees, and Charges in this catalog for information on specific fees.

The Office of the Registrar reserves the right to post degrees and/or certificates for current or former students who have met degree completion requirements but have not formally applied for graduation.

Diplomas

Diplomas will be issued approximately 6-8 weeks after commencement ceremonies, and will be sent to graduates via USPS mail. Graduates with account balances of any kind or any diploma holds must clear these before their diploma can be released. Diplomas are only kept and available for mailing for one (1) year after graduation. After one year, the graduate will need to order a replacement diploma.

Graduation With Latin Honors

Bachelor's degree candidates who have attempted and completed at least 45 semester hours in residence at The University of Texas at Arlington, including all hours completed in the first and final semesters that contain the last 45 hours, will receive:

Cum Laude Latin Honors,

- if their overall GPA is 3.500 - 3.699 OR
- (their overall GPA is 3.300 - 3.499 and the GPA in the semesters containing their last 45 semester hours in residence is 3.500 - 3.699)

Magna Cum Laude Latin Honors,

- if their overall GPA is 3.700 - 3.899 OR
- (their overall GPA is 3.500 - 3.699 and the GPA in the semesters containing their last 45 semester hours in residence is 3.700 - 3.899)

Summa Cum Laude Latin Honors,

- if their overall GPA is 3.900 - 4.000 OR
- (their overall GPA is 3.700 - 4.000 and the GPA in the semesters containing their last 45 semester hours in residence is 3.900 - 4.000)

Graduation Under a Particular Catalog

Students may obtain a degree or certification according to the course requirements for a degree or certification stated in the catalog under which they first entered the University, provided the courses are being offered. Or, students may choose to graduate under the course requirements in effect during any subsequent year in which they are registered, provided the courses are offered. A student entering for the first time in the summer session may obtain a degree or certification according to the course requirements of the catalog of the previous long session or the next long session. The above provisions, however, are subject to the restriction that all requirements for a degree or certification must be completed in eight years from the date of the catalog chosen and that the courses are still offered. A student may graduate under the current catalog. The above provisions are also subject to the University's authority to modify degree, certification or graduation requirements as necessary.

Policy on Posthumous Degrees

A posthumous degree will be awarded if the deceased was enrolled in his or her final semester in courses that would have completed all work required for the degree and meets the minimum GPA requirements for graduation. If an Application for Graduation is not already on file, one may be completed by the deceased's academic advisor or family member. For further information, individuals may contact the Office of the Registrar or the appropriate dean's office.

Graduation Rates

As of October 2022, the six-year graduation rate was 56 percent for students who entered The University of Texas at Arlington in Fall 2016 on a full-time basis as first-time, degree-seeking undergraduates.

Undergraduate Education

New Maverick Orientation (Freshman and Transfer Orientation)

B160 Lower Level, University Center · Box 19348 · 817-272-9234 · www.uta.edu/orientation (http://www.uta.edu/orientation/)

The University of Texas at Arlington is dedicated to the retention and overall success of our students, by promoting academic excellence and fostering lifelong learning. New Maverick Orientation offers a variety of programs, both on campus and online, for new freshmen, transfer students, and veterans students. These programs are designed to meet your individual needs and to assist you in making a smooth transition into life as a UT Arlington Maverick. Our goal is to assist you with the transition process, acclimate you to our way of doing things, connect you to our community and its resources that support your success, and assist you in registering for your first semester of classes.

Attending New Maverick Orientation helps students begin to take ownership of their educational goals and create a framework for their future. Embracing UT Arlington traditions and jumping into the experience will help you learn, right from the beginning, what it means to “Be a Maverick!”

Our office is staffed by professionals who specialize in providing outstanding support and service to incoming students, undergraduate student leaders who service as guides and resources in the on campus programs, and graduate students who are gaining experience for future careers in higher education. Together, we look forward to providing you with a memorable and helpful experience. Welcome to Maverick Country!

New Student Courses

The Division of Student Success is committed to providing students with the academic and personal resources they need to be successful at UTA. In order to support students in charting a course towards graduation, the Division offers a number of high impact educational practices aimed at building an environment where students can learn skills to participate fully in their courses, engage with faculty, and gain the tools to take advantage of the many opportunities UTA has to offer in the areas of research, leadership, service, and career development. One such practice are the new student courses, classes designed specifically for students entering into the UTA community.

UT Arlington’s New Student Courses, housed within the Division of Student Success, are designed to orient students to life on the Maverick campus by providing them with essential resources for their student success, instruction on critical thinking skills for academic success, and access to faculty and peer networks. These courses are for undergraduate students who are entering their first semester of coursework at UTA and they are required for both first time in college students and transfer students unless otherwise indicated by the degree plan for the major. Students are required to enroll in one of three major-specific courses (UNIV 1000, UNIV 1131 or UNIV 1101) or a departmental equivalent option. Students should work with their academic advisor to enroll in the appropriate course for their major. Students who have not yet declared a major should enroll in one of the Division of Student Success’s UNIV sections. If a student would like to drop a New Student Course, they will need to get permission to do so and work with their academic advisor on that process. Students are allowed 3 attempts to pass a UNIV course. If a student does not pass the UNIV class after a third attempt, or is nearing graduation and has not earned credit for the UNIV course requirement, they are to file an appeal with their home college following normal course appeal processes.

Transfer students who are non-degree seeking or who already hold a bachelor’s degree are not required to take a New Student Course, but they may still be required to take an equivalent course as determined by their college/school/department. Transfer students may also meet an equivalency standard for the course if they have taken a similar one at their previous institution. To determine if a student has a transfer equivalency, they should work with their academic advisor and fill out this form (https://forms.office.com/Pages/ResponsePage.aspx?id=Q1vcXL7XqkyBc3KeOwpi2VpMSni8c-VCqyeI5g9x_8VUNDZIOE5ZVzFRVDI4NEZLQjNMTzhaWVA2MSQlQCN0PWcu).

Academic Coaching for First Time in College Students (FTIC)

FTIC INDIVIDUAL REVIEW ADMITS

First-Time in College students who are admitted under individual review may be required to participate in an academic coaching session in the first three weeks of the first semester before being eligible to register for courses for the second semester. These sessions will provide students with assistance in academic planning, self-assessments, and success strategies. An Academic Coaching hold can be added to their record. This is a registration hold that prevents students from registering for the following semester until the coaching requirement is met. This requirement is in addition to any made by the student’s college, school, or academic program.

FTIC ACADEMIC PROBATION OR WARNING

First-Time in College students who have less than a 2.00 Total Institutional GPA at the end of their first semester of enrollment will be required to participate in an academic coaching session in the first six weeks of their second semester before being eligible to register for courses in the third semester. These coaching sessions will provide students with assistance in academic planning, self-assessments, and success strategies. An Academic Coaching hold will be added to their record. This is a registration hold that prevents students from registering for the following semester until the coaching requirement is met. This requirement is in addition to any made by the student’s college, school, or academic program.

MAVS RISE PROGRAM

Some first time in college applicants may be offered admission to UT Arlington with the condition that they participate in the MAVS RISE or similar program. The MAVS RISE program provides students with relevant and robust support from the Division of Student Success and other entities across campus. While in the MAVS RISE program, students may be required to participate in student success activities and may be restricted in course load and/or course selection. Selection for the conditional admission and the MAVS RISE program is based on UT Arlington admission criteria and a holistic review of a student's application. Students selected for MAVS RISE who decline participation will not be admitted to UT Arlington. Continued enrollment is contingent on meeting all conditions of admission.

Student Feedback Surveys

As part of the UT Arlington's efforts toward continually improving the quality of teaching, the University developed the Student Feedback Survey (SFS) program, a campus-wide program that affords students with an opportunity to reflect upon their experience in each organized course (lectures, seminars, and labs) and offer relevant feedback.

Toward the end of each term, each student enrolled in a lecture, seminar, or lab course will receive an e-mailed invitation to participate in the SFS for that particular section. (Students will receive separate e-mail messages for each course in which they are enrolled.) With few exceptions, each SFS is administered online. In every case, the feedback is submitted anonymously. Students also have an opportunity to provide feedback on dropped courses. Students who withdraw from one or more courses will be sent a drop survey via their student email. Questions related to dropping a course will also be asked on the final SFS.

Once the final grades for the term have been officially certified by the University, summaries of the SFS data are provided to both the professor and his/her supervisor. These reports help members of the faculty identify which aspects of a course should remain unchanged and which aspects might benefit from revision.

Graduate Education

Mission and Philosophy

The goal of graduate study is to develop a student's potential for original research, scholarship, creative expression and teaching in his or her chosen field of endeavor. Graduate study actively involves students in research, creative and scholarly pursuits that foster acquisition of factual knowledge and professional skills in an environment that values and promotes discovery, innovation, and the spirit of creative scholarship. Ultimately, graduate study prepares students to become important contributors to and intellectual leaders of their disciplines.

History and Overview

Graduate study at the University of Texas at Arlington began in 1966 with the initiation of six master's degree programs. Doctoral degree programs were added in 1969 with a Ph.D. in engineering. Today, the selection has expanded well beyond the engineering department. Numerous graduate programs offered across 46 academic departments grant prospective students the opportunity to pursue wide variety of master’s and doctoral degrees. Many of these departments also offer certificate programs for those seeking to enhance their professional skills and opportunities.

Graduate School Website

The Graduate School offers/assists with:

- Academic and professional development resources (https://www.uta.edu/academics/schools-colleges/gradschool/resources/), workshops and programs (https://www.uta.edu/academics/schools-colleges/gradschool/resources/workshops-and-programs/) for graduate students
- Grants/fellowships (https://www.uta.edu/academics/schools-colleges/gradschool/funding/) administered by the Graduate School
- All inquiries regarding Graduate School policies and procedures

Students and faculty are encouraged to visit the Graduate School website (https://www.uta.edu/academics/schools-colleges/gradschool/) to locate important information about graduate programs and to learn about support resources that help students hone critical skills which lead to academic and professional success.

Administration of the Advanced Degree Programs

GRADUATE DEAN

The Dean of Graduate Studies works advises Academic Deans, Graduate Advisors, Committees on Graduate Studies, the Graduate Assembly and Faculty and Staff regarding academic regulations, processes and procedures pertaining to graduate education and provides programming and other forms of support that support the academic and professional success of graduate students.

ACADEMIC DEANS

Academic deans oversee and regulate graduate program practices taking place in their colleges or schools.

COMMITTEES ON GRADUATE STUDIES

Each graduate program is governed by a Committee on Graduate Studies. The committee is composed of all full members of the graduate faculty in that program. Graduate faculty from allied fields may serve on the committee, when appropriate. In an interdepartmental program, the Committee on Graduate Studies is appointed by the Vice Provost for Academic Programs and Curricula.

GRADUATE ADVISORS

Each graduate program has a Graduate Advisor. The Graduate Advisor represents the academic dean of the college and the departmental Committee on Graduate Studies in matters pertaining to advising graduate students in their academic areas. The Graduate Advisor's functions include clearing of students for registration, acting upon requests for drops, adds, section changes and special examinations; maintaining graduate student records; and advising graduate students about their degree plans.

Office of International Education

Mission Statement

OIE Supports the University by:

Developing and implementing internationalization initiatives that support the University's Strategic Plan 2025 Bold Solutions – Global Impact

Providing content knowledge expertise and specialized services for 6,000 plus international students from over 100 countries to ensure opportunities for academic and professional success, and intercultural exchange.

Leading study abroad programs that equip UTA students with a better understanding of other cultures and the world at large and promoting cooperative programs with overseas institutions to facilitate student, faculty, and other academic exchanges.

Enhancing campus internationalization and cultural competency development through the implementation of intercultural training and assessment, global education opportunities, and engagement opportunities for international and domestic students.

International Student and Scholar Services (ISSS)

INTERNATIONAL STUDENT SERVICES

Advising for international students is available Monday through Friday. In addition, ISSS processes a variety of requests to help students remain in compliance with university policies and government (Department of Homeland Security, Department of State) regulations. ISSS also offers various workshops and seminars throughout the year for international students who want to learn more about topics such as off-campus employment. For more information, including advising hours, request forms, and seminar schedules, please visit: http://www.uta.edu/oie/

J-1 SCHOLAR SERVICES

ISSS works closely with other departments at UT Arlington to bring international exchange visitors to campus for research activities, teaching, and internships. For more information, please visit: http://www.uta.edu/oie/

Study Abroad

To help students attain the education demanded by today's increasingly interdependent world, UT Arlington offers the opportunity to study overseas while earning credit toward a degree. Some programs involve direct enrollment in an overseas institution, while others are led by UT Arlington faculty members. For more information, including program and application requirements, please visit: http://studyabroad.uta.edu.

Global Engagement

As part of the Office of International Education, the Global Engagement department advances UTA's strategic initiatives in relation to international education and intercultural learning.

Global Engagement provides intercultural programs that connect our diverse U.S. and international student populations, trainings and assessments that enhance cultural understanding for all members of the UTA community, ongoing support for international students in a variety of areas, and global education opportunities.

Programs | UTA Office of International Education (https://www.uta.edu/oie/?page=programs)

College of Architecture, Planning, and Public Affairs

College Overview

VISION

CAPPA engages the creative and scholarly disciplines through its commitment to providing an outstanding research-driven education.

MISSION AND PHILOSOPHY

Together, our dynamic group of faculty and dedicated staff inspires, motivates, and educates students to pursue excellence in academic scholarship, design practice, creative thinking, and critical reflection. CAPPA provides a comprehensive, collaborative, relevant, and forward-thinking learning experience grounded in the rich traditions of the professional disciplines situated in the college. Located in the heart of DFW, CAPPA is a testing ground for the design and development of healthy, inclusive, environmentally and ecologically responsive communities.

A NEW ERA BEGINS

In 2015, the University of Texas at Arlington's School of Architecture and School of Urban and Public Affairs combined to form the College of Architecture, Planning, and Public Affairs (CAPPA). The integration of the two schools strengthened the academic, research, and outreach opportunities available for students and faculty at UTA.

CAPPA offers degrees in architecture, landscape architecture, interior design, sustainable urban design, urban planning, public administration, and public policy. The college also hosts the David Dillon Center for Texas Architecture (https://www.uta.edu/academics/schools-colleges/cappa/research/ddc/), the Center for Metropolitan Density (https://www.uta.edu/academics/schools-colleges/cappa/research/cfmd/), the Center for Transportation Equity Decisions, and Dollars (CTEDD) (https://www.uta.edu/academics/schools-colleges/cappa/research/c-tedd/), and the Institute of Urban Studies (http://www.uta.edu/ius/), and partners with the City of Arlington on the Arlington Urban Design Center (https://www.uta.edu/academics/schools-colleges/cappa/research/audc/) located at City Hall.

ACCREDITATIONS

CAPPA offers the Master of Architecture (https://www.uta.edu/academics/schools-colleges/cappa/academics/architecture/m-architecture/) and the Master of Landscape Architecture (https://www.uta.edu/academics/schools-colleges/cappa/academics/landscape-architecture/m-landscape/) as first professional degrees in the respective programs. The former is accredited by the National Architecture Accrediting Board (NAAB) and the latter by the Landscape Architecture Accrediting Board (LAAB). The Bachelor of Science in Interior Design (https://www.uta.edu/academics/schools-colleges/cappa/academics/architecture/bs-interior-design/) is accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD). The Master of Public Administration (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/) degree is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the M(https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-city-regional-planning/)aster of City and Regional Planning (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-city-regional-planning/) is accredited by the Planning Accreditation Board (PAB).

CAPPA Graduate Policies

The College of Architecture, Planning and Public Affairs (CAPPA) at The University of Texas at Arlington maintains specific academic standards for all graduate students to support academic excellence and timely degree completion. Students must meet the following requirements in addition to university-wide graduate school policies.

ACADEMIC STANDING (ALL PROGRAMS)

- **Minimum GPA:** A cumulative GPA of 3.0 is required for good academic standing and graduation.
- **Probation & Dismissal:** Students whose GPA falls below 3.0 will be placed on academic probation. Continued probation may lead to dismissal as per Graduate School policy.
- **Time Limits:** Master's students must complete all degree requirements within 6 years; doctoral students within 10 years.
- **Incomplete Grades:** Must be resolved within one academic year or they will convert to an 'F'.

COLLEGE POLICIES

- **Capstone or Thesis Requirement:** All master's students must complete either a capstone project or a thesis, depending on the program.
- **Research Tools Requirement:** PhD students must meet the research skills requirement as outlined in their program's handbook.

SATISFACTORY PROGRESS

Advisors are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward the degree. If the Advisor finds that a student is not making satisfactory progress, it may be recommended to the CAPPA Director of Student Success and Advising that the student be dismissed from the program. To be qualified as making “satisfactory progress” toward their degree, students must maintain continuous enrollment in courses applicable to the degree through graduation. Exceptions require the approval of the student’s advisor and the CAPPA Director of Student Success and Advising. Students who are deemed not to be making satisfactory progress toward degree completion are subject to dismissal by the department.

STUDENT PROJECTS

The College of Architecture, Planning and Public Affairs reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

POLICY FOR CLASSROOM + STUDIO NON-REGISTERED ATTENDEES

The following policy applies to scheduled courses and academic activities in the Master of Architecture and Master of Landscape Architecture graduate programs, as well as the undergraduate programs in Architecture, Interior Design, Sustainable Urban Design. The policy is effective January 1, 2024 and complies with University of Texas at Arlington EI-PO-11 (https://policy.uta.edu/doctract/documentportal/08DBFB5B2F2385C1E7FA9336A7971113/), the Texas Education Code Section 51.982 (https://casetext.com/statute/texas-codes/education-code/title-3-higher-education/subtitle-a-higher-education-in-general/chapter-51-provisions-generally-applicable-to-higher-education/subchapter-z-miscellaneous-provisions/section-51982-protections-for-pregnant-and-parenting-students/), and Title IX (https://www2.ed.gov/about/offices/list/ocr/docs/tix_dis.html) of the Education Amendments of 1972.

Only assigned instructors, enrolled students, invited guests and other individuals who have received the instructors’ permission in advance are permitted in scheduled classes within CAPPA buildings. Unenrolled students, dependent minors of enrolled students or guests without instructors’ permission are not permitted within the assigned classroom during any scheduled class. Other faculty engaged in peer review or other sanctioned academic responsibilities may attend as warranted and with consent of the instructor for the course or program director.

On occasion, due to extenuating circumstances, it is understood that an enrolled student who is a parent may have no other childcare choice than to have their child brought to the learning environment. In these circumstances, suspension of the above policy may be permitted by the instructor on a limited basis, to be designated by the instructor. ***Prohibited Minors:*** Persons under the age of ten (10) are not permitted in any laboratory (studio).

INDEPENDENT STUDY POLICY (5191, 5391, 5395, 5591, 5691)

For students interested in completing Independent Study, independent studies are limited to no more than six (6) total hours during their graduate degree pursuit with the program. No more than one independent study is allowed in one semester. All Independent Studies must adhere to the following process:

1. The student must have a minimum 3.0 GPA both overall at UTA and within the major.
2. The Independent Study subject/purpose must not be covered in the regular curriculum.
3. The student will develop and write an independent study proposal and find a sponsoring faculty member to supervise the independent study.
4. The faculty member, if agreeable to supervise the independent study, must complete a submit a CAPPA Independent Study form with a detailed outline on what the independent study will cover, why it is needed, and how many credits are requested.
5. The faculty member will submit the completed/signed form to the CAPPA undergraduate advising office at arch.advising@uta.edu.
6. The Independent Study request is subject to administrative approval.

Any independent study from programs outside of the student's current major is still subject to the Independent Study Policy above for consideration of application to the degree plan.

CAPPA Undergraduate Policies

PROGRAMS COHORT

The undergraduate programs in the College of Architecture, Planning and Public Affairs at the University of Texas at Arlington are organized in a structured cohort format.

What Is a Cohort?

A cohort is a group of students that follows the same set schedule and progresses through a program together. The sequential scheduling of the courses promotes an interactive learning environment and facilitates networking opportunities and career-strengthening relationships.

How Does It Work?

The program consists of a sequence of courses that takes a minimum of eight semesters to complete. The courses are offered in specific semesters (Fall and Spring) that require the students to complete the prior level before proceeding to the next level. If a student gets off-track in the cohort, she/he must wait until the missing course(s) are offered again.

GRADES

Upon admission to a major, all declared majors must maintain a minimum GPA of 2.8 both within the major and in the cumulative GPA to continue in the upper level program to satisfy requirements for graduation. Grades of P are not acceptable for classes in which a grade of C or higher is required. Courses in which a grade of "C" or better was earned cannot be repeated for credit.

REPETITION OF COURSES

Two attempts to achieve a satisfactory grade are permitted for each required UDES course. Beyond that number of attempts, the student is denied access to the course in question, or to the sequence of courses for which it is requisite. Enrollment in the course for the time sufficient to receive a grade, including the grade W, is considered an attempt.

SATISFACTORY PROGRESS

Advisors are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward the degree. If the Advisor finds that a student is not making satisfactory progress, it may recommended to the CAPPA Director of Student Success and Advising that the student be dismissed from the program. To be qualified as making “satisfactory progress” toward their degree, students must maintain continuous enrollment in courses applicable to the degree through graduation. Exceptions require the approval of the student’s advisor and the CAPPA Director of Student Success and Advising. Students who are deemed as not making satisfactory progress toward degree completion are subject to dismissal by the department.

FACILITATED ADMISSION FOR UTA UNDERGRADUATES

- Students pursuing the **Bachelor of Science in Architecture** at UTA may be eligible for Facilitated Admission into the Master of Architecture program.
- Students pursuing the **Bachelor of Science in Sustainable Urban Design** at UTA may be eligible for Facilitated Admission into the Master of Landscape Architecture program.

TRANSFER OF CREDIT

The extent of credit toward degree requirements for academic work done elsewhere will be determined by the representatives of the appropriate program. Students applying to transfer credits from studio courses taken elsewhere must present examples of that work for evaluation.

FRESHMAN STUDENTS

Students entering directly from high school or with fewer than 24 hours of transferable credit are advised initially by the Division of Student Success (DSS). To transition to departmental advising within the College of Architecture, Planning and Public Affairs, students must meet the following benchmarks by the end of their first two long semesters (fall and spring) at UTA:

1. Earn a minimum 2.0 cumulative GPA
2. Earn a minimum 2.0 major GPA
3. Complete at least 30 credit hours
4. Complete a CAPPA transition request form during the CAPPA transition window

Students who do not meet transition criteria after two semesters are strongly encouraged to consult with an advisor and Major Exploration to explore alternative majors that may better align with their academic progress. Students who do not meet transition requirements after three semesters must choose a major outside the College of Architecture, Planning and Public Affairs.

STUDENT PROJECTS

The College of Architecture, Planning and Public Affairs reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

POLICY FOR CLASSROOM + STUDIO NON-REGISTERED ATTENDEES

The following policy applies to scheduled courses and academic activities in the Master of Architecture and Master of Landscape Architecture graduate programs, as well as the undergraduate programs in Architecture, Interior Design, Sustainable Urban Design. The policy is effective January 1, 2024 and complies with University of Texas at Arlington EI-PO-11 (https://policy.uta.edu/doctract/documentportal/08DBFB5B2F2385C1E7FA9336A7971113/), the Texas Education Code Section 51.982 (https://casetext.com/statute/texas-codes/education-code/title-3-higher-education/subtitle-a-higher-education-in-general/chapter-51-provisions-generally-applicable-to-higher-education/

subchapter-z-miscellaneous-provisions/section-51982-protections-for-pregnant-and-parenting-students/), and Title IX (https://www2.ed.gov/about/offices/list/ocr/docs/tix_dis.html) of the Education Amendments of 1972.

Only assigned instructors, enrolled students, invited guests and other individuals who have received the instructors' permission in advance are permitted in scheduled classes within CAPPA buildings. Unenrolled students, dependent minors of enrolled students or guests without instructors' permission are not permitted within the assigned classroom during any scheduled class. Other faculty engaged in peer review or other sanctioned academic responsibilities may attend as warranted and with consent of the instructor for the course or program director.

On occasion, due to extenuating circumstances, it is understood that an enrolled student who is a parent may have no other childcare choice than to have their child brought to the learning environment. In these circumstances, suspension of the above policy may be permitted by the instructor on a limited basis, to be designated by the instructor. ***Prohibited Minors:*** Persons under the age of ten (10) are not permitted in any laboratory (studio).

INDEPENDENT STUDY POLICY (4191, 4391, 4591)

For students interested in completing Independent Study, independent studies are limited to no more than six (6) total hours during their undergraduate degree pursuit with the program. No more than three (3) credit hours of independent study is allowed in one semester. All Independent Studies must adhere to the following process:

1. The student must have minimum 3.0 GPAs both overall at UTA and within the major.
2. The Independent Study subject/purpose must not be covered in the regular curriculum.
3. The student will develop and write an independent study proposal and find a sponsoring faculty member to supervise the independent study.
4. The faculty member, if agreeable to supervise the independent study, must complete a submit a CAPPA Independent Study form with a detailed outline on what the independent study will cover, why it is needed, and how many credits are requested.
5. The faculty member will submit the completed/signed form to the CAPPA undergraduate advising office at arch.advising@uta.edu.
6. The Independent Study request is subject to administrative approval.

Any independent study from programs outside of the student's current major are still subject to the Independent Study Policy above for consideration of application to the degree plan.

Architecture

Department Overview

The design disciplines--Architecture and Interior Design--teach us to understand and to shape the spaces in which we live: rooms, buildings, and cities. These disciplines are old, being among the first activities of civilization itself. They are also new, requiring advanced knowledge and skills to serve contemporary societies. The design disciplines operate at many levels of thought and concern. On one hand they are very practical, dealing with a host of concrete realities; on the other hand, they are highly conceptual, concerned with meaning and society's highest aspirations.

Architecture was first taught at what is now The University of Texas at Arlington in the early 1940s as a two-year, non-degree program within the School of Engineering. In 1968, with the support of professional architects in the Dallas/Fort Worth area, architecture became a department of the College of Liberal Arts, granting the degree of Bachelor of Science in Architecture. The department prospered, and by 1973 a decision was made to establish a separate school of architecture based on a four-year undergraduate program with a two-year master of architecture program as the professional degree.

By 1978, the School of Architecture and Environmental Design (as it was named in 1974) had an enrollment of more than 1,000 students with 31 full-time faculty. Four programs were included at that time: architecture, interior design, landscape architecture, and city and regional planning. Subsequently, planning moved to the Institute of Urban Studies. In 1989, the school was renamed the School of Architecture.

Architecture and landscape architecture serve as both the means and the goals of the education that we offer. As *means*, our fields provide a ready path to the larger domain of ideas, history and the human condition, reflected in the fact that architecture was one of the essential liberal arts during the Renaissance. As *goals*, our fields call upon us to learn specific professional knowledge and skills: they focus our attitudes and abilities to produce

tangible, concrete things. This demand that we alternately widen and narrow our vision is one of the great strengths of the fields and is one source of their effectiveness as courses of study.

Within a broad curriculum, design as a discipline and a process is emphasized. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at UT Arlington centers on the contemporary urban condition, an approach appropriate for a school at the heart of a diverse, expanding and internationally oriented region like Dallas/Fort Worth.

The school's location at the center of the Dallas/Fort Worth area is especially important for students of architecture and landscape architecture. Almost every cultural, social and professional opportunity is nearby. The urban setting serves as a laboratory to observe the issues that confront current design and to test the proposals put forward. Built work by many of the foremost contemporary architects and landscape architects may be experienced and studied firsthand. Kahn, Pei, Wright, Johnson, Meier, Legoretta, Rudolph, Giurgola, Barnes, Predock, Holl, KPF, Kiley and Walker all have major projects here.

The School of Architecture offers large and up-to-date facilities for research and study. Constructed in 1984, the Architecture Building houses studios, classrooms and offices in addition to a digital fabrication lab, a CAD lab, a photography studio, a materials shop, and the Architecture and Fine Arts Library that has 40,000 books and 190 periodicals. The UT Arlington Libraries contains more than 1 million volumes, and students have access to The University of Texas System Library, which houses 12 million volumes.

The School of Architecture has an enrollment of approximately 1,000 students, of whom about 160 are graduate students. They come from all parts of the United States and the world; more than 20 percent are international students. About one-third of the graduate students are women.

In terms of recognition of quality, 134 School of Architecture students have received awards in 63 major design or research competitions over the last 10 years, most at the national or international level. This record of competitive accomplishment reflects the education focus of the school. Highly developed skills, along with a tradition of integrating work and academic experience, give UT Arlington graduates ready entry and advancement in the professional world.

NATIONAL ARCHITECTURAL ACCREDITING BOARD (NAAB) ACCREDITATION POLICY

"In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards. Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree." (NAAB (http://www.naab.org/))

COURSES

ARCH 1101. ACADEMIC SUCCESS SKILLS IN ARCHITECTURE. 1 Hour.
This is a required course intended to establish a solid overview of the School of Architecture and the architecture program for all first semester UTA students who intend to declare as an architecture major. Topics for the class include: critical thinking, presentation techniques, internships, attendance of exhibitions and lectures, navigating the advising process, portfolio review and techniques, and using the library and other university resource sources. Other topics may also be discussed. The course be taken only once for credit.

ARCH 1191. CONFERENCE COURSE. 1 Hour.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Permission of the instructor and architecture undergraduate advisor required. Restricted to architecture-intended majors.

ARCH 1301. INTRODUCTION TO ARCHITECTURE AND INTERIOR DESIGN. 3 Hours.
The interrelationships between society, culture, and the built environment. Prerequisite: Department consent.

ARCH 1341. DESIGN COMMUNICATIONS I. 3 Hours.
Design Communications I is an introduction course to analog and digital representation with emphasis on notational techniques of freehand drawing, proportioning strategies, and analysis. Students will also be exposed to physical and digital model-making, craftsmanship, file organization, orthographic and axonometric delineation, line weights, and digital documentation. Prerequisite: Restricted to Architecture-Intended, ARCH_UNIV, Interior Design-Intended and INTD_UNIV majors.

ARCH 1342. DESIGN COMMUNICATIONS II. 3 Hours.
Design Communications II is a continuation of ARCH 1341 with emphasis on refined techniques and more complex drawing problems. This course focuses on scale and proportion, relational design strategies, circulation, spatial hierarchy, design narrative, and digital documentation. Students will also be exposed to in-situ notational drawing. This course is offered as INTD 1342; credit will be granted only once. Prerequisites: "C" or better in ARCH 1301 and ARCH 1341. Restricted to Architecture-Intended, ARCH_UNIV, Interior Design-Intended and INTD_UNIV majors.

ARCH 2300. MASTERWORKS OF WESTERN ARCHITECTURE. 3 Hours.
Selected architectural complexes as representative of various periods of Western culture. Stresses cultural relevance rather than stylistic analysis. Intended as humanities elective for non-architecture majors.

ARCH 2303. HISTORY OF ARCHITECTURE AND INTERIOR DESIGN I. 3 Hours.
A global survey of architecture emphasizing the material and cultural context for design. Focused primarily on the period from prehistory through 1750. Prerequisite: "C" or better in ARCH 1301, ARCH 1341, and ARCH 1342 or INTD 1342. Restricted to Architecture-intended and Interior Design-intended majors.

ARCH 2304. HISTORY OF ARCHITECTURE AND INTERIOR DESIGN II. 3 Hours.
A global survey of architecture emphasizing the material and cultural context for design. Focused on the period from 1750 to the present. Prerequisites: "C" or better in ARCH 1301, ARCH 1341, ARCH 1342 or INTD 1342, and ARCH 2303. Sophomore standing in the program. Restricted to Architecture-intended and Interior Design-intended majors.

ARCH 2341. DESIGN COMMUNICATION FOR ENGINEERS. 3 Hours.
This course introduces engineering students to design communication skills. Content includes sketching, drawing, graphic layout, diagramming and an introduction to orthographic projections and perspectives. Media will be both analog and digital. Digital tools may include image processing software, graphic design software and computer aided design (CAD) software. Prerequisite: Restricted to AREN students.

ARCH 2391. TOPICS IN ARCHITECTURE. 3 Hours.
Selected topics in concepts, philosophy, and models of architecture and allied arts of design. Prerequisite: Department Consent.

ARCH 2551. BASIC DESIGN AND DRAWING I. 5 Hours.
Basic Design and Drawing I course, the first design studio in the Basic Studies Foundation, is an introduction to architectural design, basic design theory and methodologies relating to spatial abstractions and forms. The course focuses on heuristic thinking with an emphasis on process and making. Two- and three-dimensional studio exercises develop a sensibility to design fundamentals, architectural vocabulary and design decision based on analysis and critique towards process-based learning strategies. As a continuation to the first-year courses, the role of design communications is reiterated in drawing exercises focusing on form, color theory, texture, and spatial determinants, historical precedence, sketching, orthographic projection and modeling. Prerequisite: "C" or better in ARCH 1342 or INTD 1342, credit or concurrent enrollment in ARCH 2303. Sophomore standing in the program. Restricted to Architecture-intended, ARCH_UNIV, Interior Design-intended, and INTD_UNIV majors.

ARCH 2552. BASIC DESIGN AND DRAWING II. 5 Hours.
Basic Design and Drawing II, the second design studio in the Basic Studies Foundation builds on disciplinary principles of basic design theory, 2D and 3D projects, with emphasis on visual and verbal representation. The course follows established methodologies that develop an understanding of foundational design principles of space, hierarchy, scale, proportion, circulation, and enclosure. Studio exercises and projects develop individual skills and collectively apply analog and digital processes to understand the design of architectural spaces and forms, their constituent parts, and their conditional relationships to the context, as a coherent, inter-related design process. The study of historical and contemporary masterworks of architecture serves to inform the projects toward the role of historical precedent in design. Design communication focuses on accurate orthographic projections, drawing conventions, graphic sensibility, and the exploration of 2D and 3D representation with physical models using a range of techniques, which exhibit understanding of tectonics, craft, materiality, and the representation of ideas. Prerequisite: "C" or better in ARCH 2303, ARCH 2551, and credit or concurrent enrollment in ARCH 2304. Restricted to Architecture-intended and Interior Design-intended majors.

ARCH 3312. HISTORY OF CONTEMPORARY THEORY. 3 Hours.
This course will familiarize students with major intellectual paradigms and themes that have informed postwar architectural practice in Western tradition. Through reading primary theoretical texts that have had major impact on practice, students will hone their skills of critical thinking and be better able to position themselves in their navigation of contemporary theoretical issues. Prerequisite: ARCH 2303 and ARCH 2304 and Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 3323. CONSTRUCTION MATERIALS AND METHODS. 3 Hours.
This course discusses the nature of materials and structural concepts to be used in the construction process. The principles and fundamentals of building construction materials and methods is evaluated, and the project development process and construction delivery systems are introduced. The course provides an understanding of building standards and codes; the impact of materials and buildings on the environment and human health, safety, and welfare; the material properties including structural properties of materials as well as performance properties and the major materials and construction systems such as light wood frame, mass timber, and steel and concrete frame construction. Prerequisite: ARCH 2552. Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3324. STRUCTURES I. 3 Hours.
This course is the foundation for all advanced structures courses in the undergraduate and graduate architecture programs. In an engineering curriculum, this course is offered in two separate courses referred to as: (a) Statics and (b) Strength of Materials, each of one-semester duration. the present course capsules the information yet is rigorous enough and covers all important topics in the two engineering courses including equilibrium of particles and rigid bodies, analysis of important structural load bearing items such as cables, beams and Trusses, Definition of Stress and strain and their role in structural design, cross-sectional properties of structural members and analysis of strength for the beams. Prerequisite: ARCH 3323, PHYS 1441 or PHYS 1443, MATH 1327 or MATH 1426. Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3336. STRUCTURAL SYSTEMS FOR ARCHITECTURAL ENGINEERS. 3 Hours.
This course covers the engineering design of various concrete, steel and masonry structural systems used in the construction of buildings. Building types vary from single-story commercial buildings to low-rise and high-rise buildings. Current building codes and project examples are examined from a fundamental structural engineering perspective, in which the rationale for the structural system is analyzed, calculations performed, and systematic construction design processes are developed for gravity loads and lateral loads from start to completion of each project. The project examples culminate with a detailed cost analysis based on current industry trends. Prerequisite: Restricted to CE_AENUCOL, CE_ARENINT, CE_ARENBS, and CE_AREPROB majors.

ARCH 3343. ARCHITECTURE COMPUTER GRAPHICS (DESIGN COMMUNICATION III). 3 Hours.
An advanced course to develop visual sensitivity and awareness of digital techniques to enable the student to study design ideas and present those ideas in the various design disciplines. Emphasis on the relationship of computer graphics with the design process. This course is offered as ARCH 3343 and INTD 2343, credit will only be granted once. Prerequisite: Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3354. INTRODUCTION TO ENVIRONMENTAL & SUSTAINABILITY STUDIES. 3 Hours.
Introduces major topics, questions, issues and methods within interdisciplinary and cross-disciplinary environmental studies. Includes a study of some of the most significant texts, studies, practices, and creative works from at least four different fields as they pertain to questions of environment, ecology, and sustainability.

ARCH 3357. DESIGN TECHNOLOGIES - BUILDING INFORMATION MODELING FOR ARCHITECTS/ENGINEERS. 3 Hours.
Introduction to Building Information Modeling (BIM); discussions of the roles and impacts of BIM in the design process, energy assessment, and facility management. The course includes creating building elements such as walls, windows, doors, roof, ceiling, stairs, ramp, and structural and MEP systems. Course provides an overview of BIM applications such as daylight and energy analysis. Prerequisite: AREN 2352. Restricted to CE_AENUCOL, CE_ARENINT, CE_ARENBS, and CE_AREPROB majors.

ARCH 3361. ARCHITECTURE AND ENVIRONMENT. 3 Hours.
An overview of sustainable design integrated with natural resource conservation. Prerequisite: ARCH 2552. Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3364. SITE DESIGN. 3 Hours.
The related site design process includes site planning pertaining to land use, case studies, siting of structures, codes, and topography. Prerequisite: Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3551. BASIC DESIGN FOR ENGINEERS. 5 Hours.
This course is an introduction to design communication (verbal and graphic), the process of design, architectural principles and the process of navigating the relationship between architectural design and engineering. Precedent studies introduce students to Architecture and two- and three-dimensional studio exercises develop a sensibility to design fundamentals and vocabulary. Prerequisite: ARCH 1301 and ARCH 2341 and restricted to AREN students.

ARCH 3553. DESIGN STUDIO: ARCHITECTURE I. 5 Hours.
The reiteration of basic design principles, formal ordering systems and spatial concepts toward the synthesis of simple building types, with application of materials, introduction of structural systems, rudimentary building systems, limited program, with preliminary understanding of site design, and environmental issues. Projects will investigate small scale institutional, civic, or cultural buildings set in cities of historical significance that respond directly to their context. Research and analysis of influential precedent buildings and cities, whether historical or contemporary will inform the design process and methodologies. Credit will be given for only one of ARCH 3553 or INTD 3553. Prerequisite: ARCH 2552 or INTD 2552. Credit or concurrent enrollment in ARCH 3323 and ARCH 3343 or ARCH 3364. Junior standing in the program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3554. DESIGN STUDIO: ARCHITECTURE II. 5 Hours.
A continuation of ARCH 3553 with an increased complexity and scale of projects which address buildings within urban contexts. Projects will incorporate design theory with technical, site and structural considerations. Research of local specifics as design imperatives will inform building and site integration, which respond to context. Projects will investigate and subsequently integrate rudimentary building systems including those for formal ordering, spatial organization, structural support, materiality, building assembly, envelopes, building services, life safety, and circulation, with a particular attention towards sustainability, accessibility, efficiency, and code compliance. Design communication will demonstrate understanding of project components by developing an encompassing set of orthographic projections Three dimensional models will test and communicate spatial intentions relating to the context addressing, proportion, massing, materiality, environment, and project character. Prerequisite: ARCH 3323, ARCH 3553, and ARCH 3343 or ARCH 3364. Credit or concurrent enrollment in ARCH 3324 and ARCH 3343 and ARCH 3364. Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 3595. SELECTED TOPICS ARCHITECTURE. 5 Hours.
A transitional studio course to explore and present selected topics in architecture and design. May be repeated for credit as topics change. Prerequisite: Department consent. Junior standing in program. Restricted to Architecture majors.

ARCH 4191. CONFERENCE COURSE. 1 Hour.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor or the Architecture Undergraduate Advisor.

ARCH 4305. THE CITY OF ROME. 3 Hours.
History, topography, and monuments of the city of Rome and its environs from its legendary founding in 753 B.C. until the 20th Century. Urban form and architecture will be inspected in context of contemporaneous culture, with special emphasis on imperial and papal Rome. Prerequisite: Department consent. Restricted to Architecture and Interior Design Majors.

ARCH 4306. URBAN DESIGN THEORY. 3 Hours.
Design theory and its application to the urban scale, as applied to historical and contemporary examples. Prerequisite: ARCH 2552. Department consent. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4307. THE LIFE OF CITIES. 3 Hours.
A look at a series of world cities by situating their architectural context, with a particular focus on the impact of 20th century modernism and postmodernism on city fabric. Prerequisite: ARCH 2303 and ARCH 2304 and Junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4308. HISTORY OF URBAN FORM. 3 Hours.
The history of cities as physical form, influenced by political, economic, and social forces. Prerequisite: Department consent. Restricted to Architecture and Interior Design majors.

ARCH 4309. MUSEUMS: HISTORY, CULTURE, DESIGN. 3 Hours.
This course investigates the historical and cultural forces driving the design of museums in the 19th and 20th centuries with special attention to the development of a diverse range of new museum types beyond traditional art and natural science museums. Field trips to local museum sites are required. Prerequisite: ARCH 2303 and ARCH 2304, junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4310. SKYSCRAPER HISTORIES. 3 Hours.
This course considers the history of the skyscraper from multiple perspectives, seeking consensus about what a skyscraper really is. This course will allow students to begin to develop their skills in reading, writing, critical thinking, visual memory, and visual analysis using the history of architecture as a medium. Students will also develop basic research skills using primary sources to document architecture. Prerequisite: ARCH 2303 and ARCH 2304, junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4311. TOPICS IN ARCHITECTURAL THEORY. 3 Hours.
Selected topics in concepts, philosophy, and models of architecture and allied arts of design with specific application to 20th Century problems. May be repeated for credit as specific topics vary. Prerequisites: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4312. WHAT MAKES A CITY: CRITICAL ISSUES IN ARCHITECTURE, PLANNING, AND URBAN DESIGN. 3 Hours.
This class is a critical exploration of the physical environment of the city, looking at a range of issues--mobility, housing, landscape, gentrification, sustainability, health-to understand how the built world shapes the way we live every day. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4313. THE ARCHITECT IN CONTEMPORARY SOCIETY. 3 Hours.
Readings on the Culture of Architecture The focus of this course is to examine this social construct in the belief that critical self-reflection can assist in improving success within it. This examination will be conducted through readings in a collection of publications both historical and contemporary that offer critical insight into the professional/social culture of architects. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4314. HISTORIC PRESERVATION AND RESTORATION. 3 Hours.
Concepts and implementation of the restoration and preservation of historic structures and places, including archaeological, bibliographic, legislative, institutional, and physical parameters to the retention and adaptive re-use of significant architecture. This course is offered as ARCH 4314 and INTD 4314; credit will be granted only once. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4315. TOPICS IN THE HISTORY OF ARCHITECTURE AND DESIGN. 3 Hours.
Selected topics in architecture and the allied arts of design. Some recent topics include: Architecture of Texas, The Life of Cities, History of Architecture Theory, Developing World Slum Housing, Architecture and Politics, and Contemporary Architecture. Certain topics may be offered every second or third year. The course may be repeated up to four times as the topics change. Prerequisite: ARCH 2303 and ARCH 2304, junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4316. MODERN ARCHITECTURE I. 3 Hours.
Development of 20th Century architecture from the origins of the modern movement in the 1890s until its diffusion in Europe and America in the 1930s. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4317. MODERN ARCHITECTURE II. 3 Hours.
Development of 20th Century architecture from the diffusion of modernism in the 1930s to the present day. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4318. ARCHITECTURE ON SCREEN. 3 Hours.
How do the things we watch shape our perceptions of architecture and the city? How do the environments in film and on television frame our vision, shape character, and convey themes? How are architects and other design professionals portrayed? What do they suggest about changes in the physical and technological world in which we live? This course explores those questions and others through screen history, from the earliest films to contemporary television and digital productions. Themes will include the dystopian city, suburbia, the evolving depiction of modernism, architecture as documentary subject, and the history of the city on screen. Students will explore these questions and will have to make their own short films. May be repeated for credit as specific topics vary. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4319. HOUSING PROTOTYPES: 1920s TO PRESENT. 3 Hours.
An extensive investigation of the many states of housing that architects and educators have encountered in the last 100 years. The course is organized through introduction, research, analysis, and case study of various housing typologies, unit design principles, density concerns, site, relationship of inside and outside, zoning and building codes, and new emerging housing building types. Prerequisite: ARCH 2303 and ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4320. PERFORMANCE-BASED DESIGN IN ARCHITECTURE. 3 Hours.
An overview of Performance-Based Building Design (PBBD) in architecture and how clients' expectations are translated into performance requirements, how we describe performance objectives, how we define performance indicators, and finally, how we can quantify and assess building performance. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4322. ARCHITECTURE + POLITICS. 3 Hours.
This course examines how notions of national identity are expressed in parliament buildings and other important buildings of state. Throughout the course, questions about what constitutes national identity, capital cities, and how architecture is used as a manifestation of these political aspects will be addressed. Buildings within nations or subnational regions across six continents are examined, giving students a global understanding of these issues. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4325. ENVIRONMENTAL CONTROL SYSTEMS I. 3 Hours.
Acoustics and illumination and their significance in the total design. Prerequisite: PHYS 1442. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4326. ENVIRONMENTAL CONTROL SYSTEMS II. 3 Hours.
Climate controls, mechanical and electrical systems, and their significance in the total design. Prerequisite: ARCH 4325 or AREN 3331. Junior standing in program. Restricted to Architecture, Interior Design, and Architectural Engineering majors.

ARCH 4329. TOPICS IN COMPUTERS AND DESIGN. 3 Hours.
Selected topics in the range and potential of digital computer applications in the design professions. May be repeated for credit as specific topics vary. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4332. ENERGY USE AND CONSERVATION IN ARCHITECTURE. 3 Hours.
Basic concepts of the efficient use and conservation of energy related to architectural design principles. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4338. CODES AND REGULATIONS. 3 Hours.
A study of accessibility, building and energy codes and related regulations including the architects' responsibility for compliance. This course is offered as ARCH 4338 and INTD 3338; credit will be granted only once. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4339. DIGITAL FABRICATION METHODOLOGY. 3 Hours.
The history, theory, and methodology framing the discourse for parametric design and digital fabrication with an emphasis on digital fabrication techniques and introduction to parametric modeling software. Prerequisites: Junior standing in program. Open to ARCH and INTD majors.

ARCH 4340. MODERN + CONTEMPORARY ARCHITECTURE IN MEXICO. 3 Hours.
This course examines notions of Mexican national identity as expressed through architecture. Part 1 looks at late 19th and early 20th century architecture during the Porfiriato, as well as that occurring shortly after the Mexican Revolution of 1910-20, including the critical role that cement played. Part 2 considers how the so-called First Generation of architects adapted and transformed Modernism in Mexico. Part 3 examines how the Second and Third Generations moved beyond Modernism, including. The course concludes with Mexico's "First Generation" of women architects as issues of gender are addressed. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors, or Department consent.

ARCH 4341. NOTATIONAL DRAWING. 3 Hours.
Seminar concerned with analytical drawing techniques and how to use the sketchbook as a tool and process for architectural production. Emphasis will be on cultivating drawing strategies that will heighten the ability to make observations through first-hand experience and record them with the correct conventions in order to enable recovery for future use in architectural design. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4344. CONCEPTUAL DRAWING. 3 Hours.
A seminar to explore the aspects of conceptual drawing for the architect and the relationship of design ideas in the drawing process. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4345. DIGITAL CONSTRUCTION. 3 Hours.
A workshop exploring video cartography using photography, animation, motion graphics and digital video. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4346. CONSTRUCTION DRAWINGS. 3 Hours.
The techniques of building construction, the communication of technical information, and the process of preparing contract drawings for construction. Prerequisite: ARCH 3343. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4347. DIGITAL TECTONICS & PROTOTYPING. 3 Hours.
The use of digital technology in the architectural design process focusing on the research and fabrication of full-scale production of prototypes. ARCH 4339 Digital Fabrication Methodology is highly recommended. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4348. ARCHITECTURAL PHOTOGRAPHY. 3 Hours.
Basic photography for architects. The use of photography as an investigative and presentation device in architecture. Emphasis on composition and black and white technique. Prerequisite: ARCH 2552. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4349. PORTFOLIO DESIGN. 3 Hours.
Principles and techniques of producing an architectural/interior design portfolio and resume including graphic design, layout, typography, grid systems, model photography as well as use of layout and photographic software. Prerequisite: ARCH 3553, ARCH 3554. Restricted to Architecture and Interior Design majors.

ARCH 4350. ARCHITECTURE, ENGAGEMENT + COMMUNITY POWER. 3 Hours.
Architecture, Engagement and Community Power will unpack the role of the citizen architect. It will examine participatory design processes that center community voice and shift existing power structures. In this country, constructed systems of oppression including racist practices, policies and financial systems have shaped the way our neighborhoods have developed. These acts have created inequities across communities that impact one's ability to thrive. Starting from the notion that all places are designed, and can therefore be undesigned, this course will explore the ways in which design processes can strengthen community power for marginalized communities. This course will encourage activism as an inherent quality in the development of an architect; encourage students to make connections between classroom learning and the larger community; require students to develop the skill to see and hear multiple voices; and encourage the development of visual, written, & oral communication tools. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4351. WILDERNESS: A CONDITION OF MIND. 3 Hours.
Changing conceptions of wilderness in Western thought, from ancestral prejudices to recent, revolutionary appreciation. Literary and visual documentation. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4352. HOUSING: FROM CAVES TO MANSIONS IN THE CLOUDS. 3 Hours.
This course examines the evolution of American urban settlements as they evolved from French, Spanish and English concepts of town-planning. The course begins with the Native American settlements in the American Southwest, particularly Mesa Verde and Hovenweep, followed by examination of the earliest European capital cities of Rome, Paris and London. Since the wholesale transplanting of European principles of town-planning traditions could not take root in the New World, distinctly American housing settlements evolved such as Savannah, Santa Fe, Taos and St. Augustine. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4353. HISTORY OF LANDSCAPE ARCHITECTURE. 3 Hours.
Development of landscape design from prehistory through 19th century with emphasis upon rural gardens and urban parks as representative of the social, cultural, and intellectual circumstances of the times and places in which they were created. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4354. CONVERGENCES: BETWEEN ART AND ARCHITECTURE. 3 Hours.
This course explores the convergences of artist methods of production with the processes of architectural practices. The course traces the work of leading filmmakers, both artistic and documentarian, whose professional leanings verge on the province of the architect. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4357. BUILDING INFORMATION MODELING & VISUALIZATION. 3 Hours.
To gain a working knowledge of Building Information Modeling software (Revit) and advanced 3D modeling software. This course is offered as ARCH 4357 and INTD 3357, credit will only be granted once. Prerequisite: ARCH 3343, INTD 2343, or INTD 3343; and Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4360. POLITICS AND PRACTICE OF PRESERVATION. 3 Hours.
The history and theory of preservation and of the political context that influence these. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4362. STRUCTURAL SYSTEMS IN BUILDINGS. 3 Hours.
An overview of various structural systems including those used in long-span and high-rise buildings. Numerical work limited to the explanation of relevant structural concepts. Prerequisite: ARCH 3324. Junior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 4365. CATALYTIC MAPPING. 3 Hours.
An advanced theory elective course and workshop using the potential of mapping as a design, analytic and research mechanism for exploring complex contexts. Prerequisite: Junior standing in Architecture, Interior Design or permission of the advisor.

ARCH 4366. RADICAL URBANISM. 3 Hours.
An advanced theory course focused on the exposure to and critical analysis of some of the most radical, inspirational, and transformative urban design ideas and projects from Vitruvius to today. Prerequisite: Junior standing in Architecture, Interior Design or permission by the advisor.

ARCH 4367. HIGH PERFORMANCE FACADE SYSTEMS. 3 Hours.
Examines the role of the façade and building envelope as it relates to design, indoor comfort, energy and carbon usage, and overall performance through an exploration of materiality, assembly, and construction. The course also introduces the potential of generative technologies, smart materials, passive-active combinations, and integrated systems. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4368. GREEN DESIGN + CONSTRUCTION. 3 Hours.
Green building design, construction, and operation is an opportunity to reduce negative impacts on the environment, and the health and comfort of building occupants, thereby improving building performance. It provides cost savings to all tax-payers through improved human health and productivity, lower cost building operations, and resource efficiency. Green design and construction focuses on strategies and technologies to improve the energy efficiency and performance of buildings, and to reduce the environmental impact of buildings. The course emphasizes on different aspects of green building during all phases of a building's life-cycle, including design, construction, operation and decommissioning. All LEED categories are covered throughout the course and students get prepared to take LEED Green Associate exam by the end of the semester. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4369. TERRITORIAL STRATEGIES. 3 Hours.
Territorial Strategies focus on climate resilience of the built environment on the territorial scale. In Territorial Strategies, students explore how macro-level drivers of spatial (trans)formation impact micro-level strategies and actions in distinct climatic regions. Students apply a systems-thinking approach to map, diagram, model, draw, and visualize project outcomes, research findings, and data through various media. Prerequisite: Junior standing in Architecture, Interior Design, Sustainable Urban Design, or permission by the advisor.

ARCH 4371. FUTURE CITIES. 3 Hours.
Future Cities focus on climate resilience of the built environment on the urban scale. In Future Cities, students explore historical and contemporary concepts of ecological design and combine mitigative and adaptive strategies and actions for urban landscapes in the age of anthropogenic climate change. Students apply a participatory mixed-methods approach to map, diagram, model, draw, and visualize project outcomes, research findings, and data through various media. Prerequisite: Junior standing in Architecture, Interior Design, Sustainable Urban Design, or permission by the advisor.

ARCH 4372. ADAPTIVE TYPOLOGIES. 3 Hours.
Adaptive Typologies focus on climate resilience of the built environment on the architectural object scale. In Adaptive Typologies, students explore architectural objects, their characteristics, and their performative aspects as integrated parts of the urban ecosystem. Students analyze, transform, and develop hybrid typologies merging physical, digital, and biological concepts and apply a digital mixed-methods approach, utilizing analytical, representational, and generative tools. Prerequisite: Junior standing in Architecture, Interior Design, Sustainable Urban Design, or permission by the advisor.

ARCH 4377. SPATIAL [IN] JUSTICE. 3 Hours.
Through lectures and discussions, Spatial [in] Justice will provide students with historical perspectives on how American cities became segregated, the creation and lack of inclusivity of 'public space', and the architect's role within a socially engaged practice. The course will begin by studying key philosophies and theories of justice. Students will work with a community partner to produce a community engagement and development plan. They will research publicly available data and organize it into a package for the community and other stakeholders. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4382. URBAN DESIGN SEMINAR. 3 Hours.
The Seminar establishes a basic critical understanding, and a critique of urban design by reviewing its past, present and the future as an academic field and an area of practice. The seminar introduces urban design as a transdisciplinary specialization and professional endeavor that encompasses landscape architecture, architecture, city planning, and real estate to shape and influence the built environment primarily within urban context. Students actively present and lead informed discussions on topics such as urban form, urban landscapes, land-use patterns, population density, circulation, legibility, public art, environmental behavior and urban/rural interchange. Field trips are required. Prerequisite: C or better in UDES 4551, ARCH 3554, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

ARCH 4391. CONFERENCE COURSE. 3 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor or the Architecture Undergraduate Advisor.

ARCH 4395. SELECTED TOPICS ARCHITECTURE. 3 Hours.
Studio and lecture courses to explore and present selected topics in architecture and design. May be repeated for credit as topics change. Prerequisite: Junior standing in program. Restricted to Architecture and Interior Design majors.

ARCH 4556. DESIGN STUDIO: ARCHITECTURE III. 5 Hours.
Advanced architectural design projects integrating research on contemporary issues intrinsic to architecture. Prerequisites: ARCH 3324, ARCH 3343, ARCH 3364, and ARCH 3554. Senior standing in program. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 4557. DESIGN STUDIO: ARCHITECTURE IV. 5 Hours.
Advanced architectural projects focusing on contemporary design issues that address topics extrinsic to the disciplines of architecture. Prerequisite: ARCH 3324, ARCH 3343, ARCH 3364, and ARCH 3554. Restricted to Architecture majors. Minimum 2.8 GPAs both cumulative and within the major required.

ARCH 4591. CONFERENCE COURSE. 5 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor or the Architecture Undergraduate Advisor. Senior standing in program. Restricted to Architecture majors.

ARCH 4595. SELECTED TOPICS ARCHITECTURE. 5 Hours.
A transitional studio course to explore and present selected topics in architecture and design. May be repeated for credit as topics change. Prerequisite: Department consent.

ARCH 5191. CONFERENCE COURSE. 1 Hour.
Special subjects and issues as arranged with individual students and faculty members. May be repeated for credit as topic changes.

ARCH 5291. CONFERENCE COURSE. 2 Hours.
Special subjects and issues as arranged with individual students and faculty members. May be repeated for credit as topic changes.

ARCH 5301. INTRODUCTION TO ARCHITECTURE AND INTERIOR DESIGN. 3 Hours.
A survey study of the interrelationships between society, culture, and architecture. Concurrent enrollment of ARCH 5591 and ARCH 5342 required.

ARCH 5303. HISTORY OF ARCHITECTURE AND INTERIOR DESIGN I. 3 Hours.
A global survey of architecture emphasizing the material and cultural context for design. Focused primarily on the period from prehistory through 1750. Prerequisite: Permission of the instructor.

ARCH 5304. HISTORY OF ARCHITECTURE AND INTERIOR DESIGN II. 3 Hours.
A global survey of architecture emphasizing the material and cultural context for design. Focused on the period from 1750 to the present. Prerequisite: ARCH 5303 and permission of the instructor.

ARCH 5305. CITY OF ROME. 3 Hours.
History, topography, and monuments of Rome and its environs from its legendary founding in 753 B.C. until the 20th Century, with special emphasis on imperial and papal Rome.

ARCH 5306. URBAN DESIGN. 3 Hours.
Urban design theory, method, and implementation using contemporary and historic examples.

ARCH 5307. THE LIFE OF CITIES. 3 Hours.
A look at a series of world cities by situating their architectural context, with a particular focus on the impact of 20th century modernism and postmodernism on city fabric. Prerequisites: ARCH 2303 & ARCH 2304 or ARCH 5303 & ARCH 5304.

ARCH 5308. HISTORY OF URBAN FORM. 3 Hours.
The history of cities as physical form, influenced by political, economic, and social forces.

ARCH 5309. MUSEUMS: HISTORY, CULTURE, DESIGN. 3 Hours.
This course investigates the historical and cultural forces driving the design of museums in the 19th and 20th centuries with special attention to the development of a diverse range of new museum types beyond traditional art and natural science museums. Field trips to local museum sites are required. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5310. SKYSCRAPER HISTORIES. 3 Hours.
This course considers the history of the skyscraper from multiple perspectives, seeking consensus about what a skyscraper really is. This course will allow students to begin to develop their skills in reading, writing, critical thinking, visual memory, and visual analysis using the history of architecture as a medium. Students will also develop basic research skills using primary sources to document architecture. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5311. ARCHITECTURAL THEORY. 3 Hours.
A review and analysis of the concepts, philosophy, ideology, and models that promulgated 20th Century architectural design. May be repeated for credit as topics change. Prerequisite: ARCH 2303 or ARCH 5303, ARCH 2304 or ARCH 5304, and permission of the department.

ARCH 5312. WHAT MAKES A CITY: CRITICAL ISSUES IN ARCHITECTURE, PLANNING, AND URBAN DESIGN. 3 Hours.
This class is a critical exploration of the physical environment of the city, looking at a range of issues--mobility, housing, landscape, gentrification, sustainability, health-to understand how the built world shapes the way we live every day. Prerequisite: ARCH 2303 or ARCH 5303, ARCH 2304 or ARCH 5304, and permission of the department.

ARCH 5313. THE ARCHITECT IN CONTEMPORARY SOCIETY. 3 Hours.
Readings on the Culture of Architecture The focus of this course is to examine this social construct in the belief that critical self-reflection can assist in improving success within it. This examination will be conducted through readings in a collection of publications both historical and contemporary that offer critical insight into the professional/social culture of architects. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304.

ARCH 5314. HISTORIC PRESERVATION AND RESTORATION. 3 Hours.
Concepts and implementation of the restoration and preservation of historic structures and places, including archaeological, bibliographic, legislative, institutional, and physical parameters to the retention and adaptive re-use of significant architecture.

ARCH 5315. TOPICS IN ARCHITECTURAL HISTORY. 3 Hours.
Courses to explore and present selected topics in architecture and related fields of the Ancient Mediterranean, the Classical World, the Middle Ages, the 19th Century, and the Non-Western Traditions. May be repeated for credit as topics change. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5316. MODERN ARCHITECTURE I 1890 TO 1945. 3 Hours.
Origins and development of Modern Architecture in Europe from 1890 to World War II, and its further evolution in Europe and America from 1918 to 1945. Prerequisites: ARCH 2303 and ARCH 2304.

ARCH 5317. MODERN ARCHITECTURE II 1945 TO PRESENT. 3 Hours.
Architectural developments in Europe, Asia, and America since World War II. Prerequisites: ARCH 2303 and ARCH 2304.

ARCH 5318. ARCHITECTURE ON SCREEN. 3 Hours.
How do the things we watch shape our perceptions of architecture and the city? How do the environments in film and on television frame our vision, shape character, and convey themes? How are architects and other design professionals portrayed? What do they suggest about changes in the physical and technological world in which we live? This course explores those questions and others through screen history, from the earliest films to contemporary television and digital productions. Themes will include the dystopian city, suburbia, the evolving depiction of modernism, architecture as documentary subject, and the history of the city on screen. Students will explore these questions and will have to make their own short films. Prerequisite: ARCH 2303 or ARCH 5303, ARCH 2304 or ARCH 5304, and permission of the department.

ARCH 5319. HOUSING PROTOTYPES: 1920s TO PRESENT. 3 Hours.
An extensive investigation of the many states of housing that architects and educators have encountered in the last 100 years. The course is organized through introduction, research, analysis, and case study of various housing typologies, unit design principles, density concerns, site, relationship of inside and outside, zoning and building codes, and new emerging housing building types. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304.

ARCH 5320. PERFORMANCE-BASED DESIGN IN ARCHITECTURE. 3 Hours.
An overview of Performance-Based Building Design (PBBD) in architecture and how clients' expectations are translated into performance requirements, how we describe performance objectives, how we define performance indicators, and finally, how we can quantify and assess building performance.

ARCH 5321. ADVANCED COMPUTER APPLICATIONS. 3 Hours.
The study and application of specialized computer programs in environmental design. Prerequisites: ARCH 3343 or INTD 3343 or ARCH 5343, or the equivalent. Department consent.

ARCH 5322. ARCHITECTURE + POLITICS. 3 Hours.
This course examines how notions of national identity are expressed in parliament buildings and other important buildings of state. Throughout the course, questions about what constitutes national identity, capital cities, and how architecture is used as a manifestation of these political aspects will be addressed. Buildings within nations or subnational regions across six continents are examined, giving students a global understanding of these issues. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5323. CONSTRUCTION MATERIALS AND METHODS. 3 Hours.
This course discusses the nature of materials and structural concepts to be used in the construction process. The principles and fundamentals of building construction materials and methods is evaluated, and the project development process and construction delivery systems are introduced. The course provides an understanding of building standards and codes; the impact of materials and buildings on the environment and human health, safety, and welfare; the material properties including structural properties of materials as well as performance properties and the major materials and construction systems such as light wood frame, mass timber, and steel and concrete frame construction. Prerequisite: Permission of the instructor.

ARCH 5324. STRUCTURES I. 3 Hours.
This course is the foundation for all advanced structures courses in the undergraduate and graduate architecture programs. In an engineering curriculum, this course is offered in two separate courses referred to as: (a) Statics and (b) Strength of Materials, each of one-semester duration. The present course encapsulates the information yet is rigorous enough and covers all important topics in the two engineering courses including equilibrium of particles and rigid bodies, analysis of important structural load bearing items such as cables, beams and Trusses, Definition of Stress and strain and their role in structural design, cross-sectional properties of structural members and analysis of strength for the beams. Prerequisite: ARCH 5323 or ARCH 3323.

ARCH 5325. ENVIRONMENTAL CONTROL SYSTEMS I. 3 Hours.
Illumination,acoustics, climate controls, mechanical and electrical systems, and their significance in the total design.

ARCH 5326. ENVIRONMENTAL CONTROL SYSTEMS II. 3 Hours.
Climate controls, mechanical and electrical systems, and their significance in the total design.

ARCH 5327. STRUCTURES II. 3 Hours.
This course is a continuation of ARCH 5324 with an emphasis on structural theory and systems in steel construction. It covers the design and investigation of structural steel. The course begins with a general introduction to structural behavior, strength, and modulus of elasticity of steel material. The elastic and plastic behavior of structural steel material is discussed, and the definition of yield strength is addressed as one of the main structural measures of steel material. Loads and load combinations are the next part of the course. This part describes how the gravity and lateral loads are distributed in a steel structure and what combination of loads should be considered for the design. To address the requirements of the design of structural members, simple methods of structural analysis are covered by which the internal moments and shear in members can be found. The course is continued by formulating and step by step description of the design of decks, beams and girders, open-web steel joists and joist girders as well as columns. Prerequisite: ARCH 5324.

ARCH 5328. STRUCTURES III. 3 Hours.
This course is a continuation of ARCH 5327 with an emphasis on structural theory and systems in concrete construction. It covers the design and investigation of structural concrete. The course begins with a general introduction to structural behavior, strength, and modulus of elasticity of concrete material. To ensure that the concrete has the required minimum strength, special field sampling and tests are necessary. Loads and load combinations are the next part of the course. This part describes how the gravity and lateral loads are distributed in a concrete structure and what combination of loads should be considered for the design. To address the requirements of the design of structural members, a simplified method of structural analysis is defined by which the internal moments and shear in members can be found. Course is continued by formulating and step by step description of the design of beams, columns, and footings in a concrete structure. Prerequisite: ARCH 5327.

ARCH 5329. TOPICS IN COMPUTERS AND DESIGN. 3 Hours.
Computer aided design, drafting and graphic techniques as applied to architecture. May be repeated for credit as topics change.

ARCH 5330. COMPARATIVE STRUCTURES. 3 Hours.
Comparative analysis and design of structural systems and construction techniques, including architectural and economic determinants. Prerequisite: ARCH 5328 or permission of the instructor.

ARCH 5331. PROFESSIONAL PRACTICE. 3 Hours.
Survey of the administrative functions, and the ethical and legal responsibilities of the architect. Prerequisite: ARCH 5670.

ARCH 5332. ENERGY USE AND CONSERVATION IN ARCHITECTURE. 3 Hours.
Basic concepts of the efficient use and conservation of energy related to architectural design principles. Prerequisite: permission of the instructor.

ARCH 5333. CONSTRUCTION II. 3 Hours.
Advanced construction assemblies and methods, including the principles of cost control. Prerequisites: ARCH 5670.

ARCH 5335. ADVANCED PROFESSIONAL PRACTICE II: MARKETING DESIGN SERVICES. 3 Hours.
A study of the strategies and methods for marketing professional services. Presented as case studies of architecture, interior design, and landscape architecture firms.

ARCH 5336. PROGRAMMING AND SITE DESIGN II. 3 Hours.
The course focuses on project programming and the technical aspects of site design. Prerequisite: ARCH 5670.

ARCH 5337. SOILS AND FOUNDATIONS. 3 Hours.
Soil classifications, field and laboratory identification, physical properties and load-bearing characteristics, retaining walls and foundations.

ARCH 5338. CODES AND REGULATIONS. 3 Hours.
A study of accessibility, building and energy codes and related regulations including the architects' responsibility for compliance. Prerequisite: Permission of Department.

ARCH 5339. DIGITAL FABRICATION METHODOLOGY. 3 Hours.
The conceptualizing and making of objects lying outside the traditional scope of architectural practice, including elements of industrial and product design and the development of working prototypes.

ARCH 5340. MODERN + CONTEMPORARY ARCHITECTURE IN MEXICO. 3 Hours.
This course examines notions of Mexican national identity as expressed through architecture. Part 1 looks at late 19th and early 20th century architecture during the Porfiriato, as well as that occurring shortly after the Mexican Revolution of 1910-20, including the critical role that cement played. Part 2 considers how the so-called First Generation of architects adapted and transformed Modernism in Mexico. Part 3 examines how the Second and Third Generations moved beyond Modernism, including. The course concludes with Mexico's "First Generation" of women architects as issues of gender are addressed. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5341. NOTATIONAL DRAWING. 3 Hours.
Seminar concerned with analytical drawing techniques and how to use the sketchbook as a tool and process for architectural production. Emphasis will be on cultivating drawing strategies that will heighten the ability to make observations through first-hand experience and record them with the correct conventions in order to enable recovery for future use in architectural design.

ARCH 5342. DESIGN COMMUNICATIONS. 3 Hours.
Architectural drawing, perception, projections, and three-dimensional representation. Prerequisite: Concurrent enrollment in ARCH 5591 is required.

ARCH 5343. ARCHITECTURAL GRAPHICS II. 3 Hours.
An advanced course to develop visual sensitivity and awareness of digital techniques to enable the student to study design ideas and present those ideas in the various design disciplines. Emphasis on the relationship of computer graphics to the design process. Prerequisite: ARCH 5342 or program approval.

ARCH 5344. CONCEPTUAL DRAWING. 3 Hours.
Seminar to explore aspects of conceptual drawing for the architect and the relationship of design ideas in the drawing process.

ARCH 5345. DIGITAL CONSTRUCTION. 3 Hours.
A workshop exploring video cartography using photography, animation, motion graphics and digital video.

ARCH 5346. CONSTRUCTION DRAWINGS I. 3 Hours.
The techniques of building construction, the communication of technical information, and the process of preparing contract drawings for construction.

ARCH 5347. DIGITAL TECTONICS & PROTOTYPING. 3 Hours.
The use of digital technology in the architectural design process focusing on the research and fabrication of full-scale production of prototypes. Completion of ARCH 4339 or ARCH 5339 Digital Fabrication Methodology is highly recommended.

ARCH 5348. ARCHITECTURAL PHOTOGRAPHY. 3 Hours.
The use of photography as an investigative and presentation medium in architecture. Emphasis on composition in black and white technique.

ARCH 5349. ARCHITECTURE PORTFOLIO. 3 Hours.
Seminar concerned with goal toward the production of a personal design portfolio.

ARCH 5350. ARCHITECTURE, ENGAGEMENT + COMMUNITY POWER. 3 Hours.
Architecture, Engagement and Community Power will unpack the role of the citizen architect. It will examine participatory design processes that center community voice and shift existing power structures. In this country, constructed systems of oppression including racist practices, policies and financial systems have shaped the way our neighborhoods have developed. These acts have created inequities across communities that impact one's ability to thrive. Starting from the notion that all places are designed, and can therefore be undesigned, this course will explore the ways in which design processes can strengthen community power for marginalized communities. This course will encourage activism as an inherent quality in the development of an architect; encourage students to make connections between classroom learning and the larger community; require students to develop the skill to see and hear multiple voices; and encourage the development of visual, written, & oral communication tools. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5351. WILDERNESS: A CONDITION OF MIND. 3 Hours.
Changing conceptions of wilderness in Western thought, from ancestral prejudices to recent, revolutionary appreciation. Literary and visual documentation.

ARCH 5352. HOUSING: FROM CAVES TO MANSIONS IN THE CLOUDS. 3 Hours.
This course examines the evolution of American urban settlements as they evolved from French, Spanish and English concepts of town-planning.

ARCH 5354. CONVERGENCES: BETWEEN ART AND ARCHITECTURE. 3 Hours.
This course explores the convergences of artist methods of production with the processes of architectural practices. The course traces the work of leading filmmakers, both artistic and documentarian, whose professional leanings verge on the province of the architect.

ARCH 5355. HEMISPHERES. 3 Hours.
The study and analysis of Japanese arts and contemporary culture. The arts of ceramics, painting, calligraphy, and sculpture are examined. Prerequisite: departmental approval.

ARCH 5357. BUILDING INFORMATION MODELING & VISUALIZATION. 3 Hours.
To gain a working knowledge of Autodesk Revit and 3D Studio Max. Prerequisites: ARCH 3343 or ARCH 5343 or INTD 3343.

ARCH 5361. ARCHITECTURE AND ENVIRONMENT. 3 Hours.
An overview of sustainable design integrated with natural resource conservation.

ARCH 5362. STRUCTURAL SYSTEMS IN BUILDING. 3 Hours.
An overview of various structural systems including those used in long-span and high-rise buildings. Numerical work limited to the explanation of relevant structural concepts. Prerequisite: ARCH 5324.

ARCH 5363. DESIGN RESEARCH. 3 Hours.
Seminar directed toward the understanding of research methods and the programming of an independent design project, leading to the thesis substitute.Graded P/F/R.Prerequisite: Permission of Graduate Advisor.

ARCH 5364. SITE DESIGN. 3 Hours.
The related site design process includes site planning pertaining to land use, case studies, siting of structures, codes, and topography.

ARCH 5365. CATALYTIC MAPPING. 3 Hours.
An advanced theory elective course and workshop using the potential of mapping as a design, analytic and research mechanism for exploring complex contexts.

ARCH 5366. RADICAL URBANISM. 3 Hours.
An advanced theory course focused on the exposure to and critical analysis of some of the most radical, inspirational, and transformative urban design ideas and projects from Vitruvius to today.

ARCH 5367. HIGH PERFORMANCE FACADE SYSTEMS. 3 Hours.
Examines the role of the façade and building envelope as it relates to design, indoor comfort, energy and carbon usage, and overall performance through an exploration of materiality, assembly, and construction. The course also introduces the potential of generative technologies, smart materials, passive-active combinations, and integrated systems.

ARCH 5368. GREEN DESIGN + CONSTRUCTION. 3 Hours.
Green building design, construction, and operation is an opportunity to reduce negative impacts on the environment, and the health and comfort of building occupants, thereby improving building performance. It provides cost savings to all tax-payers through improved human health and productivity, lower cost building operations, and resource efficiency. Green design and construction focuses on strategies and technologies to improve the energy efficiency and performance of buildings, and to reduce the environmental impact of buildings. The course emphasizes on different aspects of green building during all phases of a building's life-cycle, including design, construction, operation and decommissioning. All LEED categories are covered throughout the course and students get prepared to take LEED Green Associate exam by the end of the semester.

ARCH 5369. TERRITORIAL STRATEGIES. 3 Hours.
Territorial Strategies focus on climate resilience of the built environment on the territorial scale. In Territorial Strategies, students explore how macro-level drivers of spatial (trans)formation impact micro-level strategies and actions in distinct climatic regions. Students apply a systems-thinking approach to map, diagram, model, draw, and visualize project outcomes, research findings, and data through various media. Prerequisite: Graduate level in Architecture, Landscape Architecture, Urban Planning, and Public Administration and Public Policy majors.

ARCH 5370. ADVANCED DESIGN STUDIO. 3 Hours.
Studio course in the generation and development of architectural ideas in formal and environmental contexts. May be repeated for credit. Two of these courses are equivalent to ARCH 5670.

ARCH 5371. FUTURE CITIES. 3 Hours.
Future Cities focus on climate resilience of the built environment on the urban scale. In Future Cities, students explore historical and contemporary concepts of ecological design and combine mitigative and adaptive strategies and actions for urban landscapes in the age of anthropogenic climate change. Students apply a participatory mixed-methods approach to map, diagram, model, draw, and visualize project outcomes, research findings, and data through various media. Prerequisite: Graduate level in Architecture, Landscape Architecture, Urban Planning, and Public Administration and Public Policy majors.

ARCH 5372. ADAPTIVE TYPOLOGIES. 3 Hours.
Adaptive Typologies focus on climate resilience of the built environment on the architectural object scale. In Adaptive Typologies, students explore architectural objects, their characteristics, and their performative aspects as integrated parts of the urban ecosystem. Students analyze, transform, and develop hybrid typologies merging physical, digital, and biological concepts and apply a digital mixed-methods approach, utilizing analytical, representational, and generative tools. Prerequisite: Graduate level in Architecture, Landscape Architecture, Urban Planning, and Public Administration and Public Policy majors.

ARCH 5377. SPATIAL [IN] JUSTICE. 3 Hours.
Through lectures and discussions, Spatial [in] Justice will provide students with historical perspectives on how American cities became segregated, the creation and lack of inclusivity of 'public space', and the architect's role within a socially engaged practice. The course will begin by studying key philosophies and theories of justice. Students will work with a community partner to produce a community engagement and development plan. They will research publicly available data and organize it into a package for the community and other stakeholders. Prerequisite: ARCH 2303 or ARCH 5303 and ARCH 2304 or ARCH 5304. Department consent.

ARCH 5381. PRACTICUM. 3 Hours.
Internship program including work done through an approved architect's office, designed to give practical experience leading to a broader knowledge of the profession. Placement in offices must be approved, and in some cases may also be arranged by the school. Students may enroll in ARCH 5381 for half-time employment or ARCH 5681 for full-time employment. Students enrolled in Practicum may also participate in the Intern Development Program of the American Institute of Architects. No more than six total credit hours in Practicum are allowed for degree. Graded P/F/R.

ARCH 5391. CONFERENCE COURSE. 3 Hours.
Special subjects and issues as arranged with individual students and faculty members. May be repeated for credit as content changes.Prerequisite: Permission of Graduate Advisor.

ARCH 5395. TOPICS IN ARCHITECTURE. 3 Hours.
Studio, lecture or seminar courses to explore and present special topics in architecture and environmental design. May be repeated for credit as topics change.

ARCH 5591. DESIGN STUDIO I. 5 Hours.
An intensive studio course in architectonic theory and operations. Emphasis on analytic, conceptual, and manipulation procedures.

ARCH 5592. DESIGN STUDIO II. 5 Hours.
Continuation of ARCH 5591. Studio course emphasizing the interrelationship of formal/spatial ideas, use, and the building fabric. Prerequisite: ARCH 5591.

ARCH 5593. DESIGN STUDIO III. 5 Hours.
Continuation of ARCH 5592. Studio course emphasizing the interrelationship of formal/spatial ideas, use, and the building fabric with special attention to the urban context. Prerequisite: ARCH 5592.

ARCH 5594. DESIGN STUDIO IV. 5 Hours.
Continuation of ARCH 5593. Emphasis on complex building designs in urban environments. Off campus study may be substituted. Prerequisite: ARCH 5593.

ARCH 5665. INTERMEDIATE DESIGN STUDIO. 6 Hours.
Advanced architectural design problems in programming, schematic organization, synthesis and design of buildings in their environmental context.

ARCH 5670. ADVANCED DESIGN STUDIO. 6 Hours.
Studio course emphasizing the analysis and design of building aggregations within the urban context. May be repeated for credit.

ARCH 5671. INTEGRATIVE DESIGN STUDIO I. 6 Hours.
Introduces the design of a small to moderate scaled architectural building program. Focus on pre-design, site design, structural resolution, building assembly, building performance, detailing and materiality will be made through graphical identification, analysis, and evaluation. Additional considerations of codes, regulations, cost analysis, and life-cycle cost, are areas of emphasis informing the design process. Prerequisite: ARCH 5325 or ARCH 4325, ARCH 5327, and ARCH 5670. Credit or concurrent enrollment in ARCH 5357, ARCH 4357, or INTD 3357.

ARCH 5672. INTEGRATIVE DESIGN STUDIO II. 6 Hours.
Introduces the design of a larger-scaled architectural project with more complex programming requirements. Focus on the integration of environmental stewardship, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems will be made through graphical identification, analysis, and evaluation, and technical documentation. Project demonstration includes problem identification, contextual evaluative criteria, analyzing solutions, and predicting the effectiveness of implementation. Prerequisite: ARCH 5671 with a grade of C or above.

ARCH 5681. PRACTICUM. 6 Hours.
Internship program including work done through an approved architect's office, designed to give practical experience leading to a broader knowledge of the profession. Placement in offices must be approved, and in some cases may also be arranged by the school. Students may enroll in ARCH 5381 for half-time employment or ARCH 5681 for full-time employment. Students enrolled in Practicum may also participate in the Intern Development Program of the American Institute of Architects. No more than six total credit hours in Practicum are allowed for degree. Graded P/F/R.

ARCH 5691. CONFERENCE COURSE. 6 Hours.
Special subjects and issues as arranged with individual students and faculty members. May be repeated for credit. Prerequisite: Permission of Graduate Advisor.

ARCH 5693. DESIGN THESIS. 6 Hours.
Individual study project conducted by a supervising committee, with program and statement of intent to be filed with the Graduate Advisor during the previous semester. Graded R. Prerequisite: ARCH 5363.

ARCH 5695. TOPICS IN ARCHITECTURE. 6 Hours.
Studio, lecture or seminar courses to explore and present special topics in architecture and environmental design. May be repeated for credit as topics change. Prerequisite: Permission of Graduate Advisor.

ARCH 5698. RESEARCH THESIS. 6 Hours.

COURSES

HONR-AR 2303. HONORS SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-AR 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR-AR 4604. HONOR INDEPENDENT STUDY. 6 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

COURSES

INTD 1101. ACADEMIC SUCCESS SKILLS INTERIOR DESIGN. 1 Hour.
This is a required course intended to establish a solid overview of the School of Architecture and the interior design program for all first semester UTA students who intend to declare as an interior design major. Topics for the class include: critical thinking, presentation techniques, internships, attendance of exhibitions and lectures, navigating the advising process, portfolio review and techniques, and utilizing the library and other university resources. Other topics may be discussed. This course may be taken only once for credit.

INTD 1191. CONFERENCE COURSE. 1 Hour.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Permission of the instructor and the architecture undergraduate advisor required. Restricted to interior design-intended majors.

INTD 1342. DESIGN COMMUNICATION II. 3 Hours.
Introduction to concepts of design and building of interior spaces including ideation, visualization, and creative processes to solve more complex problems. Drawing and communication skills are developed using traditional and digital methods and architectural graphic conventions emphasized. This course is offered as ARCH 1342; credit will be granted only once. Prerequisite: "C" or better in ARCH 1301, ARCH 1341. Restricted to Interior Design-Intended, INTD_UNIV, Architecture-Intended, and ARCH_UNIV majors.

INTD 2343. DESIGN COMMUNICATION III. 3 Hours.
This is an introductory digital design course that develops visual awareness of the digital environment enabling students to express ideas graphically. This survey course focuses on general exposure to computer visualization software from 2D and 3D modeling and rendering, to technical drawings for design and construction documents. Emphasis is placed on the relationship of digital and graphic skills to the communication of ideas in both digital and printed media. This course was previously offered as INTD 3343; credit will only be granted once. Prerequisite: "C" or better in ARCH 2303, ARCH 2551, credit or concurrent enrollment in ARCH 2304. Restricted to Interior Design-Intended, INTD_UNIV, Architecture-Intended, and ARCH_UNIV majors.

INTD 2391. TOPICS IN INTERIOR DESIGN. 3 Hours.
Selected topics in concepts, philosophy, and models of interior design and allied arts of design.

INTD 2552. DESIGN STUDIO: INTERIOR DESIGN I. 5 Hours.
Exploration of the concepts and methods that shape interior spaces. Introduction to information gathering, exploration of three-dimensional spatial relationships and integration of color, light, and materials. Basics of interior construction, building components and professional standards are introduced. Emphasis on concept development, diagramming, space planning and human-centered design as applied to design solutions. This course offered as INTD 2552 and ARCH 2552; credit will not be granted for both. Prerequisite: "C" or better in ARCH 2303, ARCH 2551, credit or concurrent enrollment in ARCH 2304 and INTD 2343. Restricted to Interior Design-intended and Architecture-intended majors.

INTD 3305. HISTORY OF INTERIOR DESIGN. 3 Hours.
This course is a chronological survey that spans from the late nineteenth century to the present and explores a range of scales (micro to macro) from furniture, lighting, fine and decorative arts in the interior, to the related fields of architecture, landscape design, and city planning. Prerequisite: Junior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3321. MATERIALS AND RESOURCES. 3 Hours.
Survey of materials and resources in the design of the built environment in terms of aesthetics, function, and well-being. Exploration of construction processes, application, building codes, and life-cycle cost. Emphasis on understanding and specification of materials based on performance criteria and environmental sustainability. Prerequisite: Junior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3322. MATERIALS AND TECHNOLOGY. 3 Hours.
A course to investigate and explore the application of new and emerging materials in the context of sustainability, innovation and global perspective. Through the integration of technology, digital fabrication and prototyping, and emerging methodologies students explore new concepts in the use of materials that contribute to design of the built environment and human-centered design. Prerequisite:Junior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3323. LIGHTING DESIGN. 3 Hours.
An introduction to lighting technologies, luminaires, and design concepts. Exploration of creative and functional application of light sources relative to the impact on human experience, well-being, and environmental considerations. Course content emphasizes the integrated aspects of architectural lighting in the context of building systems. Prerequisite: Junior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3338. BUILDING CODES AND REGULATIONS. 3 Hours.
This course examines laws, codes, and regulatory processes applied to the built environment including Federal, State, and local codes. Students learn the integration of codes, Federal laws, and standards in the design process and apply concepts to design solutions. Awareness of building systems is emphasized as students learn about the codes and standards organizations, communication strategies, and processes that impact the practice of interior design and their role on interdisciplinary teams. This course is offered as INTD 3338 and ARCH 4338; credit will be granted only once. Prerequisite: Credit or concurrent enrollment in INTD 3553. Junior standing in the program. Restricted to Interior Design and Architecture majors.

INTD 3357. BUILDING INFORMATION MODELING & VISUALIZATION. 3 Hours.
An introduction to Building Information Modeling software to develop interior construction detailing and rendering techniques. The course is an overview of the development of an integrated set of interior construction documents, including plans, elevations, details, and schedules as well as visualization strategies. This course is offered as INTD 3357 and ARCH 4357; credit will only be granted once. Prerequisite: INTD 2343 and Junior standing in program. Restricted to Architecture and Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3361. ENVIRONMENTAL DESIGN & SUSTAINABILITY. 3 Hours.
An exploratory course that considers the impact of design decisions on the environment. Principles of sustainable design are reviewed including theoretical frameworks, concepts, certifications and standards of practice. Environmental stewardship and ethics are introduced as a model for professional practice. Concepts of adaptive re-use, historic preservation, and restoration are introduced. Prerequisite: Junior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3553. DESIGN STUDIO: INTERIOR DESIGN II. 5 Hours.
A studio course in the application of interior design principles to complex problems. Emphasis on concept development, programming, and the integration of building systems as part of the design process. Introduction to research strategies to inform design decisions and global awareness. Advanced presentation skills and use of technology are integrated to communicate the design solution. Prerequisite: Credit or concurrent enrollment in INTD 3321, INTD 3323, and INTD 3338. Junior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 3554. DESIGN STUDIO: INTERIOR DESIGN III. 5 Hours.
A studio course in the application of interior design principles to complex problems. Emphasis on concept development, programming, and the integration of building systems as part of the design process. Introduction to research strategies to inform design decisions and global awareness. Advanced presentation skills and use of technology are integrated to communicate the design solution. Prerequisite: INTD 3553 and credit or concurrent enrollment in INTD 3357. Junior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4191. CONFERENCE COURSE. 1 Hour.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: permission of instructor. Junior or senior standing in the program. Restricted to Interior Design majors.

INTD 4195. SELECTED TOPICS IN INTERIOR DESIGN. 1 Hour.
Studio and lecture course to explore and present selected topics in interior design. May be repeated for credit as topics change. Prerequisite: Permission of the Instructor or the Architecture Undergraduate Advisor. Junior standing in program. Restricted to Interior Design majors.

INTD 4314. HISTORIC PRESERVATION AND RESTORATION. 3 Hours.
Concepts and implementation of the restoration and preservation of historic structures and places, including archaeological, bibliographic, legislative, institutional, and physical parameters to the retention and adaptive re-use of significant architecture. This course is offered as ARCH 4314 and INTD 4314; credit will be granted only once. Prerequisite: ARCH 2303, ARCH 2304. Junior standing in program. Restricted to Architecture and Interior Design majors.

INTD 4332. PROFESSIONAL PRACTICE IN INTERIOR DESIGN. 3 Hours.
Introduction to business practices and procedures for interior design including ethics, governmental regulations, financial awareness, and project management. Students develop portfolio, resumes, and other marketing materials through individual and teamwork. Exploration of new models for practice and life-long learning in a global market. Prerequisite: Senior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4344. DESIGN COMMUNICATION IV. 3 Hours.
A digital design course focusing on advanced visual communication skills. The class investigates the digital realm as a tool to develop and communicate ideas graphically, analytically, and conceptually. Application of 3D computer drawing, modeling, lighting, mapping, and rendering to explore concepts and present individual and team-based design solutions. Prerequisite: INTD 4368 and INTD 4556. Senior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4345. ARCHITECTURAL GRAPHICS. 3 Hours.
Graphic and signage considerations for interior environments. Wayfinding methods will be addressed. Senior standing in the program. Restricted to Interior Design majors but open to Architecture majors as an elective based on space availability. Prerequisite: Senior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4365. IMMERSIVE ENVIRONMENTS. 3 Hours.
This course explores the use of emerging technology to develop immersive environments. Emphasis on the role of three-dimensional visualization has on the interior design process by accelerating iterations and simulating real world perspectives. Prerequisite: INTD 3553 and INTD 3554. Senior standing in the program and permission of the Interior Design Program Director. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4366. HUMAN CENTERED DESIGN. 3 Hours.
This course explores design from the perspective of human interaction with the environment in which they live. A focus on the physical, social, psychological, social, and cultural factors that influence design decisions. is a fundamental premise of this course. Students understand that the design of the built environment is based on the continual motion of life, social systems, and symbiotic human relationships. Human behavioral theories are integrated into the course. Prerequisite: Senior standing in the program. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4368. INTERIOR DETAILING. 3 Hours.
Application of design communication to interior construction detailing using more advanced software. Develop skills in articulating designs and detailing special elements related to the interior and understand installation processes. The course reviews interior construction documents, details, and schedules. Prerequisite: INTD 3553 and INTD 3554. Senior standing in the program. Restricted to Interior Design majors but open to Architecture majors as an elective based on space availability. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4369. FURNITURE DESIGN AND CONSTRUCTION. 3 Hours.
A studio course in the design, detailing, and construction of furniture. Prerequisite: INTD 3553 and INTD 3555. Restricted to Interior Design majors but open to Architecture majors as an elective based on space availability. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4391. CONFERENCE COURSE. 3 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: permission of instructor. Junior or senior standing in the program. Restricted to Interior Design majors.

INTD 4394. DESIGN RESEARCH METHODS AND APPLICATION. 3 Hours.
Research conducted by undergraduate students that contributes to ongoing faculty research within the Interior Design program or the School of Architecture. Research must be conducted under the supervision of a full-time Interior Design or Architecture faculty member. Prerequisite: Senior standing in the program and permission of the Interior Design Program Director. Open to Architecture majors as an elective based on space availability. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4395. SPECIAL TOPICS IN INTERIOR DESIGN. 3 Hours.
This course addresses areas of special interest to Interior Design studies and gives students an opportunity for a more in-depth exploration of selected topics than is possible within the embedded content of the core course requirements. Prerequisite: Junior standing in the program. Restricted to Interior Design majors but open to Architecture majors as an elective based on space availability.

INTD 4493. INTERIOR DESIGN INTERNSHIP. 4 Hours.
Workplace or professional experience: internship agreement negotiated between intern and site supervisor requiring program approval. Duties should be challenging, productive, and develop professional skills. documentation of work performed, weekly timesheets and final presentation required. Prerequisite: INTD 3553 and INTD 3554. Senior standing in the program and permission of the Interior Design Program Director. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4556. DESIGN STUDIO: INTERIOR DESIGN IV. 5 Hours.
Research for evidence based design decision-making in the context of emerging design practice. Introduction to research methodologies including primary and secondary research to frame design problems. Application of design theories and principles to understand human interaction with the built environment. Emphasis on application of interior knowledge to solve complex design problems. Prerequisite: INTD 3553 and INTD 3554. Senior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4557. DESIGN STUDIO: INTERIOR DESIGN V. 5 Hours.
Synthesis of design knowledge to a complex project scenario. Students apply critical and creative thinking to communicate understanding of large scale interior environments; focus on building systems and technology to communicate concepts and solutions. The impact of interior design on human well-being in the context of global issues is explored. Prerequisite: INTD 4368 and INTD 4556. Senior standing in the program. Restricted to Interior Design majors. Minimum 2.8 GPAs both cumulative and within the major required.

INTD 4591. CONFERENCE COURSE. 5 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: INTD 3553 and INTD 3555. Senior standing in program. Restricted to Interior Design majors.

INTD 4595. SELECTED TOPICS IN INTERIOR DESIGN. 5 Hours.
Studio and lecture courses to explore and present selected topics in interior design. May be repeated for credit as topics change. Prerequisite: permission of the Instructor or the Architecture Undergraduate Advisor. Senior standing in program. Restricted to Interior Design majors. The course may be repeated up to four times as the topics change.

COURSES

UNIV-AR 1101. CAREER PREPARATION AND STUDENT SUCCESS. 1 Hour.
A course for new transfer students that will help students transition into UTA and achieve academic and personal success through recognition of campus resources and community building. Students will discover effective ways to balance personal and career obligations with academic goals. The course will allow for the discovery of marketable skills within a chosen academic discipline and the professions associated with that program of study. Experiential learning opportunities will be discussed, including undergraduate research, leadership, international engagement, community engagement and career development. Students will understand how critical thinking and study skills can be applied to academic content, explore chosen majors and possible career pathways, and connect to activities and resources on campus.

UNIV-AR 1131. STUDENT SUCCESS. 1 Hour.
A first-year seminar that introduces new students to academic and success skills to aid their transition into college. The goal of the course is to help students identify their individual needs, determine what resources are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Students will understand how critical thinking and study skills can be applied to academic content, explore chosen majors and possible career pathways, and connect to activities and resources on campus. Experiential learning opportunities will be discussed, including undergraduate research, leadership, international engagement, community engagement and career development. Also offered as ARCH 1101 and INTD 1101, credit can only be granted once.

Policies

CLASSROOM + STUDIO NON-REGISTERED ATTENDEES

The following policy applies to scheduled courses and academic activities in the School of Architecture, including undergraduate and graduate programs in Architecture and Interior Design. The policy is effective January 1, 2024 and complies with University of Texas at Arlington EI-PO-11 (https://policy.uta.edu/doctract/documentportal/08DBFB5B2F2385C1E7FA9336A7971113/), the Texas Education Code Section 51.982 (https://texas.public.law/statutes/tex._educ._code_section_51.982), and Title IX (https://www.ed.gov/laws-and-policy/civil-rights-laws/title-ix-and-sex-discrimination/) of the Education Amendments of 1972.

Only assigned instructors, enrolled students, invited guests and other individuals who have received the instructors' permission in advance are permitted in scheduled classes within CAPPA buildings. Unenrolled students, dependent minors of enrolled students or guests without instructors' permission are not permitted within the assigned classroom during any scheduled class. Other faculty engaged in peer review or other sanctioned academic responsibilities may attend as warranted and with consent of the instructor for the course or program director.

On occasion, due to extenuating circumstances, it is understood that an enrolled student who is a parent may have no other childcare choice than to have their child brought to the learning environment. In these circumstances, suspension of the above policy may be permitted by the instructor on a limited basis, to be designated by the instructor. ***Prohibited Minors:*** Persons under the age of ten (10) are not permitted in any laboratory (studio).

STUDIO CULTURE POLICY (HTTPS://WWW.UTA.EDU/ACADEMICS/SCHOOLS-COLLEGES/CAPPA/ACADEMICS/STUDIO/)

LAPTOP POLICY

Master of Architecture (Path A)

About This Program

The Master of Architecture program educates and prepares students to secure leadership positions in the profession of architecture. Within a broad curriculum, design as a discipline and as a process is emphasized. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at the School of Architecture is the contemporary urban condition, a point of departure that is especially appropriate for a school at the heart of a diverse, expanding, and internationally oriented region like Dallas/Fort Worth.

Each student's prior record of study of each student determines where, in a progression from introductory to advanced work, the program is entered. There are three distinct programs of study, which provide options to graduate students with different backgrounds and needs. Path A, for students holding a 4-year bachelor's degree, requires 3.5 years and 104 credit hours to complete.

Students will acquire the competencies required by a professional architecture degree according to the student criteria established by the National Architectural Accrediting Board (NAAB)

Competencies

1. Health, Safety, and Welfare in the Built Environment—Upon graduation, students will understand the impact of the built environment on human health, safety, and welfare at multiple scales, from buildings to cities.
2. Professional Practice—Upon graduation, students will value professional ethics, the regulatory requirements, the fundamental business processes relevant to architecture practice in the United States, and the forces influencing change in these subjects.
3. Regulatory Context—Upon graduation, students will be able to apply the fundamental principles of life safety, land use, and current laws and regulations to buildings and sites in the United States, and use the fundamental principles in the evaluative process architects use to comply with those laws and regulations as part of a project.
4. Technical Knowledge—Upon graduation, students will understand the established and emerging systems, technologies, and assemblies of building construction, and can apply the methods and criteria architects use to assess those technologies against the design, economics, and performance objectives of projects.
5. Design Synthesis—Upon graduation, students will have the ability to make design decisions within architectural projects while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design, and consideration of the measurable environmental impacts of their design decisions.
6. Building Integration—Upon graduation, students will have the ability to make design decisions within architectural projects while demonstrating integration of building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and the measurable outcomes of building performance.

Admissions Criteria

UNCONDITIONAL ADMISSION

For unconditional admission to the Path A program, the candidate must:

- Hold a baccalaureate (BS or BA) degree from an accredited program in a subject outside architecture, such as liberal arts, sciences, business, or another profession.
- Have an undergraduate GPA of 3.0 as calculated by Graduate Admissions.
- Have a minimum total score of 297 on the Graduate Record Exam (GRE) with a minimum score of 154 in the verbal portion.
- Submit three letters of recommendation from sources who are familiar with the applicant's academic record, preferably former professors. (For applicants who have been out of school for an extended period, letters of recommendation may be from professional sources if academic ones are no longer available).
- Submit a short 200-word personal statement providing evidence of professional or academic goals consistent with the Architecture Program.
- For applicants whose native language is not English, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 is required. Further, when the TOEFL iBT is taken, sectional scores of at least 22 on the Writing section, 21 on the Speaking section, 20 on the Reading section, and 16 on the Listening section are preferred. For otherwise highly qualified candidates, this requirement may be eased.
- Submission of a design portfolio is optional. Candidates are encouraged to submit portfolios of creative work including freehand drawings or sketches, painting, graphic design, architectural or furniture design.

PROBATIONARY ADMISSION

Candidates who do not meet the criteria for unconditional admission to Path A, will be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. To be considered for probationary acceptance, the candidate must perform well on four of the following six criteria:

- Undergraduate performance in relevant courses
- Work experience
- GPA
- GRE
- Portfolio review (optional)
- Letters of recommendation

Note: Applicants whose native language is not English who do not meet the program's minimum TOEFL score, may be asked to complete extramural training in English through the Pathways Admission Program described in the Admission section of this Catalog.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the submission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. All missing documentation must be received before the end of the first semester of study.

DEFERRED ADMISSION

A deferred admission may be granted when a file is incomplete or when a denied decision is not appropriate.

WAIVER OF GRADUATE RECORD EXAM (GRE)

A waiver of the Graduate Record Exam may be considered for a UT Arlington undergraduate who has completed an undergraduate degree in Architecture or Interior Design; the student's GPA must equal or exceed 3.50 in all undergraduate coursework completed at UT Arlington. The GRE waiver may also be extended to other UT Arlington undergraduates who have completed an undergraduate degree at UT Arlington; the student's GPA must equal or exceed a 3.50 in all undergraduate coursework completed at UT Arlington. The final decision to waive the GRE also requires a positive review of completed coursework by the graduate advisor to determine the applicant's readiness to study Architecture.

DENIAL OF ADMISSION

Candidates who do not satisfy the requirements for probationary admission will not be admitted.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted unconditionally. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies, score of 23 on the TOEFL-iBT Speaking subtest or score a 7.0 on the Speaking portion of the IELTS.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarships in the Program the candidate must admitted without provisional conditions and have a favorable review in most of the evaluation criteria. Fellowships and scholarships in architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in

a minimum of 9 hours in both long semesters to retain their fellowships or scholarships. For further information and to apply for scholarships visit the CAPPA Scholarships and Financial Aid website (https://www.uta.edu/academics/schools-colleges/cappa/admissions/scholarships/).

Master of Architecture (Path B)

About This Program

The Master of Architecture program educates and prepares students to secure leadership positions in the profession of architecture. Within a broad curriculum, design is emphasized as a discipline and as a process. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at the School of Architecture is the contemporary urban condition, a point of departure that is especially appropriate for a school at the heart of a diverse, expanding, and internationally oriented region like Dallas/Fort Worth.

Each student's prior record of study of each student determines where, in a progression from introductory to advanced work, the program is entered. There are three distinct programs of study, which provide options to graduate students with different backgrounds and needs. Path B, for students holding a 4-year pre-professional degree in architecture, requires 2 years and 57 credit hours to complete.

Each student will acquire all the competencies required by a professional degree in architecture, according to the student criteria established by the National Architectural Accreditation Board (NAAB).

Competencies

1. Health, Safety, and Welfare in the Built Environment—Upon graduation, students will understand the impact of the built environment on human health, safety, and welfare at multiple scales, from buildings to cities.
2. Professional Practice— Upon graduation, students will value professional ethics, the regulatory requirements, the fundamental business processes relevant to architecture practice in the United States, and the forces influencing change in these subjects.
3. Regulatory Context— Upon graduation, students will be able to apply the fundamental principles of life safety, land use, and current laws and regulations to buildings and sites in the United States, and use the fundamental principles in the evaluative process architects use to comply with those laws and regulations as part of a project.
4. Technical Knowledge— Upon graduation, students will understand the established and emerging systems, technologies, and assemblies of building construction, and can apply the methods and criteria architects use to assess those technologies against the design, economics, and performance objectives of projects.
5. Design Synthesis— Upon graduation, students will have the ability to make design decisions within architectural projects while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design, and consideration of the measurable environmental impacts of their design decisions.
6. Building Integration— Upon graduation, students will have the ability to make design decisions within architectural projects while demonstrating integration of building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and the measurable outcomes of building performance.

Admissions Criteria

UNCONDITIONAL ADMISSION

For unconditional admission to the Path B program, the candidate must:

- Have completed a baccalaureate degree with a major in architecture (typically a BS).
- Have an undergraduate GPA of 3.0 as calculated by Graduate Admissions.
- Have a minimum total score of 297 on the Graduate Record Exam (GRE) with a minimum score of 154 in the verbal portion.
- Submit three letters of recommendation from sources who are familiar with the applicant's academic record, preferably former professors. (For applicants who have been out of school for an extended period, letters of recommendation may be from professional sources if academic ones are no longer available).
- Submit a short 200-word personal statement providing evidence of professional or academic goals consistent with the Architecture Program.
- For applicants whose native language is not English, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 is required. Further, when the TOEFL iBT is taken, sectional scores of at least 22 on the Writing section, 21 on the Speaking section, 20 on the Reading section, and 16 on the Listening section are preferred. For otherwise highly qualified candidates, this requirement may be eased.
- Submit a portfolio of design work and/or professional involvement, which shows evidence of design capability on a level expected in the graduate program as determined by the Graduate Architecture Admissions Committee. (Design work produced in an office as an employee carries less weight because of the difficulty in determining the applicant's exact contribution to the work shown). The best indication of probable success in the program is the quality of work demonstrated in the portfolio

PROBATIONARY ADMISSION

Candidates who do not meet the criteria for unconditional admission to Path B may be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. And/or they may also be required to take one or more Path A and/or fourth year design studio as determined by the graduate advisor on review of their portfolio before continuing with the Path B design studio sequence.

To be considered for probationary acceptance, the candidate must perform well on three of the following five criteria:

- Undergraduate performance in relevant courses
- GPA
- GRE
- Letters of recommendation
- Portfolio review

Note: Applicants whose native language is not English who do not meet the program's minimum TOEFL score, may be asked to complete extramural training in English through the Pathways Admission Program described in the Admission section of this Catalog.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the submission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. All missing documentation must be received before the end of the first semester of study.

DEFERRED ADMISSION

A deferred admission may be granted when a file is incomplete or when a denied decision is not appropriate.

WAIVER OF GRADUATE RECORD EXAM (GRE)

A waiver of the Graduate Record Exam may be considered for a UT Arlington undergraduate who has completed an undergraduate degree in Architecture or Interior Design; the student's GPA must equal or exceed 3.50 in all undergraduate coursework completed at UT Arlington. The GRE waiver may also be extended to other UT Arlington undergraduates who have completed an undergraduate degree at UT Arlington; the student's GPA must equal or exceed a 3.50 in all undergraduate coursework completed at UT Arlington. The final decision to waive the GRE also requires a positive review of completed coursework by the graduate advisor to determine the applicant's readiness to study Architecture.

DENIAL OF ADMISSION

Candidates who do not satisfy the requirements for probationary admission will not be admitted.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted unconditionally. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies, score of 23 on the TOEFL-iBT Speaking subtest or score a 7.0 on the Speaking portion of the IELTS.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarships in the Program the candidate must admitted without provisional conditions and have a favorable review in most of the evaluation criteria. Fellowships and scholarships in architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships. For further information and to apply for scholarships visit the CAPPA Scholarships and Financial Aid website (https://www.uta.edu/academics/schools-colleges/cappa/admissions/scholarships/).

Master of Architecture (Path C)

About This Program

The Master of Architecture degree educates and prepares students to secure leadership positions in the profession of architecture. Within a broad curriculum, design as a discipline and as a process is emphasized. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at the School of Architecture is the contemporary urban condition, a point of departure that is especially appropriate for a school at the heart of a diverse, expanding, and internationally oriented region like Dallas/Fort Worth.

Each student's prior record of study of each student determines where, in a progression from introductory to advanced work, the program is entered. There are three distinct programs of study, which provide options to graduate students with different backgrounds and needs. Path C is for applicants who already hold an accredited professional degree in architecture and desire to earn a second professional degree. It requires at least one year of advanced work.

Competencies

1. Upon completion, students will be able to apply creative and critical thinking to architectural design challenges.
2. Upon completion, students will be able to communicate architectural ideas effectively through drawings, models, diagrams, and digital media.
3. Upon completion, students will be able to design architecture that engages with social, cultural, and environmental aspects of urban life.

Admissions Criteria

UNCONDITIONAL ADMISSION

For unconditional admission to the Path C program, the candidate must:

- Have completed a baccalaureate degree with a major in architecture (typically at BS).
- Have an undergraduate GPA of 3.0 as calculated by Graduate Admissions.
- Have a minimum total score of 297 on the Graduate Record Exam (GRE) with a minimum score of 154 in the verbal portion.
- Submit three letters of recommendation from sources who are familiar with the applicant's academic record, preferably former professors. (For applicants who have been out of school for an extended period, letters of recommendation may be from professional sources if academic ones are no longer available).
- Submit a short 200-word personal statement providing evidence of professional or academic goals consistent with the Architecture Program.
- For applicants whose native language is not English, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 is required. Further, when the TOEFL iBT is taken, sectional scores of at least 22 on the Writing section, 21 on the Speaking section, 20 on the Reading section, and 16 on the Listening section are preferred. For otherwise highly qualified candidates, this requirement may be eased.
- Submit a portfolio of design work and/or professional involvement, which shows evidence of design capability on a level expected in the graduate program as determined by the Graduate Architecture Admissions Committee. (Design work produced in an office as an employee carries less weight because of the difficulty in determining the applicant's exact contribution to the work shown). The best indication of probable success in the program is the quality of work demonstrated in the portfolio

PROBATIONARY ADMISSION

Candidates who do not meet the criteria for unconditional admission to Path C, may be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. To be considered for probationary acceptance, the candidate must perform well on three of the following five criteria:

- Performance in relevant courses in a program leading to the B.Arch or M.Arch degree.
- GPA
- GRE
- Letters of recommendation
- Portfolio review

Note: Applicants whose native language is not English who do not meet the program's minimum TOEFL score, may be asked to complete extramural training in English through the Pathways Admission Program described in the Admission section of this Catalog.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the submission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. All missing documentation must be received before the end of the first semester of study.

DEFERRED ADMISSION

A deferred admission may be granted when a file is incomplete or when a denied decision is not appropriate.

WAIVER OF GRADUATE RECORD EXAM (GRE)

A waiver of the Graduate Record Exam may be considered for a UT Arlington undergraduate who has completed an undergraduate degree in Architecture or Interior Design; the student's GPA must equal or exceed 3.50 in all undergraduate coursework completed at UT Arlington. The GRE waiver may also be extended to other UT Arlington undergraduates who have completed an undergraduate degree at UT Arlington; the student's GPA must equal or exceed a 3.50 in all undergraduate coursework completed at UT Arlington. The final decision to waive the GRE also requires a positive review of completed coursework by the graduate advisor to determine the applicant's readiness to study Architecture.

DENIAL OF ADMISSION

Candidates who do not satisfy the requirements for probationary admission will not be admitted.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted unconditionally. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies, score of 23 on the TOEFL-iBT Speaking subtest or score a 7.0 on the Speaking portion of the IELTS.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarships in the Program the candidate must admitted without provisional conditions and have a favorable review in most of the evaluation criteria. Fellowships and scholarships in architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships. Master of Science in Sustainable Building Technology

About This Program

The Master of Science in Sustainable Building Technology is a post-professional degree that answers a need for practitioners in diverse fields to have a comprehensive understanding of sustainable building technology. The program provides a curriculum for the strategic intersection of energy efficient building design and sustainable building technologies. Students in this program will gain expertise in three primary areas:

- Advanced design of building system integration
- Advanced environmental system design
- Advanced performance-based design

Additional courses are available to support areas of advanced study and research.

The program is intended for graduates and practicing professionals with professional degrees in the following fields:

- Architecture
- Landscape architecture
- Interior Design
- Historic preservation
- Urban design
- Environmental planning
- Industrial design
- Civil engineering
- Architectural engineering
- Environmental engineering
- Construction management

The MS in Sustainable Building Technology does not lead to architecture licensure. Students seeking professional licensure should pursue the School of Architecture’s accredited Master of Architecture degree.

Competencies

1. Upon completion, students will be capable of advanced design of building system integration.
2. Upon completion, students will be capable of advanced environmental system design.
3. Upon completion, students will be capable of advanced performance-based design.

Admissions Criteria

- Applicants must fulfill the requirements of both the Graduate School and the College of Architecture Planning and Public Affairs.
- Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from an accredited institution in one of the professions or fields of study listed below:
  - A five-year Bachelor of Science in Architecture (BArch)*
  - A five- or six-year National Architectural Accrediting Board (NAAB)-accredited professional degree in architecture (BArch or MArch)
  - A four- or five-year Council for Interior Design Accrediting Board (CIDA)-accredited professional degree in interior Design
  - A four- or five-year Bachelor of Landscape Architecture or Bachelor of Science in Landscape Architecture degree; or a master's degree in Landscape Architecture. All degrees must be from programs accredited by the Landscape Architectural Accreditation Board.
  - A Bachelor of Science in Industrial Design
  - A Bachelor of Science in Urban and Regional Planning
  - A Bachelor of Science in Civil Engineering
  - A Bachelor of Science in Architectural Engineering
  - A Bachelor of Science Construction Management
- A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended.
- Three letters of recommendation are required, and it is suggested that at least two of the letters come from former educators or academic contact. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of Sustainable Building Technology (MSBT), Box 19108, Arlington TX 76019.
- Applicants also are required to submit scores from the Graduate Record Exam (GRE). Average GRE scores of successful applicants since 1998 have been approximately 550 Verbal and 550 Quantitative.
- Also required is a grade point average (GPA) of 3.00 as calculated by graduate admissions.
- Applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.
- Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

Applicants whose native language is not English who do not meet the program's minimum TOEFL score, may be asked to complete extramural training in English through the Pathways Admission Program described in the Admission section of this Catalog.

UNCONDITIONAL ADMISSION

Applicants meeting all the above mentioned criteria are eligible for unconditional admission.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the submission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. All missing documentation must be received before the end of the first semester of study.

PROBATIONARY ADMISSION

Those who have weaknesses with respect to letters of recommendation, GRE scores, and GPA can be admitted on probation, with the condition that they make no less than a B in the first 12 hours of coursework in landscape architecture. Such students must complete no fewer than 9 credits during the semester in which they are on probation.

DEFERRED ADMISSION

Those who have weaknesses with respect to letters of recommendation, GRE scores, and GPA and/or who have not submitted all of the materials required for unconditional admission, may have their applications deferred for one semester, until outstanding requirements and criteria are met. A deferred admission may be granted when a file is incomplete or when a denied decision is not appropriate.

DENIAL OF ADMISSION

Candidates who do not satisfy the requirements for probationary admission will not be admitted.

INTERNATIONAL STUDENT ADMISSION

In addition the above-listed requirement, applicants whose native language is not English must have a demonstrated speaking ability in English. They also present a minimum required score of 575 on the paper exam, or an equivalent score on the computer based- or internet-based tests, on the Test of English as a Foreign Language (TOEFL). International applicants who do not meet the Program's minimum TOEFL score, must complete extramural training in English, as approved by the Program and the Office of Graduate Studies.

WAIVER OF GRADUATE RECORD EXAM (GRE)

A waiver of the Graduate Record Exam may be considered for a UT Arlington undergraduate who has completed an undergraduate degree in Architecture or Interior Design; the student's GPA must equal or exceed 3.50 in all undergraduate coursework completed at UT Arlington. The GRE waiver may also be extended to other UT Arlington undergraduates who have completed an undergraduate degree at UT Arlington; the student's GPA must equal or exceed a 3.50 in all undergraduate coursework completed at UT Arlington. The final decision to waive the GRE also requires a positive review of completed coursework by the graduate advisor to determine the applicant's readiness to study Architecture.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted unconditionally. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies, score of 23 on the TOEFL-iBT Speaking subtest or score a 7.0 on the Speaking portion of the IELTS.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarship (https://www.uta.edu/academics/schools-colleges/cappa/admissions/scholarships/) the candidate must admitted without provisional conditions and have a favorable review in most of the evaluation criteria. Fellowships and scholarships in architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships.

Program Completion

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their program of graduate study. Students who complete a Master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A student whose cumulative GPA falls below a 3.0 in courses taken while enrolled as a UT Arlington graduate student may be subject to dismissal from the program (p. 99).

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Bachelor of Science in Architecture

About This Program

The Bachelor of Science in Architecture degree combines a core liberal arts curriculum with a structured sequence of courses in architecture and design. A large number of electives allows the student the flexibility to pursue special interests in the school and in the University. The four-year undergraduate

architecture program (128 credit hours) consists of two two-year segments: basic studies and major studies. Students are expected to show consistent satisfactory progress toward completion of the degree.

The first two years (basic studies) is a foundation curriculum taken by all undergraduates at that level in the school. In addition to work in the arts and sciences, basic studies includes a series of lecture and studio courses that introduce the student to the concepts, history, skills, and vocabulary of design.

Following the two-year basic studies sequence, in the third and fourth years (major studies), the student concentrates in one of the design disciplines, taking courses and studios of a more advanced and professional nature. Those pursuing the Bachelor of Science in Architecture degree follow the architecture sequence.

The Master of Architecture offers outstanding graduating students from UTA's Bachelor of Science in Architecture program the opportunity to participate in a facilitated admissions program.

Competencies

1. Upon completion, students will understand architectural history, theory, and principles in a global and cultural context.
2. Upon completion, students will demonstrate creative and critical thinking skills in architectural design.
3. Upon completion, students will be able to apply spatial reasoning and problem-solving in design solutions.
4. Upon completion, students will be able to integrate aesthetics, function, and sustainability in architectural projects.

Admissions Criteria

Admission to the Architecture Basic Studies sequence is open to all students meeting the general requirements for entrance to the University. Please visit our website for our full admissions requirements (https://www.uta.edu/academics/schools-colleges/cappa/admissions/).

To declare a major (https://www.uta.edu/academics/schools-colleges/cappa/general-advising/tools-resources/major-declaration-information/) (enter 3rd year) in Architecture and gain permission to enroll in upper-level ARCH or INTD courses:

- The student will have completed the Architecture Basic Studies sequence with a grade of C or better within each major course (ARCH+INTD).
- The student will have completed the core curriculum required for the Architecture degree plan with grades of C or better within all Math and Physics courses.
- Have a minimum of a 2.8 GPA both overall at UT Arlington as well as within the Architecture Basic Studies sequence.
- Completion of the First Year Foundation Competency portfolio review (FYPR) evaluations.
- Complete a Major Declaration form available through the School of Architecture

GPA requirements may change based on changes in the curriculum of the program. Qualified students must meet the GPA requirements that are in place at the time they fulfill all other requirements to declare their major.

To declare a major for a fall semester, qualified applicants will submit their request to declare a major in the School of Architecture office at the completion of the spring semester, by the department specified deadline.

Official records of coursework taken at other institutions or universities must be submitted to the advising office of the School of Architecture before a student can file a Major Declaration form. It is the student's responsibility to ensure that all coursework is transferred to the Office of Admissions at UT Arlington in a timely manner.

Upon entrance into the major studies programs, students will be required to maintain the minimum 2.8 GPAs both overall at UT Arlington and within the major to remain active and proceed within the program.

FIRST YEAR FOUNDATIONS COMPETENCY

The School of Architecture requires a First Year Foundations Competency (https://www.uta.edu/academics/schools-colleges/cappa/academics/architecture/first-year-foundations/) that is evaluated through a two-part First Year Portfolio Review (FYPR1 & FYPR2). All students with the intent of pursuing the BS.ARCH or BS.INTD degree are required to participate in the FYPR. All transfer students will also be required to submit a portfolio via our portfolio portal. The portfolio review will determine areas of concern and provide academic advisors with insight for student’s success.

PROGRAMS COHORT

The undergraduate programs in the School of Architecture at the University of Texas at Arlington are organized in a structured cohort format.

What Is a Cohort?

A cohort is a group of students that follows the same set schedule and progresses through a program together. The sequential scheduling of the courses promotes an interactive learning environment and facilitates networking opportunities and career-strengthening relationships.

How Does It Work?

The program consists of a sequence of courses that takes a minimum of eight semesters to complete. The courses are offered in specific semesters (Fall and Spring) that require the students to complete the prior level before proceeding to the next level. If a student gets off-track in the cohort, she/he must wait until the missing course(s) are offered again.

How Are the Courses Sequenced?

The major courses must be taken as follows.

First Year			
Fall Semester	**Hours**	**Spring Semester**	**Hours**
UNIV-AR 1131 or ARCH 1101	1	ARCH 1342	3
ARCH 1301	3		
ARCH 1341	3		
	7		**3**

Program Completion

COMPETENCE IN ORAL PRESENTATIONS

Students obtaining an Architecture BS demonstrate oral proficiency by taking and passing ARCH 2551, ARCH 2552, ARCH 3553, ARCH 3554, ARCH 4556, and ARCH 4557 or approved equivalents.

COMPETENCE IN COMPUTER USE

Students obtaining an Architecture BS can demonstrate computer proficiency by:

- Taking and passing ENGL 1301 or ENGL 1302 at UT Arlington in a computer classroom environment or ENGL 3372, ENGL 3374, CSE 1301 (or equivalent), or any other class approved for this purpose by the Undergraduate Assembly.
- Passing the University computer literacy examination.

GRADES

Upon admission to the Major Studies, all declared majors must maintain a minimum GPA of 2.8 both within the major and in the cumulative GPA to continue in the upper level program to satisfy requirements for graduation.

A grade of C or higher must be earned in each School of Architecture course used for credit toward an undergraduate degree and minor offered by the school. A grade of C or higher must be earned in all required Math and Physics courses. Grades of P are not acceptable for classes in which a grade of C or higher is required.

REPETITION OF COURSES

Three attempts to achieve a satisfactory grade are permitted for each required course in the School of Architecture. Beyond that number of attempts, the student is denied access to the course in question, or to the sequence of courses for which it is requisite. Enrollment in the course for the time sufficient to receive a grade, including the grade W, is considered an attempt.

TRANSFER OF CREDIT

The extent of credit toward degree requirements for academic work done elsewhere will be determined by the representatives of the appropriate program. Students applying to transfer credits from studio courses taken elsewhere must present examples of that work for evaluation.

STUDENT PROJECTS

The School of Architecture reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

POLICY FOR CLASSROOM + STUDIO NON-REGISTERED ATTENDEES

The following policy applies to scheduled courses and academic activities in the School of Architecture, including undergraduate and graduate programs in Architecture and Interior Design. The policy is effective January 1, 2024 and complies with University of Texas at Arlington EI-PO-11 (https://policy.uta.edu/doctract/documentportal/08DBFB5B2F2385C1E7FA9336A7971113/), the Texas Education Code Section 51.982 (https://texas.public.law/statutes/tex._educ._code_section_51.982), and Title IX (https://www.ed.gov/laws-and-policy/civil-rights-laws/title-ix-and-sex-discrimination/) of the Education Amendments of 1972.

Only assigned instructors, enrolled students, invited guests and other individuals who have received the instructors' permission in advance are permitted in scheduled classes within CAPPA buildings. Unenrolled students, dependent minors of enrolled students or guests without instructors' permission are not permitted within the assigned classroom during any scheduled class. Other faculty engaged in peer review or other sanctioned academic responsibilities may attend as warranted and with consent of the instructor for the course or program director.

On occasion, due to extenuating circumstances, it is understood that an enrolled student who is a parent may have no other childcare choice than to have their child brought to the learning environment. In these circumstances, suspension of the above policy may be permitted by the instructor on a limited basis, to be designated by the instructor. ***Prohibited Minors:*** Persons under the age of ten (10) are not permitted in any laboratory (studio).

INDEPENDENT STUDY POLICY (ARCH 4191, ARCH 4391)

For students interested in completing Independent Study, independent studies are limited to no more than six (6) total hours during their undergraduate degree pursuit with the program. No more than three (3) credit hours of independent study is allowed in one semester. ***All Independent Studies must adhere to the following process:***

1. The student must have minimum 3.0 GPAs both overall at UTA and within the major.
2. The Independent Study subject/purpose must not be covered in the regular curriculum.
3. The student will develop and write an independent study proposal and find a sponsoring faculty member to supervise the independent study.
4. The faculty member, if agreeable to supervise the independent study, must complete a submit a CAPPA Independent Study form with a detailed outline on what the independent study will cover, why it is needed, and how many credits are requested.
5. The faculty member will submit the completed/signed form to the CAPPA undergraduate advising office at arch.advising@uta.edu.
6. The Independent Study request is subject to administrative approval.

Any independent study from programs outside of the student's current major are still subject to the Independent Study Policy above for consideration of application to the degree.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Bachelor of Science in Interior Design

About This Program

Interior Design at UT Arlington focuses on the commercial, institutional, and large-project scale activities of the profession. The Bachelor of Science in Interior Design is a four-year professional program. It is the only program in the Dallas/Fort Worth area that offers an Interior Design BS within a School of Architecture. In the first two years of study, UT Arlington Interior Design students share courses with architectural students. As a result, graduates have an understanding of architecture that is valuable in working with project teams requiring collaboration across multiple disciplines. The program therefore differs from a non-professional interior decorating program. The location of the program in a major design center of the Southwest provides design students with a broad range of learning experiences, including internship and employment opportunities

Students completing the Bachelor of Science in Interior Design at UT Arlington may apply for advanced standing in the UT Arlington Master of Architecture.

The Bachelor of Science in Interior Design leads to the full professional degree and is fully accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD).

Competencies

1. Upon completion, students will demonstrate an understanding of interior design history, theory, and design principles in the context of global, cultural, social, and environmental conditions. This competency is aligned with CIDA Standard 4 (Global Context), Standard 10 (History), and Standard 12 (Design Elements and Principles).
2. Upon completion, students will apply critical and creative thinking to analyze, create, and communicate evidence-based design solutions that respond to a variety of user needs, conditions, and parameters. This competency is aligned with CIDA Standard 8 (Design Process) and Standard 9 (Communication).
3. Upon completion, students will demonstrate the ability to identify, plan, and design interior spatial environments that support health, safety, and well-being in the context of building systems. This competency is aligned with CIDA Standard 7 (Human-Centered Design), Standard 14 (Environmental Systems & Human Well-being), and Standard 16 (Regulations and Guidelines).
4. Upon completion, students will apply knowledge of products, materials, color, and lighting in support of the design intent. This competency is aligned with CIDA Standard 12 (Light and Color) and Standard 13 (Products and Materials).

5. Upon completion, students will demonstrate understanding of building systems, codes and regulations, and construction as applied to professional practice and interdisciplinary collaboration. This competency is aligned CIDA Standard 5 (Collaboration), Standards 6 (Business Practices and Professionalism, Standard 15 (Construction).

Admissions Criteria

Admission to the Interior Design Basic Studies sequence is open to all students meeting the general requirements for entrance to the University. Please visit our website for our full admissions requirements (https://www.uta.edu/academics/schools-colleges/cappa/admissions/).

To declare a major (enter 3rd year) in Interior Design and gain permission to enroll in upper-level INTD or ARCH courses:

- The student will have completed the Interior Design Basic Studies sequence with a grade of C or better within each major course (INTD+ARCH).
- The student will have completed core curriculum required for the Interior Design degree plan with grades of C or better within all Math and Physics courses.
- Have a minimum of a 2.8 GPA both overall at UT Arlington as well as within the Interior Design Basic Studies sequence.
- Completion of the First Year Foundation Competency portfolio review (FYPR) evaluations.
- Complete a Major Declaration form available through the School of Architecture

GPA requirements may change based on changes in the curriculum of the program. Qualified students must meet the GPA requirements that are in place at the time they fulfill all other requirements to declare their major.

To declare a major for a fall semester, qualified applicants will submit their request to declare a major in the School of Architecture office at the completion of the spring semester, by the department specified deadline.

Consideration for fall admission into the major studies programs for qualified summer applicants will be based on an individual basis.

Official records of coursework taken at other institutions or universities must be submitted to the advising office of the School of Architecture before a student can file a Major Declaration form. It is the student's responsibility to ensure that all coursework is transferred to the Office of Admissions at UT Arlington in a timely manner.

Upon entrance into the major studies programs, students will be required to maintain the minimum 2.8 GPAs both overall at UT Arlington and within the major to remain active and proceed within the program.

FIRST YEAR FOUNDATIONS COMPETENCY

The School of Architecture requires a First Year Foundations Competency (https://www.uta.edu/academics/schools-colleges/cappa/academics/architecture/first-year-foundations/) that is evaluated through a two-part First Year Portfolio Review (FYPR1 & FYPR2). All students with the intent of pursuing the BS.ARCH or BS.INTD degree are required to participate in the FYPR. All transfer students will also be required to submit a portfolio via our portfolio portal. The portfolio review will determine areas of concern and provide academic advisors with insight for student's success.

PROGRAMS COHORT

The undergraduate programs in the School of Architecture at the University of Texas at Arlington are organized in a structured cohort format.

What Is a Cohort?

A cohort is a group of students that follows the same set schedule and progresses through a program together. The sequential scheduling of the courses promotes an interactive learning environment and facilitates networking opportunities and career-strengthening relationships.

How Does It Work?

The program consists of a sequence of courses that takes a minimum of eight semesters to complete. The courses are offered in specific semesters (Fall and Spring) that require the students to complete the prior level before proceeding to the next level. If a student gets off-track in the cohort, she/he must wait until the missing course(s) are offered again.

How Are the Courses Sequenced?

The major courses must be taken as follows.

How Are the Courses Sequenced?

First Year			
Fall Semester	**Hours**	**Spring Semester**	**Hours**

Students obtaining an Architecture BS demonstrate oral proficiency by taking and passing ARCH 2551, ARCH 2552, ARCH 3553, ARCH 3554, ARCH 4556, and ARCH 4557 or approved equivalents.

COMPETENCE IN COMPUTER USE

Students obtaining an Architecture BS can demonstrate computer proficiency by:

- Taking and passing ENGL 1301 or ENGL 1302 at UT Arlington in a computer classroom environment or ENGL 3372, ENGL 3374, CSE 1301 (or equivalent), or any other class approved for this purpose by the Undergraduate Assembly.
- Passing the University computer literacy examination.

GRADES

Upon admission to the Major Studies, all declared majors must maintain a minimum GPA of 2.8 both within the major and in the cumulative GPA to continue in the upper level program to satisfy requirements for graduation.

A grade of C or higher must be earned in each School of Architecture course used for credit toward an undergraduate degree and minor offered by the school. A grade of C or higher must be earned in all required Math and Physics courses. Grades of P are not acceptable for classes in which a grade of C or higher is required.

REPETITION OF COURSES

Three attempts to achieve a satisfactory grade are permitted for each required course in the School of Architecture. Beyond that number of attempts, the student is denied access to the course in question, or to the sequence of courses for which it is requisite. Enrollment in the course for the time sufficient to receive a grade, including the grade W, is considered an attempt.

TRANSFER OF CREDIT

The extent of credit toward degree requirements for academic work done elsewhere will be determined by the representatives of the appropriate program. Students applying to transfer credits from studio courses taken elsewhere must present examples of that work for evaluation.

STUDENT PROJECTS

The School of Architecture reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

POLICY FOR CLASSROOM + STUDIO NON-REGISTERED ATTENDEES

The following policy applies to scheduled courses and academic activities in the School of Architecture, including undergraduate and graduate programs in Architecture and Interior Design. The policy is effective January 1, 2024 and complies with University of Texas at Arlington EI-PO-11 (https://policy.uta.edu/doctract/documentportal/08DBFB5B2F2385C1E7FA9336A7971113/), the Texas Education Code Section 51.982 (https://texas.public.law/statutes/tex._educ._code_section_51.982), and Title IX (https://www.ed.gov/laws-and-policy/civil-rights-laws/title-ix-and-sex-discrimination/) of the Education Amendments of 1972.

Only assigned instructors, enrolled students, invited guests and other individuals who have received the instructors' permission in advance are permitted in scheduled classes within CAPPA buildings. Unenrolled students, dependent minors of enrolled students or guests without instructors' permission are not permitted within the assigned classroom during any scheduled class. Other faculty engaged in peer review or other sanctioned academic responsibilities may attend as warranted and with consent of the instructor for the course or program director.

On occasion, due to extenuating circumstances, it is understood that an enrolled student who is a parent may have no other childcare choice than to have their child brought to the learning environment. In these circumstances, suspension of the above policy may be permitted by the instructor on a limited basis, to be designated by the instructor. ***Prohibited Minors:*** Persons under the age of ten (10) are not permitted in any laboratory (studio).

INDEPENDENT STUDY POLICY (INTD 4191, INTD 4391)

For students interested in completing Independent Study, independent studies are limited to no more than six (6) total hours during their undergraduate degree pursuit with the program. No more than three (3) credit hours of independent study is allowed in one semester. ***All Independent Studies must adhere to the following process:***

1. The student must have minimum 3.0 GPAs both overall at UTA and within the major.
2. The Independent Study subject/purpose must not be covered in the regular curriculum.
3. The student will develop and write an independent study proposal and find a sponsoring faculty member to supervise the independent study.
4. The faculty member, if agreeable to supervise the independent study, must complete a submit a CAPPA Independent Study form with a detailed outline on what the independent study will cover, why it is needed, and how many credits are requested.
5. The faculty member will submit the completed/signed form to the CAPPA undergraduate advising office at arch.advising@uta.edu.
6. The Independent Study request is subject to administrative approval.

Any independent study from programs outside of the student's current major are still subject to the Independent Study Policy above for consideration of application to the degree.

Minor in Architecture History

About This Program

For undergraduate students in architecture, interior design, or allied disciplines, the School of Architecture offers a Minor in Architecture History.

Competencies

1. Historical and Cultural Literacy in the Built Environment: Upon completion, students will demonstrate an understanding of architectural and urban forms across time, exploring how design reflects and shapes cultural, political, and societal values.
2. Critical Frameworks in Architectural History: Upon completion, students will apply historical, theoretical, and contextual analysis to understand the evolution of architecture, from ancient cities to contemporary movements.
3. Integrated Perspectives on Architecture and Society: Upon completion, students will be able to connect architectural history to broader fields, such as politics, art, and urbanism, enhancing their ability to think critically about the built environment's role in shaping human experience.

Landscape Architecture

Department Overview

The UT Arlington Master of Landscape Architecture program advances design and planning solutions for environmental resiliency, urban placemaking, quality of life, and well-being. Through interdisciplinary teaching, research, and service activities, the program promotes leading-edge design and planning by capitalizing upon its unique position within the urban lab environment that Dallas/Fort Worth area offers, providing students with skills that are transferable to cities around the globe

Students and faculty within the Master of Landscape Architecture program seek to fulfill its vision on various levels, beginning with the program and radiating outward.

The Landscape Architecture Program:

- provides a creative and engaging classroom, as well as an experiential learning environment that promotes critical and creative thinking about advanced solutions for current and future urban landscapes; a commitment to continual growth of the profession is manifested in lifetime learning opportunities including continuing education, certificates, and executive programs for working professionals
- encourages collaborative teaching and research within the College of Architecture, Planning and Public Affairs
- encourages collaborative teaching, research and outreach programs across the University with such programs as Engineering, Environmental Sciences, Sociology, Real Estate Development, and Business Administration
- acts as a bridge between academia and industry by providing a hub for service learning opportunities that benefit a wide range of community partners; we do this by capitalizing upon the broad and diverse expertise of faculty research, and by integrating creative and thoughtful design that addresses the culture, nature, and people within a rapidly growing metropolitan environment to help create viable, sustainable, and resilient urban communities.

OUR VALUES

- **Excellence in our education programs**: We value excellence and seek the highest standards in teaching by engaging students to develop creative and critical thinking, an appreciation of lifetime learning, and the professional skills necessary to address issues of landscape architecture, urban design, sustainability, and quality of life.
- **Diversity**: We value and promote diversity in our students, faculty, design and planning practices, and see diversity as one of the strengths of our program.
- **Research:** We value and promote original research and scholarly activities that apply the diverse expertise of faculty students to addressing complex urban issues.
- **Collaboration:** We value collaboration within our students, our MLA faculty, CAPPA, and across the University, as well as with our current and developing business, government and nonprofit community partners.
- **Service to our community:** We value service as a key element of structured experiential learning that results in creative solutions to urban landscape, urban design, sustainability, and city building challenges, with the goal of fostering quality of life and well-being.

ACCREDITATION

The Landscape Architecture Program is fully accredited by the Landscape Architecture Accreditation Board. Graduates from the Landscape Architecture Program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the State of Texas.

Graduate Programs (p. 167)

Undergraduate Program (p. 177)

COURSES

LARC 4191. CONFERENCE COURSE. 1 Hour.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: Departmental permission.

LARC 4300. INTRODUCTION TO LANDSCAPE ARCHITECTURE. 3 Hours.
An orientation to this environmental-design profession. Landscape architecture applies a blending of art with knowledge of natural processes and historical, cultural, and social dynamics to design richly supportive and beautiful outdoor places. Open to all students.

LARC 4301. SITE PLANNING AND DEVELOPMENT PROCESSES. 3 Hours.
Presents the processes and practices of site planning and development, including site inventory, analysis, and assessment of potential building sites. Students examine the natural, cultural, and social systems that affect design decisions, as well as the language and literature of landscape architecture. Prerequisite: "C" or better in UDES 2441, ARCH 2551, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4312. HISTORY AND THEORY OF LANDSCAPE ARCHITECTURE I. 3 Hours.
Traces landscape planning and design from pre-history through Egyptian, Greek, Roman, Islamic and Medieval gardens to Italian, French, and English landscape approaches, culminating in the mid-19th century. Relates landscape design to societal, cultural, technological and belief systems of each period. Culminates in the contemporary history of the profession from Andrew Jackson Downing to the present day. The growth and development of the profession, professional education, the environmental movement, large scale regional land planning and significant landscape architectural projects of the past century and a half. Course also offered as ARCH 4353, credit will only be granted one. Prerequisite: UDES 2303 and LARC 4300 or ARCH 2303 and ARCH 2304. Restricted to Sustainable Urban Design, Architecture, and Interior Design majors.

LARC 4313. HISTORY AND THEORY OF LANDSCAPE ARCHITECTURE II. 3 Hours.
The contemporary history of the profession from Andrew Jackson Downing to present day. The growth and development of the American Society of Landscape Architects (ASLA), professional education, the environmental movement, large scale regional planning, and significant landscape architectural projects of the past century. Prerequisite: "C" or better in ARCH 4353. Department consent.

LARC 4320. COMMUNICATIONS FOR LANDSCAPE ARCHITECTS. 3 Hours.
Primary class for the development of graphic and communication skills in landscape architecture. Provides a method for transferring conceptual ideas into legible graphic presentations. Prerequisite: "C" or better in UDES 2441, ARCH 2551, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4324. ENVIRONMENTAL ART AND DATA VISUALIZATION. 3 Hours.
Siting and creating works of art; analysis of the creative processes of the two different-yet-related disciplines; case studies of built works. Communication of ideas through environmental media. Prerequisite: C or better in UDES 3551, ARCH 2551, or approved equivalent. Restricted to Sustainable Urban Design major. Department approval is required for Architecture and Interior Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

LARC 4325. URBAN SKETCHING. 3 Hours.
This course employs freehand, on-location sketching as a means for exploring and understanding the rich visual language of the urban environment. Lectures will introduce timeless urban design principles and field sketching techniques, which will be further developed through on-location sketching in the city. The course would be of interest to students of art, architecture, landscape architecture, planning, art and related fields. Some background in sketching through art or design coursework is recommended. Prerequisite: "C" or better in UDES 2441, ARCH 1342, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4326. DESIGN AND HUMAN BEHAVIOR. 3 Hours.
This course is an introduction to a range of viewpoints, concepts and characteristics of human behavior which should be taken into consideration when designing the urban environment. Cultural, social and psychological factors will be considered. Various theories and methods of environmental assessment and design will be studied that are based on an understanding of mutually supportive relationships between human beings and their physical environment. Field study will be employed to exercise theories and techniques explored. Prerequisite: "C" or better in UDES 2441, ARCH 2551, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4327. REGIONALISM, CREATIVITY, AND DESIGN. 3 Hours.
This class will cover various readings and discuss inspiring regionalist essays by architects, landscape architects, philosophers, and others in order to shape a set of beliefs (an ideology) that can productively inform the student's trajectory as a creative designer. Students will learn how regionalism makes the life of a designer more interesting and fulfilling as new regional influences in diverse areas are absorbed and become continuing fodder for personal growth and creativity through a long career. Prerequisite: "C" or better in UDES 2441, ARCH 2551, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4330. PLANT IDENTIFICATION AND ECOLOGY. 3 Hours.
Examines the design characteristics and horticultural requirements of a broad palette of plants adapted to the North Texas region. Field trips are required to learn the plants at both ornamental gardens and local ecological communities. Prerequisite: C or better in UDES 4551, ARCH 3554, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4341. LANDSCAPE TECHNOLOGY I. 3 Hours.
Surveying, site grading, storm water management, vertical and horizontal curves and an overview of the construction documentation process employed by landscape architects. Prerequisite: C or better in UDES 4551, ARCH 3554, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4344. PARK AND RECREATION DESIGN AND PLANNING. 3 Hours.
History, data collection, program formulation, and design principles for public and private park and recreation systems and sites. Includes management objectives, operations and maintenance, and public input as planning components. Prerequisite: C or better in UDES 4551, ARCH 3554, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4350. LANDSCAPE ARCHITECTURE COMPUTER APPLICATIONS. 3 Hours.
Examines various computer applications currently used in office practice. Computer applications used for office management, site analysis, design development, construction documentation, and cost estimating. Introduction to computer aided design applications and the underlying theories of application. Prerequisite: "C" or better in UDES 2441, ARCH 2551, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4351. ADVANCED COMPUTER AIDED DESIGN. 3 Hours.
Focus is on a methodology for designing and illustrating with computer graphics that is very compatible with the design and production workflow of most landscape architecture offices. All work is done in an AutoCAD environment using AutoCAD for modeling and Lumion for rendering still images, interactive panoramas, and both viewpoint and key-frame animations. Photoshop is used for the creation of texture maps, image manipulation and photo-montage. Emphasis is on working intuitively and creatively. Prerequisite: "C" or better in LARC 4350, ARCH 3343, INTD 2343, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4382. URBAN DESIGN SEMINAR. 3 Hours.
The Seminar establishes a basic critical understanding, and a critique of urban design by reviewing its past, present and the future as an academic field and an area of practice. The seminar introduces urban design as a transdisciplinary specialization and professional endeavor that encompasses landscape architecture, architecture, city planning, and real estate to shape and influence the built environment primarily within urban context. Students actively present and lead informed discussions on topics such as urban form, urban landscapes, land-use patterns, population density, circulation, legibility, public art, environmental behavior and urban/rural interchange. Field trips are required. Prerequisite: C or better in UDES 4551, ARCH 3554, or approved equivalent. Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. Department consent.

LARC 4391. CONFERENCE COURSE IN LANDSCAPE ARCHITECTURE. 3 Hours.
Independent study guided by an instructor on a regular basis. Prerequisite: Students must have a minimum cumulative GPA of 2.8 and a minimum major course(s) GPA of 2.8. May be repeated for credit, may not exceed six credits. Permission of the instructor and the Landscape Architecture Program Director.

LARC 4395. SELECTED TOPICS IN LANDSCAPE ARCHITECTURE. 3 Hours.
Courses to explore and present selected topics in landscape architecture and design. May be repeated for credit as topics change. Prerequisite: Department consent.

LARC 4695. CONFERENCE COURSE IN LANDSCAPE ARCHITECTURE. 6 Hours.
Studio and lecture courses to explore and present selected topics in landscape architecture and design. Not repeatable for credit. Prerequisite: Permission of the Landscape Architecture Program Director.

LARC 5191. CONFERENCE COURSE IN LANDSCAPE ARCHITECTURE. 1 Hour.
Special subjects and issues in landscape architecture that may be studied independently under faculty supervision. May be repeated for credit.

LARC 5294. MASTERS COMPREHENSIVE EXAMINATION. 2 Hours.
Must be taken concurrently with Thesis. Directed study, consultation, and comprehensive examination of coursework, leading to and including the thesis. Oral presentation required. Required of all Master of Landscape Architecture students in the semester in which they plan to graduate. Prerequisite: LARC 5397.

LARC 5300. INTRODUCTION TO LANDSCAPE ARCHITECTURE. 3 Hours.
An orientation to this environmental-design profession. Landscape architecture applies a blending of art with knowledge of natural processes and historical, cultural, and social dynamics to design richly supportive and beautiful outdoor places. Open to all students.

LARC 5301. SITE PLANNING AND DEVELOPMENT PROCESSES. 3 Hours.
Presents the processes and practices of site planning and development, including site inventory, analysis, and assessment of potential building sites. Students examine the natural, cultural, and social systems that affect design decisions, as well as the language and literature of landscape architecture.

LARC 5302. LAND DEVELOPMENT PLANNING. 3 Hours.
The process of land development planning for landscape architects. Detailed expansion of LARC 5301. Uses case studies in land development planning to instruct students in the environmental, economic, legal, and visual issues associated with the land planning process.

LARC 5312. HISTORY AND THEORY OF LANDSCAPE ARCHITECTURE. 3 Hours.
Traces landscape planning and design from pre-history through Egyptian, Greek, Roman, Islamic and Medieval gardens to Italian, French, and English landscape approaches, culminating in the mid-19th century. Relates landscape design to societal, cultural, technological and belief systems of each period. Culminates in the contemporary history of the profession from Andrew Jackson Downing to the present day. The growth and development of the profession, professional education, the environmental movement, large scale regional land planning and significant landscape architectural projects of the past century and a half.

LARC 5313. HISTORY AND THEORY OF LANDSCAPE ARCHITECTURE II. 3 Hours.
The contemporary history of the profession from Andrew Jackson Downing to present day. The growth and development of the American Society of Landscape Architects (ASLA), professional education, the environmental movement, large scale regional planning, and significant landscape architectural projects of the past century. Prerequisite: "C" or better in LARC 5312 or ARCH 4353.

LARC 5320. COMMUNICATIONS FOR LANDSCAPE ARCHITECTS. 3 Hours.
Primary class for the development of graphic and communication skills in landscape architecture. Provides a method for transferring conceptual ideas into legible graphic presentations. Should be taken concurrently with LARC 5661 Design Studio I. Prerequisite: Credit or concurrent enrollment in LARC 5661.

LARC 5321. ADVANCED COMMUNICATIONS. 3 Hours.
Focuses on the symbolic and representational computer graphics as well as communication and presentation techniques typically used in landscape architecture profession. Building on the graphic thinking, production, and communications skills covered in LARC 5320 and further expanding those basics to digital technologies and media. It also introduces students to fundamental concepts and principles of design and graphic composition in the digital environment. Prerequisite: LARC 5320.

LARC 5323. STUDIO TEACHING. 3 Hours.

LARC 5324. LANDSCAPE ARCHITECTURE AND ENVIRONMENTAL ART SEMINAR. 3 Hours.
Siting and creating works of art; analysis of the creative processes of the two different-yet-related disciplines; case studies of built works. Communication of ideas through environmental media.

LARC 5325. URBAN SKETCHING. 3 Hours.
This course employs freehand, on-location sketching as a means for exploring and understanding the rich visual language of the urban environment. Lectures will introduce timeless urban design principles and field sketching techniques, which will be further developed through on-location sketching in the city. The course would be of interest to students of art, architecture, landscape architecture, planning, art and related fields. Some background in sketching through art or design coursework is recommended.

LARC 5326. DESIGN AND HUMAN BEHAVIOR. 3 Hours.
This course is an introduction to a range of viewpoints, concepts and characteristics of human behavior which should be taken into consideration when designing the urban environment. Cultural, social and psychological factors will be considered. Various theories and methods of environmental assessment and design will be studied that are based on an understanding of mutually supportive relationships between human beings and their physical environment. Field study will be employed to exercise theories and techniques explored.

LARC 5327. REGIONALISM, CREATIVITY, AND DESIGN. 3 Hours.
This class will cover various readings and discuss inspiring regionalist essays by architects, landscape architects, philosophers, and others in order to shape a set of beliefs (an ideology) that can productively inform the student's trajectory as a creative designer. Students will learn how regionalism makes the life of a designer more interesting and fulfilling as new regional influences in diverse areas are absorbed and become continuing fodder for personal growth and creativity through a long career.

LARC 5330. PLANT IDENTIFICATION AND ECOLOGY. 3 Hours.
Examines the design characteristics and horticultural requirements of a broad palette of plants adapted to the North Texas region. Field trips are required to learn the plants at both ornamental gardens and local ecological communities.

LARC 5331. PLANTING DESIGN. 3 Hours.
Design applications of plant material. Students apply the design problem-solving approach to the detailed aspects of planting design and complete a progressively-more-difficult series of problems to practice techniques and methods of plant manipulation that encompass both the aesthetic, programmatic, environmental, and ecological objectives of planting design. Prerequisites: LARC 5330; LARC 5661; LARC 5662.

LARC 5340. PROFESSIONAL PRACTICE. 3 Hours.
Ethical, legal, and administrative aspects of the public, private, and academic spectrums of practice in landscape architecture.

LARC 5341. LANDSCAPE TECHNOLOGY I. 3 Hours.
Surveying, site grading, storm water management, vertical and horizontal curves and an overview of the construction documentation process employed by landscape architects.

LARC 5342. LANDSCAPE TECHNOLOGY II. 3 Hours.
Examines hardscape materials and methods typical to the practice of landscape architecture, through readings, examinations, design detail exercises, and the creation of a complete set of construction documents. Construction site tours are required with area industry professionals. Prerequisites: LARC 5341.

LARC 5344. PARK AND RECREATION DESIGN AND PLANNING. 3 Hours.
History, data collection, program formulation, and design principles for public and private park and recreation systems and sites. Includes management objectives, operations and maintenance, and public input as planning components.

LARC 5350. LANDSCAPE ARCHITECTURE COMPUTER APPLICATIONS. 3 Hours.
Examines various computer applications currently used in office practice. Computer applications used for office management, site analysis, design development, construction documentation, and cost estimating. Introduction to computer aided design applications and the underlying theories of application. Prerequisite: LARC 5320.

LARC 5351. ADVANCED COMPUTER AIDED DESIGN. 3 Hours.
Focus is on a methodology for designing and illustrating with computer graphics that is very compatible with the design and production workflow of most landscape architecture offices. All work is done in an AutoCAD environment using AutoCAD for modeling and Lumion for rendering still images, interactive panoramas, and both viewpoint and key-frame animations. Photoshop is used for the creation of texture maps, image manipulation and photo-montage. Emphasis is on working intuitively and creatively. Prerequisite: LARC 5350.

LARC 5368. DESIGN PRACTICUM. 3 Hours.
An internship program which includes approved work done in a landscape architect's office or one of the related design fields. The purpose of the practicum is to provide students with practical design experience. Students may enroll in LARC 5368 for half-time employment or LARC 5668 for full time employment.

LARC 5380. RESEARCH METHODS IN LANDSCAPE ARCHITECTURE. 3 Hours.
Theories of practical research and methods of applying them as they relate to landscape architecture. Includes research program development, data collection and analysis, thesis proposal writing, and research tools and techniques. Emphasis is on qualitative methods. Prerequisites: LARC 5661, LARC 5662.

LARC 5382. URBAN DESIGN SEMINAR. 3 Hours.
The Seminar establishes a basic critical understanding, and a critique of urban design by reviewing its past, present and the future as an academic field and an area of practice. The seminar introduces urban design as a transdisciplinary specialization and professional endeavor that encompasses landscape architecture, architecture, city planning, and real estate to shape and influence the built environment primarily within urban context. Students actively present and lead informed discussions on topics such as urban form, urban landscapes, land-use patterns, population density, circulation, legibility, public art, environmental behavior and urban/rural interchange. Field trips are required.

LARC 5391. CONFERENCE COURSE IN LANDSCAPE ARCHITECTURE. 3 Hours.
Special subjects and issues in landscape architecture that may be studied independently under faculty supervision. May be repeated for credit.

LARC 5395. SELECTED TOPICS IN LANDSCAPE ARCHITECTURE. 3 Hours.
Selected studio or lecture course offerings in specific areas of expertise or interest. Course allows the program the flexibility to address the ever-changing needs of students and the profession by offering courses beyond the scope of the core curriculum. May be repeated for credit.

LARC 5397. THESIS PREP. 3 Hours.
Preparation for landscape architecture thesis (design or written) on design, technology, history or professional principles. Students work closely with a landscape architecture faculty advisor and thesis committee to complete the proposal for a written or design thesis and begin thesis work. Prerequisite: LARC 5380.

LARC 5398. THESIS. 3 Hours.
Independent research and presentation of findings under the direction of a supervising committee. The findings of the thesis should extend the boundaries of the professional discipline by either presenting new and unique ideas or information, or by interpreting existing knowledge from a different perspective. Prerequisite: LARC 5397.

LARC 5623. STUDIO TEACHING PRACTICUM. 6 Hours.
Students spend one semester as a teaching assistant in the studio sequence under the supervision of the assigned faculty member. They will observe the methods employed in the studio and prepare a comprehensive evaluation of the studio in conjunction with the instructor. The students will oversee one short studio project and evaluate its success or failure based on the criteria learned in LARC 5323 and the goals and objectives of the test project. Prerequisite: LARC 5323.

LARC 5660. ENRICHMENT DESIGN STUDIO. 6 Hours.
Review of the principles and processes of design presented in Design Studios I, II, and III. Provides an opportunity for students with weak design and graphic skills to improve those skills to meet requirements for Design Studio IV. Course can use design competitions as projects, for advanced students who have completed the studio sequence. May be repeated for credit as specific topics vary. Prerequisite: LARC 5661 and LARC 5662.

LARC 5661. DESIGN STUDIO I. 6 Hours.
A design course for students with no background in landscape architecture or design. Outlines the site planning and site design decision-making process. Focuses on providing students with the verbal, intellectual, and graphic tools necessary to successfully tackle a design problem and bring it to a schematic level of completion. It is highly recommended that this course be taken concurrently with LARC 5320.

LARC 5662. DESIGN STUDIO II. 6 Hours.
A continuation of LARC 5661. Basic design principles and their application to three-dimensional spaces. Examines how humans occupy exterior space and combines this information with the principles of design to create garden scale models. Models are used as a medium for design expression. Landscape character, design simulation, landscape media, landscape context, and human spatial experience are included.

LARC 5663. DESIGN STUDIO III: SITE PLANNING. 6 Hours.
Features the process of solving complicated site planning and site design problems. Each phase of the site planning process is examined in detail by undertaking one or more studio problems that involve resolution of issues related to existing site conditions, program development, conceptual design, design development, and design detailing.

LARC 5664. DESIGN STUDIO IV: ENVIRONMENTAL PLANNING. 6 Hours.
Studio IV is designed to provide the fundamental concepts and mechanisms underlying natural processes, and environmental planning and design. It addresses the influence of both natural and human factors on landscape planning and landscape architectural design within the context of sustainability. The course expands the regional planning and design to the environment as a large scale ecological unit, independent of political boundaries, through the use of Geographic Information System (GIS) and Geodesign framework. Prerequisite: LARC 5341, LARC 5661, LARC 5662, and LARC 5663.

LARC 5665. DESIGN STUDIO V: THE URBAN LANDSCAPE. 6 Hours.
The studio uses both real and hypothetical projects as well as competitions as design problems which require in depth understanding of behavioral, social, environmental, and economic conditions in relation to landscape architecture and urban design. Basic design and planning principles acquired in earlier studios are reiterated, and solutions to new problems on complex urban projects are introduced that benefit from interactions with architects, planners, urban designers, and developers. Prerequisite: LARC 5341, LARC 5342, LARC 5661, LARC 5662, LARC 5663, and LARC 5664.

LARC 5668. DESIGN PRACTICUM. 6 Hours.
An internship program which includes approved work done in a landscape architect's office or one of the related design fields. The purpose of the practicum is to provide students with practical design experience. Students may enroll in LARC 5368 for half-time employment or LARC 5668 for full time employment.

LARC 5691. CONFERENCE COURSE IN LANDSCAPE ARCHITECTURE. 6 Hours.
Special subjects and issues in landscape architecture that may be studied independently under faculty supervision. May be repeated for credit.

LARC 5693. MASTERS DESIGN THESIS. 6 Hours.
Independent research and design/planning investigations, under the direction of a supervising committee, that demonstrate rigorous original thinking. Topics can explore material in a new light or engage research and design practices in ways that strengthen and define the final masters design thesis in relationship to the field. Prerequisite: LARC 5397.

LARC 5698. THESIS. 6 Hours.
Independent research and presentation of findings under the direction of a supervising committee. The findings of the thesis should extend the boundaries of the professional discipline by either presenting new and unique ideas or information, or by interpreting existing knowledge from a different perspective. Prerequisite: LARC 5397.

LARC 5998. THESIS. 9 Hours.
Independent research and presentation of findings under the direction of a supervising committee. The findings of the thesis should extend the boundaries of the professional discipline by either presenting new and unique ideas or information, or by interpreting existing knowledge from a different perspective. Prerequisite: LARC 5397.

COURSES

UDES 1301. INTRODUCTION TO PRINCIPLES OF SUSTAINABLE URBAN DESIGN. 3 Hours.
This course is an introduction to sustainable urban design and its principles through the lenses of the college's four disciplines: landscape architecture, architecture, planning and public affairs. How these disciplines interface with environmental, economic, socio-cultural and design sustainability is the focus of the course, culminating with an exploration of urban ecology.

UDES 1304. DIGITAL METHODS IN SUSTAINABLE URBAN DESIGN. 3 Hours.
This course introduces students to the use of digital tools with a focus on their applications in sustainable urban design. The course will cover a wide spectrum of digital art methodologies: image creation and manipulation; simple animation and sound design; static and moving images; digital fabrication outputs; utilizing both pixel and vector-based applications. Prerequisite: C or better in UDES 1301 and UDES 1341. Restricted to Sustainable Urban Design_INT and Sustainable Urban Design _UNIV students.

UDES 1341. DESIGN COMMUNICATIONS. 3 Hours.
Design Communications is an introduction course to analog and digital representation with emphasis on notational techniques of freehand drawing, proportioning strategies, and analysis. Students will also be exposed to physical and digital model-making, craftsmanship, file organization, orthographic and axonometric delineation, line weights, and digital documentation. Prerequisite: Restricted to SUDBSINT and SUDBS_UNIV majors.

UDES 2441. URBAN DIAGRAMMING AND COMMUNICATION I. 4 Hours.
This course establishes a framework for understanding how design is used to create sustainable urban communities. An interdisciplinary course, its focus is upon heightening student awareness of the built environment by investigative sketching and measuring, as well as by digital means. This process of documenting encompasses the human uses of objects and systems that comprise an urban community: buildings, public spaces, landscape, transportation systems, waterways, and other infrastructure. Issues of social and economic equity are introduced, as well as the roles that human interaction and participation play in successful design strategies. Prerequisite: "C" or better in UDES 1301, credit or concurrent enrollment in UDES 2303. Restricted to Sustainable Urban Design-intended and SUDBS_UNIV students.

UDES 2442. URBAN DIAGRAMMING AND COMMUNICATION II. 4 Hours.
This course continues developing students' abilities to visually document urban environments in relation to urban ecologies, while beginning to investigate how designs are created to address the range of scales and ecological impact in a city, from the individual site to a neighborhood. This course focuses upon the impact of infrastructure upon a city's human and ecological systems, encompassing the plant and animal species that are part of urban environments. Prerequisite: C or better in UDES 1301, UDES 2303, and UDES 2441. Restricted to Sustainable Urban Design-intended students.

UDES 2551. URBAN DESIGN STUDIO I: URBAN RESILIENCY. 5 Hours.
This studio focuses upon the planning and design for disaster recovery and the impact upon infrastructure caused by natural events such as earthquakes, flooding and tornadoes. The studio explores the latest and most reliable recovery strategies for rebuilding and repairing a city's human and ecological systems. Students document streets, waterways, transportation and landscape, examining issues of congestion, pollution, storm water management, and transportation access. Group design projects are based on both the scale of neighborhoods and regions. Prerequisite: C or better in UDES 2442. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

UDES 3303. HISTORY OF URBAN DESIGN, FORM, AND INFRASTRUCTURE. 3 Hours.
This course examines the history of urban design, form and infrastructure in a variety of cities, providing students with an understanding of how decisions about design, form and infrastructure impact the lives of inhabitants. Prerequisite: "C" or better in UDES 3552 and LARC 4324. Restricted to Sustainable Urban Design majors.

UDES 3552. URBAN DESIGN STUDIO II: MOBILITY. 5 Hours.
This studio examines the major shifts in the organization and spatial allocation of cities that are transforming urban mobility infrastructures, from light rail to pedestrian zones to cyclist lanes. The interface of transportation, public open spaces, buildings and landscape architecture is explored as well as issues of diversity, equity, and inclusion. A series of group design projects at the neighborhood scale continues the refinement of students' graphic and written skills. Prerequisite: C or better in UDES 1301, UDES 3551. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

UDES 4304. URBAN SUSTAINABILITY CAPSTONE PREP. 3 Hours.
This course includes preparation for the Urban Sustainable Design Capstone Project which can encompass design thinking, technology, history, or professional principles of Sustainable Urban Design. The course instructor will guide students in selecting a faculty advisor and committee and prepare students to complete a proposal in preparation for the Capstone Project undertaken in the final semester of the program. Prerequisite: C or better in UDES 4551. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

UDES 4391. CONFERENCE COURSE. 3 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the department.

UDES 4395. TOPICS IN SUSTAINABLE URBAN DESIGN. 3 Hours.
Studio and lecture courses to explore and present selected topics in architecture and design. May be repeated for credit as topics change. Prerequisite: Permission of the department.

UDES 4404. URBAN SUSTAINABILITY PROJECT CAPSTONE. 4 Hours.
In the Capstone Course, students will culminate their learning by completing a sustainability project at the Institute for Sustainability and Global Impact (ISGI) at UT Arlington under the supervision of the Chief Sustainability Officer. Student capstone projects will address pressing issues concerning sustainable urban communities. Students may collaborate and work on a project for an external organization, or work on sustainability programs and projects at UT Arlington. Potential capstone sites will range from local non-profits and government agencies to faculty research projects and private sector initiatives. The Capstone Course is a one-semester project. Prerequisite: C or better in UDES 3552. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

UDES 4551. URBAN DESIGN STUDIO III: CLIMATE CHANGE. 5 Hours.
This studio examines specific climate change issues as selected by the instructor. The studio is a recognition of an evolving set of data with shifting timelines and levels of impact for evaluating the ecological impact of climate change, upon the built environment. One of the areas of study will include sea-level rising and its global impact upon coastal cities. The students will engage in problem solving, using contemporary design and planning strategies on a regional scale. Prerequisite: C or better in UDES 3552. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

UDES 4552. URBAN DESIGN STUDIO IV: ADVANCED SUSTAINABLE URBAN DESIGN. 5 Hours.
This studio examines the roles that smart city technologies play in sustainable urban design. The group design projects in the Urban Resiliency and Urban Mobility studios are reassessed, and the course culminates with individual design projects based upon new locations. Prerequisite: C or better in UDES 4551. Restricted to Sustainable Urban Design majors. Students must have a minimum cumulative GPA of 2.8 and a minimum major course GPA of 2.8.

Landscape Architecture - Graduate

Programs

MASTER OF LANDSCAPE ARCHITECTURE DEGREE

- Advanced Standing MLA (p. 170)
- Advanced Standing Landscape Professional MLA (p. 167)
- First Professional MLA (p. 173)

Master of Landscape Architecture (Advanced Standing Landscape Professional)

About This Program

The Master of Landscape Architecture (Advanced Standing Landscape Architecture Professional) allows students with first professional degrees in landscape architecture to enter the research (third year) phase of the curriculum.

The Master of Landscape Architecture is fully accredited by the Landscape Architecture Accreditation Board. Graduates from the Landscape Architecture Program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the State of Texas.

Competencies

1. Proficiency in communication: graduating students will demonstrate proficiency in communicating ideas with visual proficiency.
2. Proficiency in verbal communication: graduating students will demonstrate proficiency in communicating ideas with verbal proficiency.
3. Identification of natural and cultural systems: graduating students will demonstrate the ability to identify the local and regional cultural and natural systems including hydrology for a given design program.
4. Knowledge of computer applications: graduating students will demonstrate proficiency with relevant computer programs.
5. Knowledge of construction materials, methods, technologies and applications: graduating students will demonstrate the ability to produce a set of industry standard construction documents.
6. Advanced written research/communication: graduating students will demonstrate the ability to produce scholarly research in the form of a written and oral thesis.
7. Design comprehension, creativity and rigor: graduates will demonstrate understanding of design processes, comprehension, creativity and rigor.

Admissions Criteria

Applicants must meet the general requirements of the Office of Graduate Studies. A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended. Three letters of recommendation are required and it is suggested that at least two of the letters come from former educators and/or academic contact. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of Landscape Architecture (MLA), Box 19108, Arlington TX 76019.. Applicants also are required to submit scores from the Graduate Record Exam (GRE). Also required is a grade point average (GPA) of 3.00 as calculated by the Office of Graduate Studies.

Selected applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.

Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

UNCONDITIONAL ADMISSION

Applicants must possess a bachelor's degree from an accredited college or university. Transcripts from all previous college or university work, along with scores from the Graduate Record Exam (GRE), and three letters of recommendation are required of all applicants. In addition, applicants should have a minimum Grade Point Average (GPA) of 3.0, as calculated by the Office of Graduate Studies. Applicants holding the first professional degree in landscape architecture, or related fields, must submit a portfolio. Applicants should contact the Landscape Architecture Graduate Advisor (https://www.uta.edu/academics/schools-colleges/cappa/general-advising/grad-advising/) or Program Director regarding this requirement.

Minimum GRE scores of 298-147 verbal and minimum 142 on the quantitative section.

PROVISIONAL ADMISSION

Those who have submitted their applications forms, but whose packets are incomplete, can be admitted provisionally if their GPA meets minimum requirements, and if the Program and the Office of Graduate Studies have received official transcripts. In this case, incomplete materials could include letters of recommendation, GRE scores, and/or portfolios.

PROBATIONARY ADMISSION

Those who have weaknesses with respect to letters of recommendation, GRE scores, and GPA can be admitted on probation, with the condition that they make no less than a B in the first 12 hours of coursework in landscape architecture. Such students must complete no fewer than 9 credits during the semester in which they are on probation.

DEFERRED ADMISSION

Those who have weaknesses in with respect to letters of recommendation, GRE scores, and GPA, and/or who have not submitted all of the materials required for unconditional admission, can have their applications deferred for one semester, until outstanding requirements and criteria are met.

INTERNATIONAL STUDENT ADMISSION

International applicants must meet all admission requirements and be admitted in one of the admission categories described above. In addition, applicants whose native language is not English must have a demonstrated speaking ability in English. They also must meet the Program's minimum required score of 79 on the TOEFL IbT or 6.5 on the IELTS. International applicants who do not meet the Program's minimum TOEFL IbT or IELTS score must complete extramural training in English, as approved by the Program and the Office of Graduate Studies.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted without provisional conditions. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies or a score of 23 on the TOEFL speaking.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarships (https://www.uta.edu/academics/schools-colleges/cappa/admissions/scholarships/) in the program the candidate must admitted without provisional conditions and have a favorable review in most of the evaluation criteria. Fellowships and scholarships in landscape architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships.

FACILITATED ADMISSION OF OUTSTANDING UT ARLINGTON UNDERGRADUATES

The Master of Landscape Architecture offers outstanding graduating students from UTA's Bachelor of Science in Sustainable Urban Design program the opportunity to participate in the Facilitated Admissions program.

Students are recommended for facilitated admission by the Master of Landscape Architecture graduate advisor. To qualify the students must meet the following minimum requirements:

- Graduation from UTA's Bachelor of Science in Sustainable Urban Design (https://www.uta.edu/academics/schools-colleges/cappa/academics/landscape-architecture/bs-sustainability/) program no more than one academic year prior to the semester for which facilitated admission is sought.
  - If the student has not yet graduated from the program, they must be in their final undergraduate semester and have applied for undergraduate graduation.
- Achieved a grade-point average of 3.5 in these calculations:
  - Last 60 hours GPA as calculated in Graduate Admissions for admission purposes,
  - All work completed to date at UTA (cumulative GPA),
  - Within their major (from LARC and UDES courses)

Students who qualify for facilitated admission will be admitted into graduate school without completing the application for admission, submitting the application fee, or taking the GRE or GMAT test. The graduate advisor of the Master of Landscape Architecture program will complete an Facilitated Admission Application on behalf of the student.

Program Completion

MILESTONES

After completing 45 credit hours, the first professional degree student is evaluated by means of an academic review and portfolio review by the Graduate Studies Committee. The committee identifies areas of strength and weakness in the student's performance and recommends appropriate action.

Upon completion of the three core semesters, the student is required to develop an area of specialization or primary interest. The student must consult with faculty advisors to complete this step, which includes a preliminary agreement between student and faculty advisors regarding the specialization or primary interest and the appropriate research method to support it.

DESIGN THESIS OPTION

The design thesis option requires the student to conduct independent research, but also design investigations to demonstrate their capacity for rigorous original thinking. The design thesis, as does the written thesis, will include a research proposal, a written research portion and also design products (analysis and design drawings) that meet the highest standards of academic excellence and contribute significantly to the discipline and profession. Students will take research methods, masters comp/thesis preparation, and design thesis.

ACADEMIC STANDING

LARC 5693 MASTERS DESIGN THESISmany not be taken more than 4 times before a “Fail” grade is assigned and the student has to be reinstated in order to complete their degree.

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their graduate study. Students who complete a Master’s degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student’s record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A student whose cumulative grade point average (GPA) falls below a 3.0 in all courses taken while enrolled as a UT Arlington graduate student may be subject to dismissal (p. 99) from the program.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Our Advising Office supports academic and career success. Explore our Future Students page to connect with an Academic Advisor and shape your future.

Master of Landscape Architecture (Advanced Standing)

About This Program

The Master of Landscape Architecture (Advanced Standing) allows students with degrees and/or professional experience in fields related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning and the like) to enter the second year of the first professional degree curriculum.

Each student will be counseled, based upon interests and background, to develop an appropriate degree plan. An approved degree plan must be submitted no later than the start of the student's second semester of graduate work.

The Master of Landscape Architecture is fully accredited by the Landscape Architecture Accreditation Board. Graduates from the Landscape Architecture Program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the State of Texas.

Competencies

1. Proficiency in communication: graduating students will demonstrate proficiency in communicating ideas with visual proficiency.
2. Proficiency in verbal communication: graduating students will demonstrate proficiency in communicating ideas with verbal proficiency.
3. Identification of natural and cultural systems: graduating students will demonstrate the ability to identify the local and regional cultural and natural systems including hydrology for a given design program
4. Knowledge of computer applications: graduating students will demonstrate proficiency with relevant computer programs.
5. Knowledge of construction materials, methods, technologies and applications: graduating students will demonstrate the ability to produce a set of industry standard construction documents.
6. Advanced written research/communication: graduating students will demonstrate the ability to produce scholarly research in the form of a written and oral thesis
7. Design comprehension, creativity, and rigor: graduates will demonstrate understanding of design processes, comprehension, creativity and rigor.

Admissions Criteria

Applicants must meet the general requirements of the Office of Graduate Studies. A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended. Three letters of recommendation are required and it is suggested that at least two of the letters come from former educators and/or academic contact. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of Landscape Architecture (MLA), Box 19108, Arlington TX 76019.. Applicants also are required to submit scores from the Graduate Record Exam (GRE). Also required is a grade point average (GPA) of 3.00 as calculated by the Office of Graduate Studies.

Selected applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.

Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

UNCONDITIONAL ADMISSION

Applicants must possess a bachelor's degree from an accredited college or university. Transcripts from all previous college or university work, along with scores from the Graduate Record Exam (GRE), and three letters of recommendation are required of all applicants. In addition, applicants should have a minimum Grade Point Average (GPA) of 3.0, as calculated by the Office of Graduate Studies. Applicants holding the first professional degree

in landscape architecture, or related fields, must submit a portfolio. Applicants should contact the Landscape Architecture Graduate Advisor (https://www.uta.edu/academics/schools-colleges/cappa/general-advising/grad-advising/) or Program Director regarding this requirement.

Minimum GRE scores of 298-147 verbal and minimum 142 on the quantitative section.

PROVISIONAL ADMISSION

Those who have submitted their applications forms, but whose packets are incomplete, can be admitted provisionally if their GPA meets minimum requirements, and if the Program and the Office of Graduate Studies have received official transcripts. Master of Landscape Architecture (First Professional Degree)

About This Program

The Master of Landscape Architecture (First Professional Degree) prepares students holding a college degree in a field other than landscape architecture or a related design discipline to complete the requirements for the first professional degree in landscape architecture. The core curriculum provides students with the basic equivalent of a bachelor's degree in landscape architecture. For full-time students with degrees from other non-design disciplines, the core usually takes three semesters to complete. For all students, electives must be concentrated in areas of interest which support the student's thesis and/or the student's professional objectives.

Each student will be counseled, based upon interests and background, to develop an appropriate degree plan. An approved degree plan must be submitted no later than the start of the student's second semester of graduate work.

The Master of Landscape Architecture is fully accredited by the Landscape Architecture Accreditation Board. Graduates from the Landscape Architecture Program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the State of Texas.

Competencies

1. Proficiency in communication: graduating students will demonstrate proficiency in communicating ideas with visual proficiency.
2. Proficiency in verbal communication: graduating students will demonstrate proficiency in communicating ideas with verbal proficiency.
3. Identification of natural and cultural systems: graduating students will demonstrate the ability to identify the local and regional cultural and natural systems including hydrology for a given design program.
4. Knowledge of computer applications: graduating students will demonstrate proficiency with relevant computer programs.
5. Knowledge of construction materials, methods, technologies and applications: graduating students will demonstrate the ability to produce a set of industry standard construction documents.
6. Advanced written research/communication: graduating students will demonstrate the ability to produce scholarly research in the form of a written and oral thesis.
7. Design comprehension, creativity, and rigor: graduates will demonstrate understanding of design processes, comprehension, creativity and rigor.

Admissions Criteria

Applicants must meet the general requirements of the Office of Graduate Studies. A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended. Three letters of recommendation are required and it is suggested that at least two of the letters come from former educators and/or academic contact. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of Landscape Architecture (MLA), Box 19108, Arlington TX 76019.. Applicants also are required to submit scores from the Graduate Record Exam (GRE). Also required is a grade point average (GPA) of 3.00 as calculated by the Office of Graduate Studies.

Selected applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.

Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

UNCONDITIONAL ADMISSION

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point

W = 0.5 deficiency point

A student whose cumulative grade point average (GPA) falls below a 3.0 in all courses taken while enrolled as a UT Arlington graduate student may be subject to dismissal (p. 99) from the program.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Landscape Architecture - Undergraduate

Program

- Sustainable Urban Design BS (p. 177)

Bachelor of Science in Sustainable Urban Design

About This Program

The Bachelor of Science in Sustainable Urban Design degree combines a core liberal arts curriculum with a structured sequence of courses in sustainable urban design, landscape architecture, architecture, planning, and public affairs. In addition to these courses, students within the program select 18 hours of upper-level electives from a list that includes courses from many disciplines within the university.

In their first two years, students will complete a foundation curriculum (basic studies) taken by all undergraduates in the School of Architecture. In addition to work in the arts and sciences, Basic Studies includes all required core curriculum for the degree as well as a series of lecture and studio courses which introduce the student to the concepts, history, skills, and vocabulary of design. Following the two-year basic studies sequence, the student completes two years of major studies, an intensive series of courses and studios on the theory, history, skill, and practice of sustainable urban design.

Competencies

1. Upon completion, students will demonstrate knowledge of environmental sustainability, energy efficiency, and resource conservation
2. Upon completion, students will demonstrate understanding of climate-responsive design, including passive design strategies, energy use, and urban heat island mitigation.
3. Upon completion, students will demonstrate familiarity with green building standards (e.g., LEED, BREEAM) and sustainable construction practices.

Admissions Criteria

Admission to the Sustainable Urban Design basic studies sequence is open to all students meeting the general requirements for entrance to the University.

MAJOR DECLARATION

To declare a major for a fall semester, qualified applicants will submit their request to declare a major in the Academic Advisor’s office at the completion of the spring semester of second year, by the program specified deadline.

Official records of coursework taken at other institutions or universities must be submitted to the CAPPA undergraduate advising office before a student can file a Major Declaration form. It is the student's responsibility to ensure that all coursework is transferred to the Office of Admissions at UT Arlington in a timely manner.

Upon entrance into the major studies programs, students will be required to maintain the minimum 2.8 GPAs both overall at UT Arlington and within the major to remain active and proceed within and complete the program.

Curriculum

Foundations		
General Core Requirements (p. 46)		42
Students must complete specific courses in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Creative Arts select:		
ARCH 1301	INTRODUCTION TO ARCHITECTURE AND INTERIOR DESIGN	
For Language, Philosophy & Culture select:		
GLOBAL 2301	INTRODUCTION TO GLOBAL ISSUES	
For Life & Physical Sciences select 2 from the following: [2]		
BIOL 1334	BIOLOGY FOR NON-SCIENCE MAJORS: LIFE ON EARTH	
ENVR 1301	INTRODUCTION TO ENVIRONMENTAL SCIENCE	
GEOL 1330	GLOBAL WARMING	
GEOL 1301	EARTH SYSTEMS	
GEOL 1340	WEATHER AND CLIMATE	
GEOL 1360	GEOLOGIC HAZARDS	
PHYS 1351	ENERGY AND ENVIRONMENT	
For Mathematics select:		
MATH 1301	CONTEMPORARY MATHEMATICS	
MATH 1303	TRIGONOMETRY	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
or HIST 1331	TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, I	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
or HIST 1332	TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, II	
Sustainable Urban Design Foundations (Basic Studies)		**20**
ARCH 1101	STUDENT SUCCESS	
or UNIV-AR 1131	STUDENT SUCCESS	
UDES 1301	INTRODUCTION TO PRINCIPLES OF SUSTAINABLE URBAN DESIGN	
UDES 1304	DIGITAL METHODS IN SUSTAINABLE URBAN DESIGN	
UDES 1341	DESIGN COMMUNICATIONS	
UDES 2441	URBAN DIAGRAMMING AND COMMUNICATION I	
UDES 2442	URBAN DIAGRAMMING AND COMMUNICATION II	
UDES 2551	URBAN DESIGN STUDIO I: URBAN RESILIENCY	
Sustainable Urban Design Specialization (Major Studies)		**25**
UDES 3303	HISTORY OF URBAN DESIGN, FORM, AND INFRASTRUCTURE	
UDES 3552	URBAN DESIGN STUDIO II: MOBILITY	
UDES 4304	URBAN SUSTAINABILITY CAPSTONE PREP	
UDES 4404	URBAN SUSTAINABILITY PROJECT CAPSTONE	
UDES 4551	URBAN DESIGN STUDIO III: CLIMATE CHANGE	
UDES 4552	URBAN DESIGN STUDIO IV: ADVANCED SUSTAINABLE URBAN DESIGN	
Sustainability Specialization		**21**
Landscape Architecture		
LARC 4300	INTRODUCTION TO LANDSCAPE ARCHITECTURE	

LARC 4324	ENVIRONMENTAL ART AND DATA VISUALIZATION	
LARC 4326	DESIGN AND HUMAN BEHAVIOR	
Planning		
PLAN 4320	SUSTAINABLE COMMUNITIES	
PLAN 4356	INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS	
PLAN 4357	INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS	
Public Affairs		
PAPP 4307	URBAN GEOGRAPHY	
Electives		**12**
Select 4 from the following (some options require prerequisites):		
Architecture		
ARCH 3361	ARCHITECTURE AND ENVIRONMENT [1]	
ARCH 3364	SITE DESIGN [1]	
ARCH 4308	HISTORY OF URBAN FORM [1]	
ARCH 4314	HISTORIC PRESERVATION AND RESTORATION [1]	
ARCH 4332	ENERGY USE AND CONSERVATION IN ARCHITECTURE [1]	
ARCH 4360	POLITICS AND PRACTICE OF PRESERVATION [1]	
Landscape Architecture		
LARC 4301	SITE PLANNING AND DEVELOPMENT PROCESSES	
LARC 4327	REGIONALISM, CREATIVITY, AND DESIGN	
LARC 4330	PLANT IDENTIFICATION AND ECOLOGY	
Interior Design		
INTD 4314	HISTORIC PRESERVATION AND RESTORATION [1]	
Planning		
ESST 2300	INTRODUCTION TO ENVIRONMENTAL & SUSTAINABILITY STUDIES	
PLAN 3301	THE METROPLEX	
PLAN 4305	FOUNDATIONS OF ENVIRONMENTAL PROTECTION AND SUSTAINABILITY	
PLAN 4327	GREEN CITIES AND TRANSPORTATION	
Business		
MANA 1301	BUSINESS IN A GLOBAL ENVIRONMENT	
Engineering		
CE 3300	INTRODUCTION TO SUSTAINABLE ENGINEERING	
CM 2331	CONSTRUCTION DOCUMENTS	
Liberal Arts		
ART 3357	SUSTAINABLE DESIGN	
DS 3355	UNIVERSAL DESIGN & ACCESSIBILITY IN THE PERFORMING ARTS	
HIST 3327	CITIES AND SUBURBS IN THE UNITED STATES	
HIST 3336	ENVIRONMENTAL HISTORY OF THE UNITED STATES	
HIST 3348	HISTORY OF THE DALLAS-FORT WORTH METROPLEX	
THEA 3355	UNIVERSAL DESIGN & ACCESSIBILITY IN THE PERFORMING ARTS	
Science [2]		
BIOL 1334	BIOLOGY FOR NON-SCIENCE MAJORS: LIFE ON EARTH	
GEOG 3380	THE SPATIAL HUMANITIES	
GEOL 1301	EARTH SYSTEMS	
Social Work		
AAST 3353	SOCIAL CLIMATE OF CITIES	
Total Hours		**120**

At least 36 hours must be 3000/4000 level.

1 Must be fully declared into the SUD major studies program for enrollment consideration into upper-level ARCH and INTD classes.

2 Courses on elective list taken as Life and Physical Science requirements cannot count for both. Classes can only be used to fulfill one requirement.

SUGGESTED PLAN OF STUDY

First Year

Fall Semester	Hours	Spring Semester	Hours
ARCH 1101 or UNIV-AR 1131	1	ENGL 1302	3
ARCH 1301	3	MATH 1303	3
ENGL 1301	3	POLS 2312	3
MATH 1301	3	UDES 1304	3
UDES 1301	3	UDES 2441	4
UDES 1341	3		
	16		**16**

Second Year

Fall Semester	Hours	Spring Semester	Hours
GLOBAL 2301	3	HIST 1302	3
HIST 1301	3	POLS 2311	3
PLAN 4356	3	UDES 2551	5
UDES 2442	4	Life & Physical Sciences Core	3
Life & Physical Sciences Core	3	Social/Behavioral Sciences Core	3
	16		**17**

Third Year

Fall Semester	Hours	Spring Semester	Hours
LARC 4300	3	PAPP 4307	3
LARC 4324	3	PLAN 4357	3
PLAN 4320	3	UDES 3303	3
UDES 3552	5	UDES 4551	5
	14		**14**

Fourth Year

Fall Semester	Hours	Spring Semester	Hours
UDES 4304	3	LARC 4326	3
UDES 4552	5	UDES 4404	4
SUD Elective	3	SUD Elective	3
ENVR 1301	3	SUD Elective	3
	14		**13**

Total Hours: 120

FACILITATED ADMISSION TO THE MLA

The Master of Landscape Architecture offers outstanding graduating students from UTA's Bachelor of Science in Sustainable Urban Design program the opportunity to participate in a Facilitated Admissions program. See advisor for details.

Program Completion

In addition to CAPPA Undergraduate Policies (https://catalog.uta.edu/courseleaf/courseleaf.cgi?page=/cappa/index.html&step=undergraduatepoliciestext), the following specific polices apply the Sustainable Urban Design BS.

COMPETENCE IN ORAL PRESENTATIONS

Students obtaining a Bachelor of Science degree in Sustainable Urban Design demonstrate oral proficiency by taking and passing UDES 2551, UDES 3552, UDES 4551, and UDES 4552, or approved equivalents.

COMPETENCE IN COMPUTER USE

Students obtaining a Bachelor of Science degree in Sustainable Urban Design can demonstrate computer proficiency by:

- Taking and passing ENGL 1301 (https://catalog.uta.edu/search/?P=ENGL%201301) or ENGL 1302 (https://catalog.uta.edu/search/?P=ENGL%201302) at UT Arlington in a computer classroom environment or ENGL 3372 (https://catalog.uta.edu/search/?P=ENGL%203372), ENGL 3374 (https://catalog.uta.edu/search/?P=ENGL%203374), CSE 1301 (https://catalog.uta.edu/search/?P=CSE%201301) (or equivalent), or any other class approved by the Undergraduate Assembly.
- Passing the University computer literacy examination.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Public Affairs and Planning

Department Overview

The Department of Public Affairs and Planning (PAPL) offers interdisciplinary programs that prepare students for leadership roles in urban planning, public administration, and public policy. These programs emphasize real-world problem-solving, community engagement, and sustainable development. These programs have a long history, diverse faculty and students, and a dense network of prominent alumni in practice, academia, and research in Texas, the U.S., and around the world.

MISSION

The mission of the Department of Public Affairs and Planning (PAPL) is to provide a stimulating and inclusive environment that fosters intellectual curiosity and rigorous inquiry aimed at strengthening public affairs and urban planning practice. The department prepares students to be leaders in the creation of environmentally and economically sustainable, healthy, and engaged communities.

ACCREDITATION

The Master of Public Administration (MPA) program is accredited by The Network of Schools of Public Policy, Affairs, and Administration (NASPAA), the international accreditation body for the MPA.

The Master of City and Regional Planning (MCRP) is accredited by the Planning Accreditation Board (PAB).

COURSES

PAPP 4307. URBAN GEOGRAPHY. 3 Hours.
Emphasizes real aspects associated with urban physical environments and social, behavioral and financial processes that shape these environments.

PAPP 5160. URBAN MANAGEMENT/PLANNING INTERNSHIP. 1 Hour.
Intended to enhance readiness for professional work through exposure to planning practice in a one semester log internship (100 hrs in the spring or fall semester or 75 hrs in the summer). Integrates work experience and coursework through journaling and reflective practice. Requirements: (1)student secures an internship from a planning related employer and approval from the student's major professor prior to enrolling in the course;(2)the intern must provide performance evaluation by the job supervisor and the intern's evaluation of the internship experience. Enrollment open to students with no previous formal planning experience. Credit not available for previous internship or planning experience. P/F grade.

PAPP 5300. FOUNDATION OF URBAN THEORY. 3 Hours.
Social theories that explain the life cycle of urban communities as they develop, expand, and are sustained or decay are presented and contrasted. Special consideration is given to role of social policy. Topics such as poverty, race, neighborhoods, and environment are addressed.

PAPP 5301. FOUNDATIONS OF URBAN POLITICS AND ECONOMICS. 3 Hours.
Examines the major political and economic institutions and processes in urban communities and their effect on urban policy.

PAPP 5302. FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS. 3 Hours.
An introduction to research methodologies, both quantitative and qualitative, and statistical techniques useful in the analysis of urban trends and administrative programs.

PAPP 5303. THE METROPLEX: SURVEY OF URBAN AFFAIRS, PLANNING, ADMINISTRATION. 3 Hours.
The Metroplex provides an ideal laboratory for study with more than 100 cities and other governmental units, thousands of neighborhoods and business enterprises, major concentration of minorities and dozens of ethnic groups. An in-depth orientation on urban dynamics utilizing senior faculty members, governmental and community leaders, and current research reports and studies.

PAPP 5304. URBAN POLITICS. 3 Hours.
Examination of the city as a political system, including the impact of urbanization and fragmentation on policies; input dimensions, including voting patterns and interest group development; decision-making structures, especially types of community power structures and the impact of the reform movement on structural processes. Also offered as POLS 5305; credit will be granted only once.

PAPP 5305. THEORIES OF URBAN SOCIETY. 3 Hours.
Several theoretical perspectives of the community and community organization examined. Special emphasis given to theories from human ecology, organization and stratification, and social welfare.

PAPP 5306. THE URBAN ECONOMY. 3 Hours.
Internal dynamics of the growth and development of the urban system and its relation to the national economy. National and urban economic policy, urban growth and land use, market imperfections, urban financial issues, and the environmental implications of urban growth studied through lecture, game simulation and policy debates.

PAPP 5307. URBAN GEOGRAPHY. 3 Hours.
Emphasizes real aspects associated with urban physical environments and social, behavioral and financial processes that shape these environments.

PAPP 5308. URBAN HISTORY. 3 Hours.
Extensive reading primarily in the history of the urbanization and metropolitanization of the people of the United States. Historical methods as exemplified in the works of leading historians and analyzed; examples of the scholarship of selected historians and treatises on selected cities, regions, and urban institutions studied.

PAPP 5309. LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING. 3 Hours.
Critical analysis of the implications of federalism, and the changing nature of intergovernmental relations on state and local management, administration, planning, and policy making.

PAPP 5310. URBAN POLICY AND THE LAW. 3 Hours.
Critical analysis of federal government and selected state and local government policies and programs designed to influence the course of change and the future development of cities and urban areas. The role of "private" governments in affecting policy explored.

PAPP 5311. PUBLIC POLICY FORMATION AND ANALYSIS. 3 Hours.
The course covers the policy process, policy formulation and provides an introduction to the tools and techniques of policy analysis, using multiple theoretical and analytical perspectives. The primary focus is on U.S. policy, with an emphasis on state and local policy issues. The course aims to provide students with a foundation in the theory, process, and tools of policy analysis, so that they are able to think critically about applied public policy problems and the role of policy analysts. Students will also gain practical skills in the development and presentation of policy analysis and recommendations.

PAPP 5312. ECONOMIC POLICY. 3 Hours.
Examines structure of the U.S. economic system and its impact on welfare of consumers, workers, and industry; public policy efforts to provide for management of critical economic variables are evaluated for effectiveness and equity as they impact different interest groups.

PAPP 5313. COMMUNITY DEVELOPMENT. 3 Hours.
Focuses on current problems of community development and neighborhood revitalization. Housing, community assets, the roles of community development corporations and social capital in cities, and community economic development will be analyzed. Federal, state, and local policies, with grassroots initiatives evaluated for effectiveness on promoting alternatives for community building and organizing. Also offered as PLAN 5324; credit will be granted only once.

PAPP 5314. HEALTH POLICY. 3 Hours.
Current health policy and programs, examination of historical development, economic and legal aspects, interest groups and health constituencies.

PAPP 5315. URBAN EDUCATION POLICY. 3 Hours.
Examines current education policy and programs, including public school districts, charter schools, and vouchers; economic and political aspects; role of adult education programs in improving human capital.

PAPP 5316. HUMAN SERVICES. 3 Hours.
Social welfare institutions: private and public; needs assessment, resource allocation, procedures, city/state/federal/private policy review; highlights of current system demands and changes. Offered as PLAN 5316 and PAPP 5344; credit will be granted only once.

PAPP 5317. ENVIRONMENTAL POLICY. 3 Hours.
Focuses on the physical environmental dimensions of urbanization including such factors as pollution, waste disposal, and land use; stresses the role of economic, social, and political institutions as these affect environmental quality of the city. Offered as PLAN 5342 and PAPP 5317; credit will be granted only once.

PAPP 5318. SOCIAL WELFARE POLICY. 3 Hours.
Examines recent welfare reform measures (federal, state, and local levels), the political issues behind them, and their influence on urban life. A central topic will be the impact of a changing society on social welfare policy needs, including analyses of labor force participation and family structure.

PAPP 5319. URBAN PROBLEMS. 3 Hours.
Specific urban problems examined in depth, traced to their historical origins to see how they or similar problems have been dealt with in other times and places. Students will then propose possible solutions to the problems in their contemporary form. Offered as PLAN 5347 and PAPP 5319.

PAPP 5320. PUBLIC AND NON-PROFIT ORGANIZATION THEORY. 3 Hours.
Historical evolution of administrative theory including classical, sociological and social-psychological dimensions; decision-making theory; implications of public interest theory for public and non-profit management; basic concepts of organization development and impact on public administration paradigms; new public administration; and future of public and nonprofit urban organization. Also offered as CRCJ 5309 and POLS 5303; credit will be granted only once.

PAPP 5321. URBAN MANAGEMENT. 3 Hours.
Focuses through lectures, readings, and exercises on major administrative process: personnel and policy development and analysis; management styles and key contemporary management problems explored through presentations by prominent local practitioners.

PAPP 5322. POLITICS AND POLICY IN PUBLIC AND NON-PROFIT MANAGEMENT. 3 Hours.
Development of theory of bureaucracy; bureaucracy as social issue; ethics and morality in public and non-profit bureaucracy; mobilization of special interest support; power differentials in urban agencies; policy process in bureaucracy; new bureaucratic structures and processes for urban policy making.

PAPP 5323. MANAGING CHANGE IN PUBLIC AND NON-PROFIT SERVICES. 3 Hours.
Current theories and concepts of public and non-profit organizational change with particular emphasis on organization development and action research; theoretical roots of contemporary change literature traced through readings and discussion of classical organization theory, public administration including New Public Administration decision making, public interest, phenomenology, learning theory and general systems. Prerequisite: Basic organizational theory course or permission of instructor.

PAPP 5324. URBAN PUBLIC FINANCE. 3 Hours.
Local urban governments increasingly rely less and less on support from the state and federal governments. Many local governments rely heavily on a limited number of taxes and fees to finance services. This course explores the variety of revenue sources and fiscal problems of cities and local governments in metropolitan areas. This includes the topics of tax burden and tax equity. The second half of the course focuses on the unique challenges of financing the diversity of activities that cities in particular support, e.g. housing, transportation, economic and community development and human services. Offered as PAPP 5324 and PLAN 5329; credit will be granted only once.

PAPP 5325. ADMINISTRATIVE LAW. 3 Hours.
Examines scope and role of administrative regulation of and by governmental agencies; explores constitutional principles which limit administrative power and administrative law which governs classical areas of conflict between administrative agencies and their constituencies; rule-making, judicial review and informal regulatory processes of importance to public officials.

PAPP 5326. PUBLIC BUDGETING. 3 Hours.
This course introduces students to the principles and practices used by federal, state, and local governments to acquire and spend revenues within the context of American democracy, capitalism, federalism, and economics. The primary objective of this course is to provide students with the practical skills and theoretical knowledge to enable them to be effective participants in the budgeting process and critical consumers and producers of research relevant to public budgeting. Offered as PLAN 5328 and PAPP 5326. Credit will be granted only once.

PAPP 5327. COMPARATIVE ADMINISTRATION AND POLICY. 3 Hours.
Extensive, multidisciplinary exposure to concepts and models of administration in developed and modernizing countries; role of the military, bureaucracy and traditional elites in development; practices and concepts of strategies for effective change.

PAPP 5328. SMALL CITY MANAGEMENT. 3 Hours.
This course will focus on problems peculiar to small cities, including administrative law; personnel, planning; public works, public safety; human services; budget and finance; public relations and parks and recreation.

PAPP 5329. FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES. 3 Hours.
Overview of the principles of finance as they apply to the public and non-profit services, financial reporting for state and local governments and non-profit organizations and evaluation.

PAPP 5330. COMMUNITY AND NEIGHBORHOOD ORGANIZATION. 3 Hours.
Structure and processes in the analysis and development of community and neighborhood organizations; special emphasis given to poverty and minority communities and neighborhoods.

PAPP 5331. LAND USE PLANNING AND THE LAW. 3 Hours.
Explores the law of land use in the context of the American legal, economic, and political systems. Examines leading court decisions and precedents for their background, content, and applicability to contemporary land use. Offered as PLAN 5316 and PAPP 5331. Credit will be granted only once.

PAPP 5332. PUBLIC CAPITAL BUDGETING. 3 Hours.
Examines governmental capital budgeting processes with a focus on understanding the significance of capital improvement planning, public facility investment, and project evaluation to sound infrastructure financing and regional economic growth. Governments purchase or construct long-lasting physical assets or facilities financed mostly through borrowing. This course aims to understand the rationale for public capital budgeting and debt instruments used to finance capital investment in the political context of public budgeting in America.

PAPP 5333. GOVERNMENTAL AND NONPROFIT ACCOUNTING. 3 Hours.
This course is designed as an introduction to governmental and nonprofit accounting. The course reviews major fund accounting principles, accounting for budgetary, revenue, and expenditure funds, accounting for general capital assets and long-term liabilities, accounting for fiduciary and proprietary funds, auditing practices, and financial reporting unique to government and non-profit organizations.

PAPP 5334. MANAGEMENT OF ECONOMIC DEVELOPMENT. 3 Hours.
This course focuses on the knowledge, organization, politics, issues, techniques and processes of local economic development. Emphasis is placed on contemporary issues and trends in the rich, dynamic laboratory of local economic development in Texas. Learning objectives include: 1) comprehension of basic techniques and issues such as strategic planning, leadership strategies, financial options and evaluation; 2) increased knowledge of the positive potential of thoughtful economic development for local environmental, infrastructure, and revenue challenges; and 3) enhanced professional development through individual and classroom exposure to successful practitioners.

PAPP 5341. PROFESSIONAL REPORT WRITING. 3 Hours.
The course aims to build professional writing skills. It reviews memo and report writing including grammatical construction, identifying and writing for a targeted audience, and writing in a clear, concise, and professional style. Also offered as PLAN 5335; credit will be granted for only one.

PAPP 5342. INTERMEDIATE DATA ANALYSIS. 3 Hours.
An intermediate level examination of statistical and research techniques appropriate to urban and social analysis. Presuming a basic understanding of descriptive and inferential statistics, the course covers multivariate regression, including error analysis and non-linear models, path analysis, ANOVA, logit and probit models, and techniques for data reduction (e.g., factor analysis). Offered as PAPP 5342 and PLAN 5317; credit will be granted only once. Prerequisite: PAPP 5302.

PAPP 5343. APPLIED URBAN ANALYSIS. 3 Hours.
Group and individual projects to develop research studies or strategies, data reports for local government, agency or citizen group; techniques appropriate to task utilized. P/F only.

PAPP 5344. QUALITATIVE METHODS. 3 Hours.
The study of qualitative research and analysis methods. Offered as PLAN 5346 and PAPP 5344; credit will be given only once.

PAPP 5345. EVALUATION RESEARCH. 3 Hours.
Methodological issues in evaluating public programs; identification of variables, indicators and analyses formats presented. Prerequisite: PAPP 5302.

PAPP 5346. BIG DATA AND PUBLIC POLICY ANALYSIS. 3 Hours.
An examination of the data competencies and quantitative techniques necessary for policy analysis, with a special emphasis on big data and policy analysis. Increasingly, the rise and aggregation of what is commonly referred to as "big data" has raised many questions about the potential of this data for informing public policy as well as the tools and techniques appropriate for analysis. This course focuses on questions as to what constitutes big data, what sources of big data have relevance for public policy analysis, and concerns related to generalizability, reliability and validity. The course presumes a basic understanding of the basic statistical and research techniques taught in PAPP 5302 and PAPP 5342 (or equivalents from other departments). It builds on this foundation to analyze the tools and techniques appropriate for big data analysis in the field of public policy. The purpose of the course is to prepare students to understand what constitutes big data and evaluate the potential and limitations of its use in policy analysis. Students will be responsible for analyzing a source of big data, evaluating its research potential, and communicating the results of the analysis in a professional manner.

PAPP 5347. DEMOGRAPHIC METHODS. 3 Hours.
Examination of sources of data-census, vital statistics, special surveys, reports, special studies; techniques of analysis with particular emphasis on growth and projection models, interpretation of findings as a major policy area in urban analysis.

PAPP 5348. COST BENEFIT ANALYSIS. 3 Hours.
Reviews theory of cost-benefit and cost-effective analyses; explores the research, measurement and methodological requirements for the assessments of costs and benefits. It is recommended that students have completed at least one graduate course in research and one graduate class in public finance.

PAPP 5349. RESEARCH DESIGN IN PUBLIC POLICY. 3 Hours.
Application of research issues, writing, and communication skills in public policy. Designed to assist students in preparing their research for master's thesis or project report. Also offered as PLAN 5380. Credit can only be granted once.

PAPP 5350. INTRODUCTION TO PUBLIC ADMINISTRATION. 3 Hours.
This is a graduate level introductory course designed to give students an understanding of public administration as a field of academic inquiry and professional practice within the context of American federalism, democratic values, institutional dynamics, and bureaucratic politics. In addition to contextually defining public administration, the course addresses government reform, intergovernmental relations, public ethics, organizational dynamics and behavior, personnel issues, budgeting, and e-governance.

PAPP 5351. HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS. 3 Hours.
The purpose of this course is to familiarize students with key functions of government and non-profit personnel systems, discuss various theoretical approaches and techniques, and understand the major legal requirements of public and non-profit personnel management. The course examines the structure, role, and evolution of the Civil Service, current personnel policies, and personnel management tasks such as examination, recruitment, position classification, and collective bargaining.

PAPP 5352. CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT. 3 Hours.
Labor management at all levels of government and non-profits, ability to work together to solve problems. Emphasis on collective and interest based bargaining, mediation, labor management partnership. Simulation exercises teach dynamics of bargaining, negotiation, problem solving, and small group dynamics.

PAPP 5353. REFORM AND INNOVATION IN URBAN PUBLIC AND NON-PROFIT MANAGEMENT. 3 Hours.
Designed to acquaint students with urban governance and non-profit reform and innovation. Course will explore how reformed government differs from traditional bureaucracy by contrasting it with entrepreneurial government and other innovations. Examines some of the areas most in need of reform, including service delivery, organizational capacity, and fiscal decentralization.

PAPP 5354. NONPROFIT MANAGEMENT AND SOCIAL ENTREPRENEURSHIP. 3 Hours.
This course prepares students to be entrepreneurs, innovators and change leaders by using social entrepreneurship perspective to examine leadership and management practices of nonprofit organizations. Through hands-on experiential training, developing skills in needs assessment, and formulating interventions for social change, students develop a blueprint of a nonprofit organization that takes an innovative approach for sustainable solutions of social problems.

PAPP 5355. NONPROFIT ORGANIZATIONS IN PUBLIC POLICY. 3 Hours.
This course examines non-profits as community institutions with an outward focus: the political, economic, and inter-organizational environment, fund-raising and financial management, community relations and needs assessment, the role of the volunteers, boards and community leaders, marketing, and legal and government issues.

PAPP 5356. ENTREPRENEURSHIP IN PUBLIC AND NON-PROFIT MANAGEMENT. 3 Hours.
Public and non-profit entrepreneurship involves the use of public powers, and partnerships with individuals, firms and other organizations, to achieve public purposes. The focus will be on creative management techniques and methods employed in managing the public and non-profit sectors.

PAPP 5357. STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES. 3 Hours.
Readings and case studies of strategic planning and management in the public and non-profit sectors; application of principles to an actual situation, involving stakeholder identification, environmental scanning, and formulation of mission statements, goals, and strategies. Offered as PLAN 5312 and PAPP 5357. Credit will be granted only once.

PAPP 5358. ETHICS IN THE PUBLIC SERVICE. 3 Hours.
This course examines public service theoretical ethics literature to provide a basis for each student to both reflect upon and expand their comprehension of the values and processes of ethical decision making. Beyond theoretical works, it addresses the application and evaluation of theory against the professional, workaday reality of case studies, ethical codes and other relevant materials. Three major learning objectives are: 1) achievement of a solid understanding of the dominant theoretical perspectives in the public service ethics literature; 2) competency in the development of guidelines and procedures that encourage ethical behavior, and 3) enhancement of the reach and resiliency of each member's personal commitment to public service ethics.

PAPP 5359. ORGANIZATIONAL DIAGNOSIS. 3 Hours.
This class deals with tools and techniques necessary to manage public organizations. The learning objectives include ability to conduct an organizational diagnostic; and familiarity with group procedures and facilitation techniques involved in organizational change.

PAPP 5360. PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP. 3 Hours.
Designed to integrate work experience and coursework through a series of brief work-related assignments; presentations by local planning and management practitioners and class discussions and exercises. Enrollment is open to both pre-entry and in-career students. Formal internship placements with agency mentors will be arranged. P/F only.

PAPP 5361. INTERNATIONAL ORGANIZATIONS. 3 Hours.
The course focuses on the rise of governmental and nongovernmental organizations in geopolitics, international development, and environmental management. It analyzes their institutional histories, their organizational structures and cultures, and their role as institutional policy actors in the global diffusion of policy initiatives and managerial knowledge and practices.

PAPP 5362. URBAN DIVERSITY. 3 Hours.
Examines the growing spatial and social diversity of cities; how physical as well as socioeconomic urban structures have fostered race, class, and gender inequalities; how urban policies have addressed and can address these issues. Offered as PLAN 5362 and PAPP 5362.

PAPP 5363. CIVIL RIGHTS AND URBAN MINORITIES. 3 Hours.
Examines the changes in and growth of the civil rights of minorities in the United States from the close of the Civil War to the present. This is accomplished through the study of court decisions, legislation, and the civil rights movement in the 1950s and 1960s, as seen through the eyes of contemporary writers, including William Faulkner, Alice Walker, and Alex Haley.

PAPP 5364. URBAN POLITICAL ECONOMY. 3 Hours.
Examines the theoretical bases of economic paradigms and the different economic policies that logically flow from them. Comparison is made between the orthodox, or neoclassical, model of economics and alternative heterodox models, including comparing the growth and development of the urban system, land use patterns, and economic policy debates. Consideration will be given to how and why the neoclassical model remains the dominant model for economic policy in Western, capitalist countries.

PAPP 5365. FOUNDATIONS OF ENVIRONMENTAL POLICY. 3 Hours.
Explores how environmental controversy is rooted in conflict between a number of schools of environmental policy thought with divergent perspectives on issues such as how to define progress, how to balance the needs of economy and ecosystem, how to cope with environmental complexity, and what role science should play in environmental affairs. Also offered as PLAN 5343; credit will be granted only once.

PAPP 5366. US IMMIGRATION POLICIES AND PLANNING FOR IMMIGRANTS. 3 Hours.
A seminar course where weekly readings would include: perspectives on international migration theory; the evolution of US immigration policy and national security; theories and urban issues related to immigrant assimilation and incorporation; urban ethnic economies and ethnic enclaves; segregation and housing of immigrants; globalization and immigrant labor networks; governance issues with providing education and other public services to immigrants and their children; and social work issues regarding generational conflict in immigrant families.

PAPP 5367. STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT. 3 Hours.
This course is designed to acquaint students with the theory and practice of strategically developing, utilizing, and aligning human resources so that maximum contribution from each member of an organization is used toward the attainment of strategic long-range goals and objectives. Topics include HR strategy, diversity, leadership, selection, training and development, compensation, classification, performance appraisal, and future practices for public and non-profit organizations.

PAPP 5368. PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS. 3 Hours.
The course examines the rights and obligations of employers and employees. It does this by examining the legal background pertinent to public and nonprofit management. Topics addressed include employee selection, promotion and discipline, anti-discrimination legislation, gender and family issues legislation, environmental, safety and health issues, whistleblower legislation, immigration law, worker's compensation, labor law, and drug and alcohol issues.

PAPP 5390. TOPICS IN URBAN THEORY. 3 Hours.
Different topics explored on an intensive basis, especially recent theoretical approaches. May be repeated for credit as topic changes.

PAPP 5391. TOPICS IN URBAN POLICY. 3 Hours.
Different topics and approaches in analysis of urban problems. May be repeated for credit as topic changes.

PAPP 5392. TOPICS IN URBAN MANAGEMENT. 3 Hours.
Selected topics on current management problems including small city management, community-neighborhood relations, citizen involvement programs and techniques, personal and professional effectiveness as a total person, intergovernmental strategies and styles, public-private sector collaboration and co-planning, privatization, and other alternatives to economic service delivery. May be repeated as topic changes.

PAPP 5394. SPECIAL TOPICS IN URBAN RESEARCH. 3 Hours.
Different topics each semester concentrate on a variety of methodological techniques and research strategies, such as demographic research and survey techniques. May be repeated for credit as topic changes.

PAPP 5395. CONFERENCE COURSE IN URBAN AFFAIRS. 3 Hours.
Reading and research in a specialized area of urban affairs under the direction of a member of the graduate faculty.

PAPP 5396. PROJECT REPORT. 3 Hours.
Student prepares report focusing on specific policy or professional issue, utilizing appropriate research techniques; subject area and design of project report with consent of instructor. Graded P/F/R only.

PAPP 5397. RESEARCH REPORT. 3 Hours.
Student prepares report comparable to a journal article focusing on research issue, utilizing appropriate theory and research techniques; subject area and design of research report with consent of instructor. Graded P/F/R only. Prerequisite: PAPP 5342.

PAPP 5398. THESIS. 3 Hours.
A thesis conforming to University and departmental requirements may be prepared by graduate students in urban affairs. Graded F, R.

PAPP 5399. PUBLIC ADMINISTRATION CAPSTONE. 3 Hours.
This integrative applied research course assesses the student's ability to analyze, synthesize, and formulate cogent recommendations to solve a real public sector problem. Students will write the capstone paper using concepts drawn from the MPA core curriculum, their chosen emphasis track, and the student's professional public work experience. Students are required to successfully defend their capstone paper before a Public Administration Forum consisting of CAPPA faculty, students, and other interested parties. Prerequisite: Completion of all other course work required for the MPA degree, including core courses and emphasis area courses, unless an exception is approved by the MPA advisor.

PAPP 5698. THESIS. 6 Hours.
A thesis conforming to University and departmental requirements may be prepared by graduate students in urban affairs. Graded P/F/R.

PAPP 6301. RESEARCH FOUNDATIONS AND PH.D. WORKSHOP. 3 Hours.
Explores the development and function of theoretical models and frameworks. Examines the major theories from the social sciences designed for framing urban planning or administration issues and public policy. Designed to assist doctoral students in preparing their dissertation research. Opportunities to present work in progress, share ideas, and interact with faculty. Also offered as PLAN 6301; credit will be granted only once. Prerequisite: PLAN 5346; and PLAN 5317 or PAPP 5342.

PAPP 6305. ADVANCED THEORIES OF URBAN SOCIETY. 3 Hours.
Advanced theoretical perspectives of the community and community organization are examined. Special emphasis given to theories from human ecology, organization and stratification, and social welfare.

PAPP 6306. THE URBAN ECONOMY. 3 Hours.
Study of theories that explain the structure, growth and change of urban economies.

PAPP 6307. URBAN GEOGRAPHY. 3 Hours.
Emphasizes real aspects associated with urban physical environments and social, behavioral, and financial processes that shape these environments.

PAPP 6309. INTERGOVERNMENTAL RELATIONS IN THE ADMINISTRATION AND PUBLIC POLICY. 3 Hours.
The course explores the constitutional, political and fiscal relationships among the federal, state and local levels of government. How the relationships impact the administration of urban public policy is of primary focus.

PAPP 6310. MONETARY AND FISCAL POLICY: THE FEDERAL ROLE. 3 Hours.
Examination of the role of the federal government in maintaining economic stability, ensuring full employment and controlling inflation; exploration of liberal interventionist, conservative and radical theories of state economic management to assess the various policy alternatives and the importance of interest groups.

PAPP 6311. ADVANCED PUBLIC POLICY FORMATION AND ANALYSIS. 3 Hours.
The course covers policy process, policy formulation and policy analysis, using multiple theoretical and analytical perspectives. The primary focus is on U.S. policy, with an emphasis on state and local policy issues. The course aims to provide students with advanced knowledge in the theory, process, and tools of policy analysis essential in critiquing and researching public policy. Students will also gain advanced skills in the development and presentation of policy analysis and recommendations.

PAPP 6314. SEMINAR IN POLICY PROCESSES. 3 Hours.
The course focuses on the political, economic, and sociological institutions in the policy process, including various theoretical approaches, and application of these multidisciplinary perspectives in the analysis of specific policy issues.

PAPP 6315. PUBLIC ADMINISTRATION THEORY. 3 Hours.
This course is designed to critically examine public administration theory through the lenses of various governance models that have been proposed beginning with Weber's "ideal"; bureaucratic model through Osborne and Gaebler's market model to Fox and Miller's postmodern discourse model. The course begins by examining each governance model's stated or implied assumptions (about man, government, state, etc.) Second, the course considers the political philosophy and conceptual pillars on which the models are theoretically founded. Finally, the course examines the ideas of what constitutes a state as it might be relevant to a particular model and public administration.

PAPP 6316. SEMINAR IN PUBLIC ADMINISTRATION. 3 Hours.
Final course in the public administration field, focuses on review and integration of the theories that explain the structure, growth and change of public administration.

PAPP 6320. ADVANCED ORGANIZATION THEORY. 3 Hours.
The purpose of this advanced seminar is to examine the role of public agencies as organs of the State. It focuses on federal, urban, and nonprofit organizations. Learning objectives include understanding of interpretive, critical, and postmodern critiques of State's institutions; and application of power, knowledge, and gender lenses to the analysis of organizational practices, culture, and policy actions. Prerequisite: PAPP 5320 or PAPP 5323.

PAPP 6326. PUBLIC BUDGETING & FINANCE. 3 Hours.
The primary objective of this seminar is to provide students with the theoretical underpinnings of budgeting and financial management in the public sector. Students will engage in in-depth discussions of public budgeting and financial management topics drawn from economics, decision-making models, urban politics, federalism, and others to be able to have a sound understanding of how fiscal decisions affect public administration and policy.

PAPP 6340. RESEARCH DESIGN. 3 Hours.
Advanced course especially for Ph.D. students; covers logic of research design and problems of structure. Emphasis on empirical and quantitative studies.

PAPP 6342. INTERMEDIATE DATA ANALYSIS. 3 Hours.
An intermediate level examination of statistical and research techniques appropriate to urban and social analysis. Presuming a basic understanding of descriptive and inferential statistics, the course covers multivariate regression, including error analysis and non-linear models, path analysis, Analysis of Variance (ANOVA), logit and probit models, and techniques for data reduction (e.g., factor analysis). Also offered as PAPP 5342, PLAN 5317, and PLAN 6317; credit will be granted only once. Prerequisite: PAPP 5302.

PAPP 6344. QUALITATIVE METHODS. 3 Hours.
The study of qualitative research and analysis methods. Offered as PAPP 6344 and PLAN 6347; credit will be given only once.

PAPP 6346. ADVANCED DATA ANALYSIS IN URBAN AND PUBLIC AFFAIRS. 3 Hours.
An introduction to selected advanced techniques related to planning analysis. Subjects include advanced applied regression analysis, multivariate logit analysis, and multinomial logistic regression. Applications of projection techniques, land use and transportation models, and methods of regional analysis. Offered as PLAN 6346 and PAPP 6346. Credit will be given only once.

PAPP 6349. DECISION MAKING AND PUBLIC POLICY ANALYSIS. 3 Hours.
This course explores the theoretical, practical, and topical connections between public policy and public administration through a decision-making lens. The objectives of the course are to enable students to identify, critique, and connect the theoretical and meta-theoretical assumptions of decision-making models to models of public policy analysis and public administration. Course objectives will be pursued through readings, seminar discussions, and research-based assignments that focus on the intersection between decision-making, public policy, and public administration.

PAPP 6399. DISSERTATION. 3 Hours.
Graded F/R only.

PAPP 6699. DISSERTATION. 6 Hours.
Graded F/R/P/W only.

PAPP 6999. DISSERTATION. 9 Hours.
Graded P/F/R.

PAPP 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken twice. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

PLAN 1301. INTRODUCTION TO URBAN LIFE. 3 Hours.
An examination of major urban problems, opportunities, and policy issues including crime, transportation, housing, education, welfare, and the environment with emphasis on racial, ethnic, and cultural diversity issues and alternative future possibilities; and an examination of the major political, social, and economic challenges facing contemporary urban planners and administrators - with emphasis on the interrelations among the national, state, and local governments.

PLAN 3301. THE METROPLEX. 3 Hours.
An in-depth orientation to urban dynamics, using as a case study the Dallas/Fort Worth metroplex - with its hundreds of cities, governmental units, neighborhoods, and business enterprises as well as its major concentrations of racial minorities and ethnic groups. Special attention is paid to the changing patterns of growth and demography occurring in the Dallas/Fort Worth metropolitan area and the impact of these on emerging social, political, and economic issues of this area. Emphasis also placed on career specializations and professional opportunities in the urban context.

PLAN 4305. FOUNDATIONS OF ENVIRONMENTAL PROTECTION AND SUSTAINABILITY. 3 Hours.
The organization, structure and practice of environmental protection at the federal, state and local levels of government. Course will develop a full understanding of how the goals of protecting human health and the environment are achieved through the implementation of environmental law, policy, practice, enforcement and collaboration among governmental entities, industry, environmental groups and the general public. Wide ranging use of case studies will be made and full engagement in new developments in the era of climate change will be achieved.

PLAN 4310. PLANNING THE AMERICAN CITY. 3 Hours.
Students in this course will develop an understanding of the role of the private and public sectors in the development and management of the American city. It will consider such topics as the organization of city government, demographic, economic, and physical conditions analysis, land use planning, the quality of the urban environment, urban redevelopment, urban design, and regional planning. An off-campus service learning component is a key required element of this course.

PLAN 4320. SUSTAINABLE COMMUNITIES. 3 Hours.
This course explores broad environmental and social issues in sustainable communities. Potential topics include urban water management, food and resources, wildlife conservation, native landscaping, waste management, green building, housing diversity, public transportation, and community participation. The course serves as a laboratory for working with governmental and non-governmental organizations in the DFW area and developing issue-based, action research projects to solve real-world problems in our communities. This hands-on course combines lectures, student-led discussions, site visits, and collaborative teamwork for service-learning projects.

PLAN 4327. GREEN CITIES AND TRANSPORTATION. 3 Hours.
Concepts of green cities and transportation, environmental and transportation challenges, and schools of thought on causes of environmental and transportation problems, with emphasis on planning practices and policies in relation to environmental and transportation issues and roles of planners in shaping urban landscape and infrastructure. Prerequisite: Junior standing. Department consent.

PLAN 4356. INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
Introduction to GIS and the application of computer graphics systems in the storage, processing, and retrieval of geographic urban and regional information; case examples and related projects and issues of system management.

PLAN 4357. INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
Applications of GIS to typical urban and regional geographic information problems and projects. Prerequisite: PLAN 4356.

PLAN 4391. INDEPENDENT STUDY. 3 Hours.
Independent study guided by an instructor on a regular basis. May be repeated for credit. Prerequisite: permission of the instructor.

PLAN 4394. COMMUNITY RESEARCH & APPLICATION. 3 Hours.
Exposes students to research methods typically employed in planning and to their application to a community-based research project.

PLAN 4395. STUDIES IN PLANNING. 3 Hours.
Advanced studies in various subjects of city and regional planning. May be repeated for credit as topic varies. Prerequisite: Consent of the instructor.

PLAN 5160. URBAN MANAGEMENT/PLANNING INTERNSHIP. 1 Hour.
Intended to enhance readiness for professional work through exposure to planning practice in a one semester log internship (100 hrs in the spring or fall semester or 75 hrs in the summer). Integrates work experience and coursework through journaling and reflective practice. Requirements: (1)student secures an internship from a planning related employer and approval from the student's major professor prior to enrolling in the course;(2)the intern must provide performance evaluation by the job supervisor and the intern's evaluation of the internship experience. Enrollment open to students with no previous formal planning experience. Credit not available for previous internship or planning experience. P/F grade.

PLAN 5191. CONFERENCE COURSE. 1 Hour.
Special subjects and issues as arranged by individual students and faculty members. May be repeated for credit.

PLAN 5193. MASTER'S COMPREHENSIVE EXAMINATION. 1 Hour.
Directed study, consultation and comprehensive examination over coursework leading to thesis substitute for MCRP degree. Required of all thesis substitute students who were admitted to the MCRP program prior to Fall 2009 and who are not enrolled in thesis or other thesis substitute courses during semester in which they plan to graduate. Students beginning the MCRP program in Fall 2009 or after may not choose the Master's Comprehensive Examination as a thesis substitute option and may not enroll in this course.

PLAN 5197. PROFESSIONAL REPORT. 1 Hour.
Preparation of final professional report as a thesis substitute for MCRP degree. Required of all thesis substitute students not enrolled in PLAN 5193.

PLAN 5297. PROFESSIONAL REPORT. 2 Hours.
Preparation of final professional report as a thesis substitute for MCRP degree. Required of all thesis substitute students not enrolled in PLAN 5193.

PLAN 5300. FOUNDATIONS OF URBAN THEORY. 3 Hours.
Spatial development of human settlements, their life cycles, expansion, and decay. Covers key theories of social, spatial, and economic structures of cities, nineteenth century to present. Considers influences of urban form and development on class, race, gender, and community.

PLAN 5303. PLANNING HISTORY, THEORY AND ETHICS. 3 Hours.
Various theories of planning including rational comprehensive, communicative action, social learning, and radical planning. Sets theories within their historical contexts, and examines the social and political details of each era to show the development of diverse planning practices and theories of planning. Evaluates the values embodied in different theories and their relationship to practice and social justice, including planning ethics as contained in the AICP Code of Ethics and Professional Conduct.

PLAN 5304. PLAN IMPLEMENTATION, ZONING, AND REGULATIONS. 3 Hours.
Introduction to plan preparation and implementation. Topics include zoning, subdivision regulations, form-based codes, site planning, strategic planning, and comprehensive planning.

PLAN 5305. LAND USE, MANAGEMENT AND DEVELOPMENT. 3 Hours.
Assesses land use, management and development and considers new directions. Relates comprehensive planning, environmental management, and land use.

PLAN 5306. URBAN REVITALIZATION. 3 Hours.
Examines various urban revitalization projects from coordinated, large-scale ventures to grassroots and informal neighborhood initiatives. Emphasis on the history, logic, politics, and implementation of these projects as well as their physical, social, and economic outcomes.

PLAN 5307. URBANIZATION IN THE DEVELOPING WORLD. 3 Hours.
Explores the social, political and spatial dimensions of urbanization processes in developing countries. Covers urban, social, and cultural movements as well as development, processes of urban-rural migration, and globalization. The course will cover all developing regions of the world with an emphasis on Latin American countries.

PLAN 5308. METROPOLITAN SUSTAINABILITY AND PLAN MAKING. 3 Hours.
Provides the background for sustainability planning at the city and metropolitan levels including plan making (e.g., comprehensive plans, small area plans, functional plans, etc.). Explores the relationship of environmental sustainability to economic vitality and social equity including planning ethics.

PLAN 5309. TRANSPORTATION/LAND USE MODELING AND POLICY ANALYSIS. 3 Hours.
Overview of transportation/land use with specific transportation models and simulation methods; topics include economic theory of travel demand, land use models, UTPS framework for travel demand estimation, disaggregated travel demand models and abstract mode models.

PLAN 5310. PLANNING, URBAN DEVELOPMENT AND STRUCTURE. 3 Hours.
Overview of functional areas of planning (e.g., urban design, housing, transportation, etc.); fundamentals of urban structure and development of cities and regions including environmental, social, economic, and political factors and issues affecting urban settlements; global dimensions of planning.

PLAN 5311. ELEMENTS OF URBAN DESIGN. 3 Hours.
Study of contemporary urban form and environmental design, emphasizing visual-spatial qualities, social needs and economic linkages. Examination of processes, methods and techniques for solving urban design problems.

PLAN 5312. STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES. 3 Hours.
Readings and case studies of strategic planning and management in the public and non-profit sectors; application of principles to an actual situation, involving stakeholder identification, environmental scanning, and formulation of mission statements, goals, and strategies. Offered as PLAN 5312 and PAPP 5357. Credit will be granted only once.

PLAN 5313. URBAN GROWTH POLICIES. 3 Hours.
Study of the political, societal and physical policies involved in urban growth management.

PLAN 5315. TRANSPORTATION POLICIES, PROGRAMS AND HISTORY. 3 Hours.
Transportation and related programs and policies in relation to city development and housing patterns. Interdependencies of land use, building development, and social change are explained as transportation-related.

PLAN 5316. LAND USE PLANNING AND THE LAW. 3 Hours.
Explores the law of land use in the context of the American legal, economic, and political systems. Examines leading court decisions and precedents for their background, content, and applicability to contemporary land use. Offered as PLAN 5316 and PAPP 5331. Credit will be granted only once.

PLAN 5317. INTERMEDIATE DATA ANALYSIS. 3 Hours.
An intermediate level examination of statistical and research techniques appropriate to urban and social analysis. Presuming a basic understanding of descriptive and inferential statistics, the course covers multivariate regression, including error analysis and non-linear models, path analysis, Analysis Of Variance (ANOVA), logit and probit models, and techniques for data reduction (e.g., factor analysis). Offered as PAPP 5342 and PLAN 5317; credit will be granted only once. Prerequisite: PAPP 5302.

PLAN 5318. TECHNIQUES OF PLANNING ANALYSIS I. 3 Hours.
Introduction to analytical techniques used in urban and regional planning. Topics include: census data and geography and introduction to GIS, demographic analysis, cost-benefit analysis, economic base analysis, gravity models, and displaying and communicating data analysis and results in graphic, written, and oral forms.

PLAN 5319. AGENCIES OF PLANNING AND ADMINISTRATION. 3 Hours.
Contemporary managerial functions involved in running public, private, or non-profit organizations: goal setting, planning, organizing, delegating and motivating others, personal productivity and motivation, time and stress management, controlling, and project management.

PLAN 5320. DATABASE MANAGEMENT FOR URBAN PLANNING AND ADMINISTRATION. 3 Hours.
Concepts and computer applications of data management. Topics include data sources, data models, database design, data query, data analysis, and database management techniques for urban planning, management and administration. Credit will be given only once.

PLAN 5321. VISUAL BASIC AND GIS. 3 Hours.
Provides an introduction to the techniques and applications of computer graphics and mapping for presenting socioeconomic information in graphic and spatial form.

PLAN 5322. ECONOMIC DEVELOPMENT PLANNING AND POLICY. 3 Hours.
Introductory seminar in subnational economic development programs in the U.S. Covers basics of location theory, economic planning, budgeting, incentives, public and private revenue sources, analysis methods such as central place and economic base, intergovernmental efforts, redevelopment, high tech, trade and/or tourism.

PLAN 5323. HISTORIC PRESERVATION. 3 Hours.
Covers elements of historic designation, rehabilitation, financial incentives, district regulations, and preservation impacts.

PLAN 5324. COMMUNITY DEVELOPMENT. 3 Hours.
Focuses on current problems of community development and neighborhood revitalization. Housing, community assets, the roles of community development corporations and social capital in cities, and community economic development will be analyzed. Federal, state, and local policies, with grassroots initiatives evaluated for effectiveness on promoting alternatives for community building and organizing. Also offered as URPA 5313; credit will be granted only once.

PLAN 5325. PHYSICAL PLANNING AND URBAN DESIGN. 3 Hours.
Introduction to basic concepts in urban design and physical planning. Provides an understanding of how built environments evolve, and how they can be creatively planned and designed so as to meet social and ecological goals. Special attention to principles and analyses related to the physical planning of neighborhoods and streets, as well as patterns of urban form and public places.

PLAN 5326. CULTURAL PLANNING AND URBAN DEVELOPMENT. 3 Hours.
This course examines 1) the composition of the creative economy in cities around the world, 2) arts, culture, and creative economy planning and policy efforts at the neighborhood, city, and regional levels, and 3) the social, spatial and political ramifications of these efforts and of the creative economy broadly.

PLAN 5327. GREEN CITIES AND TRANSPORTATION. 3 Hours.
Concepts of green cities and transportation, environmental and transportation challenges, and schools of thought on causes of environmental and transportation problems, with emphasis on planning practices and policies in relation to environmental and transportation issues and roles of planners in shaping urban landscape and infrastructure.

PLAN 5328. PUBLIC BUDGETING. 3 Hours.
This course introduces students to the principles and practices used by federal, state, and local governments to acquire and spend revenues within the context of American democracy, capitalism, federalism, and economics. The primary objective of this course is to provide students with the practical skills and theoretical knowledge to enable them to be effective participants in the budgeting process and critical consumers and producers of research relevant to public budgeting. Offered as PLAN 5328 and PAPP 5326. Credit will be granted only once.

PLAN 5329. PUBLIC CAPITAL BUDGETING. 3 Hours.
Examines governmental capital budgeting processes with a focus on understanding the significance of capital improvement planning, public facility investment, and project evaluation to sound infrastructure financing and regional economic growth. Governments purchase or construct long-lasting physical assets or facilities financed mostly through borrowing. This course aims to understand the rationale for public capital budgeting and debt instruments used to finance capital investment in the political context of public budgeting in America. Offered as PAPP 5332 and PLAN 5329; credit will be granted only once.

PLAN 5330. TECHNIQUES OF PLANNING ANALYSIS II. 3 Hours.
Introduction to research methods, both quantitative and qualitative and mixed methods. Relating planning problem identification and definition with appropriate method of data gathering and analysis. Analysis and interpretation of qualitative and quantitative data including interview and small group techniques, and basic statistical analysis. Communication of analysis results in graphic, written, and oral forms.

PLAN 5331. GIS WORKSHOP. 3 Hours.
Skills, practical experience, problem-solving methods and techniques in geographic information systems. Capstone course for GIS Certificate Program; substitutes for one Project Planning Course. Prerequisite: PLAN 5357.

PLAN 5332. PROJECT STUDIO. 3 Hours.
Studio course working on applied city and regional planning projects within the Dallas-Fort Worth area or elsewhere. Provides students with practical experience in collaborative teamwork and the application of skills, methods, and techniques in city and regional planning, including citizen participation, problem analysis, mapping, design, presentation, working with clients, and applied planning process. Should be taken in the second half of the student's program of study, with exceptions for those with applied planning experience. May be repeated as topic changes.

PLAN 5333. GRAPHICS AND MULTIMEDIA COMMUNICATION IN PLANNING. 3 Hours.
Builds skills in the use and application of contemporary graphic techniques that enable planners to visually communicate and display data, design concepts and ideas as solutions to planning problems. Training in the use of various graphic communication and multimedia software, including online web media and print media.

PLAN 5335. PROFESSIONAL WRITING. 3 Hours.
Builds student writing skills in professional communication of ideas and information. Includes review of basic writing skills, grammatical construction, report and memo writing based on current standardized formats; considering the role of audience, writing in a clear, concise and professional style; emphasizes revising writing assignments for effective communication. Also offered as PAPP 5341; credit will be granted for only one.

PLAN 5340. GIS AND SUITABILITY ANALYSIS. 3 Hours.
Acquaints students with theoretical and practical aspects of suitability analysis process or activity allocation on land use/environmental policies. Uses Geographic Information System (GIS) and computer models for overlaying map analysis, buffering, market demand and activity locations, etc. to incorporate environmental and ecological factors into the determination of land development potential including soils, slope, drainage, vegetation, and related factors.

PLAN 5341. ENVIRONMENTAL REGULATIONS: LAWS AND PLANNING. 3 Hours.
Federal, state, and local environmental regulations which have effect on the practice of city and regional planning. Specific articles, laws, and directives contrasted and compared to local city design and development controls. Subjects include CERCLA, RCRA, SARA, TSCA, OSH Act, among others.

PLAN 5342. ENVIRONMENTAL POLICY. 3 Hours.
Focuses on the physical environmental dimensions of urbanization including such factors as pollution, waste disposal, and land use; stresses the role of economic, social, and political institutions as these affect environmental quality of the city. Offered as PLAN 5342 and PAPP 5317; credit will be granted only once.

PLAN 5343. FOUNDATIONS OF ENVIRONMENTAL POLICY. 3 Hours.
Explores how environmental controversy is rooted in conflict between a number of schools of environmental policy thought with divergent perspectives on issues such as how to define progress, how to balance the needs of economy and ecosystem, how to cope with environmental complexity, and what role science should play in environment affairs. Also offered as URPA 5365; credit will be granted only once.

PLAN 5344. HUMAN SERVICES PLANNING. 3 Hours.
Social welfare institutions: private and public; needs assessment, resource allocation, procedures, city/state/federal/private policy review; highlights of current system demands and changes. Also offered as URPA 5316.

PLAN 5345. PLANNING AND REAL ESTATE DEVELOPMENT. 3 Hours.
The goals, strategies, methods, and achievements of major participants in the urban land and building markets are examined. Land owners, speculators, real estate brokers, developers, bankers, lawyers, non-profit builders, and government agencies are studied, as well as such business tools as: market and feasibility analysis, appraisal techniques, proforma analysis, and others.

PLAN 5346. QUALITATIVE METHODS. 3 Hours.
The study of qualitative research and analysis methods. Offered as PLAN 5346 and PAPP 5344; credit will be given only once.

PLAN 5347. URBAN PROBLEMS. 3 Hours.
Specific urban problems examined in depth, traced to their historical origins to see how they or similar problems have been dealt with in other times and places. Students will then propose possible solutions to the problems in their contemporary form. Offered as PLAN 5347 and PAPP 5319.

PLAN 5350. ENVIRONMENTAL PLANNING. 3 Hours.
Overview of environmental planning issues and problems, including basic ecological principles; development and effects of the chemical industry; policies on international issues; environmental justice and ethics; environmental economics, including externalities and public goods; sustainable development; overviews of planning for air quality, water quality, solid waste, pollution prevention, habitat conservation, etc.; and plan implementation, including enforcement, regulation and funding.

PLAN 5351. TECHNIQUES OF ENVIRONMENTAL ASSESSMENT. 3 Hours.
Analysis of impact assessment documents from a variety of projects; study of federal laws and regulations governing the process; state impact assessment laws and regulations; and procedures used in other nations. Students will prepare an environmental assessment for a real-world project. Overviews of environmental site assessment, MIS documents, and environmental auditing will also be given.

PLAN 5352. ENVIRONMENT ASSESSMENT POLICY & PRACTICE. 3 Hours.
Review and analysis of the development of the environmental assessment process with focus on expectations of how environmental assessment will be transformed in the era of climate change. Students evaluate the effects of new laws and regulations and the accelerated growth of environmental policy development at all levels of government, especially among urban areas. The course includes review of selected environmental assessment documents and project case studies.

PLAN 5353. ENVIRONMENTAL LAW. 3 Hours.
This seminar examines the role of environmental law within the political-institutional framework of the American system. Emphasis is on the legal-judicial aspects of environmental regulation. Analyzes the decision of U.S. courts as these affect and interpret environmental laws and regulations for their legality and constitutionality.

PLAN 5354. HOUSING PLANNING, POLICY AND FINANCE. 3 Hours.
Evaluation of the effect of state, local, and federal housing policy on the urban arena. Topics will be selected from federal subsidy programs, tax subsidies, operations of financial intermediaries, and related areas.

PLAN 5356. INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
Introduction to GIS and the application of computer graphics systems in the storage, processing, and retrieval of geographic urban and regional information; case examples and related projects and issues of system management.

PLAN 5357. INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
Applications of GIS to typical urban and regional geographic information problems and projects. Prerequisite: PLAN 5356.

PLAN 5358. INTELLIGENT TRANSPORTATION SYSTEMS (ITS) AND PLANNING. 3 Hours.
Concepts, components, deployments, and implementations of ITS; methods for ITS evaluations; linkage between ITS and traditional transportation planning; and issues related to ITS planning and deployment.

PLAN 5360. COMPUTER METHODS FOR TRANSPORTATION PLANNING. 3 Hours.
Applications of computer software (for example, TransCad, Tranplan) in transportation planning modeling. Theories of residential location choice and travel behavior. Topics may include land-use and travel demand models, trip distribution models, mode choice models, and network equilibrium.

PLAN 5361. PLANNING INTERNSHIP. 3 Hours.
Intended to enhance readiness for professional work through exposure to planning practice in a one semester log internship (300 hrs in the spring or fall semester or 275 hrs in the summer). Integrates work experience and coursework through journaling and reflective practice. Requirements: (1)student secures an internship from a planning related employer and approval from the student's major professor prior to enrolling in the course;(2)the intern must provide performance evaluation by the job supervisor and the intern's evaluation of the internship experience. Enrollment open to students with no previous formal planning experience. Credit not available for previous internship or planning experience. P/F grade.

PLAN 5362. URBAN DIVERSITY. 3 Hours.
Examines the growing spatial and social diversity of cities; how physical as well as socioeconomic urban structures have fostered race, class, and gender inequalities; how urban policies have addressed and can address these issues. Offered as PLAN 5362 and PAPP 5362.

PLAN 5363. LEADERSHIP AND COMMUNICATION SKILLS IN THE PLANNING PROCESS. 3 Hours.
Governance and participation, comprehensive planning and the community planning process, participatory planning, and practical communication skills for planners and administrators: leadership and public meetings, participative decision making, interpersonal communications and conflict management, effective writing and presentations.

PLAN 5364. ECONOMIC BASE AND INDUSTRIAL DEVELOPMENT POLICY. 3 Hours.
Theories and methods of local and regional economic base analyses; techniques for inventorying strengths, weaknesses, opportunities and threats of local capital, labor and land resources; alternative policy responses to industrial development issues arising from economic base analysis.

PLAN 5370. SUSTAINABLE COMMUNITIES. 3 Hours.
This course explores broad environmental and social issues in sustainable communities. Potential topics include urban water management, food and resources, wildlife conservation, native landscaping, waste management, green building, housing diversity, public transportation, and community participation. The course serves as a laboratory for working with governmental and non-governmental organizations in the DFW area and developing issue-based, action research projects to solve real-world problems in our communities. This hands-on course combines lectures, student-led discussions, site visits, and collaborative teamwork for service-learning projects.

PLAN 5380. RESEARCH QUESTIONS IN PLANNING. 3 Hours.
Application of research issues, writing, and communication skills in planning. Designed to assist students in preparing their research for master's thesis or professional report.

PLAN 5391. CONFERENCE COURSE. 3 Hours.
Special subjects and issues as arranged by individual students and faculty members. May be repeated for credit.

PLAN 5395. SPECIAL TOPICS IN PLANNING. 3 Hours.
Selected topics in City and Regional Planning. May be repeated for credit.

PLAN 5397. PROFESSIONAL REPORT. 3 Hours.
Preparation of final professional report as a thesis substitute for MCRP degree. Required of all thesis substitute students not enrolled in PLAN 5193. Prerequisite: PLAN 5380.

PLAN 5398. PLANNING THESIS. 3 Hours.
Graded F/R.

PLAN 5695. TOPICS IN PLANNING. 6 Hours.
Studio, lecture or seminar course to explore and present special topics in city and regional planning. May be repeated for credit as topics change. Prerequisite: Permission of Graduate Advisor or Program Director.

PLAN 5698. PLANNING THESIS. 6 Hours.
Graded F/R.

PLAN 5998. PLANNING THESIS. 9 Hours.
Graded P/F/R.

PLAN 6161. TEACHING INTERNSHIP. 1 Hour.
Provides exposure to all aspects of course preparation and delivery including, course and syllabus design, student performance assessment, exam preparation, maintaining class records, and grading. Also, lecture and other forms of delivery of instruction. Interns co-teach with a faculty mentor, who provides feedback.

PLAN 6300. ADVANCED URBAN THEORY. 3 Hours.
Covers key theories of urbanization and socioeconomic relations. Emphasis is placed on the development of paradigms in urban theory, from classic texts to important shifts and debates in the late 20th-early 21st centuries. Considers principal theorists from urban disciplines of planning, geography, economics, sociology, and how they structure their arguments about urban form and social relations. Aimed at doctoral students, as well as advanced master's students, both from urban planning/urban affairs as well as from graduate programs outside School of Urban and Public Affairs.

PLAN 6301. RESEARCH FOUNDATIONS AND Ph.D. WORKSHOP. 3 Hours.
Examines fundamentals of research design for linking research questions to evidence, analysis, and research conclusions in urban planning, public administration, and public policy. Designed to assist doctoral students in preparing their research for dissertation. Opportunities to present work in progress, share ideas, and interact with faculty. Also offered as PAPP 6301; credit will be granted only once. Prerequisite: PLAN 5317 or PAPP 5342, PLAN 5346 or PAPP 5344 and PLAN 6346 or PAPP 6346.

PLAN 6303. PLANNING HISTORY, THEORY AND ETHICS. 3 Hours.
Various theories of planning including rational comprehensive, communicative action, social learning, and radical planning. Sets theories within their historical contexts, and examines the social and political details of each era to show the development of diverse planning practices and theories of planning. Evaluates the values embodied in different theories and their relationship to practice and social justice, including planning ethics.

PLAN 6305. SEMINAR IN URBAN PLANNING PROCESSES. 3 Hours.
Final course in urban planning field. Focus on the various political, economic, and social institutions and theoretical approaches in the planning process, and application of these multidisciplinary perspectives in the analysis of specific planning issues.

PLAN 6306. URBAN REVITALIZATION. 3 Hours.
Emphasizes the history, logic, politics, and implementation of urban revitalization projects as well as their physical, social, and economic outcomes. Examines various urban revitalization projects from coordinated, large-scale ventures to grassroots and informal neighborhood initiatives.

PLAN 6307. URBAN GEOGRAPHY. 3 Hours.
Emphasizes real aspects associated with urban physical environments and social, behavioral, and financial processes that shape these environments.

PLAN 6308. METROPOLITAN SUSTAINABILITY AND PLAN MAKING. 3 Hours.
Provides the background for sustainability planning at the city and metropolitan levels including plan making (e.g., comprehensive plans, small area plans, functional plans, etc.). Explores the relationship of environmental sustainability to economic vitality and social equity including planning ethics.

PLAN 6309. TRANSPORTATION/LAND USE MODELING AND POLICY ANALYSIS. 3 Hours.
Overview of transportation/land use with specific transportation models and simulation methods; topics include economic theory of travel demand, land use models, UTPS framework for travel demand estimation, disaggregated travel demand models and abstract mode models.

PLAN 6310. PLANNING, URBAN DEVELOPMENT AND STRUCTURE. 3 Hours.
Planning functional domains from transportation to comprehensive planning and fundamental theories explaining urban structure and development of cities and regions.

PLAN 6311. SPATIAL THEORY AND POLICY: URBAN FORM AND STRUCTURE. 3 Hours.
Examines factors shaping urban form. Includes economic and spatial structures of cities and their implications for planning and policy issues. Outlines location theory, urban growth, density and land price, land use and spatial pattern, multi-centering and sprawl, as well as new traditional and transit oriented developments (NTD & TOD) among others. Broadens understanding of different aspects of cities and urban areas (housing, employment and commercial centers). Reflects on the connections between emergent patterns of growth and evolving transportation network.

PLAN 6313. URBAN GROWTH POLICIES. 3 Hours.
Study of the political, societal and physical policies involved in urban growth management.

PLAN 6315. LAND USE, MANAGEMENT AND DEVELOPMENT. 3 Hours.
Fundamentals of real estate development and land use planning and its intersection with the planning process. Assesses land use, management and development and considers new directions.

PLAN 6317. INTERMEDIATE DATA ANALYSIS. 3 Hours.
Intermediate statistical and research techniques appropriate to Ph.D. level urban and social analysis. Presuming a basic understanding of descriptive and inferential statistics, the course covers multivariate regression, including error analysis and non-linear models, path analysis, Analysis of Variance (ANOVA), logit and probit models, and techniques for data reduction (e.g., factor analysis). Prerequisite: PAPP 5302.

PLAN 6318. TECHNIQUES OF PLANNING ANALYSIS I. 3 Hours.
Analytical techniques used in urban and regional planning. Topics include: census data and geography, introduction to GIS, demographic analysis, cost-benefit analysis, economic base analysis, gravity models, and displaying and communicating data analysis and results in graphic, written, and oral forms.

PLAN 6321. ELEMENTS OF URBAN DESIGN. 3 Hours.
Study of contemporary urban form and environmental design, emphasizing visual-spatial qualities, social needs and economic linkages. Examination of theories, processes, methods and techniques of urban design.

PLAN 6322. ECONOMIC DEVELOPMENT PLANNING AND POLICY. 3 Hours.
A seminar on subnational economic development programs in the U.S. Covers location theory, economic planning, budgeting, incentives, public and private revenue sources, analysis methods such as central place and economic base, intergovernmental efforts, redevelopment, high tech, trade and/or tourism.

PLAN 6324. COMMUNITY DEVELOPMENT. 3 Hours.
Focuses on current problems of community development and neighborhood revitalization. Housing, community assets, the roles of community development corporations and social capital in cities, and community economic development. Federal, state, and local policies vs. grassroots initiatives evaluated for effectiveness on promoting alternatives for community building and organizing. Ph.D. level critical assessment of the central theories and rationales driving community development.

PLAN 6325. TRANSPORTATION POLICIES, PROGRAMS AND HISTORY. 3 Hours.
Transportation and related programs and policies in relation to city development and housing patterns. Interdependencies of land use, building development, and social change are explained as transportation-related.

PLAN 6326. PHYSICAL PLANNING AND URBAN DESIGN. 3 Hours.
Concepts in urban design and physical planning. Provides an understanding of how built environments evolve, and how they can be creatively planned and designed so as to meet social and ecological goals. Special attention to principles and analyses related to the physical planning of neighborhoods and streets, as well as patterns of urban form and public places.

PLAN 6327. GREEN CITIES AND TRANSPORTATION. 3 Hours.
Schools of thought on causes of environmental and transportation problems and 'green cities' as potential solution with emphasis on the planning approaches and public policies tackling environmental and transportation issues. Critical assessment of the roles of planners in shaping the urban landscape and infrastructure.

PLAN 6330. TECHNIQUES OF PLANNING ANALYSIS II. 3 Hours.
Quantitative and qualitative and mixed methods research. Relating planning problem identification and definition with appropriate methods of data gathering and analysis. Analysis and interpretation of qualitative and quantitative data including interview and small group techniques, and basic statistical analysis. Communication of analysis results in graphic, written, and oral forms.

PLAN 6331. GIS WORKSHOP. 3 Hours.
Application of methods and techniques in geographic information systems to the analysis of spatial urban phenomena and spatial decision-making in regional planning and public policy. Research and project-based planning course. Prerequisite: PLAN 6357.

PLAN 6340. GIS AND SUITABILITY ANALYSIS. 3 Hours.
Presents theoretical and practical aspects of the suitability analysis process. Uses Geographic Information System (GIS) analysis and computer models for incorporating environmental and ecological factors in determining land development potential.

PLAN 6345. PLANNING AND REAL ESTATE DEVELOPMENT. 3 Hours.
The goals, strategies, methods, and achievements of major participants in the urban land and building markets are examined. Land owners, speculators, real estate brokers, developers, bankers, lawyers, non-profit builders, and government agencies are studied, as well as such business tools as: market and feasibility analysis, appraisal techniques, proforma analysis, and others.

PLAN 6346. ADVANCED DATA ANALYSIS IN URBAN AND PUBLIC AFFAIRS. 3 Hours.
An introduction to selected advanced techniques related to planning analysis. Subjects include advanced applied regression analysis, multivariate logit analysis, and multinomial logistic regression. Applications of projection techniques, land use and transportation models, and methods of regional analysis. Offered as PLAN 6346 and PAPP 6346. Credit will be given only once.

PLAN 6347. QUALITATIVE METHODS. 3 Hours.
The study of qualitative research and analysis methods. Offered as PAPP 6344 and PLAN 6347; credit will be given only once.

PLAN 6350. ENVIRONMENTAL PLANNING. 3 Hours.
Reviews environmental planning and its ecological principles; environmental effects of industrial development; policies on international issues; environmental justice and ethics; environmental economics, including externalities and public goods; sustainable development; overview of planning for air quality, water quality, solid waste, pollution prevention, habitat conservation, etc.; and issues of plan implementation, including enforcement, regulation and funding.

PLAN 6357. INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
GIS applications to typical urban and regional geographic information problems and projects. Prerequisite: PLAN 5356.

PLAN 6358. INTELLIGENT TRANSPORTATION SYSTEMS (ITS) AND PLANNING. 3 Hours.
Concepts, components, deployments, and implementations of ITS; methods for ITS evaluations; linkage between ITS and traditional transportation planning; and issues related to ITS planning and deployment.

PLAN 6361. TEACHING INTERNSHIP. 3 Hours.
Provides exposure to all aspects of course preparation and delivery including, course and syllabus design, student performance assessment, exam preparation, maintaining class records, and grading. Also, lecture and other forms of delivery of instruction. Interns co-teach with a faculty mentor, who provides feedback.

PLAN 6399. DISSERTATION. 3 Hours.
Graded R/F only.

PLAN 6691. CONFERENCE COURSE. 6 Hours.
Special subjects and issues as arranged by individual students and faculty members. May be repeated for credit.

PLAN 6699. DISSERTATION. 6 Hours.
Graded R/F/P/W only.

PLAN 6999. DISSERTATION. 9 Hours.
Graded P/F/R.

PLAN 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken twice. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

Public Affairs and Planning - Graduate

Programs

DOCTORAL DEGREES

- Public Administration and Public Policy PhD (p. 196)
- Urban Planning and Public Policy PhD (p. 201)

MASTER OF CITY AND REGIONAL PLANNING

- MCRP (p. 205)
- MCRP (Advanced Standing) (p. 210)

MASTER OF PUBLIC ADMINISTRATION

- MPA (Local Government Management) (p. 213)
- MPA (Online) (p. 217)
- MPA (Public Budgeting and Financial Management) (p. 220)
- MPA (Strategic Human Resources Management) (p. 223)
- MPA (Urban Nonprofit Management) (p. 226)

CERTIFICATES

- Development Review Graduate Certificate (p. 230)
- Geographic Information Systems Graduate Certificate (p. 231)
- Public Budget & Financial Management Graduate Certificate (p. 232)
- Transportation Planning and Policy Graduate Certificate (p. 233)
- Urban Non-Profit Management Graduate Certificate (p. 226)

Doctor of Philosophy in Public Administration and Public Policy

About This Program

The Doctor of Philosophy in Public Administration and Public Policy (PAPP) program prepares future academicians and practitioners with research, policy, and administrative skills to help shape policy and improve communities, locally and globally. This interdisciplinary program provides rigorous training in the theoretical, analytical, historical, and practical foundations in public administration, public policy, and nonprofit management.

The PAPP PhD program provides students with a strong theoretical foundation, empirical rigor, and substantive and procedural knowledge concerning the field. It offers students an interdisciplinary perspective to examining administrative and policy issues. Graduates of this program continue to become future leaders who address complex community challenges with evidence-based, equitable, sustainable, and effective solutions in academia, government, the nonprofit, and for-profit sectors.

Competencies

1. Upon completion, students will be able to identify problems and determine their relevance.
2. Upon completion, students will be able to design field specific, rigorous, and valid research questions and utilize their understanding of theoretical foundations, research design, and data sources to answer their research questions.
3. Upon completion, students will be able to leverage qualitative and quantitative research methods in order select the correct research tools to measure or assess research questions.
4. Upon completion, students will be able to engage in independent research and advance their data gathering and preparation techniques.
5. Upon completion, students will be able to engage in impactful communication and learning experiences that address the norms of the professions including explicit understanding of the writing process in submitting works for publication, grant funding, conference presentation, and professional networking.

Admissions Criteria

Along with the Office of Graduate Studies application requirements, a complete application includes:

1. Official transcripts from colleges and universities attended. Students who obtained their master's degree at UT Arlington are not required to submit separate copies of transcripts as their information will be available to the CAPPA advisors online. Information about submitting transcripts is available in the University Catalog.
2. Official test score reports for the Graduate Record Exam (GRE) and, for international applicants, the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Information about submitting official test scores is available from the University Catalog.
3. Essay by applicant (minimum 500 words, maximum 1000 words). The essay is considered both for its content and writing quality. The essay should discuss: (1) tentative research topic, (2) how your undergraduate and graduate studies have prepared you for doctoral study in Public Administration and Public Policy; (3) identify your potential research area and Public Affairs faculty whose area relates to your research interests; and (4) the reasons for wanting to earn the doctoral degree.
4. Three Letters of Recommendation. Letters should attest to the applicant's ability to do doctoral-level work and successfully complete the dissertation. Letters from references who hold a Ph.D. degree are strongly preferred.

5. Samples of applicant's written work (e.g., thesis, publication, professional report) that demonstrates graduate level English writing proficiency as compared to the writing proficiency of students who have successfully completed the program.
6. Applicant's Curriculum Vitae.

Official transcripts and test scores must be sent directly to the Office of Graduate Studies by the institution and ETS respectively. The ETS code for UTA is 6013.

Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program - Ph.D. in Public Administration and Public Policy (PAPP), Box 19108, Arlington TX 76019.

It is the applicant's responsibility to ensure all application materials are received by the priority deadline of February 1st . Incomplete applications or applications received after the deadline may be deferred.

CAPPA primarily admits doctoral students for the Ph.D. in Public Administration and Public Policy for fall semester. Spring admissions are rare and there are no summer admissions.

Applicants who wish to be considered for graduate teaching/ research assistant positions or other financial assistance, must submit their applications by their first week in February for full consideration. Only complete applications (including GRE scores and letters) will be considered for financial assistance. Students must also complete the university application for financial aid in the Mav ScholarShop (http://www.uta.edu/fao/scholarships/).

UNCONDITIONAL ADMISSION

Applicants may be admitted unconditionally with a graduate GPA of 3.6, a Verbal GRE score of at least 153 (500 if taken before August 1, 2011 and a Quantitative GRE score of at least 144 (500 if taken before August 1, 2011). International applicants are required to have a score of 213 or higher on the TOEFL (550 or higher on the written TOEFL; 79 or higher on TOEFL iBT). Strength of letters of recommendation and quality of personal statement and master's degree field of study are also considered.

or

Applicants may be admitted unconditionally with a graduate GPA of 3.7, a Verbal GRE score of at least 153 (500 if taken before August 1, 2011 and a Quantitative GRE score of at least 140 (500 if taken before August 1, 2011). International applicants are required to have a score of 213 or higher on the TOEFL (550 or higher on the written TOEFL; 79 or higher on TOEFL iBT). Strength of letters of recommendation and quality of personal statement and master's degree field of study are also considered.

The admissions committee may defer the admission decision when a component of the application is incomplete. It may also admit a student provisionally when an applicant is unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements.

PROBATIONARY ADMISSION

Applicants not admitted unconditionally may be considered for admission on probation based on factors mentioned above as well as multilingual proficiency, first generation graduate student and applicant's community service experience. Applicants with a 3.0 graduate GPA or better and based on the strength of admission requirements (personal statement, letters of recommendation and scores on standardized tests). Under Probationary Admission, special course requirements or other conditions may be imposed by the Admissions Committee (e.g., applicants who meet all the standards for Unconditional Admission, except for required Writing GRE score, will be considered for Probationary Admission conditioned on completing an approved writing course).

Foreign applicants with low TOEFL or IELTS scores may be accepted probationary on the condition of successfully completing the Pathway Admission Program. More information about that program may be found in the Graduate Admissions (p. 26) section of this catalog.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONAL ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline, but who otherwise appear to meet admission requirements may be granted Provisional Admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the PAPP PhD Admission Committee finds there is insufficient basis to justify any other kind of admission. GRE performance will not be the sole factor leading to a decision to deny admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

CONTINUOUS ENROLLMENT AND READMISSION

UTA Continuous Enrollment Policy requires students to remain enrolled throughout the duration of their studies. PAPP students must comply with this policy by enrolling in at least three or six credit hours each fall and spring semester, depending on the stage in their program of studies. Enrollment in summer sessions is not required.

Students who are unable to continue their PhD studies due to legitimate reasons can petition a leave of absence by following university policies (https://www.uta.edu/records/graduate/leave-of-absence-loa.php). Students who are granted a leave of absence are subject to the university's policy on readmission.

Students who have been absent without approval of leave of absence, but wish to resume their graduate work, will need to follow the university's readmission policy (http://catalog.uta.edu/academicregulations/admissions/graduate/).

Students who have been absent from the program for four or more long semesters will, in addition to the university policies, be subject to the program's admission criteria and the program's new procedures, guidelines, curriculum and degree requirements existing at the time of the readmission application. PAPP readmission policy and application instructions can be obtained from the PAPP graduate advisor (https://www.uta.edu/academics/schools-colleges/cappa/general-advising/grad-advising/).

3-6	

Total Hours: 51-66

[1] Student must complete 9 hours of dissertation and/or enroll in PAPP 7399 (Final Dissertation) which must be taken in the final graduating semester.

Program Completion

Students are assigned an initial faculty adviser based primarily on their research interests and they add two additional diagnostic committee members within their first year to help guide them through their course of study.

A full-time student can expect to complete the required courses within two academic years. Upon completing all required courses (30 hours), students sit for their written comprehensive examination. The comprehensive examination is an integrative exam that blends public policy issues with public administration.

DIAGNOSTIC EVALUATION

During the student's first year of doctoral program work, the student must demonstrate potential to successfully complete a degree program. The diagnostic evaluation assesses the student's potential and is in the form of an oral examination/ presentation to the diagnostic committee members. Results of the diagnostic evaluation may be 1) approval to continue in the doctoral program; 2) approval to continue with specified remedial work; 3) failure, but with permission for assessment through a second diagnostic evaluation after a specified period; or 4) failure and termination in the program. The student must be enrolled in the graduate program in the term in which he/she completes the diagnostic evaluation. The results of the diagnostic evaluation must be filed in the Office of the Registrar no later than after completion of 18 credit hours of coursework while enrolled in a doctoral program at UT Arlington.

COMPREHENSIVE EXAM

Students are eligible to take the comprehensive examination after having completed all coursework requirements for a degree. The comprehensive examination usually marks the end of formal coursework and the beginning of concentrated work on dissertation research and preparation. The student must be enrolled in the term in which he/she takes the comprehensive examination. A student who fails to pass a comprehensive examination is allowed to retake the examination once. In this case, the exam must be retaken the following semester (excluding summer semester). If the student fails to pass the examination a second time, the student is not permitted to continue in the doctoral program.

DISSERTATION PROPOSAL

Upon successful completion of the written comprehensive examination, students form a three-member dissertation committee and prepare their dissertation proposal. Given the research topic and preparedness of the student, the faculty committee may recommend that the student take additional courses that contribute to the student’s dissertation. Students must also work closely with their dissertation supervisor and committee to develop their dissertation proposal. A formal oral proposal defense must be held, and the proposal must be formally approved by the dissertation committee before the student may continue to complete the dissertation. Guidelines for the dissertation proposal are available in the PhD Student Handbook. Successful completion of the dissertation proposal advances the student to the status of candidacy (ABD).

DISSERTATION

The dissertation represents the culmination of the student’s academic efforts and so is expected to demonstrate original and independent research activity and be a significant contribution to knowledge. Upon the successful defense of their dissertation proposal, the student is required to submit an application to the UT Arlington’s Institutional Review Board if their research involves human subjects. The student continues to work closely with her/his dissertation committee to the completion of the dissertation.

Doctoral students must enroll in a minimum of three dissertation hours PAPP 6399) every long semester (Fall & Spring). The student must accumulate a minimum of nine dissertation hours to graduate. Once the student’s committee has reviewed the completed dissertation and agree that the student is ready to defend, the student enrolls in Doctoral Degree Completion (PAPP 7399) in the term designated as their completion term. The Dissertation Completion course (7399) may only be taken two times. Doctoral students who do not graduate at the end of their second attempt in 7399 will receive a grade of R, W or F and must enroll in a minimum of six hours of dissertation research (PAPP 6699) every term until graduation.

The Office of Graduate Studies offers Dissertation Seminars each semester and encourages all Dissertation students to attend.

The dissertation defense is a public oral examination open to all members (faculty, students, and invited guests) of the University community. Questioning of the candidate will be directed by the student’s dissertation committee. All members of the student’s committee must be present at the defense. Although the defense is concerned primarily with the dissertation research and its interpretation, the examining committee may explore the student’s knowledge of areas relevant to the core of the dissertation problem.

The dissertation defense may result in a decision that the candidate has:

- passed unconditionally.
- passed conditionally with remedial work specified by the committee.
- failed, with permission to be re-examined after a specified period, or
- failed and dismissed from the program.

The dissertation must be approved unanimously by the student’s dissertation supervising committee. All doctoral students must be aware of requirements and deadlines associated with the dissertation, final defense, and submission of the final copy of the dissertation.

DISSERTATION MANUSCRIPT FORMAT, FINAL SUBMISSION AND ARCHIVING

Students pursuing a doctoral degree must submit an acceptably formatted manuscript to the UTA Library before the degree can be conferred. Details regarding dissertation formats can be found on the UT Arlington Library website.

TIME LIMIT

All requirements for the doctoral degree must be completed within four years after the student unconditionally passes the comprehensive exam. Students who exceed the published time limits for completing the graduate degree but wish to graduate, must petition the Academic Dean for an exception to the time limit policy.

CAPPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their graduate studies. Students who complete a master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A graduate student, whose cumulative grade point average (GPA) falls below a 3.000 in all graduate courses, be they graduate or undergraduate level and taken while enrolled as a UT Arlington graduate student, may be subject to dismissal from the program (http://catalog.uta.edu/academicregulations/academicstanding/#graduatetext).

PhD students who do not complete dissertation proposal within two years of passing comprehensive exam will accrue 2 deficiency points.

PhD students who do not complete all requirements for the Doctoral degree within four years after passing the comprehensive examination will accrue 1 deficiency point per year beyond the four year mark.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Doctor of Philosophy in Urban Planning and Public Policy

About This Program

The Doctor of Philosophy in Urban Planning and Public Policy (UPPP) integrates the academic disciplines of urban planning and public policy by training PhD students to conduct independent research that makes a substantive contribution to their chosen planning and policy subfields. The program prepares doctoral students for academic careers and for leadership in research positions in the public, private or nonprofit sectors. UPPP graduates have secured academic and research positions at research universities and institutes, think tanks, and public planning agencies nationally and internationally.

The UPPP PhD program requires a minimum of 48 credit hours beyond the master's degree, including 39 credit hours of coursework and a minimum of 9 dissertation credit hours. The 39 credit hours of coursework include: 6 hours of leveling courses, 9 hours in the required core of urban planning and public policy, 12 hours of methods courses and 12 hours of elected field area courses. Qualified applicants hold a master's degree in planning or in another discipline or are in the process of completing the degree. Depending on the master's degree, admission might be contingent on taking leveling courses that provide the necessary background.

UPPP Field Areas:

- Urban Planning and Policy
- Physical Planning, Development and Urban Design
- Land Use/Transportation Analysis, Planning and Policy
- Environmental Planning Policy/Sustainability

Competencies

1. Upon completion, students will be able to synthesize relevant literature, from which they will formulate public administration and/or policy-based research questions.
2. Upon completion, students will be able to formulate and analyze discipline relevant research questions.
3. Upon completion, students will demonstrate knowledge of applicable research methods.
4. Upon completion, students will be able to present findings effectively in both verbal and written formats to academic and non-academic audiences.

Admissions Criteria

Along with the Office of Graduate Studies application requirements, a complete application includes:

1. Official transcripts from colleges and universities attended. Information about submitting transcripts is available in the Graduate Catalog.
2. Graduate Record Exam (GRE) and, for international applicants, the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) official test scores.
3. Three letters of recommendation attesting to the applicant's ability to do doctoral-level work and complete the dissertation. Letters from professors or supervisors who hold a Ph.D. degree are strongly preferred.
4. Essay by applicant (minimum 500 words, maximum 1000 words). The essay is considered both for its content and writing quality. The essay should discuss: (1) tentative research topic, (2) how your undergraduate and graduate studies have prepared you for doctoral study in Urban Planning and Public Policy; (3) identify your desired field area (see field areas, below) and identify potential Planning faculty whose area relates to your research interests; and (4) the reasons for wanting to earn the doctoral degree.
5. Samples of applicant's written work (e.g., thesis, publication, professional report) that demonstrates graduate level English writing proficiency as compared to the writing proficiency of students who have successfully completed the program.
6. Applicant's CV.

Official transcripts and test scores must be sent directly to the Office of Graduate Admissions by the issuing institution and testing agency respectively.

Letters of recommendation and personal essay should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program - PhD in Urban Planning and Policy (UPPP), Box 19108, Arlington TX 76019.

It is the applicant's responsibility to ensure all application materials are received by the application deadline. Incomplete applications or applications received after the deadline could be deferred.

CAPPA primarily admits UPPP doctoral students for Fall semester. Spring admissions are rare and there are no summer admissions. The Fall application deadline is February 1st.

The Doctoral Admission Committee determines admission based on the applicant's academic record, commitment to scholarly research, and overall fit with the program.

UNCONDITIONAL ADMISSION

Applicants are typically admitted unconditionally with a graduate GPA of 3.6, a Verbal GRE score of at least 153 and a Quantitative GRE score of at least 144. GRE requirements are applied flexibly as different areas of study vary in the relative importance of quantitative and verbal analysis. GRE scores must be from a test taken in the past 5 years. In no case will standardized test performance be the sole or primary determinant of admissibility. Strength of letters of recommendation, quality of personal statement and master's degree field of study are also considered carefully.

International applicants are required to have a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79. Further, when the TOEFL iBT is taken, sectional scores of at least 22 on the Writing section, 21 on the Speaking section, 20 on the Reading section, and 16 on the Listening section are preferred.

U.S. students, with a master's degree from an accredited U.S. institution in Urban Planning, Public Administration, Public Policy or in a closely related field, or a master's in Architecture or Landscape Architecture and several years of increasing responsibilities on the job, are not required to submit GRE scores. The Admissions Committee may require written samples demonstrating graduate level English proficiency.

The UPPP PhD Admissions Committee will consider other types of admission decisions for applicants who do not meet all unconditional admission requirements:

PROBATIONARY ADMISSION

Applicants with a 3.0 graduate GPA or better and based on the strength of admission requirements (personal statement, letters of recommendation and scores on standardized tests). Under Probationary Admission, special course requirements or other conditions may be imposed by the Admissions Committee (e.g., applicants who meet all the standards for Unconditional Admission, except for required Writing GRE score, will be considered for Probationary Admission conditioned on completing an approved writing course).

Foreign applicants with low TOEFL or IELTS scores may be accepted probationary on the condition of successfully completing the Pathway Admission Program (https://catalog.uta.edu/academicregulations/admissions/graduate/).

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONAL ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline, but who otherwise appear to meet admission requirements may be granted Provisional Admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIED ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the UPPP PhD Admission Committee finds there is insufficient basis to justify any other kind of admission. GRE performance will not be the sole factor leading to a decision to deny admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

CONTINUOUS ENROLLMENT AND READMISSION

UTA Continuous Enrollment Policy requires students to remain enrolled throughout the duration of their studies. UPPP students must comply with this policy by enrolling in at least three or six credit hours each fall and spring semester, depending on the stage in their program of studies. Enrollment in summer sessions is not required.

Students who are unable to continue their PhD studies due to legitimate reasons can petition a leave of absence by following university policies (https://www.uta.edu/records/graduate/leave-of-absence-loa.php) Students who are granted a leave of absence are subject to the university's policy on readmission.

READMISSION

Students who have been absent without approval of leave of absence, but wish to resume their graduate work, will need to follow the university's readmission policy (http://catalog.uta.edu/academicregulations/admissions/graduate/).

Students who have been absent from the program for four or more long semesters will, in addition to the university policies, be subject to the program's admission criteria and the program's new procedures, guidelines, curriculum and degree requirements existing at the time of the readmission application. UPPP readmission policy and application instructions can be obtained from the UPPP graduate advisor.

GRADUATE ASSISTANTSHIPS & SCHOLARSHIPS

Applicants who wish to be considered for graduate teaching/research assistant positions or other financial assistance, must submit their applications by their first week in February for full consideration. Only complete applications (including GRE scores and letters) will be considered for financial assistance. Students must also complete the university application for financial aid in Mav ScholarShop (https://uta.academicworks.com/opportunities/).

Curriculum

PhD students who do not complete all requirements for the doctoral degree within four years after passing the field examination will accrue 1 deficiency point per year beyond the four-year mark.

Leveling Courses		
PLAN 6303	PLANNING HISTORY, THEORY AND ETHICS	3

Master of City and Regional Planning

About This Program

The Master of City and Regional Planning (MCRP) prepares students for careers as professional planners with public, private and nonprofit organizations. It does this by training students to apply planning theory, knowledge, techniques, and skills to “real world” planning problems through coursework, studios, and internship opportunities.

UTA’s MCRP is accredited by the Planning Accreditation Board (http://www.planningaccreditationboard.org/) (PAB). The program’s mission, goals and objectives, and accreditation efforts are shaped in consultation with the MCRP Advisory Board composed of alumni and area practitioners.

Competencies

1. Students will be able to communicate planning information clearly and effectively in oral, written, and graphic form.
2. Students will be able to relate knowledge of the ethical and normative aspects of planning to the planning process.
3. Students will be able to identify and evaluate planning problems and to apply planning methods to their solution and communication.
4. Students will be able to identify and relate the factors influencing the growth and development of communities, cities, and regions.
5. Students will be able to understand the challenges that regions, cities, communities, and planners face in the field.

Admissions Criteria

The MCRP program takes a holistic approach to the application review process. Each applicant file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's record. A complete application includes:

- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal, Quantitative, and Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work (download Letter of Recommendation form (https://cdn.web.uta.edu/-/media/project/website/cappa/documents/admissions-and-advising/forms/grad_request_recommendation.ashx?revision=00cbff08-7e0d-4035-aa71-615a17c672b9))
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The Essay is considered both for its content and quality of writing. The Essay should address the following questions: 1. Why do you want to earn a Master's degree in the program for which you are applying? 2. What relevant background and experience do you bring to the program? The essay can also include other concerns you'd like to bring to the attention of the CAPPA Academic Recruiter. the Graduate Advisor, or the Master's Admissions Committee.
- Non-native English speakers only: TEOFL-iBT or IELTS scores meeting University minimum admission standards are required (TOEFL-iBT 79 with sectional scores of at least 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or an IELTS score of at least 6.5.). However, a non-native English speaking applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to take these tests. Students failing to meet English proficiency requirements may be admitted on probation ~~to~~ the Pathway Admission (https://catalog.uta.edu/academicregulations/admissions/graduate/) program to improve their English skills.

Official transcripts and test scores must be sent directly to Graduate Admissions by the issuing institution or testing service. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of City & Regional Planning (MCRP), Box 19108, Arlington TX 76019. It is the applicant's responsibility to ensure all application materials are received by the application deadline. Incomplete applications or applications received after the deadline could be deferred.

A student who is well-prepared through an undergraduate degree in planning or related field and has as well five or more years of relevant and verifiable professional experience maybe eligible to complete the degree in 30 credit hours.

The MCRP program admits students for Fall and Spring semesters; the application deadlines are June 15th and October 15th respectively.

WAIVING THE GRE

The MCRP program waives the requirement that an applicant take the GRE under the following condition:

- A completed UT-Arlington undergraduate degree awarded within three years of application for admission and a 3.0 or higher GPA on the last 60 hours of coursework.

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

1. Undergraduate GPA of 3.0 or better
2. A preferred minimum Verbal GRE score of 150 a preferred minimum Quantitative GRE score of 141 and a preferred minimum Writing GRE score of 4.
3. Outstanding letters of recommendation
4. Strong, well-written personal essay
5. Non-native English speakers only: Students must demonstrate proficiency in English by earning a TOEFL-iBT score of at least 79 with sectional scores of at least 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or an IELTS score of at least 6.5. A non-native English speaking applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is presumed to be English-proficient and is not required to take these tests.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for Unconditional admission will be considered for Probationary admission based on the strength of all the listed admission factors. International students who do not meet the minimum requirements for demonstrating proficiency in English may be admitted on probation to the Pathways Admission (https://catalog.uta.edu/academicregulations/admissions/graduate/) program to strengthen their English skills. Under Probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for Probationary Admission conditional on completing an approved Writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONAL ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted Provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a Provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. GRE test scores will not constitute the sole or primary basis for ending the consideration of an applicant. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

SCHOLARSHIP AND FELLOWSHIP CRITERIA

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships, fellowships and the planner-in-training internship.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of all admission criteria assessed by their admitting programs.

Curriculum

The MCRP requires completion of 48 hours of study. The generalist core (33 hrs) is organized into three knowledge tiers: Theory, Analysis and Techniques, and Implementation and Plan Making, plus a Professional Report (3 hrs) or Thesis (6 hrs) and 9-12 hours in elective coursework.

Foundations		
PLAN 5303	PLANNING HISTORY, THEORY AND ETHICS	3

The Transportation Planning and Policy certificate requires 15 hours of graduate course work, up to 12 of which may be applied to the MCRP subject to the policies on grades and graduate credit described in the University Catalog. See the program's graduate advisor for additional information.

DUAL DEGREES

To participate in the dual degree program, students must make separate application to each program and must meet the admission requirements of each program. Students must be admitted to the second program before completing more than 24 credit hours in the first program and must complete the second degree within three academic years following completion of the first. By participating in a dual degree program, students may apply 6-18 total credit hours jointly to meet the requirements of both degrees, thus reducing the total number of hours required to earn each degree separately (shared courses are subject to approval by Program Advisors of each program). Degree plans, thesis or professional report proposals, and the final thesis or report must be submitted separately for each degree and approved by Program Advisors and relevant committees of each program. The successful candidate is awarded two degrees (not one joint degree).

Those interested in the dual degree program should consult the appropriate Program Advisors for further information and review the statement on Dual Degree Programs in the general information section of the catalog.

Dual degrees can be arranged with any suitable program. Arrangements have already been made with the relevant program advisors for dual degrees in the MCRP and:

- Master of Public Administration (MPA)
- Master of Social Work (MSW)
- Master of Architecture (MArch)*
- Master of Landscape Architecture (MLA)**
- Master of Science or Master of Engineering in Civil Engineering (MECE, MSCE)
- Master of Science in Environmental Science and Engineering (MSEvSE)

*MCRP students without a bachelor's in architecture take path A in the architecture program; those with an undergraduate degree take path B. All 15 credit hours of electives in the MArch must be taken in the MCRP program. Only in special instances may students select the thesis substitute plan of the MCRP program. Student will write one thesis and the thesis supervisor should be selected from City and Regional Planning (CIRP) or the School of Architecture, and committee members should be selected from both faculties.

**MCRP students pursuing a dual degree with another program that requires a thesis (ex. MLA) must select the thesis substitute plan of the MCRP program. Student will write one thesis and the thesis supervisor should be selected from CIRP or the other program, and committee members should be selected from both faculties. If the student does not select the thesis substitute plan of the MCRP program, the student will be required to complete a thesis for both programs separately and the thesis supervisors should be selected from CIRP and the other program, and committee members should be selected from both faculties.

Program Completion

THESIS OR PROFESSIONAL REPORT

All MCRP students must enroll in PLAN 5380 RESEARCH QUESTIONS IN PLANNING in their next to last semester to prepare for the Thesis or Professional Report.

Thesis (At Least 6 credit hours)

This option is recommended for students who enjoy research and/or are interested in pursuing a career in research or private consulting, or who intend to obtain another advanced degree. However, this option is also available to students who intend to go into professional planning practice.

Thesis format and submission calendar must adhere to the Office of Graduate Studies' thesis criteria. Thesis students identify a committee chair from among the Planning faculty no later than their next to last semester and, in consultation with the chair, form a thesis committee consisting of at least

two additional members of the CAPPA Graduate Faculty. The thesis committee guides the student's development of research question and choice of research method and analysis. Thesis students must defend their thesis in a public oral examination- open to all members of the faculty- and before all members of the student's thesis committee. The thesis committee must have copies of the thesis at least two weeks prior to the thesis defense. All members of the student's committee must be present at the defense. Thesis students must be enrolled in the appropriate section of PLAN 5698 PLANNING THESIS (under their committee chair) during the semester they receive advise from their chair and committee for preparing the thesis, as well as during the semester they defend their thesis. Once the student is enrolled in the thesis course, continuous enrollment is required.

Professional Report (3 credit hours)

This option is recommended for students who are going into professional practice and/or who desire additional experience beyond the Project Studio course by working on a professional report. This option does not preclude professional report students the opportunity of further pursuing an advanced graduate degree. Students identify a professional report committee chair from among the Planning faculty no later than their next to last semester and, in consultation with the chair, form a professional report committee consisting of at least two additional members of the CAPPA Graduate Faculty. The professional report committee guides the student's choice of planning project and method of analysis. Professional report students must defend their report in a public oral examination- open to all CAPPA graduate faculty and students- and before all members of the student's professional report committee. Professional Report students must be enrolled in the appropriate section (under their committee chair) of PLAN 5397 PROFESSIONAL REPORT the semester in which the professional report is defended.

CAPPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their graduate degree. Students who complete a master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A graduate student, whose cumulative grade point average (GPA) falls below a 3.000 in all graduate courses, be they graduate or undergraduate level and taken while enrolled as a UT Arlington graduate student, may be subject to dismissal from the program. (See academic standing policy (http://catalog.uta.edu/academicregulations/academicstanding/#graduatetext).)

Master of City and Regional Planning (Advanced Standing)

About This Program

The Master of City and Regional Planning (MCRP) prepares students for careers as professional planners with public, private and nonprofit organizations. It does this by training students to apply planning theory, knowledge, techniques, and skills to "real world" planning problems through coursework, studios, and internship opportunities. The advanced standing track is available to students well-prepared through an undergraduate degree in planning or related field with five or more years of relevant and verifiable professional experience. This track is not accredited by the Planning Accreditation Board.

Competencies

1. Graduates will be able to communicate planning information clearly and effectively in oral, written, and graphic form.
2. Graduates will be able to relate knowledge of the ethical and normative aspects of planning to the planning process.
3. Graduates will be able to identify and evaluate planning problems and to apply planning methods to their solution and communication.
4. Graduates will be able to identify and relate the factors influencing the growth and development of communities, cities, and regions.
5. Graduates will be able to understand the challenges that regions, cities, communities, and planners face in the field.

Admissions Criteria

The MCRP program takes a holistic approach to the application review process. Each applicant file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's record. A complete application includes:

- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal, Quantitative, and Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work (download Letter of Recommendation form (https://cdn.web.uta.edu/-/media/project/website/cappa/documents/admissions-and-advising/forms/grad_request_recommendation.ashx?revision=00cbff08-7e0d-4035-aa71-615a17c672b9))
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The Essay is considered both for its content and quality of writing. The Essay should address the following questions: 1. Why do you want to earn a Master's degree in the program for which you are applying? 2. What relevant background and experience do you bring to the program? The essay can also include other concerns you'd like to bring to the attention of the CAPPA Academic Recruiter. the Graduate Advisor, or the Master's Admissions Committee.
- Non-native English speakers only: TEOFL-iBT or IELTS scores meeting University minimum admission standards are required (TOEFL-iBT 79 with sectional scores of at least 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or an IELTS score of at least 6.5.). However, a non-native English speaking applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to take these tests. Students failing to meet English proficiency requirements may be admitted on probation ~~to~~ the Pathway Admission (https://catalog.uta.edu/academicregulations/admissions/graduate/) program to improve their English skills.

Official transcripts and test scores must be sent directly to Graduate Admissions by the issuing institution or testing service. Letters of recommendation should be sent directly via email to cappa.advising@uta.edu (%20cappa.advising@uta.edu) or by postal service, to: CAPPA Program – Master of City & Regional Planning (MCRP), Box 19108, Arlington TX 76019. It is the applicant's responsibility to ensure all application materials are received by the application deadline. Incomplete applications or applications received after the deadline could be deferred.

The MCRP program admits students for Fall and Spring semesters; the application deadlines are June 15th and October 15th respectively.

WAIVING THE GRE

The MCRP program waives the requirement that an applicant take the GRE under the following condition:

- A completed UT-Arlington undergraduate degree awarded within three years of application for admission and a 3.0 or higher GPA on the last 60 hours of coursework.

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

1. An undergraduate degree in planning or related field and at least five relevant and verifiable professional experience.
2. Undergraduate GPA of 3.0 or better
3. A preferred minimum Verbal GRE score of 150 a preferred minimum Quantitative GRE score of 141 and a preferred minimum Writing GRE score of 4.
4. Outstanding letters of recommendation
5. Strong, well-written personal essay
6. Non-native English speakers only: Students must demonstrate proficiency in English by earning a TOEFL-iBT score of at least 79 with sectional scores of at least 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or an IELTS score of at least 6.5. A non-native English speaking applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is presumed to be English-proficient and is not required to take these tests.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for Unconditional admission will be considered for Probationary admission based on the strength of all the listed admission factors. International students who do not meet the minimum requirements for demonstrating proficiency in English may be admitted

on probation to the Pathways Admission (https://catalog.uta.edu/academicregulations/admissions/graduate/) program to strengthen their English skills. Under Probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for Probationary Admission conditional on completing an approved Writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONAL ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted Provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a Provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. GRE test scores will not constitute the sole or primary basis for ending the consideration of an applicant. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

SCHOLARSHIP AND FELLOWSHIP CRITERIA

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships, fellowships and the planner-in-training internship.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of all admission criteria assessed by their admitting programs.

Curriculum

The MCRP (Advanced Standing) requires completion of 30 hours of study. The required courses are organized into three knowledge tiers: theory, analysis and techniques, and implementation and plan making, plus a professional report (3 hrs) and an elective chosen in consultation with an advisor or thesis (6 hrs).

Foundations		
PLAN 5303	PLANNING HISTORY, THEORY AND ETHICS	3
PLAN 5304	PLAN IMPLEMENTATION, ZONING, AND REGULATIONS	3

Master of Public Administration (Local Government Management)

About This Program

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, the Master of Public Administration (MPA) Local Government Management emphasis gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the curriculum conforms to NASPAA standards.

Competencies

1. Upon completion, students will demonstrate proficiency in the use of applied analytic tools such as program evaluation, policy analysis, cost-benefit analysis, and other management decision-making tools to aid the public manager make more informed decisions.
2. Upon completion, students will be able to assist public managers and other higher-level public officials to understand, analyze, and recommend appropriate solutions to complex public policy issues.

3. Upon completion, students will be able to lead and manage in public governance.
4. Upon completion, students will be able to participate in and contribute to the policy process.
5. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
6. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
7. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

The program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work.
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The essay is considered both for its content and quality of writing and should address the following questions: 1) Why do you want to earn a Master's degree in the program for which you are applying? 2) What relevant background and experience do you bring to the program? The essay may also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

- Minimum Writing GRE score of 4.0 (may be waived under certain conditions - see "Waiving the GRE" below)
- Minimum Undergraduate GPA of 3.0 based on the last 60 hours of course work as calculated by UTA Graduate Admissions.
- A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a minimum combined Verbal and Quantitative score of 1,000 (Revised GRE Test Combined: 291) (may be waived under certain conditions - see "Waiving the GRE" below)
- Outstanding letters of recommendation
- Strong, well-written personal essay
- Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for unconditional admission will be considered for probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for probationary admission conditional on completing an approved writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONA L ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

WAIVING THE GRE

The MPA program waives the requirement that an applicant take the GRE under any of the following conditions:

- A 3.25 or higher undergraduate GPA based on the last 60 hours of course work AND at least three years professional non-profit or public service work experience (as judged by the MPA admission committee. Applicants should submit a supporting resume or other relevant documentation to the MPA Graduate Advisor)
- A completed graduate degree from an accredited program in a related field such as, but not exclusively, political science, economics, urban planning, social work, criminal justice, and sociology OR a 3.0 or better higher after 12 hours of coursework in the accredited graduate degree program.
- A completed UTA BA or BS with 3.0 or higher GPA
- An equivalent GMAT or LSAT score from an exam taken within the last two years preceding the time of application.

SCHOLARSHIPS AND FELLOWSHIPS

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for master's and doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

Curriculum

The campus program consists of 39 or 42 total hours, which includes 10 required core courses and 9 hours in a selected emphasis area (2 core courses and 1 elective). PAPP 5360 PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP, a required is a 3-hour internship course, can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/)

Upon being admitted into the MPA program, students will choose an emphasis area and degree plan. Most all classes are offered as one session per week on Monday through Thursday during evening times (6:00-8:50pm or 7-9:50pm).

Foundations		
PAPP 5302	FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS	3
PAPP 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING	3
PAPP 5320	PUBLIC AND NON-PROFIT ORGANIZATION THEORY	3
PAPP 5326	PUBLIC BUDGETING	3
PAPP 5329	FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES	3
PAPP 5345	EVALUATION RESEARCH	3
PAPP 5350	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PAPP 5351	HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS	3
PAPP 5358	ETHICS IN THE PUBLIC SERVICE	3
PAPP 5399	PUBLIC ADMINISTRATION CAPSTONE	3
Local Government Management Emphasis		
PAPP 5312	ECONOMIC POLICY	3
PAPP 5355	NONPROFIT ORGANIZATIONS IN PUBLIC POLICY	3
Select one of the following with approval of emphasis coordinator or program director:		3
PAPP 5306	THE URBAN ECONOMY	
PAPP 5321	URBAN MANAGEMENT	
PAPP 5324	URBAN PUBLIC FINANCE	
PAPP 5325	ADMINISTRATIVE LAW	
PAPP 5341	PROFESSIONAL WRITING	
PAPP 5352	CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT	
PAPP 5357	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES	
PAPP 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS	
Internship		

PAPP 5360	PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP [1]	3
Total Hours		**42**

[1] Internship can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/).

DUAL DEGREE PROGRAMS

Students in public administration may participate in one of five dual degree programs whereby they can earn a Master of Public Administration and one of the following:

1. Master of Arts in Urban Affairs
2. Master of City and Regional Planning,
3. Master of Science in Social Work,
4. Master of Science in Nursing,
5. Master of Arts in Criminal Justice, or
6. Master's of Sociology.

By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of graduate advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in the dual degree program should consult the appropriate graduate advisor(s) for further information on course requirements. See also the statement of dual degree programs in the general information section of this catalog.

Program Completion

CAPPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their master's degree or their PhD. Students who complete a master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A graduate student, whose cumulative grade point average (GPA) falls below a 3.000 in all graduate courses, be they graduate or undergraduate level and taken while enrolled as a UT Arlington graduate student, may be subject to dismissal (http://catalog.uta.edu/academicregulations/academicstanding/#graduatetext) from the program.

Master of Public Administration (Online)

About This Program

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, the Master of Public Administration (MPA) online option gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA) via the Commission on Peer Review and Accreditation (COPRA), and the curriculum conforms to NASPAA standards.

Competencies

1. Upon completion, students will be able to lead and manage in public governance.
2. Upon completion, students will be able to participate in and contribute to the policy process.
3. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
4. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
5. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

The program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work.
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The essay is considered both for its content and quality of writing and should address the following questions: 1) Why do you want to earn a Master's degree in the program for which you are applying? 2) What relevant background and experience do you bring to the program? The essay may also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

- Minimum Writing GRE score of 4.0 (may be waived under certain conditions - see "Waiving the GRE" below)
- Minimum Undergraduate GPA of 3.0 based on the last 60 hours of course work as calculated by UTA Graduate Admissions.
- A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a minimum combined Verbal and Quantitative score of 1,000 (Revised GRE Test Combined: 291) (may be waived under certain conditions - see "Waiving the GRE" below)
- Outstanding letters of recommendation
- Strong, well-written personal essay
- Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for unconditional admission will be considered for probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet

all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for probationary admission conditional on completing an approved writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONA L ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

WAIVING THE GRE

The MPA program waives the requirement that an applicant take the GRE under any of the following conditions:

- A 3.25 or higher undergraduate GPA based on the last 60 hours of course work AND at least three years professional non-profit or public service work experience (as judged by the MPA admission committee. Applicants should submit a supporting resume or other relevant documentation to the MPA Graduate Advisor)
- A completed graduate degree from an accredited program in a related field such as, but not exclusively, political science, economics, urban planning, social work, criminal justice, and sociology OR a 3.0 or better higher after 12 hours of coursework in the accredited graduate degree program.
- A completed UTA B.A. or B.S. with 3.0 or higher GPA
- An equivalent GMAT or LSAT score from an exam taken within the last two years preceding the time of application.

SCHOLARSHIPS AND FELLOWSHIPS

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

Curriculum

The online program consists of 42 hours: 36 required foundation hours including a choice of either PAPP 5332 PUBLIC CAPITAL BUDGETING or PAPP 5354 NONPROFIT MANAGEMENT AND SOCIAL ENTREPRENEURSHIP, a 3 hour capstone, and a 3 hour internship that can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/).

The program is designed for students to take two courses a term (Fall, Spring, Summer) in succession (one course in first half of term, another in second half of term) except in Summer where the two courses have staggered starting dates and PAPP 5399 PUBLIC ADMINISTRATION CAPSTONE , which is a full semester course. It is possible to take more than two courses per term but is not advised. The curriculum is offered in a lockstep cohort format. Unlike the campus program, there are no emphasis areas. However, is possible to complete one of two certificates (Public Budgeting and Financial Management or Urban Nonprofit Management) as part of the coursework. An independent study, PAPP 5395 CONFERENCE COURSE IN URBAN AFFAIRS, can be substituted for one of courses with registration approval of the program director.

DUAL DEGREE PROGRAMS

Students in public administration may participate in one of five dual degree programs whereby they can earn a Master of Public Administration and one of the following:

1. Master of Arts in Urban Affairs
2. Master of City and Regional Planning,
3. Master of Science in Social Work,
4. Master of Science in Nursing,
5. Master of Arts in Criminal Justice, or
6. Master's of Sociology.

By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of graduate advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in the dual degree program should consult the appropriate graduate advisor(s) for further information on course requirements. See also the statement of dual degree programs in the general information section of this catalog.

Program Completion

CAPPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their master's degree or their PhD. Students who complete a master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A graduate student, whose cumulative grade point average (GPA) falls below a 3.000 in all graduate courses, be they graduate or undergraduate level and taken while enrolled as a UT Arlington graduate student, may be subject to dismissal (http://catalog.uta.edu/academicregulations/academicstanding/#graduatetext) from the program.

Advising Resources

The College of Architecture, Planning and Public Affairs (CAPPA) at UT Arlington equips students with skills and knowledge to address real-world challenges in design, public policy, and research. Master of Public Administration (Public Budgeting and Financial Management

About This Program

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, the Master of Public Administration (MPA), Public Budgeting and Financial Management track gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the curriculum conforms to NASPAA standards.

Competencies

1. Upon completion, students will be able to review, recommend, and interpret operating and capital budget requests taking political, economic, and decision-making processes into account.
2. Upon completion, students will be able to assist budget officers and other higher-level public officials in performing comprehensive financial analyses and developing financial and budgetary recommendations.
3. Upon completion, students will be able to lead and manage in public governance.
4. Upon completion, students will be able to participate in and contribute to the policy process.
5. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
6. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
7. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

The program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work.
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The essay is considered both for its content and quality of writing and should address the following questions: 1) Why do you want to earn a Master's degree in the program for which you are applying? 2) What relevant background and experience do you bring to the program? The essay may also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

- Minimum Writing GRE score of 4.0 (may be waived under certain conditions - see "Waiving the GRE" below)
- Minimum Undergraduate GPA of 3.0 based on the last 60 hours of course work as calculated by UTA Graduate Admissions.

- A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a minimum combined Verbal and Quantitative score of 1,000 (Revised GRE Test Combined: 291) (may be waived under certain conditions - see "Waiving the GRE" below)
- Outstanding letters of recommendation
- Strong, well-written personal essay
- Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for unconditional admission will be considered for probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for probationary admission conditional on completing an approved writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONA L ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

WAIVING THE GRE

The MPA program waives the requirement that an applicant take the GRE under any of the following conditions:

- A 3.25 or higher undergraduate GPA based on the last 60 hours of course work AND at least three years professional non-profit or public service work experience (as judged by the MPA admission committee. Applicants should submit a supporting resume or other relevant documentation to the MPA Graduate Advisor)
- A completed graduate degree from an accredited program in a related field such as, but not exclusively, political science, economics, urban planning, social work, criminal justice, and sociology OR a 3.0 or better higher after 12 hours of coursework in the accredited graduate degree program.
- A completed UTA B.A. or B.S. with 3.0 or higher GPA
- An equivalent GMAT or LSAT score from an exam taken within the last two years preceding the time of application.

SCHOLARSHIPS AND FELLOWSHIPS

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

Curriculum

The campus program consists of 39 or 42 total hours, which includes 10 required core courses and 9 hours in a selected emphasis area (2 core courses and 1 elective). PAPP 5360 PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP, a required is a 3-hour internship course, can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/)

Upon being admitted into the MPA program, students will choose an emphasis area and degree plan. Most all classes are offered as one session per week on Monday through Thursday during evening times (6:00-8:50pm or 7-9:50pm).

Master of Public Administration (Strategic Human Resources Management)

About This Program

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, the Master of Public Administration (MPA) Strategic Human Resources Management emphasis gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the curriculum conforms to NASPAA standards.

Competencies

1. Upon completion, students will demonstrate an understanding of public human resource policies, programs, procedures, and legal issues relevant to the field.
2. Upon completion, students will demonstrate knowledge of techniques employed in designing performance appraisals, recruiting and selecting employees, and developing rewards system.
3. Upon completion, students will be able to lead and manage in public governance.
4. Upon completion, students will be able to participate in and contribute to the policy process.
5. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
6. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
7. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

The program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)

Master of Public Administration (Urban Nonprofit Agency Management)

About This Program

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, the Master of Public Administration (MPA) Urban Nonprofit Agency Management emphasis gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the curriculum conforms to NASPAA standards.

Competencies

1. Upon completion, students will understand the different management areas and techniques within the nonprofit organization, including institutional management, leadership, fund-raising, financial administration, human resources coordination, and planning and performance measurements.

2. Upon completion, students will understand the role of nonprofits as community institutions with an outward focus, including the political, economic, and inter-organizational environment, as well as marketing, legal, and government policy issues.
3. Upon completion, students will be able to lead and manage in public governance.
4. Upon completion, students will be able to participate in and contribute to the policy process.
5. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
6. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
7. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

The program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work.
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The essay is considered both for its content and quality of writing and should address the following questions: 1) Why do you want to earn a Master's degree in the program for which you are applying? 2) What relevant background and experience do you bring to the program? The essay may also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

UNCONDITIONAL ADMISSION

Applicants who meet all the following requirements will be considered for unconditional admission:

- Minimum Writing GRE score of 4.0 (may be waived under certain conditions - see "Waiving the GRE" below)
- Minimum Undergraduate GPA of 3.0 based on the last 60 hours of course work as calculated by UTA Graduate Admissions.
- A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a minimum combined Verbal and Quantitative score of 1,000 (Revised GRE Test Combined: 291) (may be waived under certain conditions - see "Waiving the GRE" below)
- Outstanding letters of recommendation
- Strong, well-written personal essay
- Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

PROBATIONARY ADMISSION

Applicants who do not meet all requirements for unconditional admission will be considered for probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under probationary admission, special course requirements or other conditions may be imposed by the CAPPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for probationary admission conditional on completing an approved writing course in their first semester.

DEFERRED ADMISSION

Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.

PROVISIONA L ADMISSION

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a provisional status.

DENIAL OF ADMISSION

Applicants who fail to meet more than one of the admission requirements and for whom the CAPPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

WAIVING THE GRE

The MPA program waives the requirement that an applicant take the GRE under any of the following conditions:

- A 3.25 or higher undergraduate GPA based on the last 60 hours of course work AND at least three years professional non-profit or public service work experience (as judged by the MPA admission committee. Applicants should submit a supporting resume or other relevant documentation to the MPA Graduate Advisor)
- A completed graduate degree from an accredited program in a related field such as, but not exclusively, political science, economics, urban planning, social work, criminal justice, and sociology OR a 3.0 or better higher after 12 hours of coursework in the accredited graduate degree program.
- A completed UTA BA or BS with 3.0 or higher GPA
- An equivalent GMAT or LSAT score from an exam taken within the last two years preceding the time of application.

SCHOLARSHIPS AND FELLOWSHIPS

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for master's and doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

Curriculum

The campus program consists of 39 or 42 total hours, which includes 10 required core courses and 9 hours in a selected emphasis area (2 core courses and 1 elective). PAPP 5360 PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP, a required is a 3-hour internship course, can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/)

Upon being admitted into the MPA program, students will choose an emphasis area and degree plan. Most all classes are offered as one session per week on Monday through Thursday during evening times (6:00-8:50pm or 7-9:50pm).

Foundations		
PAPP 5302	FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS	3
PAPP 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING	3

PAPP 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS	
Internship		
PAPP 5360	PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP [1]	3
Total Hours		**42**

[1] Internship can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (https://www.uta.edu/academics/schools-colleges/cappa/academics/public-affairs-planning/m-public-administration/).

DUAL DEGREE PROGRAMS

Students in public administration may participate in one of five dual degree programs whereby they can earn a Master of Public Administration and one of the following:

1. Master of Arts in Urban Affairs
2. Master of City and Regional Planning,
3. Master of Science in Social Work,
4. Master of Science in Nursing,
5. Master of Arts in Criminal Justice, or
6. Master's of Sociology.

By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of graduate advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in the dual degree program should consult the appropriate graduate advisor(s) for further information on course requirements. See also the statement of dual degree programs in the general information section of this catalog.

Program Completion

CAPPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their master's degree or their PhD. Students who complete a master's degree at CAPPA will not carry deficiency points into their PhD work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
F = 3 deficiency points
I = 1 deficiency point
W = 0.5 deficiency point

A graduate student, whose cumulative grade point average (GPA) falls below a 3.000 in all graduate courses, be they graduate or undergraduate level and taken while enrolled as a UT Arlington graduate student, may be subject to dismissal (http://catalog.uta.edu/academicregulations/academicstanding/#graduatetext) from the program.

Post-Baccalaureate Certificate in Development Review

About This Program

The Post-Baccalaureate Certificate in Development Review provides training in zoning, subdivision plat review, site design, communication skills, and urban development, while keeping in mind the interests of citizens and the spirit of places. These skills are essential for planners who want to understand proposed development activity, ensure that proposed development is consistent with a city's vision, and facilitate review of development proposals. The program is geared for both entry-level planners/planning technicians, and for professionals in allied fields such as architecture, landscape architecture, law, engineering, and real estate.

Competencies

1. Upon completion, students will be able to communicate planning information clearly and effectively in oral, written, and graphic form.
2. Upon completion, students will be able to relate knowledge of the ethical and normative aspects of planning to the planning process.
3. Upon completion, students will be able to identify and evaluate planning problems and to apply planning methods to their solution and communication.
4. Upon completion, students will be able to identify and relate the factors influencing the growth and development of communities, cities, and regions.
5. Upon completion, students will be able to understand the challenges that regions, cities, communities, and planners face in the field.

Admissions Criteria

Non-degree seeking students may apply complete this certificate by applying for admission to the UTA Graduate Admissions as a Non-Degree Seeking Student (https://www.uta.edu/academics/schools-colleges/gradschool/admissions/).

Students can also complete the certificate as part of the accelerated online MPA program by completing hours applicable to the MPA degree.

Post-Baccalaureate Certificate in Geographic Information Systems

About This Program

The Post-Baccalaureate Certificate in Geographic Information Systems (GIS) is designed for students and professionals wishing to acquire skills in spatial data analysis. GIS is a powerful computer-based analytical tool used at all levels of government, in business, industry, and institutions. GIS skills are a must in many different fields including urban planning, engineering, geology, and the social sciences. In planning for instance, GIS skills provide professionals a spatial analytical edge with application in all areas of planning including land use, environmental, transportation and economic development planning.

Competencies

1. Upon completion, students will be able to communicate planning information clearly and effectively in oral, written, and graphic form.
2. Upon completion, students will be able to relate knowledge of the ethical and normative aspects of planning to the planning process.
3. Upon completion, students will be able to identify and evaluate planning problems and to apply planning methods to their solution and communication.
4. Upon completion, students will be able to identify and relate the factors influencing the growth and development of communities, cities, and regions.
5. Upon completion, students will be able to understand the challenges that regions, cities, communities, and planners face in the field.

Admissions Criteria

Applying for admission to the GIS-Certificate program does not require the GRE or a degree in planning and should be done as a Non-Degree Seeking Student (https://www.uta.edu/academics/schools-colleges/gradschool/admissions/) through the Graduate Admissions.

Up to 12 credit hours in the GIS Certificate earned as a non-degree seeking student may be applied to the Master's degree in City and Regional Planning, subject to the policies on grades and graduate credit described in the Catalog.

Students can also complete the certificate as part of the accelerated online MPA program by completing hours applicable to the MPA degree.

Post-Baccalaureate Certificate in Public Budgeting and Financial Management

About This Program

Sound fiscal management at all levels of government is essential for meeting the demands of an increasingly expensive and complex service-delivery need. Post-Baccalaureate Certificate in Public Budgeting and Financial Management provides students interested in public sector affairs and local government officials (budgeters, planners, finance analysts, and elected officials) with the skills to enable them to effectively support local government financial decision-making. Participants should expect to attain a comprehensive understanding of public budgeting and financial management practices and theories including knowledge of the various government revenue sources, major expenditures, and borrowing mechanisms used to finance long-life capital assets.

Competencies

1. Upon completion, students will be able to lead and manage in public governance.
2. Upon completion, students will be able to participate in and contribute to the policy process.
3. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
4. The ability to communicate and interact productively with a diverse and changing workforce and citizenry
5. The ability to articulate and apply a public service perspective

Admissions Criteria

Students wishing to enroll in the Post-Baccalaureate Certificate in Public Budgeting and Financial Management without seeking a master's or PhD may apply for admission to UT Arlington as a non-degree seeking student. A bachelor’s degree with a GPA of 2.8 in the last 60 hours of undergraduate coursework is required for admission. Students with GPAs lower than 2.8 may be recommended for admission by the certificate adviser, based on the following admission enhancing factors:

1. the applicant’s work experience and level of responsibility;
2. undergraduate degree in economics, financial management, accounting, or other closely related field; and
3. two letters of recommendation.

Students already enrolled in a master’s degree program, especially the campus and online MPA, at UT Arlington may enroll by submitting the appropriate application form to the certificate advisor and his or her academic graduate adviser. Students who have completed a master’s degree may apply for admission to UT Arlington as a non-degree seeking student. In either case, a minimum GPA of 3.0 in master’s degree work is required.

Post- Baccalaureate Certificate in Transportation Planning and Policy

About This Program

In partnership with Civil Engineering and the Center for Transportation Equity Decisions and Dollars (CTEDD (https://ctedd.uta.edu/)), the College of Architecture, Planning and Public Affairs offers Post- Baccalaureate Certificate in Transportation Planning and Policy that prepares students to plan, advocate and engineer for sustainable transportation and for better equity within existing transportation resources and infrastructure. The certificate enables students and professionals with:

- an engineering or technical background to gain knowledge in transportation planning and policy
- a planning and/or policy-related background interested in transportation to complement their degree.

The program is open to both degree and non-degree seeking students.

Competencies

1. Upon completion, students will be able to communicate planning information clearly and effectively in oral, written, and graphic form.
2. Upon completion, students will be able to relate knowledge of the ethical and normative aspects of planning to the planning process.
3. Upon completion, students will be able to identify and evaluate planning problems and to apply planning methods to their solution and communication.
4. Upon completion, students will be able to identify and relate the factors influencing the growth and development of communities, cities, and regions.
5. Upon completion, students will be able to understand the challenges that regions, cities, communities, and planners face in the field.

Admissions Criteria

Non-degree seeking students may apply complete this certificate by applying for admission to the UTA Graduate Admissions as a Non-Degree Seeking Student (https://www.uta.edu/academics/schools-colleges/gradschool/admissions/).

Students can also complete the certificate as part of the accelerated online MPA program by completing hours applicable to the MPA degree.

Post-Baccalaureate Certificate in Urban Nonprofit Management

About This Program

The Post-Baccalaureate Certificate in Urban Nonprofit Management prepares students who are working in or are considering management careers in nonprofit organizations. The courses in this program address pertinent topics in entrepreneurship, leadership and management of the trillion dollar nonprofit sector that includes education, research, healthcare, art, culture, religion, social and human services, advocacy, legal services, international organizations, foundations, and mutual benefit professional and trade associations. Students from any department or discipline may elect to complete the certificate program. Upon completion, students will be prepared to assume key roles in any nonprofit institution.

Competencies

1. Upon completion, students will be able to participate in and contribute to the policy process.
2. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
3. Upon completion, students will be able to communicate and interact productively with a diverse and changing workforce and citizenry.
4. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

Students who are already enrolled in a graduate degree program at UT Arlington, especially the campus or online MPA, need only declare their intent to enroll by submitting the appropriate application form the Urban Nonprofit Management certificate advisor. No prerequisites are essential for these students.

Students who desire to enroll in the Urban Nonprofit Management Certificate without enrolling in a master's or PhD program may apply for admission to UT Arlington as a special student or "non-degree seeking" student. An undergraduate degree and grade point average of 3.0 are required. A GRE (graduate record examination) score and letters of recommendation are not necessary for admission to the Urban Nonprofit Management Certificate program.

Any student that later seeks a graduate degree at UT Arlington may apply nine hours of coursework toward that degree within six years of completion and award of the Urban Nonprofit Management Certificate and by petition to the Graduate School through her or his prospective academic department. The acceptance or waiver of the remaining six hours taken as part of the requirements for the award of the Urban Nonprofit Management Certificate is at the discretion of each department.

Graduate students in any degree program at UT Arlington may register for Urban Nonprofit Management courses using standard registration procedures. It should be noted that class slots in the two core courses would be reserved for all of those Urban Nonprofit Management Certificate program participants who are accepted. Urban Nonprofit Management program students who are enrolled in other academic schools or colleges must obtain written course approval from their respective graduate advisors.

Professionals who desire to enroll in any or both of the core courses for continuing education hours may do so as special students. If at a later date these students decide to apply for the Urban Nonprofit Management Certificate program, the hours already taken as continuing education will be applied (within six years of completion of the courses) to the certificate program requirements.

Minor in Environmental and Sustainability Studies

About This Program

The Minor in Environmental and Sustainability Studies undergraduates across the campus--from Liberal Arts and Architecture to Science and Interdisciplinary Studies--a set of tools for understanding the social, political, humanistic, and scientific dimensions of climate change and other environmental problems. Taking advantage of the many courses on sustainability and the environment offered throughout the university, this broadly interdisciplinary program provides students a powerful way to enrich their education and more effectively apply their major field of study to some of the most complex and crucial problems of the 21st century. The 18-hou minor can be combined with many majors and, in some cases, already completed coursework will qualify for credit.

Competencies

1. Interdisciplinary Environmental Literacy: Upon completion, students will be able to analyze environmental challenges—including those related to the built environment—through diverse academic perspectives, from science and public policy to culture and economics.
2. Applied Sustainability Frameworks: Upon completion, students will be able to evaluate how the five domains of sustainability impact both natural and built environments, informing decisions in areas like design, planning, and resource management.
3. Strategic Career Integration: Upon completion, students will be able to connect your major to urgent environmental concerns—including climate change, public health, and sustainable development—to enhance career readiness in fields that shape the built world.

Curriculum

Minor in Urban and Public Affairs

About This Program

The College of Architecture, Planning and Public Affairs offers a Minor in Urban and Public Affairs for students interested in complementing their undergraduate career with a broader understanding of Urban Affairs, Urban Planning and the Environment, or Public Administration.

Competencies

1. Upon completion, students will be able to analyze, synthesize, think critically, solve problems and make decisions.
2. Upon completion, students will be able to articulate and apply a public service perspective.

Admissions Criteria

Students interested in adding the Minor in Urban and Public Affairs to their degree plan should send questions to arch.advising@uta.edu and complete the Urban Affairs Minor Request Form (https://common.forms.uta.edu/view.php?id=1617323).

College of Business

College Overview

Since its origination in 1965, the College of Business continues to be a leader in business education. The college is organized into six academic departments: Accounting, Economics, Finance and Real Estate, Information Systems and Operations Management, Management, and Marketing. A total of 140 full-time equivalent faculty organize and conduct classes, including 115 with doctoral degrees from some of the top schools in the nation. The college currently enrolls 6,300 students, 1,600 of whom are enrolled in twelve graduate business programs.

Teaching, research, and community service are the essential activities of the College of Business. All three activities are aimed at enhancing the college's scholarly environment and strengthening relationships with the business community. The emphasis on excellence in the performance of these cornerstone activities enables the college to offer an outstanding business education for students over a broad spectrum of interest, age, and experience.

MISSION, VISION AND VALUES

The mission of the College of Business is to provide a transformative educational experience accessible to a diverse student population at a top research university. Offering a variety of programs, we prepare students to succeed in their career of choice and become business leaders, impacting lives forever.

Our vision is to be a top choice for students and employers.

Four values form much of the foundation upon which the College operates on a daily basis in developing and offering degree programs, linking faculty and students to the business and professional communities, and conducting relevant research to advance business practices and enhance the performance of business and other organizations. These values are:

Integrity - We do the right thing, always being honest, transparent and accountable.

Respect - We treat all people in a way that affirms their individual uniqueness, worth and dignity.

Excellence - We continually strive to achieve the highest levels of performance in all our endeavors.

Collaboration - We team with internal and external partners to create and accomplish shared goals.

ACCREDITATION

The University of Texas at Arlington’s College of Business is fully accredited in business and accounting at both the undergraduate and graduate levels by the AACSB-International – The Association to Advance Collegiate Schools of Business.

The Master of Science in Health Care Administration program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

College Of Business Undergraduate Policies

ADMISSION TO THE COLLEGE OF BUSINESS

Admission to the College of Business is based on the University's undergraduate admission requirements for incoming freshman and incoming transfer students. All applicants who meet those criteria are admitted as business intended majors.

Major Intended (i.e. Accounting Intended, Management Intended, etc.)

Students who have already decided to pursue a specific business major will be admitted as intended for that specific major. Students will be encouraged to meet with an advisor regularly and monitored for progress toward declaring a business major.

Undeclared Business Intended Major

Students who are not sure which business major to pursue will be admitted to the Undeclared Business Intended (UBUSINT) major. Students will be encouraged to meet with an advisor regularly and monitored for progress toward declaring a business major.

Internal Transfers

Students already admitted to UT Arlington, who previously declared a major other than business, may change to business intended with a UTA overall GPA of a 2.25 or better. Current UT Arlington students with less than a 2.25 overall grade point average and/or 2.25 business grade point average, will be allowed one provisional semester as a business intended student under a College of Business enrollment contract earning a minimum term grade point average of 2.5 to remain in the College of Business. The enrollment contract may include restrictions on course load and course selection.

Degree Program Admission Requirements

Academic performance of all business intended and major intended students is monitored for progress toward meeting the following Degree Program Admission Requirements.

To declare a major, an intended student must meet the following criteria:

- Complete twelve (12) hours of business course work at UT Arlington;
- An overall grade point average of 2.25 at UT Arlington;
- A business grade point average of 2.25 at UT Arlington; and
- Completion of the CoB math requirement. (The CoB math requirement includes MATH 1315 and MATH 1316 or equivalent courses as transfer credits.)
- Business Analytics BS candidates must earn a B or better in both BSTAT 3321 and INSY 3300.

ADVISING OF NEW BUSINESS STUDENTS

Students entering directly from high school or with less than 24 hours of transferable credit are advised initially by the Division of Student Success. To transition to departmental advising within the College of Business, students must meet the following benchmarks by the end of their first two long semesters (fall and spring) at UTA:

1. Earn a minimum 2.25 cumulative GPA
2. Complete at least 30 credit hours

Students who do not meet transition criteria after three semesters are strongly encouraged to consult with an advisor to explore alternative majors that may better align with their academic progress.

Entering transfer students with 24 hours or more of transferable credit will be advised by the College of Business advisors upon admission to UT Arlington and throughout their time as a business student.

PROBATIONARY ADMISSION AND DISMISSAL

Business students unable to meet the above transition criteria after completing at least 30 credit hours may be admitted to the College of Business under specific conditions. If the Admission Criteria can be met by earning a term GPA of 2.5 or better in nine (9) hours of business coursework at UT Arlington, the student may be admitted as a probationary business-intended major up to the semester containing the ninth hour of business course work under an enrollment contract. Depending on the circumstances, a student on College of Business probation may have restrictions on course load, course selection, and will be given specific course grade requirements that must be met. All UT Arlington business hours will be used to calculate a business grade point average for College of Business admission purposes.

Students who do not meet the College of Business minimum academic standing requirements after nine (9) hours of business course work, or do not meet the requirements outlined in the enrollment contract, will not be allowed to take additional business courses at UT Arlington. The student will be dismissed from the College of Business and must choose a major other than business in order to remain enrolled at UT Arlington.

Students who have not completed the College of Business Math requirement after 18 hours of business coursework may be placed on a probation contract requiring the completion of MATH 1315 and/or MATH 1316 (or equivalent) before future business course enrollment will be allowed.

MAJOR PROBATION AND DISMISSAL

Students who have been accepted to a business degree program must maintain satisfactory academic standing and progress in their field of study to continue as a business degree candidate.

College of Business students are in satisfactory academic standing if they maintain the required 2.25 grade point average across:

- All courses completed at UT Arlington
- All business courses completed at UT Arlington
- All major courses completed at UT Arlington

If at any time a business-intended student does not meet the above academic standards, the student is on College of Business probation. If minimum academic standards can be met within eighteen (18) hours of business coursework at UT Arlington, the student may continue enrollment as a business student up to the semester containing the eighteenth hour of business course work under an enrollment contract. Depending on the circumstances, a student on College of Business probation may have restrictions on course load, course selection, and will be given specific course grade requirements that must be met.

Students who do not meet the College of Business minimum academic standing requirements after eighteen (18) hours of business course work, or do not meet the requirements outlined in the enrollment contract, will not be allowed to take additional business courses at UT Arlington. The student will be dismissed from the College of Business and must choose a major other than business in order to remain enrolled at UT Arlington.

Additionally, declared business majors are subject to dismissal from a business degree program and will not be permitted to enroll for additional courses in that major if they:

- Receive a grade of D or F in more than one upper level major course, or
- Receive any combination of grades of D or F in two attempts of the same major course.

COURSE TRANSFER

The College of Business has the authority for determining which transfer courses apply toward any undergraduate business degree program or business minor. Students transferring business classes taken at another institution will be required to submit both a catalog course description and a syllabus for each course to the Business Undergraduate Advising Center for approval.

Students planning to complete transfer coursework are strongly advised to consult the Office of Undergraduate Advising **before** taking courses outside of UT Arlington for credit transfer. Courses should be completed at the same level (freshman, sophomore, junior, senior) as the UT Arlington course. A course completed at the freshman or sophomore level at another institution will not be considered an equivalent of an upper level (junior or senior) course or degree requirement. Upper level business courses must be completed at an AACSB accredited institution. Transfer credit for courses from institutions outside the United States will be evaluated independently.

RESIDENCY AND GRADUATION

In addition to meeting the credit hour and course requirements for a specific College of Business degree program, the student must meet the following requirements:

- Be a declared business major;
- A minimum overall grade point average of 2.25;
- A minimum grade point average of 2.25 in all course work taken from the College of Business;
- A minimum grade point average of 2.25 for courses taken within the major/concentration area for those majors having a concentration (This requirement also applies to modern language course work for International Business degree programs);
- Students must complete at least 50 percent of their business course work with the UT Arlington College of Business;
- Students must complete at least 24 of the last 30 semester hours of advanced (3000/4000 level) course work with UT Arlington College of Business, to include a minimum of 12 hours of advanced courses in their major/concentration subject area beyond business core requirements; and
- A grade of "C" or better must be earned in all major/concentration courses required for the degree. Business Analytics BS candidates must earn a B or better in both BSTAT 3321 and INSY 3300.

UNIV 1101 CAREER PREPARATION AND STUDENT SUCCESS

Business transfer students have the option to enroll in a 1-hour career preparation course, UNIV 1101, or the hour may be an elective (business or non-business).

UNIV 1131 STUDENT SUCCESS

All entering freshmen are required to enroll in a 1 hour student success course, UNIV 1131.

COMPUTER LITERACY

Students majoring in business administration obtain competencies in computer literacy via required course work. They are required to take a computer course, INSY 2303.

SPECIAL UNDERGRADUATE PROGRAMS AND OPPORTUNITIES

Double Majors

The College of Business allows Bachelor of Business Administration (BBA) programs to be combined resulting in a degree with a double major. If all specified requirements are completed at the same time as outlined in the departmental sections of the University Catalog, one diploma recognizing both business majors will be awarded. These may restrict the option of participating in various programs (i.e. fast tracks). Double major combinations available to business students are limited to:

- BBA in Accounting and Finance
- BBA in Accounting and Information Systems
- BBA in Economics and Finance
- BBA in Economics and Marketing
- BBA in Finance and Marketing
- BBA in Finance and Real Estate
- BBA in Hospitality Management and Entrepreneurship
- BBA in Hospitality Management and Marketing

- BBA in Hospitality Management and Real Estate
- BBA in Management and Marketing
- BBA in Management and Real Estate
- BBA in Marketing and Real Estate
- BBA in Operations & Supply Chain Management and Economics
- BBA in Operations & Supply Chain Management and Management
- BBA in Operations & Supply Chain Management and Marketing

Business Honors Program

The Business Honors Program (BHP) operates as a part of UT Arlington's Honors College. Its primary objective is to establish a cohesive community of exceptionally intelligent and motivated students who will pursue the study of business together in a stimulating learning environment. Participation in the BHP is open to entering freshmen with fewer than 30 college hours and continuing UT Arlington and transfer students with more than 30 college hours. Additional standards for admission may be found on the Honors College website (https://www.uta.edu/honors/). Students who complete the program successfully will receive a special citation on their diplomas. The University honors degree requirements are compatible with all College of Business degree programs.

Internship for Degree Credit

Up to 6 credit hours of approved internship credit can be used to satisfy advanced business electives or advanced major electives for eligible students. Students must be a declared business major, junior or senior standing, have a GPA of 2.25 or better in all calculations (cumulative, business, and major), have advanced business elective or advanced major elective hours available, and complete the approval forms before the appropriate semester deadline.

Internship experiences must be approved in advance by the appropriate department Internship Coordinator and must provide clear evidence of substantial educational experience in the business subject area for which credit is being sought. Internship courses are graded on a pass/fail basis and credit will not be given for previous experience or activities. For specific course requirements, refer to the undergraduate internship application (https://common.forms.uta.edu/view.php?id=1094452).

Study Abroad/Exchange Programs

The leaders for the 21st century will be deeply involved in business opportunities around the world. Study abroad/exchange programs are available to help students prepare in both curricular and extracurricular ways for these future international leadership roles. Students wishing to study abroad are encouraged to review the many opportunities contained in the Study Abroad Library in the International Office. Once a specific program is identified, students may submit their request for Study Abroad/exchange program enrollment through the College of Business website (https://www.uta.edu/academics/schools-colleges/business/undergraduate-advising/undergraduate-forms/) to ensure the program fulfills degree requirements. Depending on their terms, study abroad/exchange programs may allow students to complete courses as resident credit or as transfer credit.

College of Business Graduate Student Policies

SPECIAL STUDENTS

An applicant can gain admission as a special student in the College of Business, but he/she must meet the same admission requirements as those unconditionally admitted to the corresponding Masters program of their chosen field of study. In order to take masters and/or doctoral level courses in the College of Business, a student must be admitted as a graduate student.

DUAL DEGREE PROGRAMS

The college offers a rich array of dual degree opportunities that build synergistic skill sets that prepare students for more advanced career opportunities. While most dual degree programs include two graduate business degrees, the Professional Management Option in the MBA program allows professionals with undergraduate degrees in engineering, architecture, education, and urban affairs to complete a master's degree in that field along with the MBA. Dual degree programs allow students to earn two degrees with a substantial reduction in course requirements.

Within an approved dual degree program, students may apply semester hours jointly to meet the requirements of each Masters program and subsequently reduce the total number of hours required to earn two degrees. The number of hours which may be jointly applied ranges from 6 to 18 hours subject to the approval of Graduate Advisors for each participating program. To participate in a dual degree program, students must make a separate application to each desired program and must meet the admission requirements of each program individually. To be eligible, students must be admitted to the second degree program prior to completing the full degree requirements of their first program.

FAST TRACK PROGRAMS

The Fast Track Program enables outstanding undergraduate UT Arlington Business students to satisfy degree requirements that will lead to a master's degree in Business Administration (MBA), Accounting, Business Analytics, Human Resource Management, Taxation, Information Systems, Quantitative Finance, Real Estate, Economic Data Analytics or Marketing Research while completing their undergraduate studies. If admitted, students will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. Admitted students will be allowed to complete 6 to 9 hours of selected graduate coursework as an undergraduate student. A GPA of 3.0 in each graduate class taken is required

to continue taking graduate courses. Any Fast Track student who completes the 6 to 9 hours of graduate coursework with grades of B or better will be automatically admitted to Graduate School. The student would then be awarded his or her bachelor's degree. The student will not be required to take the GMAT or complete the graduate application and will have the related application fees waived.

FACILITATED ADMISSION OF OUTSTANDING UT ARLINGTON UNDERGRADUATES

The following master's programs participate in the Facilitated Admissions: Business Administration (MBA), Accounting, Taxation, Business Analytics, Economic Data Analytics, Human Resource Management, Information Systems, Real Estate, Quantitative Finance, and Marketing Research. Students pursuing Facilitated Admission must demonstrate quantitative proficiency. For details on admission into the program please refer to UT Arlington's Graduate Catalog Special Admissions Programs under Admission Requirements and Procedures.

INTERNSHIP PROGRAM

Graduate students are encouraged to participate in internships to supplement and complement classroom education by providing valuable experience and training in their chosen area of expertise. Internships allow students to meet and interact with professionals in the work setting, identify and develop critical professional skills, clarify their own career goals and interests, and develop important contacts for future development. This internship program is open to all graduate students who have completed a minimum of 9 required credit hours in their program of study, are in good academic standing (GPA => 3.0), have elective hours available, and have secured their advisor's approval for up to six hours of graduate credit. Interested students should obtain an internship packet found on the Graduate Business Services website (https://www.uta.edu/academics/schools-colleges/business/graduate-business-services/graduate-business-forms/). After gaining the advisor's approval, students will complete an application and meet with the appropriate departmental internship coordinator. Once an internship is obtained, the coordinator will monitor progress and assign a Pass/Fail grade. For specific course requirements, refer to the internship approval forms.

STUDY ABROAD/EXCHANGE PROGRAMS

The leaders for the 21st century will be deeply involved in business opportunities around the world. Study abroad/exchange programs are available to help students prepare in both curricular and extracurricular ways for these future international leadership roles. Students wishing to study abroad are encouraged to review the many opportunities contained in the Study Abroad Library in the International Office. Once a specific program is identified, students discuss the available courses with their advisor to ensure they meet degree requirements. Depending on their terms, study abroad/exchange programs may allow students to complete courses as resident credit or as transfer credit.

WAIVERS AND TRANSFER CREDIT

Course waivers* are determined by each program's Graduate Studies Committee. Check with the program advisor for more details.

A maximum of 9 hours of advanced coursework or 25% of the total hours required for degree completion may be transferred in from other AACSB accredited schools if approved by the program advisor. The grade must be a B or better to transfer. Transfer of graduate courses from other universities will be considered on a case-by-case basis. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at the University of Texas at Arlington.

* Note: The University of Texas at Austin offer Business Foundations Programs (BFP) for non-business majors that provide solid foundations in basic business concepts. BFP courses and courses from equivalent programs for non-business majors at other colleges/universities may not be used for course waiver credit. Survey classes cannot be used for waiver credit.

Accounting

Department Overview

The mission of the Department of Accounting is to:

1. prepare students from diverse backgrounds for professional careers in accounting,
2. create, interpret, and disseminate knowledge of accounting, and
3. provide service to the University and accounting profession.

ACCREDITATION

The College of Business is fully accredited by The Association to Advance Collegiate Schools of Business (AACSB International) and the Department of Accounting is separately accredited by the AACSB. The department is also a member of the Federation of Schools of Accountancy, an organization to promote and support high quality accredited graduate programs in accounting.

COURSES

ACCT 2301. PRINCIPLES OF ACCOUNTING I. 3 Hours. (TCCN = ACCT 2301)
The accounting process and its informational output. Financial accounting concepts, basic procedures, and the resulting reports. Recognition and creation of accounting information as bases for decisions. An accounting lab is required. The grade for this course requires the completion of both the lecture component and the accounting lab. Prerequisite: 30 credit hours or permission of the department.

ACCT 2302. PRINCIPLES OF ACCOUNTING II. 3 Hours. (TCCN = ACCT 2302)
A study of managerial accounting concepts and techniques. Topics include cost behavior, budgeting, responsibility accounting, and product costing. An accounting lab is required. The grade for this course requires the completion of both the lecture component and the accounting lab. Prerequisite: ACCT 2301 with a grade of C or higher.

ACCT 2303. ACCOUNTING AND COMPLIANCE OF NON-PROFIT ORGANIZATIONS. 3 Hours.
The primary objective of this course is to help students understand accounting theories and compliance issues that relate to non-profit and philanthropic organizations. The course introduces students to general accounting theories, budgeting, internal control, fraud, and compliance issues of non-profit organizations. Restriction: Students enrolled in this course cannot be accounting majors. Prerequisite: Students enrolled in this course cannot be accounting majors, 30 credit hours.

ACCT 3133. PROFESSIONALISM IN ACCOUNTING. 1 Hour.
Topics to engender a stronger sense of professionalism: business and social etiquette, self-assessment, professional deportment, networking, effective communication skills, and dressing professionally. Topics primarily presented by accomplished professionals from public accounting, industry, and government. Prerequisites: Accounting major and ACCT 3311, can be taken concurrently.

ACCT 3303. INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS. 3 Hours.
The structure of contemporary accounting systems with emphasis on controls, auditing, reporting, and efficient operation. Prerequisite: ACCT 2302 and INSY 2303 with grades of C or higher.

ACCT 3308. FINANCIAL STATEMENT ANALYSIS FOR BANKING. 3 Hours.
The environment of accounting, development of standards, basic theory, financial statements, worksheets with a particular focus on the application of accounting topics of Intermediate Accounting to banking institutions. Prerequisite: ACCT 2301 with a grade of C or higher. Credit will not be received for both ACCT 3311 and ACCT 3308.

ACCT 3309. ACCOUNTING FOR MANAGERS. 3 Hours.
Planning, controlling, decision making, and performance evaluation. Uses a variety of teaching techniques (e.g., problems, cases, and projects) and is open only to non-accounting majors. Credit will not be given for both this course and ACCT 4302. Prerequisite: ACCT 2302 with a grade of C or higher.

ACCT 3311. FINANCIAL ACCOUNTING I. 3 Hours.
The environment of accounting, development of standards, basic theory, financial statements, worksheets, annuities and present value, receivables, inventories, liabilities, plant assets, depreciation and depletion, and intangible assets. Prerequisite: ACCT 2301 with a grade of C or higher and successful completion of basic accounting skills exam. (See the departmental website for details about the exam.).

ACCT 3312. FINANCIAL ACCOUNTING II. 3 Hours.
Stockholders' equity, earnings per share, investments in bonds and stocks, equity method, revenue recognition, accounting changes, error analysis, income taxes, leases, and cash flows. Prerequisite: ACCT 3311 with a grade of C or higher.

ACCT 3315. PRINCIPLES OF FEDERAL INCOME TAX. 3 Hours.
A study of general federal income tax principles such as income, deductions, losses, and property transactions. Emphasis is placed on the taxation of individuals as well as on an understanding of property transactions which apply to individuals and other entities. Prerequisite: Accounting major with junior standing and ACCT 3311 with a grade of C or higher.

ACCT 3316. DATA ANALYTICS FOR ACCOUNTING. 3 Hours.
Businesses use data analytics to evaluate organizational data and improve business decisions. The ability to collect, analyze, and use data to provide information for better decisions is a critical skill for accounting professionals. This course will introduce students to the growing role of analytics to answer business questions. Students will analyze data to solve problems frequently encountered in accounting. This course will also introduce students to basic statistical techniques used to analyze specific accounting related business problems. Prerequisite: ACCT 2302 with a C or better.

ACCT 4191. STUDIES IN ACCOUNTING. 1 Hour.
Advanced studies, on an individual basis, in the various fields of accounting. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

ACCT 4193. ACCOUNTING INTERNSHIP. 1 Hour.
Practical training in accounting. Analysis of theory applied to real life situations. Graded on a pass/fail basis. No credit will be given for previous experience or activities. Prerequisite: ACCT 4393 and accounting major with junior standing and consent of department internship advisor.

ACCT 4291. STUDIES IN ACCOUNTING. 2 Hours.
Advanced studies, on an individual basis, in the various fields of accounting. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

ACCT 4302. COST ANALYSIS AND DECISION MAKING. 3 Hours.
This course will cover advanced cost analysis concepts including Cost-Volume-Profit analysis, cost-benefit analysis, product and service costing, pricing and budgeting. Class discussions will integrate concepts and applications of cost analysis with corporate practice through use of analytical problem solving, real world examples and case analyses. Prerequisite: Accounting major with 60 credit hours and ACCT 3303 with a grade of C or higher.

ACCT 4304. MANAGEMENT PLANNING AND CONTROL. 3 Hours.
This course covers intermediate and advanced concepts in decentralization and management control, including budgetary control, performance measurement and incentive structures, and transfer pricing. Class discussions will integrate concepts and applications of control with corporate practice through use of analytical problem solving, real world examples and case analyses. Prerequisite: Accounting major with junior standing and ACCT 4302 with a grade of C or higher.

ACCT 4318. AUDITING. 3 Hours.
Principles, concepts, and techniques which are appropriate to the acquisition, evaluation, and documentation of audit evidence. Internal control concepts, financial compliance, and operational auditing. Prerequisite: Accounting major with junior standing and ACCT 3303 and ACCT 3312 with grades of C or higher.

ACCT 4319. FINANCIAL ACCOUNTING III. 3 Hours.
Accounting for business combinations, preparation of consolidated financial statements, multinational operations, and partnerships. Prerequisite: ACCT 3312 with a C or higher.

ACCT 4323. CORPORATE SUSTAINABILITY REPORTING. 3 Hours.
This course examines current trends in corporate sustainability reporting by business organizations. Topics include stakeholders, voluntary reporting frameworks, mandatory reporting standards, climate risk disclosures, sustainability ratings, and assurance. Student learning will be enhanced with in-class discussions, guest speaker visits, and assignments that require critical thinking, written communication, and oral communication. Prerequisite: Junior standing.

ACCT 4325. GOVERNMENTAL ACCOUNTING. 3 Hours.
Budgeting, accounting, and financial reporting for local governmental units, hospitals, voluntary health and welfare organizations, and other nonprofit entities. Prerequisite: Accounting major with junior standing and ACCT 3312 with a grade of C or higher.

ACCT 4331. SEMINAR IN ACCOUNTING. 3 Hours.
Readings and discussions of special topics in accounting. Prerequisite: Junior or senior standing and consent of instructor. May be repeated for credit with consent of department chair.

ACCT 4332. INTERNAL AUDITING I. 3 Hours.
A comprehensive study of internal auditing standards, ethics, concepts, audit techniques, and reporting practices. Prerequisite: Accounting major with junior standing and ACCT 3303 with a grade of C or higher or consent of the instructor.

ACCT 4333. INTERNAL AUDITING II. 3 Hours.
An advance study of operational, organizational, and quality control audits. Topics will include operational audit methodology, audits of administrative and support services, audits of line functions, and audits of special areas. Prerequisite: Accounting major with junior standing and ACCT 4332 with a grade of C or higher and a 3.0 GPA.

ACCT 4340. STUDY OF FEDERAL INCOME TAX FOR ENTITIES OTHER THAN INDIVIDUALS. 3 Hours.
Comprehensive analysis of the federal income tax consequences applicable to entities other than individuals. Analysis of the relevant tax principles of corporations, partnerships, trusts and estates will be undertaken. Cannot be taken for credit within the 36-hour program requirements for Master of Science in Taxation program. Prerequisite: ACCT 3315 with a C or higher.

ACCT 4380. ETHICS IN ACCOUNTING. 3 Hours.
This course is intended to introduce students to ethical reasoning, integrity, objectivity, independence, professionalism and other core values. The course incorporates the essentials of professional responsibilities, including elements of trust and communications with clients and other professionals. Both ethical principles and rules are considered. This course is intended to satisfy conditions of the Texas State Board of Public Accountancy that require candidates for the CPA Exam to have completed an approved ethics course. Accounting majors may take this course as a business elective, but may not count this course as an accounting elective nor include it in the calculation of their accounting GPA. Prerequisite: ACCT 3312 with a grade of C or higher.

ACCT 4391. STUDIES IN ACCOUNTING. 3 Hours.
Advanced studies, on an individual basis, in the various fields of accounting. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

ACCT 4393. ACCOUNTING INTERNSHIP. 3 Hours.
Practical training in accounting. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. Prerequisite: Accounting major with junior standing and consent of department internship advisor.

ACCT 5133. PROFESSIONALISM IN ACCOUNTING. 1 Hour.
Topics to engender a stronger sense of professionalism: business and social etiquette, self-assessment, professional deportment, networking, effective communication skills, and dressing professionally. Topics primarily presented by accomplished professionals from public accounting, industry, and government. Prerequisite: ACCT 5311 with a grade of C or higher or acceptance in the PPIA .

ACCT 5199. GRADUATE ACCOUNTING INTERNSHIP. 1 Hour.
Practical training in accounting. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum twelve accounting semester hours beyond principles completed or with approval of the internship coordinator.

ACCT 5299. GRADUATE ACCOUNTING INTERNSHIP. 2 Hours.
Practical training in accounting. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum twelve accounting semester hours beyond principles completed or with approval of the internship coordinator.

ACCT 5301. ACCOUNTING ANALYSIS I. 3 Hours.
Introduction to concepts, purposes, problems, methodology, and terminology of financial accounting.

ACCT 5302. ACCOUNTING ANALYSIS II. 3 Hours.
Introduction to concepts, purposes, problems, methodology, and terminology of managerial accounting. Prerequisite: ACCT 5301 with a grade of C or higher.

ACCT 5307. MEASUREMENT AND ANALYSIS FOR BUSINESS DECISION-MAKING. 3 Hours.
This course provides students with a comprehensive overview of financial reporting, analysis and measurement issues in the context of business decision making. Student will gain an understanding of financial statements and their underlying measurements. They will then use this understanding to conduct analyses using financial ratios. Students will then explore the role of cost measurements, allocations, etc. in determining the performance measures of parts of the organization and their inter-relationship with both choosing and evaluating strategies in various business contexts. They will cover issues such as matching strategies to performance measures, choosing and evaluating key performance indicators and balanced scorecards, etc.

ACCT 5311. FINANCIAL ACCOUNTING I. 3 Hours.
Examination of financial accounting process, problems encountered in preparation of financial statements, and concepts and principles used to resolve these problems. Prerequisite: ACCT 5301 with a grade of C or higher.

ACCT 5312. FINANCIAL ACCOUNTING II. 3 Hours.
Study of additional problems encountered in preparation of financial statements. Prerequisite: ACCT 5311 with a grade of C of higher.

ACCT 5313. SOFTWARE TOOLS. 3 Hours.
An in-depth study of software that would likely be used by accountants and other business people. May include spreadsheet, database, and accounting software, tax software, and other types of tools such as XBRL and XML. Prerequisite: ACCT 5302 with a grade of C or higher.

ACCT 5314. PRINCIPLES OF FEDERAL INCOME TAX. 3 Hours.
A study of general federal income tax principles such as income, deductions, losses and property transactions. The principles of individual taxation will be covered as well as an overview of tax considerations for entities such as corporations and partnerships. Prerequisite: ACCT 5301 with a grade of C or higher.

ACCT 5315. ACCOUNTING SYSTEMS ANALYSIS. 3 Hours.
Analysis and design of business information processes. Includes coverage of control concepts, audit trails, and the uses of information technology. Emphasis on the role of accounting in collecting, storing, and communicating information for management planning and control. Prerequisite: ACCT 5302 with a grade of C or higher.

ACCT 5316. AUDITING CONCEPTS AND PRACTICES. 3 Hours.
Concentrates on practice of professional accounting and auditing. Emphasizes decision making in a variety of unstructured situations where decisions demand a grasp of purpose, method, and judgment for their resolution. May not be taken for credit by students who have received credit for a course in auditing. Prerequisite: ACCT 5312 and ACCT 5315 with grades of C or higher.

ACCT 5317. COST ANALYSIS AND DECISION MAKING. 3 Hours.
The course will cover advanced cost analysis concepts including Cost-Volume-Profit analysis, cost-benefit analysis, product and service costing, pricing and budgeting. Class discussions will integrate concepts and applications of cost analysis with corporate practice through use of analytical problem solving, real world examples and case analyses. Prerequisite: ACCT 5302 with a grade of C or higher.

ACCT 5318. STUDIES IN AUDITING. 3 Hours.
A critical analysis of advanced topics in both auditing theory and professional practice. Emphasis on: development of auditing theory, generally accepted auditing standards, professional responsibilities, auditing EDP, SEC practice and reporting, cases in audit decision making, and analyses of emerging issues and contemporary problems in auditing. Prerequisite: ACCT 5316 with a grade of C or higher.

ACCT 5319. FINANCIAL ACCOUNTING III. 3 Hours.
Accounting for business combinations, preparation of consolidated financial statements, multinational operations, partnerships, and estates and trusts. Prerequisite: ACCT 5312 with a grade of C or higher.

ACCT 5320. GOVERNMENTAL AND NONPROFIT ACCOUNTING. 3 Hours.
Budgeting, accounting and financial reporting, managerial control, and auditing considerations of governmental and nonprofit entities. Prerequisite: ACCT 5312 with a grade of C or higher.

ACCT 5321. RESEARCH IN ACCOUNTING ISSUES. 3 Hours.
Designed to improve student's ability to research complex areas in accounting and to sharpen understanding and application of accounting concepts and principles. Case studies and problems considered and analyzed. Prerequisite: Excel certification and ACCT 5312 with a grade of C or better.

ACCT 5322. ACCOUNTING FOR MANAGEMENT PLANNING AND CONTROL. 3 Hours.
This course covers intermediate and advanced concepts in decentralization and management control, including budgetary control, performance measurement and incentive structures, and transfer pricing. Class discussions will integrate concepts and applications of control with corporate practice through use of analytical problem solving, real world examples and case analyses. May not be taken for credit by students who previously received credit for ACCT 4302 (before Fall 2020) or ACCT 4304 (after Fall 2020) or equivalent. Prerequisite: ACCT 5317 with grade of C or higher.

ACCT 5323. CORPORATE SUSTAINABILITY REPORTING. 3 Hours.
This course examines current trends in corporate sustainability reporting by business organizations. Topics include stakeholders, voluntary reporting frameworks, mandatory reporting standards, climate risk disclosures, sustainability ratings, and assurance. Student learning will be enhanced with in-class discussions, guest speaker visits, and assignments that require critical thinking, written communication, and oral communication.

ACCT 5324. FINANCIAL STATEMENT ANALYTICS AND BUSINESS VALUATION. 3 Hours.
This course covers the use of financial data to analyze business performance. Students will develop an understanding of financial data, how to evaluate a firm's strategy and risk factors, how to analyze and forecast financial statements, and techniques to value a business's equity. Students implement these lessons through the use of case studies involving data analytics. Prerequisite: ACCT 5307 or equivalent course with a grade of B or higher.

ACCT 5327. CONTEMPORARY ISSUES IN ACCOUNTING THEORY. 3 Hours.
Designed to familiarize students with significant problems currently facing the accounting profession, to examine in depth various solutions proposed by accounting scholars and others, and to strengthen student understanding of today's critical issues in accounting theory. Prerequisite: ACCT 5312 with a grade of C or higher.

ACCT 5329. ADVANCED ACCOUNTING INFORMATION SYSTEMS AND ANALYTICS. 3 Hours.
An exploration of advanced topics critical to accounting information systems. The course is designed to enhance student understanding of complex and emerging issues and technologies related to reporting, internal controls, system security and effectiveness. Topics may change semester to semester. Prerequisite: ACCT 5315 with a grade of C or higher.

ACCT 5330. INTERNATIONAL ACCOUNTING AND FINANCIAL REPORTING. 3 Hours.
Financial accounting and reporting principles and practices in various countries, the role of accounting in economic development, as well as the accounting considerations in international business operations -- e.g. foreign currency translation, auditing, accounting systems, taxation, and sensitive payments. Prerequisite: ACCT 5302 with a grade of C or higher.

ACCT 5332. OPERATIONAL AUDITING. 3 Hours.
A study of operational audit methodology for management audits. Audits of administrative and support functions, and other special areas such as fraud audits. Prerequisite: Graduate standing and six hours of accounting with grades of C or higher.

ACCT 5335. ACCOUNTING ANALYTICS. 3 Hours.
The analysis of data as it pertains to accounting professionals. Focuses on analytical techniques and the skills necessary to translate accounting information into actionable proposals that can be presented to decision makers in areas such as auditing, risk management, forensics, predictive modeling and strategic planning. Prerequisite: Business statistics, ACCT 5315 and ACCT 5316 with a grade of C or higher or consent of instructor.

ACCT 5339. TAX PLANNING AND RESEARCH. 3 Hours.
A study of the use of various techniques and procedures available in evaluating issues arising under federal income tax law. Emphasizes research into individual and business tax problems and planning alternatives. Prerequisite: ACCT 5314 with a grade of C or higher.

ACCT 5340. STUDY OF FEDERAL INCOME TAX FOR ENTITIES OTHER THAN INDIVIDUALS. 3 Hours.
Comprehensive analysis of the federal income tax consequences applicable to entities other than individuals. Analysis of the relevant tax principles of corporations, partnerships, trusts and estates will be undertaken. Cannot be taken for credit within the 36-hour program requirements for Master of Science in Taxation program. Prerequisite: ACCT 5314 with a grade of C or higher.

ACCT 5341. TAXATION OF PASSTHROUGH ENTITIES. 3 Hours.
Analysis of the federal income tax rules governing passthrough entities. Credit will not be received for both ACCT 5340 and ACCT 5341. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5342. TAX PROBLEMS OF CORPORATIONS AND SHAREHOLDERS. 3 Hours.
Analysis of the federal income tax rules governing corporations and shareholders. Subjects include corporate formations, corporate capital structure, administrative requirements affecting corporations, the corporate alternative minimum tax, special tax provisions (such as the personal holding company and accumulated earnings taxes and the collapsible corporation rules), nonliquidating distributions, stock dividends, redemptions and partial liquidations, liquidating distributions, corporate reorganizations, and Subchapter S corporations. Credit will not be received for both ACCT 5340 and ACCT 5342. Prerequisite: Excel certification and ACCT 5339 with grade of C or higher.

ACCT 5343. TAX PROBLEMS OF TRANSACTIONS IN REAL ESTATE. 3 Hours.
Problems and elections relating to the acquisition, holding, and disposition of real property. Subjects include means of acquisition and disposition, capital gains and losses, deferred payment sales, organization of syndicates, sale and leaseback, dissolutions, and general tax-saving methods. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5345. STATE AND LOCAL TAXATION. 3 Hours.
Introduction to the principles and practices of state and local taxation. Topics considered in the course include the application of both inter- and intra-state taxation, allocation and apportionment principles and issues in relation to the predominant forms of state taxes, such as franchise, sales, use, income, ad valorem, and property tax. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5346. TAX PRACTICE AND PROCEDURE. 3 Hours.
This course overviews the procedural aspects of dealing with the Internal Revenue Service. The focus is from the private practitioner's perspective in assisting clients in navigating the Service's administrative requirements. Topics include administrative organization of the Service, tax audits, the use of Service administrative summonses, statutes of limitation, penalties, interest charges, civil and criminal procedures and appeals. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5347. FEDERAL TAXATION OF GIFTS AND ESTATES. 3 Hours.
A comprehensive survey of the principles and procedures involved in determining the federal estate tax and the supplementary federal gift tax including taxability and valuation of property and the determination of deductions and credits. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5352. INFORMATION SYSTEMS AUDIT AND CONTROL. 3 Hours.
A study of modern approaches to the audit and control of business information systems. Prerequisite: ACCT 5315 and ACCT 5316 with grades of C or higher.

ACCT 5353. STATISTICAL TECHNIQUES USED IN ACCOUNTING. 3 Hours.
A study of statistical techniques used in accounting. Topics include alternative sample selection methods, attribute methods, mean-per-unit estimation, ratio and difference estimation, monetary unit sampling, and regression analysis. Prerequisite: STAT 5301 with a grade of C or higher.

ACCT 5366. FRAUD EXAMINATION. 3 Hours.
Analysis of fraud examiner and auditor responsibilities and current methodologies with respect to financial fraud investigation, detection, and prevention. Management's responsibilities for fraud deterrence and implementation of effective prevention measures. Identification, analysis, and examination of financial fraud using actual case studies. Prerequisite: ACCT 5316 with a grade of C or higher.

ACCT 5372. FEDERAL TAXATION OF INTERNATIONAL TRANSACTIONS. 3 Hours.
This course provides an overview of the U.S. system for taxing international transactions. Topics include U.S. jurisdictional and source-of-income rules; the foreign tax credit; anti-deferral provisions; taxation of U.S. activities of foreign persons, and issues common to both outbound and inbound activities including intercompany transfer pricing rules. Prerequisite: ACCT 5339 with grade of C or higher.

ACCT 5380. ETHICS IN ACCOUNTING. 3 Hours.
This course is intended to introduce students to ethical reasoning, integrity, objectivity, independence, professionalism and other core values. The course incorporates the essentials of professional responsibilities, including elements of trust and communications with clients and other professionals. Both ethical principles and rules are considered. This course is intended to satisfy conditions of the Texas State Board of Public Accountancy that require candidates for the CPA Exam to have completed an approved ethics course. Prerequisite: ACCT 5311 or equivalent.

ACCT 5382. INDEPENDENT STUDIES IN ACCOUNTING. 3 Hours.
Extensive analysis of an accounting topic. Prerequisite: Consent of faculty member and department chair.

ACCT 5392. SELECTED TOPICS IN ACCOUNTING. 3 Hours.
In-depth study of selected topics in accounting. May be repeated when topics vary. Prerequisite: consent of instructor.

ACCT 5398. THESIS. 3 Hours.
Thesis. Graded F, R. Prerequisite: permission of Accounting Graduate Advisor.

ACCT 5399. GRADUATE ACCOUNTING INTERNSHIP. 3 Hours.
Practical training in accounting. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum twelve accounting semester hours beyond principles completed or with approval of the internship coordinator.

ACCT 5698. THESIS. 6 Hours.
Thesis. Graded F, R. Prerequisite: permission of Accounting Graduate Advisor.

ACCT 6101. ACCOUNTING RESEARCH COLLOQUIUM. 1 Hour.
A forum in which visiting scholars and U.T. Arlington faculty members present and discuss results of their contemporary research. Doctoral students participate by meeting with visiting scholars, reading the research papers, providing written critiques, and discussing the papers. Doctoral students are required to enroll and attend the colloquia presentations each fall and spring semester until the students pass all their comprehensive examinations. May be repeated for credit. Prerequisite: consent of College PhD advisor.

ACCT 6309. SEMINAR IN ACCOUNTING RESEARCH I. 3 Hours.
Analysis of the theoretical and empirical literature in accounting. Prerequisite: consent of College PhD advisor.

ACCT 6310. SEMINAR IN ACCOUNTING RESEARCH II. 3 Hours.
Analysis of Theoretical and Empirical Research in Accounting.

ACCT 6311. SEMINAR IN ACCOUNTING RESEARCH III. 3 Hours.
Continuation of analysis of the theoretical and empirical literature in accounting. Prerequisite: ACCT 6310 with a grade of C or higher and consent of the College Ph.D. advisor.

ACCT 6312. SEMINAR IN ACCOUNTING RESEARCH IV. 3 Hours.
Continuation of analysis of the theoretical and empirical literature in accounting.

ACCT 6313. SEMINAR IN ACCOUNTING RESEARCH V. 3 Hours.
Seminar will cover advanced accounting research topics.

ACCT 6390. SPECIAL TOPICS IN ACCOUNTING RESEARCH. 3 Hours.
Doctoral level coverage of advanced topics in accounting. Topics may vary. Prerequisite: Approval by faculty member and doctoral program advisor.

COURSES

BLAW 3310. LEGAL AND ETHICAL ENVIRONMENT OF BUSINESS. 3 Hours.
The basic structure and processes of the legal system are reviewed followed by coverage of key common law areas and major regulatory rules that impact business. The focus is on a working knowledge of the law that has the greatest impact on business today and the social and ethical issues that may be related to legal issues. Prerequisite: 30 credit hours.

BLAW 3311. LAW I. 3 Hours.
The law relevant to business transactions of large and small business firms and individuals. The history and development of our legal system, (e.g. increased government regulation of business) reviewed to help the student understand political and social influences on law. Topics covered include common law and Uniform Commercial Code, and contractual relationships (contracts, assignments, commercial papers, sales, and bailments). Prerequisite: 30 credit hours.

BLAW 3312. LAW II. 3 Hours.
The law of property (real and personal), business associations (agency, partnership, corporation, bankruptcy), wills and trusts. Prerequisite: 30 credit hours.

BLAW 3314. REAL ESTATE LAW. 3 Hours.
Development of real estate law and the legal constraints within which real estate decisions are made. Prerequisite: 60 credit hours.

BLAW 4310. BASIC INTERNATIONAL LAW FOR BUSINESS. 3 Hours.
The basic principles of law related to international transactions and relations as may be applicable to business dealings. Laws related to persons and property in the foreign environment. Prerequisite: 60 credit hours.

BLAW 4332. BUSINESS LAW FOR ACCOUNTANTS. 3 Hours.
This course provides the basic legal principles of business organizations and operations, with coverage including the law of contracts (both common law and the law of sales of goods), commercial paper, property (including bailments, documents of title, patents and copyrights), employment law, agency, business organizations, selected topics of government regulation of business (securities regulation, antitrust, and bankruptcy), money laundering, suretyship and creditors' rights, the Dodd-Frank Act of 2010, the Sarbanes-Oxley Act of 2002, and CPA professional responsibility and liability. Prerequisite: 60 Credit hours completed.

BLAW 5330. LEGAL ENVIRONMENT OF BUSINESS. 3 Hours.
The basic structure and processes of the legal system are reviewed followed by coverage of key common law areas and major regulatory rules that impact business. The focus is on a working knowledge of the law that has the greatest impact on business today and the social and ethical issues that may be related to legal issues.

BLAW 5331. LAW OF INTERNATIONAL BUSINESS. 3 Hours.
General principles of law applicable to international business including case law, statutory law, treaties, administrative law, and international agreements.

BLAW 5332. BUSINESS LAW FOR ACCOUNTANTS. 3 Hours.
This course provides the basic legal principles of business organizations and operations, with coverage including the law of contracts (both common law and the law of sales of goods), commercial paper, property (including bailments, documents of title, patents and copyrights), employment law, agency, business organizations, selected topics of government regulation of business (securities regulation, antitrust, and bankruptcy), money laundering, suretyship and creditors' rights, the Dodd-Frank Act of 2010, the Sarbanes-Oxley Act of 2002, and CPA professional responsibility and liability.

BLAW 5392. SELECTED TOPICS IN BUSINESS LAW. 3 Hours.
In-depth study of selected topics in business law. May be repeated when topics vary. Prerequisite: consent of instructor.

- Professional Accounting MPACC (p. 255)
- Taxation MS (p. 259)

CERTIFICATE

- Taxation Graduate Certificate (p. 261)

Policies

CLASSROOM TIME FLEXIBILITY

All of the graduate degree programs offered by the Department of Accounting can be completed by individuals who work full-time and wish to attend class in the evenings. Each student's program of work must be approved by the Accounting Graduate Advisor and must include a minimum of 31 semester hours. A minimum of 28 semester hours must be taken at The University of Texas at Arlington. During the final semester, students who have written a thesis must defend the thesis in an oral examination.

TRANSFER CREDIT APPLIED TO MASTER'S DEGREE

University policy allows students to transfer in no more than nine hours of transfer credit into a graduate program. Equivalent coursework completed at other institutions of recognized standing prior to admittance into the UTA masters' program may be transferred to a masters' degree program after evaluation and approval. Courses from other universities taken after a student has been admitted into a masters' program at UT Arlington must be approved in advance by the Graduate Studies Committee. To request transfer credit, students must complete the Transfer of Graduate Credit form and obtain approvals from the Department of Accounting's graduate advisor and chair of the Graduate Studies Committee. As a general rule, transfer credits will not be approved for core graduate courses in any of the department's masters' programs or for transfer credits taken without prior approval. Other courses which are not considered suitable to a student's program of work will not be approved. The department's transfer credit policy is in addition to the university's regulation on transfer credit and course waivers. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

BBA or BS in Business to Master of Science in Accounting Fast Track

About This Program

The Bachelor of Business Administration or Bachelor of Science in Accounting to Master of Science in Accounting Fast Track enables outstanding senior undergraduate students in Accounting to satisfy degree requirements leading to the Accounting MS while completing their undergraduate studies.

ASSOCIATED PROGRAMS

Accounting BBA (p. 264)

Accounting BS

Accounting MS

Admissions Criteria

An undergraduate Accounting student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ACCT 3311 FINANCIAL ACCOUNTING I
- ACCT 3312 FINANCIAL ACCOUNTING II
- FINA 3313 BUSINESS FINANCE
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS, students must complete the following graduate courses:

- ACCT 5316
- ACCT 5335 ACCOUNTING ANALYTICS or ACCT 5322 ACCOUNTING FOR MANAGEMENT PLANNING AND CONTROL
- BLAW 5332 BUSINESS LAW FOR ACCOUNTANTS

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete the foundations requirements for BBA/BS including the following used to determine eligibility for the fast track:		84
ACCT 3311	FINANCIAL ACCOUNTING I	
ACCT 3312	FINANCIAL ACCOUNTING II	
FINA 3313	BUSINESS FINANCE	
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	
or BSTAT 3322	ADVANCED STATISTICS FOR BUSINESS ANALYTICS	
Accounting Specialization		
ACCT 3303	INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS	3
ACCT 3311	FINANCIAL ACCOUNTING I	3
ACCT 3312	FINANCIAL ACCOUNTING II	3
ACCT 3315	PRINCIPLES OF FEDERAL INCOME TAX	3
ACCT 4302	COST ANALYSIS AND DECISION MAKING	3
ACCT 5316	AUDITING CONCEPTS AND PRACTICES (replaces ACCT 4318)	3
BLAW 5332	BUSINESS LAW FOR ACCOUNTANTS (replaces BLAW 3310 or BLAW 4332)	3
ACCT 5335	ACCOUNTING ANALYTICS (replaces ACCT 3316 [BS only] or ACCT 4304 or ACCT 4325 [BBA only])	3
or ACCT 5322	ACCOUNTING FOR MANAGEMENT PLANNING AND CONTROL	
Select one Economics course numbered 3000 or higher.		3
Select 3 additional electives with approval of advisor.		9
MS Foundations		
ACCT 5133	PROFESSIONALISM IN ACCOUNTING	1
ACCT 5319	FINANCIAL ACCOUNTING III	3
ACCT 5321	RESEARCH IN ACCOUNTING ISSUES	3
ACCT 5329	ADVANCED ACCOUNTING INFORMATION SYSTEMS AND ANALYTICS	3
ACCT 5335	ACCOUNTING ANALYTICS (if not completed within the undergraduate plan)	3
ACCT 5380	ETHICS IN ACCOUNTING	3
ACCT 5340	STUDY OF FEDERAL INCOME TAX FOR ENTITIES OTHER THAN INDIVIDUALS	3
MS Electives		
Select 3 hours in approved MS electives if ACCT 5322 is taken in the undergraduate plan, select 6 if ACCT 5335 is taken.		3
Total Hours		**142**

Master of Professional Accounting

About This Program

Master of Professional Accounting is designed for individuals who hold an undergraduate degree in any major other than accounting (economics, engineering, finance, liberal arts, management, mathematics, science, etc.)

This accounting program is separately accredited by the Association to Advance Collegiate Schools of Business (AACSB), ensuring it meets high standards of education and professional development.

Competencies

1. Upon completion, students will demonstrate knowledge of accounting practices and procedures across financial accounting, cost & managerial accounting, and auditing.
2. Upon completion, students will demonstrate skills in managing data, understanding and implementing appropriate internal controls in accounting systems, and demonstrate proficiency in contemporary essential business software.\\n

3. Upon completion, students will demonstrate the ability to recognize ethical issues, analyze choices, and then defend a solution.\\n
4. Upon completion, students will be able to research complex accounting-related issues using primary and secondary authoritative sources and apply their findings in various decision settings.
5. Upon completion, students will be able to clearly and effectively communicate their ideas at a professional-level.

Admissions Criteria

The department has two alternative sets of conditions that allow applicants to be unconditionally admitted without review by the Graduate Studies Committee. The departmental graduate advisor reviews all applications and determines if they qualify for admission under one of these two sets of criteria. Applicants who do not satisfy any of the following sets of conditions for unconditional admission are referred to the Graduate Studies Committee for consideration.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Graduate Studies Committee if they meet any one of the following two sets of unconditional admission criteria:

Set #1: GMAT Condition

Individuals who meet each of the following two conditions are given unconditional admission:

- Applicant holds an earned bachelor's degree from an AACSB accredited college or university, with a minimum GPA of 3.0 on the last 60 hours of undergraduate work and
- GMAT total score is at least 500 with verbal and quantitative score at the 30th percentile or higher, on both. While the GMAT is strongly preferred, for non-business majors, an equivalent GRE score will be accepted in lieu of the GMAT.

Set #2: GMAT Waiver Condition

This unconditional admission set #2 focuses on satisfying any one of the following criteria.

- Graduated from UTA or other AACSB accredited college or University within the three years of expected entrance into the graduate program with a minimum GPA of 3.25 in their major and overall;
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, holds a current recognized professional accounting credential or license (e.g., Certified Public Accountant, Certified Financial Analyst, Chartered Accountant);
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, and completed another postbaccalaureate degree (e.g., master's degree, JD degree, LLM degree, MD degree, Ph.D. degree).

Admission with Committee Review

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution;
- Score on the GMAT (including separate scores on the verbal and quantitative portions);
- Applicant's professional work experience and professional certification/licensure; and
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Studies Committee will evaluate an applicant's readiness to successfully complete one of the Department's graduate programs. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

PRE-ENROLLMENT COMPETENCY (OR DEFICIENCY) REQUIREMENTS

If students have not satisfactorily completed all of their pre-enrollment competency (deficiency) requirements, they will, in addition to their program of work, also be required to complete those pre-enrollment competency courses. If college courses constituting the pre-enrollment competency requirements have not been completed with a grade of C or better, students must include these courses in their program of work. Deficiency courses may be completed at the undergraduate level but core courses must be completed at the graduate level.

Master of Science in Accounting

About This Program

Master of Science in Accounting is designed for students who have an undergraduate degree in accounting or a degree in business administration with a major in accounting who wish to specialize in an area of accounting other than tax. The student, with the assistance and consent of the graduate advisor, will develop a course of study designed to meet his or her educational needs in light of previous academic work and career objectives.

This accounting program is separately accredited by the Association to Advance Collegiate Schools of Business (AACSB), ensuring it meets high standards of education and professional development.

Competencies

1. Upon completion, students will be able to demonstrate knowledge of accounting practices and procedures across financial accounting, cost & managerial accounting, and auditing.
2. Upon completion, students will demonstrate skills in managing data, understanding and implementing appropriate internal controls in accounting systems, and demonstrate proficiency in contemporary essential business software.
3. Upon completion, students will demonstrate the ability to recognize ethical issues, analyze choices, and then defend a solution.
4. Upon completion, students will be able to research complex accounting-related issues using primary and secondary authoritative sources and apply their findings in various decision settings.
5. Upon completion, students will be able to clearly and effectively communicate their ideas at a professional-level.

Admissions Criteria

The Department has two sets of conditions that allow applicants to be unconditionally admitted without review by the Graduate Studies Committee. The departmental graduate advisor reviews all applications and determines if they qualify for admission under one of these two sets of criteria. Applicants who do not satisfy any of the following sets of conditions for unconditional admission are referred to the Graduate Studies Committee for consideration.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Graduate Studies Committee if they meet any one of the following two sets of unconditional admission criteria:

Set #1: GMAT Condition

Individuals who meet each of the following two conditions are given unconditional admission:

- Applicant holds an earned bachelor's degree from an AACSB accredited college or university, with a minimum GPA of 3.0 on the last 60 hours of undergraduate work and
- GMAT total score is at least 500 with verbal and quantitative score at the 30th percentile or higher, on both. While the GMAT is strongly preferred, for non-business majors, an equivalent GRE score will be accepted in lieu of the GMAT.

Set #2: GMAT Waiver Condition

This unconditional admission set #2 focuses on satisfying any one of the following criteria.

- Graduated from UTA or other AACSB accredited college or University within the three years of expected entrance into the graduate program with a minimum GPA of 3.25 in their major and overall;
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, holds a current recognized professional accounting credential or license (e.g., Certified Public Accountant, Certified Financial Analyst, Chartered Accountant);
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, and completed another postbaccalaureate degree (e.g., master's degree, JD degree, LLM degree, MD degree, Ph.D. degree).

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution;
- Score on the GMAT (including separate scores on the verbal and quantitative portions);
- Applicant's professional work experience and professional certification/licensure; and
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Studies Committee will evaluate an applicant's readiness to successfully complete one of the Department's graduate programs. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

PRE-ENROLLMENT COMPETENCY (OR DEFICIENCY) REQUIREMENTS

If students have not satisfactorily completed all of their pre-enrollment competency (deficiency) requirements, they will, in addition to their program of work, also be required to complete those pre-enrollment competency courses. If college courses constituting the pre-enrollment competency requirements have not been completed with a grade of C or better, students must include these courses in their program of work. Deficiency courses may be completed at the undergraduate level but core courses must be completed at the graduate level.

Master of Science in Taxation

About This Program

The Master of Science in Taxation (MST) is designed for students who have an undergraduate degree in accounting or a degree in business administration with a major in accounting who wish to specialize in taxation. The student, with the assistance and consent of the Graduate Advisor, will develop a course of study designed to meet his or her educational needs in light of previous academic work and career objectives.

This accounting program is separately accredited by the Association to Advance Collegiate Schools of Business (AACSB), ensuring it meets high standards of education and professional development.

Competencies

1. Upon completion, students will be able to identify relevant tax issues associated with the corporate, partnership, S corporation, estate, and gift tax fields.
2. Upon completion, students will demonstrate skills in managing data in contemporary essential business software.
3. Upon completion, students will demonstrate the ability to recognize ethical issues, analyze choices, and then defend a solution.

4. Upon completion, students should be able to find, cite, and apply primary and secondary tax authority and sources and be able to critically think through tax issues and develop tax solutions.
5. Upon completion, students will be able to clearly and effectively communicate their ideas at a professional-level.

Admissions Criteria

The Department has two alternative sets of conditions that allow applicants to be unconditionally admitted without review by the Graduate Studies Committee. The departmental graduate advisor reviews all applications and determines if they qualify for admission under one of these two sets of criteria. Applicants who do not satisfy any of the following sets of conditions for unconditional admission are referred to the Graduate Studies Committee for consideration.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Graduate Studies Committee if they meet any one of the following two sets of unconditional admission criteria.

Set #1: GMAT Condition

Individuals who meet each of the following two conditions are given unconditional admission:

- Applicant holds an earned bachelor's degree from an AACSB accredited college or university, with a minimum GPA of 3.0 on the last 60 hours of undergraduate work and
- GMAT total score is at least 500 with verbal and quantitative score at the 30th percentile or higher, on both. While the GMAT is strongly preferred, for non-business majors, an equivalent GRE score will be accepted in lieu of the GMAT.

Set #2: GMAT Waiver Condition

This unconditional admission set #2 focuses on satisfying any one of the following criteria.

- Graduated from UTA or other AACSB accredited college or University within the three years of expected entrance into the graduate program with a minimum GPA of 3.25 in their major and overall;
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, holds a current recognized professional accounting credential or license (e.g., Certified Public Accountant, Certified Financial Analyst, Chartered Accountant);
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in their major and overall, and completed another postbaccalaureate degree (e.g., master's degree, JD degree, LLM degree, MD degree, Ph.D. degree).

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution.
- Score on the GMAT (including separate scores on the verbal and quantitative portions).
- Applicant's professional work experience and professional certification/licensure.
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Studies Committee will evaluate an applicant's readiness to successfully complete one of the Department's graduate programs. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

PRE-ENROLLMENT COMPETENCY (OR DEFICIENCY) REQUIREMENTS

If students have not satisfactorily completed all of their pre-enrollment competency (deficiency) requirements, they will, in addition to their program of work, also be required to complete those pre-enrollment competency courses. If college courses constituting the pre-enrollment competency requirements have not been completed with a grade of C or better, students must include these courses in their program of work. Deficiency courses may be completed at the undergraduate level but core courses must be completed at the graduate level.

Curriculum

Of the required accounting semester hours, 18 of those semester hours must be in specified courses in the area of taxation beyond ACCT 5314:

Foundations		
ACCT 5133	PROFESSIONALISM IN ACCOUNTING	1
ACCT 5319	FINANCIAL ACCOUNTING III	3
ACCT 5339	TAX PLANNING AND RESEARCH	3
ACCT 5341	TAXATION OF PASSTHROUGH ENTITIES	3
ACCT 5342	TAX PROBLEMS OF CORPORATIONS AND SHAREHOLDERS	3
ACCT 5347	FEDERAL TAXATION OF GIFTS AND ESTATES	3
Electives		
Tax Accounting Electives		6
Accounting Electives		6
Business Electives		3
Total Hours		**31**

Program Completion

Students enrolled in accounting degree programs are subject to the grade requirements for academic probation and graduation as specified under the general regulations for graduate admissions.

Post-Baccalaureate Certificate in Taxation

About This Program

To support The University of Texas at Arlington's mission to provide lifelong learning opportunities to the community, the Department of Accounting offers qualified applicants an opportunity to participate in a Post-Baccalaureate Certificate in Taxation. This is a non-degree seeking program. The program offers graduate courses in specific areas of taxation as a means of

- maintaining and promoting their professional development in an interactive environment;
- acquiring continuing education hours necessary to maintain a professional certification;
- furthering their opportunity to participate in a graduate degree program. Subject to the applicable degree requirements, up to 4 courses taken in the certificate can be applied toward a master's degree;
- providing quality cost-efficient staff training;
- interacting with other professionals and developing a dialogue that can improve your practice's efficiency and effectiveness. A number of our professors in the program are either currently with the Internal Revenue Service or in practice in the area of specialization associated with the course.

Competencies

1. Upon completion, students will be able to identify relevant tax issues associated with the corporate, partnership, S corporation, estate, and gift tax fields.
2. Upon completion, students will be able to find, cite, and apply primary and secondary tax authority and sources and be able to critically think through tax issues and develop tax solutions.
3. Upon completion, students will be able to clearly and effectively communicate their ideas at a professional-level.

Admissions Criteria

The certificate is a post-baccalaureate educational opportunity available to degreed applicants. It is narrower in scope and shorter in duration than any of the department's graduate degree programs. To qualify, an applicant must:

- have an undergraduate degree
- have a grade point average of 3.0.

A GMAT score and letters of recommendation are not required for admission to the certificate.

STATUS AS A CERTIFICATE STUDENT

Special student status characteristics include the following.

- Must be approved by the Graduate Studies Committee.
- No more than twelve (12) hours of work earned as a special student may be applied to a graduate degree at UT Arlington.

A person who is admitted as a certificate student and later seeks admission to a degree program must submit a regular Graduate Admissions Application form, pay the application fee, submit all required documents, and meet all admission requirements, including admission tests and any additional requirements established by the degree program.

APPLICATION TO A GRADUATE PROGRAM

Admission as a certificate student in no way guarantees subsequent unconditional admission into a graduate program or the College of Business. Anyone who enters a certificate program and later seeks a graduate degree at the College of Business may apply 12 hours of coursework toward that degree program if done within 6 years of completion of the certificate by petitioning Graduate Admissions through her/his prospective academic department. Only grades of A and B may be applied toward graduate credit.

TERMS OF ADMISSION

Once admitted, participants may take up to four (4) of the approved courses. The terms of admission allow participants to take only the specific courses approved for the certificate. Participants would not be allowed to take courses outside of their certificate requirements without applying for and having been accepted into the graduate program.

CURRENT GRADUATE STUDENTS

Graduate students currently enrolled in a UT Arlington graduate program may also earn the certificate by notifying the Accounting Advisor of their intent to participate in the certification program and by successfully completing the prescribed number of classes in their degree program.

Curriculum

Courses appropriate for the certificate have been selected because their subject matters directly relate to materials needed by professionals engaged in tax-related activities.

Those students entering the Certificate of Taxation without having taken the equivalent of the undergraduate tax course will also be required to take a "foundation" course, ACCT 5314.

Foundations		
ACCT 5339	TAX PLANNING AND RESEARCH	3
Specialization		
Choose three of the following:		9
ACCT 5341	TAXATION OF PASSTHROUGH ENTITIES	
ACCT 5342	TAX PROBLEMS OF CORPORATIONS AND SHAREHOLDERS	
ACCT 5345	STATE AND LOCAL TAXATION	
ACCT 5346	TAX PRACTICE AND PROCEDURE	
ACCT 5347	FEDERAL TAXATION OF GIFTS AND ESTATES	
Total Hours		**12**

Program Completion

The Certificate in Taxation requires students to take and successfully complete, with a minimum GPA of 3.0, four advanced tax courses.

TRANSFER CREDIT

Acceptance of transfer credit for accounting courses will generally be limited to those courses taught in the freshman and sophomore years in the Department of Accounting at UT Arlington. Junior and senior level accounting courses taught at UT Arlington, but completed at another institution, must be validated if they are to be used to fulfill degree requirements for an undergraduate degree in accounting. Courses are ordinarily validated from an examination of course materials and acceptable performance on a validation examination. Students must earn a grade of C or higher on the validation examination for transfer credit. Information about the validation examination can be obtained from the undergraduate advisor.

ENTRANCE EXAMINATION FOR ACCT 3311 (FINANCIAL ACCOUNTING I)

A student's performance in ACCT 3311 (Financial Accounting I) is often viewed as an important indicator of aptitude for success in the accounting profession. To help ensure that each student enrolling in ACCT 3311 has the preparation to succeed, students must pass an entrance examination prior to enrolling in ACCT 3311. Students who score in the top one-third of a UT-Arlington ACCT 2301 comprehensive exam (with no less than a B on that exam), and earn a B or better in the UT-Arlington ACCT 2301 are exempt from the ACCT 3311 entrance examination. Details regarding this entrance examination may be obtained on the departmental website.

DEGREE PROGRESS AND MAJOR DISMISSAL

Students who have been admitted to an accounting degree program must maintain satisfactory progress in their field of study. Declared accounting majors are subject to dismissal from accounting degree programs and will not be permitted to continue to enroll in accounting courses at UT Arlington if they:

- Receive a grade of D or F in more than two upper level accounting courses, or
- Receive a combination of grades of D or F on two attempts of the same accounting course.

GRADUATION REQUIREMENTS

In addition to requirements imposed by the University and College of Business, students must earn a grade of C or higher in each accounting course presented to satisfy the requirements for a degree with a major in accounting.

Bachelor of Business Administration in Accounting

About This Program

The Bachelor of Business Administration degree is intended for those individuals who seek a broader education. This program prepares students for graduate study and/or for professional careers in the public, private, government and non-for profit sector as internal auditors, management accountants, government auditors and other accounting related functions.

This accounting program is separately accredited by the Association to Advance Collegiate Schools of Business (AACSB), ensuring it meets high standards of education and professional development.

Competencies

1. Upon completion, students will be able to demonstrate an understanding of the accounting process and demonstrate knowledge of the reporting requirements in financial statements and the accountants' impact on the economy and the financial markets.
2. Upon completion, students will be able to demonstrate an ability to apply information technologies relevant to the accounting field.
3. Upon completion, students will be able to articulate the values and practices associated with the ethical responsibilities of public and private accounting fields.
4. Upon completion, students will be able to demonstrate effective business communication skills.
5. Upon completion, students will be able to research, identify issues and critically analyze responses and conclusions to those issues.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Bachelor of Science in Accounting

About This Program

The Bachelor of Science in Accounting provides accounting and business knowledge sufficient to enable the pursuit of professional opportunities in government, industry, and public practice. This degree is appropriate for individuals who wish to complete significant course work in accounting.

This accounting program is separately accredited by the Association to Advance Collegiate Schools of Business (AACSB), ensuring it meets high standards of education and professional development.

Competencies

1. Upon completion, students will be able to demonstrate an understanding of the accounting process and demonstrate knowledge of the reporting requirements in financial statements and the accountants' impact on the economy and the financial markets.
2. Upon completion, students will be able to demonstrate an ability to apply information technologies relevant to the accounting field.
3. Upon completion, students will be able to articulate the values and practices associated with the ethical responsibilities of public and private accounting fields.

4. Upon completion, students will be able to demonstrate effective business communication skills.
5. Upon completion, students will be able to research, identify issues and critically analyze responses and conclusions to those issues.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

First Semester	Hours	Second Semester	Hours
ENGL 1301	3	ENGL 1302	3
MATH 1315	3	MATH 1316	3
HIST 1301	3	HIST 1302	3
ECON 2305	3	ECON 2306	3
MANA 1301	3	Creative Arts	3
UNIV-BU 1131 Freshmen Only	1		
	16		**15**

Second Year

First Semester	Hours	Second Semester	Hours
ACCT 2301	3	ACCT 2302	3
INSY 2303	3	BSTAT 2305	3
POLS 2311	3	POLS 2312	3
Life & Physical Science	3	Life & Physical Science Elective	3
Language, Philosophy & Culture	3	Elective (2 Hours for Freshmen/3 Hours for Transfers)	2
	15		**14**

Third Year

First Semester	Hours	Second Semester	Hours
ACCT 3303	3	ACCT 3312	3
ACCT 3311	3	ACCT 3315	3
BLAW 3310	3	ACCT 3316	3
FINA 3313	3	BSTAT 3321	3
Advanced Economics Elective	3	MARK 3321	3
	15		**15**

Fourth Year

First Semester	Hours	Second Semester	Hours
ACCT 4302	3	ACCT 4318	3
BLAW 4332	3	BCOM 3360	3
Advanced Accounting Elective	3	Advanced Accounting Elective	3
Advanced Accounting Elective	3	Advanced Accounting Elective	3
Advanced Business or Accounting Elective	3	Advanced Business Elective	3
	15		**15**

Total Hours: 120

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Location:

College of Business, Suite 107

Email:

ugadvise@uta.edu

Phone:

817-272-3368

Web:

Minor in Accounting

About This Program

The Minor in Accounting provides a solid foundation whether you are aiming for a corporate career, planning to run your own business, or just want to understand financial decision-making. It builds practical skills, sharpens your understanding of how businesses work, and can give you a competitive edge when it is time to enter the job market.

Competencies

1. Upon completion, students will be able to demonstrate an understanding of the accounting process and demonstrate knowledge of the reporting requirements in financial statements and the accountants' impact on the economy and the financial markets.
2. Upon completion, students will be able to demonstrate effective business communication skills.
3. Upon completion, students will be able to research, identify issues and critically analyze responses and conclusions to those issues.

Curriculum

ACCT 2301	PRINCIPLES OF ACCOUNTING I	3
ACCT 2302	PRINCIPLES OF ACCOUNTING II [1]	3
ACCT 3311	FINANCIAL ACCOUNTING I [1]	3
Select 9 hours in courses numbered ACCT 33xx or 43xx. [1]		9
Total Hours		**18**

[1] Prerequisites must be met before enrollment. A student should consider prerequisites, identified in the catalog, when selecting courses to satisfy the minor requirement.

ACCT 3309 ACCOUNTING FOR MANAGERS may not be used to satisfy any minor requirement.

Students must complete at least 9 hours of upper level accounting coursework at UT Arlington. Vocational and technical courses (including WECM courses) may not count toward any business minor.

A minimum accounting GPA of 2.0 must be maintained for accounting classes completed at UT Arlington.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Business Administration

Overview

Business Administration programs are administered by the College of Business and include bachelor's, master's, and doctoral programs. Each program is designed to provide a broad understanding of business principles through a combination of theoretical knowledge and practical applications including internships, case studies, and group projects.

COURSES

BSAD 6182. INDEPENDENT STUDIES IN BUSINESS ADMINISTRATION. 1 Hour.
This independent study course is centered on the application of content related to teaching in higher education settings. Students will be expected to design a lesson, present a lecture, and arrange for a final feedback report following an observed teaching demonstration. The focus will be on reflective teaching, sound lesson design, and receiving feedback towards improved teaching practice in higher education.

BSAD 6310. FOUNDATIONS OF SCIENTIFIC INQUIRY. 3 Hours.
The evolution of the modern corporation is briefly addressed. The core topics include the structure of explanation, the structure of scientific laws, theory building, philosophy of science and relativistic/post-relativistic philosophies of science.

BSAD 6311. EXPERIMENTAL DESIGN AND RESEARCH METHODS. 3 Hours.
In-depth coverage of selected topics in the design of research; topics include philosophy of science, theory of measurement, complex experimental and quasi-experimental designs.

BSAD 6312. REGRESSION. 3 Hours.
The theoretical and practical aspects of regression analysis. Topics include simple and multiple linear regression, the matrix formulation of regression models, regression diagnostics and remedial measures, collinearity and ridge regression, normal correlation models, and non-linear least squares, time series including ARIMA models are covered. Practical applications of statistical software packages are emphasized.

BSAD 6313. ANOVA. 3 Hours.
Experimental design and data analysis, especially as related to business and economic research. Topics include completely randomized designs, complete and incomplete blocks, nested designs, estimation and testing of fixed, random and mixed effects, sampling, nonparametric statistics and analysis of variance.

BSAD 6314. MULTIVARIATE STATISTICS. 3 Hours.
Topics include commonly applied multivariate methods such as multiple analysis of variance, factor analytic methods, discriminant analysis, logistic regression, canonical correlations, profile analysis, cluster analysis, and repeated measures. The use available computer packages to conduct data analysis will be stressed.

BSAD 6315. TIME SERIES. 3 Hours.
Univariate and multivariate time series; analysis of economic and financial data; out-of-sample forecasting using computer software. Autoregressive-moving average models, vector autoregression, unit roots, co-integration, ARCH and GARCH.

BSAD 6316. FINANCIAL ECONOMETRICS. 3 Hours.
In-depth study of the econometric tools and techniques used in empirical finance research. Course emphasizes data extraction and analysis of common finance databases, as well as the theoretical basis for current empirical finance techniques and methods.

BSAD 6317. APPLIED BUSINESS & ECONOMICS DATA ANALYSIS I. 3 Hours.
The course develops an understanding of basic statistical and econometric techniques. Participants exploit real data and computational power to uncover patterns/trends and examine relationships. There is a focus on conceptual frameworks and the application of techniques to data sets in various fields. Participants learn how to use statistical packages such as R, SAS, and STATA to apply the tools to real data. Participants will complete an empirical analysis paper. Prerequisite: BSTAT 5325 or consent of instructor.

BSAD 6318. APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS II. 3 Hours.
The course covers cross-section, panel data, and limited dependent variables methods. Topics may include analysis of natural experiments/differences-in-differences, panel data methods, instrumental variable estimation, simultaneous equation models, sample selection corrections, and limited dependent variable and hierarchical models. Participants learn how to use statistical packages such as R and SAS, to apply these methods to data to examine causal relationships. They build an understanding of appropriate methods for different research design. Participants will complete an empirical research paper. Prerequisite: ECON 5336 or BSAD 6317 or consent of the instructor; cross referenced with ECON 5339.

BSAD 6319. BUSINESS & ECONOMIC FORECASTING. 3 Hours.
This applied course provides students the foundation to analyze business, economic, and financial data to develop forecasts using current statistical and computing tools. Emphasis is on methods that allow students to capture trending and seasonal patterns present in the data and other predictable variations hiding in plain sight, including temporal correlation. Once equipped with appropriate models, including ARIMA methods, students learn how to use the extracted information to project into the future. Critical thinking will be strengthened, as students will select an appropriate forecasting model and demonstrate its efficacy against reasonable alternatives. Prerequisite: ECON 5336 or BSAD 6317 or consent of the instructor.

BSAD 6320. CAUSAL INFERENCE FOR BUSINESS DECISIONS. 3 Hours.
Students learn methods to identify and measure the outcomes of business decisions. In particular, students will learn various issues pertaining to the misattribution of causal effects. The course surveys multiple methods to overcome the misidentification problem. Students will engage in empirical analysis. Prerequisite: ECON 5336 or BSAD 6317 and ECON 5339 or BSAD 6318.

BSAD 6321. FOUNDATIONS OF STRUCTURAL EQUATION MODELING. 3 Hours.
The purpose of this course is to provide a foundation into structural equation modeling (SEM) techniques and issues as well as hands-on training with SEM software. Application of basic techniques such as confirmatory factor analysis (CFA), mediation and moderation in SEM, and multi-group analyses will be covered. Students must have taken a graduate course on regression. Prerequisite: Multivariate.

BSAD 6322. MODELING IN BUSINESS RESEARCH. 3 Hours.
A wide range of modeling techniques such as game theory in economics, discrete choice models in marketing and dynamical stochastic models will be discussed. The course focuses on model development to match mathematical framework and features to the underlying research setting and estimation/model selection techniques. Examples drawing from multiple research disciplines will be used to demonstrate relevant techniques and design principles step by step.

BSAD 6323. DATA ANALYTICS SEMINAR. 3 Hours.
The imperative to harness vast amounts of data has spawned a number of tools and techniques that complement traditional statistical approaches. From a research perspective, these tools and techniques afford new ways of collecting and analyzing data. This seminar will introduce students to contemporary data analytic techniques, including social network analysis, text analysis, machine learning and AI, and their applications in research.

BSAD 6330. NONPARAMETRIC STATISTICS. 3 Hours.
A survey of statistical tools which may be used when the normal assumptions of parametric statistics cannot be made; including procedures for categorical data, methods involving ranks, bootstrapping, and Kolmogorov-Smirnov type techniques. Cross listed with BSTAT 5330. Prerequisite: BSTAT 5325 or equivalent.

BSAD 6392. DOCTORAL RESEARCH AND TEACHING COLLOQUIUM. 3 Hours.
Review of the research process and contemporary developments in the methodology and design of empirical research in the major fields of study represented in the doctoral program. Review of teaching methods for effective classroom instruction. May be repeated for credit.

BSAD 6399. DISSERTATION. 3 Hours.

BSAD 6699. DISSERTATION. 6 Hours.

BSAD 6999. DISSERTATION. 9 Hours.

BSAD 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken twice. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

BUSA 2211. BUSINESS DATA LITERACY AND VISUALIZATION. 2 Hours.
This course is designed to introduce business data literacy and business data visualization. The course will cover data fundamentals including both the principles and techniques needed to effectively validate business data, draw insights from business data, and communicate the results. Students will learn the value of visualizations, specific techniques in visualization, and how to best leverage visualization methods to tell engaging business data stories.

BUSA 4344. SAS TOOLS FOR BUSINESS AND ECONOMICS. 3 Hours.
SAS is used by many businesses to generate analysis and reports they rely on to make good decisions. This course teaches students the skills needed to use SAS to clean data, visualize data, conduct basic business and economic analysis, and present that information in business-friendly reports using the tools in SAS for effective communication. Prerequisite: BSTAT 3321.

BUSA 4345. R FOR BUSINESS AND ECONOMIC ANALYSIS. 3 Hours.
This course teaches students how to analyze, visualize, and summarize data analysis using R. It covers the preliminaries of coding, data cleaning and visualization, and report writing using RStudios markdown package. Students will then use the techniques learned in the course to write a modern, data analysis report using contemporary business or economic data. Prerequisite: BSTAT 3321.

BUSA 5322. DATA ANALYTICS WITH PYTHON AND MACHINE LEARNING. 3 Hours.
This course uses Python to give students hands-on experience with web scraping and machine learning. Web scraping gives students the ability to collect data from webpages that would be difficult to acquire otherwise. Machine learning techniques covered in this class include linear regression and classification, trees and tree-based methods such as random forests, neural networks, support vector machines, clustering, and dimension reduction methods. This class will help students learn to use Python in a professional context, and students will add supervised and unsupervised machine learning techniques to their economic analysis toolkit. Prerequisite: ECON 5336 or BSTAT 5325 or consent of instructor.

BUSA 5344. SAS TOOLS FOR BUSINESS AND ECONOMICS. 3 Hours.
SAS is used by many businesses to generate analysis and reports they rely on to make good decisions. This course teaches students the skills needed to use SAS to clean data, visualize data, conduct basic business and economic analysis, and present that information in business-friendly reports using the tools in SAS for effective communication. Prerequisite: BSTAT 3321.

BUSA 5345. R FOR BUSINESS AND ECONOMIC ANALYSIS. 3 Hours.
This course teaches students how to analyze, visualize, and summarize data analysis using R. It covers the preliminaries of coding, data cleaning and visualization, and report writing using RStudios markdown package. Students will use the techniques learned in the course to write a modern, data analysis report using contemporary business or economic data. Prerequisite: BSTAT 3321.

COURSES

EMBA 5101. LEADERSHIP LABORATORY MODULE 2. 1 Hour.
1.0 Hours This module focuses on the importance of teams for leadership and management effectiveness and focuses on the process of combining talented individuals into a high-performance cohort. Students will learn the skills and techniques that enable high-performance teams and what is required to be both an effective team member and leader.

EMBA 5105. LEADERSHIP LABORATORY MODULE 4. 1 Hour.
1.0 Hours. This module explores the impact of ethics on managerial decisions, creating ethical environments for employees, establishing expected norms of behavior, and topical issues such as Corporate Social Responsibility and the consequences of unethical behavior.

EMBA 5106. LEADERSHIP LABORATORY MODULE 5. 1 Hour.
1.0 Hours. This module 'brings it all together' and summarizes, enhances, and builds upon the models and competencies explored throughout the Leadership Laboratory series with a particular focus on students' future direction and ongoing development.

EMBA 5111. LEADERSHIP LABORATORY MODULE 3. 1 Hour.
1.0 Hours. This course module focuses on various human capital competencies that firms and individuals can use to enhance organizational capabilities and achieve strategic objectives. The course details how the acquisition, deployment, assessment, and retention of an organization's workforce impacts productivity and firm performance in various contexts. Diversity, Inclusion, and the multi-cultural workforce issues are explored in this module.

EMBA 5123. NEGOTIATIONS. 1 Hour.
Effective Leadership requires strong communication and negotiation skills. The course will cover techniques and tools for effective negotiating.

EMBA 5192. CAPSTONE: SPECIAL TOPICS IN INTERNATIONAL BUSINESS. 1 Hour.
The course combines class discussion of lessons learned from the international project experience with case-based analysis. Discussion merges diverse functional business perspectives with student presentations on concepts covered in the EMBA program.

EMBA 5199. STRATEGIC SALES MANAGEMENT AND PROFESSIONAL SELLING. 1 Hour.
This course will focus on two key areas: building and managing a superior sales organization and understanding the professional selling process with an emphasis on B2B sales. Topics to be covered include strategic decisions such as sales force structure and deployment, key account and sales territory management, and sales leadership and evaluation of sales organization effectiveness. The second component of the course will cover key selling steps (e.g., prospecting, customer needs development and discovery, objection handling) as well as hands-on skills/techniques for building strong customer relationships in the consultative selling process.

EMBA 5202. PRICING STRATEGIES AND TACTICS. 2 Hours.
Often, managers treat pricing as a tactical problem. By pricing to cover costs, they undermine profit. By pricing for competitive advantage, they undermine value. In fact, pricing products and services is a strategic challenge that requires insight, analysis, and perspective. This course will introduce senior managers and executives responsible for pricing decisions and approvals to the theory and techniques needed to understand strategic pricing. The course will focus on how to use price to achieve strategic objectives, including successfully introducing new products to the market, responding to significant price competition, and achieving prices that reflect the true value of your products.

EMBA 5206. DIGITAL TRANSFORMATION OF THE ENTERPRISE. 2 Hours.
In the modern economy, digital and technological literacy are of key importance for any top executive. Modern executives and business leaders must be able to leverage technology to reimagine their businesses and unlock value through data-driven decision making. In this course, students will be exposed to transformative technological areas that are changing business and are key for leaders to understand and master: AI/ML, IoTs, Cybersecurity, Blockchain, and Cloud Computing with a particular emphasis on analytics (AI, ML, Visualization, NLP).

EMBA 5211. COMPETING IN A GLOBAL ENVIRONMENT. 2 Hours.
With an ever-growing number of industries becoming global in scope, managers are being increasingly challenged to manage strategies within a global perspective. This course provides participants with the skills, knowledge and sensitivity required to successfully manage organizations and organizational units within a multinational environment.

EMBA 5212. LEADERSHIP LABORATORY MODULE 1. 2 Hours.
2.0 Hours. The module explores key characteristics of high-performing leaders and organizations and weaves these into a single integrated model that students can apply to improve their individual and organizational effectiveness. This course introduces students to a leadership and organizational effectiveness framework and assesses individual competencies using a comprehensive leadership 360 analysis.

EMBA 5225. FOUNDATIONS OF QUANTITATIVE ANALYSIS. 2 Hours.
This course is designed to introduce foundational statistical building blocks used in applied managerial reasoning and decision making. Coverage will include (1) the computation, interpretation, and visualization of descriptive statistics (e.g., quantities reported as key performance indicators and/or metrics on dashboards), (2) tests of statistical differences (e.g., period over period, segment vs. segment, comparisons, etc.), (3) tests for statistical association (e.g., correlations, associations among categorical variables), and (4) an introduction to predictive modeling using multiple regression. In addition to gaining working knowledge of foundational statistics, an intended outcome is to equip organizational leaders to evaluate analysis results prepared by others, a critical skill for modern data-rich business contexts with expanding applications of business analytic techniques.

EMBA 5299. SPECIAL TOPICS IN EXECUTIVE BUSINESS EDUCATION. 2 Hours.
New topics or independent study options to be offered as needed.

EMBA 5303. STRATEGIC COST MANAGEMENT. 3 Hours.
Tools for cost management to meet strategic as well as tactical organizational goals are examined. Emphasis is on leveraging accounting information for decision making, strategic management, and for the control of processes and organizations.

EMBA 5304. MAKING STRATEGIC DECISIONS WITH FINANCIAL DATA. 3 Hours.
A review of the elements of accounting measurement principles and practical analytical skills needed to manage the resources of a firm. This includes exposure to the fundamentals of financial statement analysis with a focus on profitability, liquidity, solvency and risk management. Reporting incentives and disclosure requirements are explored within this framework.

EMBA 5307. DESIGNING GLOBAL SUPPLY CHAINS FOR COMPETITIVE ADVANTAGE. 3 Hours.
The course focuses on coordination and integration of global logistics, purchasing, operations and market channel strategies. Issues on global supply chains include: forecasting demand and technology and market growth; likelihood of regulation or political instability; activities to do in-house as opposed to outsourcing; global facility location; and managing a geographically dispersed supply chain including relations with vendors.

EMBA 5308. MARKETING AND CUSTOMER VALUE CREATION. 3 Hours.
This course focuses on marketing strategies and tactics to create customer value and build long term relationships to meet organizational goals. Students are exposed to tools that enable managers to understand the ever-changing marketplace and then build an effective marketing strategy to meet corporate goals. Not all customers are profitable or even desirable. Customer management strategies to build marginal buyers into valued customers are also covered.

EMBA 5309. FINANCIALMANAGEMENT FOR EXECUTIVES. 3 Hours.
This course provides an overview of strategic financial management for executives. The first module begins by introducing the tools needed for financial analysis at the executive level. We examine the strategic concept of opportunity cost by analyzing how to use bond yields to model the net present value of business projects. The second module adds advanced financial modeling skills for corporate financial analysis, applied to decisions on capital structure, payout policy, and M&A opportunities. The third module concludes by expanding the executive's perspective to incorporate international financial management and corporate real estate.

EMBA 5310. COMPETITIVE STRATEGY, INTRAPRENEURIAL AND ENTREPRENEURIAL. 3 Hours.
This course broadens student perspectives on strategy and competitive advantage. Strategic vision is developed for mature businesses and entrepreneurial startups. Conceptual tools associated with industry dynamics and the assessment of core competencies are presented. Students learn how to evaluate key competitors to formulate and implement winning strategies.

EMBA 5311. STRATEGIC MARKETING MANAGEMENT. 3 Hours.
The course focuses on how to develop and deliver products and services with meaningful customer value. Students learn to evaluate market potential, price products optimally, and evolve marketing strategies to capitalize on business shifts.

EMBA 5313. EXPERIENCING THE GLOBAL ENVIRONMENT: INTERNATIONAL PROJECT. 3 Hours.
A key factor in understanding how a business may operate in the global marketplace is to understand the culture, business practices, laws and regulations, and logistical challenges that exist in another country. This is particularly true for one as important to the world economy (let alone the U.S.) as China has become. The class will travel to China and participate in a two-week immersion into the cultural and economic aspects of how business is conducted there. Through our extensive network, that has been developed through the graduates of our China EMBA program, we are able to provide an experience like no other program of its kind can offer.

EMBA 5399. SPECIAL TOPICS IN EXECUTIVE BUSINESS EDUCATION. 3 Hours.
New topics or independent study options to be offered as needed.

EMBA 5413. INTERNATIONAL BUSINESS EXPERIENCE. 4 Hours.
A key factor in understanding how a business may operate in the global marketplace is to understand the culture, business practices, laws and regulations, and logistical challenges that exist in another country. The class will travel internationally and participate in a two-week immersion into the cultural and economic aspects of how business is conducted in an international country.

EMBA 5415. EXPERIENCING THE INTERNATIONAL ENVIRONMENT: SPECIAL PROJECT. 4 Hours.
Key factors in how business operates in the global marketplace means understanding the culture, business practices, laws, and logistical challenges that exist in another country. The class travels to an international destination and participate in a two-week immersion into the cultural and economic aspects of how business is conducted there. This course is an alternative to EMBA 5413 with destinations and itineraries specially designed.

EMBA 5417. EXPERIENCING THE BUSINESS ENVIRONMENT: INDUSTRY PROJECT. 4 Hours.
Understanding the challenges of management by experiencing the dynamics of industry and company culture, business practices, laws and regulations, and logistical challenges that confront today's business enterprises. This course is an alternative to EMBA 5413, with domestic destinations and itineraries specially designed.

EMBA 5499. SPECIAL TOPICS IN EXECUTIVE BUSINESS EDUCATION. 4 Hours.
New topics or independent study options to be offered as needed.

COURSES

HCAD 5192. SPECIAL TOPICS IN HEALTH CARE ADMINISTRATION. 1 Hour.
In-depth study of selected topics in health care administration.

HCAD 5199. GRADUATE HEALTH CARE ADMINISTRATION INTERNSHIP. 1 Hour.
Practical training in health care administration. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

HCAD 5292. SPECIAL TOPICS IN HEALTH CARE ADMINISTRATION. 2 Hours.
In-depth study of selected topics in health care administration.

HCAD 5299. GRADUATE HEALTH CARE ADMINISTRATION INTERNSHIP. 2 Hours.
Practical training in health care administration. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

HCAD 5301. HEALTH CARE ADMINISTRATION I. 3 Hours.
Introduction to health care; legislation; reimbursement systems; characteristic administrative and clinical roles responsibilities and education; public health care structures; regulatory agencies; health industry trends; and advances in research and technologies.

HCAD 5302. HEALTH CARE ADMINISTRATION II. 3 Hours.
Managed care; types of health care delivery systems; national health care policy; teamwork in primary care; management of cost and quality of care; legal issues; ethical issues, including bioethics and business ethics; changing roles of health care professionals; varieties of domestic, public and international health care delivery systems.

HCAD 5305. FINANCIAL ACCOUNTING FOR HEALTH CARE INDUSTRY. 3 Hours.
Introduction to concepts, purposes, problems, methodology, and terminology of financial accounting for health care industry.

HCAD 5306. MANAGERIAL ACCOUNTING FOR HEALTH CARE INDUSTRY. 3 Hours.
Introduction to concepts, purposes, problems, methodology, and terminology of managerial accounting for health care industry. Prerequisite: HCAD 5305.

HCAD 5310. HEALTH CARE LAW. 3 Hours.
Coverage of statutory and case law of the health care industry. Topics include patient rights and malpractice, employment and compensation matters, insurance and claims, and government agencies that regulate aspects of health services delivery.

HCAD 5315. STATISTICAL METHODS FOR HEALTH CARE ADMINISTRATORS. 3 Hours.
Statistical methods designed to prepare graduate students to become competent producers and consumers of data analyses and to use statistical thinking to approach managerial decision making. Students should be familiar with the effectiveness and limitations of various applicable techniques and should be able to recognize when additional statistical expertise is required. Topics include an introduction to evidenced based medicine, probability with an emphasis on the poor predictive value of imperfect diagnostics for rare conditions, standardizing and trending data, graphic and numeric descriptions of data, concepts of inference such as margins of error and significance of results, concepts of quality control including time series analysis and forecasting, and health care applications of discrete random variables with Poisson or binomial probability mass functions. It is recommended that students who have no recent courses in statistics take BSTAT 5301 prior to HCAD 5315.

HCAD 5316. HEALTH CARE FINANCE. 3 Hours.
Analysis of financial problems with an emphasis on the application of financial management principles and concepts to health care organizations.

HCAD 5330. SERVICE MARKETING MANAGEMENT. 3 Hours.
Examines conceptual frameworks and management practices particularly relevant to the health care industry. The course examines many concepts and theories from the service marketing industry and analyzes their values in crafting marketing strategies. Emphasis is on problem solving unique to the health care industry.

HCAD 5333. ECONOMICS OF HEALTH. 3 Hours.
Economic analysis applied to current health policy issues, including health expenditures, public and private insurance, incentives, provider education and labor markets, hospitals, prescription drugs, malpractice, long-term care, the Internet, and various proposals for reform. For HCAD majors only.

HCAD 5337. ETHICS, LEADERSHIP, AND TEAMWORK. 3 Hours.
Examines the leadership process, change management, and high-performance team-building strategies. Emphasis will be placed on the development of self-awareness and skills necessary to lead. Identification of values and ethical issues in health care administration will also be stressed through the application of ethical principles and theories of decision making in the analysis of ethical dilemmas.

HCAD 5340. HEALTH CARE STRATEGIC HUMAN CAPITAL. 3 Hours.
A high-performing workforce, developed through effective people practices, is the lifeblood of a health care organization. This course presents a strategic perspective on contemporary human resource management theory and practice. Key topics covered include workforce planning, staffing, diversity, development, performance measurement and management, and compensation; labor and employee relations, regulations, and legislation; as well as key concepts in team and organizational behavior.

HCAD 5350. HEALTH CARE INFORMATION SYSTEMS. 3 Hours.
Addresses issues in the development, integration, and management of health care information systems. Specifically, topics in financial information systems, patient care systems, and health care delivery applications will be discussed. Both case studies and real life applications will be studied.

HCAD 5377. HEALTH CARE QUALITY ASSESSMENT. 3 Hours.
Covers an integrated case study approach to organizational performance management resulting in the delivery of ever-improving value to patients, improved health care quality and organizational sustainability, improvement of overall organizational effectiveness as a health care provider, and organizational learning.

HCAD 5380. HEALTH CARE DATA ANALYTICS. 3 Hours.
Digitization of patient records and widespread use of digital technologies in healthcare organizations have created large repositories of data that can be analyzed to improve care delivery quality, lower cost, and increase patient satisfaction. This course introduces concepts, techniques, and tools for collecting and analyzing healthcare data to gain insight and support decision making by managers and policymakers in healthcare organizations. Data visualization techniques to effectively communicate results are also covered. The course will consist of lectures, case studies, hands-on exercises, and projects.

HCAD 5390. STRATEGIC MANAGEMENT FOR HEALTH CARE ORGANIZATIONS. 3 Hours.
Development of skills necessary for managing health care organizations from a strategic perspective. Particular emphasis is given to the use of systematic assessment of the environment and the organization, as well as the development and implementation of business strategies to meet the needs of stakeholders. Prerequisite: Must be taken in the last semester of the HCAD program.

HCAD 5392. SPECIAL TOPICS IN HEALTH CARE ADMINISTRATION. 3 Hours.
In-depth study of selected topics in health care administration.

HCAD 5398. RESEARCH IN HEALTH CARE ADMINISTRATION. 3 Hours.
Independent research under the supervision of a faculty member.

HCAD 5399. GRADUATE HEALTH CARE ADMINISTRATION INTERNSHIP. 3 Hours.
Practical training in health care administration. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Last semester of the program and permission granted by Graduate Advisor.

Business Administration - Graduate

Programs

DOCTORAL DEGREES

- Accounting PhD (p. 276)
- Finance PhD (p. 279)
- Information Systems PhD (p. 282)
- Management PhD (p. 288)
- Management Science PhD (p. 285)
- Marketing PhD (p. 290)

MASTER OF BUSINESS ADMINISTRATION DEGREES

- Executive MBA (p. 295)
- Executive MBA (International) (p. 297)

- MBA (p. 293)
- STEM MBA (p. 298)

MASTER OF SCIENCE DEGREE

- Health Care Administration MS (p. 300)

FAST TRACKS

- BBA/BS to MBA Fast Track (https://catalog.uta.edu/business/administration/graduate/business/administration/graduate/bba-bs-to-mba-fast/)
- BBA/BA to STEM MBA Fast Track (p. 305)

CERTIFICATES

- Healthcare Administration Graduate Certificate (p. 307)
- Graduate Advanced Studies Certificate (p. 308)

Doctor of Philosophy in Business Administration (Accounting)

About This Program

The objective of the Doctor of Philosophy in Business Administration (Accounting) is primarily to develop scholars with an ability to teach and conduct independent research in the field of accounting. The program prepares students for careers as researchers and teachers by providing thorough preparation in the theory of business administration and developing the skills needed to conduct high quality research in this area. The curriculum emphasizes and develops the rigorous analytical skills needed to make significant scholarly contributions in fields of business. Graduates of the program will assume significant roles in the world's educational and research institutions.

To support the Business Administration PhD, the College of Business offers graduate coursework in the following areas: accounting, banking and finance, business economics, business policy/strategic management, business statistics, research design, human resource management, insurance and risk management, international business management, investments and securities, management information systems, management sciences, marketing management and research, organizational behavior, organizational theory, production/operations management, real estate, entrepreneurship, and taxation.

Competencies

1. Upon completion, students will be able to design and conduct original research that contributes to theoretical and empirical advancements in accounting.
2. Upon completion, students will demonstrate mastery of core disciplinary knowledge and advanced scholarship in the field of accounting.
3. Upon completion, students will be able to apply appropriate research methods and analytical techniques to develop and test accounting-related theories and hypotheses with scientific rigor.
4. Upon completion, students will be able to communicate scholarly findings effectively through academic publications, conference presentations, and university-level teaching in accounting.
5. Upon completion, students will be able to critically evaluate and synthesize marketing literature to generate novel insights and guide future research agendas in the discipline.

Admissions Criteria

Applicants who hold only an undergraduate degree, or fewer than 30 hours of graduate coursework, may be considered for admission. Such applicants should contact the PhD coordinator in Accounting prior to applying. Based on the coordinator's assessment, bachelor's entry students may be required to take up to 30 additional credit hours of coursework and dissertation-related credits to ensure they possess the competencies needed to successfully complete the program.

Admission to the PhD program is based upon the completion of the general admission requirements of Graduate Admissions. For PhD program admission, a score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) and a record of undergraduate and master's (if applicable) level academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 550. The TOEFL cannot be waived, even for students holding a master's degree from a U.S. university. International applicants who score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit a résumé with their application that highlights professional and personal accomplishments, linguistic abilities, computer expertise, and leadership experience. A statement of purpose, which describes the applicant's academic and work background, research interests, and reasons for applying to the UTA PhD program, is required as part of the application.

Multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE score and grade point averages on undergraduate and master level courses as calculated by the Graduate Admissions. No formula is used, nor are weights assigned to these

factors. There are no set minimum scores for the GMAT or GRE required for admission, and no cutoff scores are applied to grade point averages. A standardized test score (GMAT or GRE) is not used as the sole criterion for an applicant's admission decision.

PhD admission decisions are made by a committee headed by the major field coordinator for the track that an applicant wishes to specialize in (Management, Finance, etc.). These committees typically consider multiple factors, including educational objectives, letters of recommendation, and other relevant criteria, in addition to quantitative metrics, to arrive at a decision. All students who wish to have a strong application for a PhD program are encouraged to gain research experience through activities such as working as a research assistant for a faculty member, writing a master's thesis, and/or presenting papers at academic conferences. Strong performance in courses in research methods and advanced statistics is also viewed positively. Students interested in learning more about the admission process for a specific area of business administration are encouraged to contact the major field coordinator for that area.

CATEGORIES OF ADMISSION DECISIONS

An applicant is unconditionally admitted when all factors for consideration indicate very strong potential for academic success as a business doctoral student. When multiple factors indicate a lack of potential, admission will be denied. Probationary admission is not available for the doctoral program.

A provisional decision to admit may be granted when the applicant meets the criteria for unconditional admission, but an item of applicant information has not been received by the Graduate Admissions (e.g., official test scores have not arrived). A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

UNIVERSITY AND COLLEGE FELLOWSHIP/SCHOLARSHIP AWARDS

Doctoral students who are newly admitted, have a minimum undergraduate grade point average of 3.0 as calculated by Graduate Admissions (and 3.0 at the graduate level), and enroll for nine semester credit hours will be eligible for available Dean's Doctoral Assistantship (DDA), fellowship and/or scholarship support. A standardized test score (GMAT or GRE) is not used as the sole criterion for determining fellowship and/or scholarship eligibility.

Curriculum

Students choosing accounting as a major field in the PhD program are expected to have at least 24 hours of accounting credits beyond accounting principles. Those courses are normally completed as part of a formal degree and prior to admission to the doctoral program. Alternatively, the student may complete this coursework after admission to the PhD program. In that case, the time at UTA will likely be extended. Additionally, all students must have working knowledge of linear algebra, statistics, basic regression, and calculus. Confer with major field coordinator for courses and strategies for meeting these requirements.

Program Completion

ANNUAL PROGRESS EVALUATIONS

All doctoral students are expected to show steady progress toward their degree and to demonstrate satisfactory advances in their ability and motivation to conduct independent research throughout their program. During a student's program, a progress evaluation will be conducted near the end of the first year, but no later than 24 credit hours. After the first year, an annual progress evaluation will take place each subsequent year. The evaluation will be conducted by the major field coordinator/PhD advisor in consultation with a faculty committee. If the student has not yet passed all comprehensive

examinations or does not have a formal dissertation committee, the faculty committee will consist of the PhD Committee for the major area. If the student has passed all comprehensive examinations and has a formal dissertation committee, the faculty committee will consist of the Dissertation Committee.

Upon completion of the evaluation, a recommendation of continuation or discontinuation in the program is made to the College of Business PhD program director for a final decision. When a discontinuation decision is made as a result of the first-year diagnostic evaluation, the student will be immediately discontinued from the PhD program. For a discontinuation decision in the annual progress review in the second year and beyond, the student will be placed on probation for one regular semester (Fall or Spring) during which he or she must demonstrate satisfactory improvement in his/her performance. At that time, the major field coordinator/PhD advisor, in consultation with the faculty committee and the PhD program director, will make a final decision on whether the improvements are satisfactory. An unsatisfactory decision at that time will result in the immediate discontinuation of the student from the PhD program.

During the annual progress reviews, reasons for poor performance include: grade point averages below minimum GPA requirements, unsatisfactory progress in completing coursework, unsatisfactory progress in completing the dissertation, and inadequate demonstration of ability and motivation to conduct independent research.

All students must maintain a GPA of 3.25 or higher to remain in good standing in the PhD program. Students whose GPA falls below 3.25 will be given a one-semester probationary period to raise their GPA to the 3.25 level or above. If, after one semester has passed, the student's GPA remains below 3.25, the student will be dismissed from the program. Any student who earns three grades of C or lower in the PhD program will be immediately dismissed from the program.

COMPREHENSIVE EXAMINATIONS

Students must demonstrate competence in their fields of study by the successful completion of comprehensive examinations. Written comprehensive examinations in each field will be administered at the start of each fall and spring semester of each year and may also be administered during the summer term. A student is eligible for a written comprehensive examination when that student has completed:

1. Any Business Foundation courses with a GPA of at least 3.25 and
2. prescribed coursework in the field with a GPA of at least 3.25.

If a student fails a written comprehensive examination and continues in that field, the examination must be retaken by the end of the next long semester. If a student fails a second comprehensive examination, that student will not be permitted to continue in the PhD program.

When a student successfully completes the written comprehensive examination, that student should schedule a comprehensive oral examination, which is administered by the student’s Supervisory Committee. A student who fails the comprehensive oral examination is given a second oral examination within 12 months of the date of the first examination. If a student fails the second comprehensive oral examination, that student will not be permitted to continue in the PhD program.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

DISSERTATION

The Dissertation Committee consists of a minimum of three members, at least two of whom must be from the major field. There is no maximum number of faculty members that can serve on a committee, although committees of more than five are unusual. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from outside the department, either from outside the major field at UTA or a nationally or internationally recognized scholar not affiliated with UTA. Any committee member from outside UTA must receive approval from the Graduate Dean.

The dissertation must be completed within four years of the oral comprehensive examination.

Doctor of Philosophy in Business Administration (Finance)

About This Program

The objective of the Doctor of Philosophy in Business Administration (Finance) is primarily to develop scholars with an ability to teach and conduct independent research in the field of Finance and/or Real Estate. The program prepares students for careers as researchers and teachers by providing thorough preparation in the theory of business administration and developing the skills needed to conduct high quality research in this area. The curriculum emphasizes and develops the rigorous analytical skills needed to make significant scholarly contributions in fields of business. Graduates of the program will assume significant roles in the world's educational and research institutions.

To support the Business Administration PhD, the College of Business offers graduate coursework in the following areas: accounting, banking and finance, business economics, business policy/strategic management, business statistics, research design, human resource management, insurance and risk management, international business management, investments and securities, management information systems, management sciences, marketing management and research, organizational behavior, organizational theory, production/operations management, real estate, entrepreneurship, and taxation.

Competencies

1. Upon completion, students will be able to design and conduct original research that contributes to theoretical and empirical advancements in finance.
2. Upon completion, students will demonstrate mastery of core disciplinary knowledge and advanced scholarship in the field of finance.
3. Upon completion, students will be able to apply appropriate research methods and analytical techniques to develop and test finance-related theories and hypotheses with scientific rigor.
4. Upon completion, students will be able to communicate scholarly findings effectively through academic publications, conference presentations, and university-level teaching in finance.
5. Upon completion, students will be able to critically evaluate and synthesize finance literature to generate novel insights and guide future research agendas in the discipline.

Admissions Criteria

Applicants who hold only an undergraduate degree, or fewer than 30 hours of graduate coursework, may be considered for admission. Such applicants should contact the PhD coordinator in Finance prior to applying. Based on the coordinator's assessment, bachelor's entry students may be required to take up to 30 additional credit hours of coursework and dissertation-related credits to ensure they possess the competencies needed to successfully complete the program.

Admission to the PhD program is based upon the completion of the general admission requirements of Graduate Admissions. For PhD program admission, a score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) and a record of undergraduate and master level academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 550. The TOEFL cannot be waived, even when a student has a Master's degree from a US university. International applicants that score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit a résumé with their application that highlights professional and personal accomplishments, linguistic abilities, computer expertise and leadership experience. A statement of purpose which describes the applicant's academic and work background, research interests, and reasons for applying to the UTA PhD program is required as part of the application.

Multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE score and grade point averages on undergraduate and master level courses as calculated by the Graduate Admissions. No formula is used nor weights assigned to these factors. There are no set minimum scores for GMAT or GRE required for admission and no cutoff scores on grade point averages. A standardized test score (GMAT or GRE) is not used as the sole criterion for an applicant's admission decision.

PhD admission decisions are made by a committee headed by the major field coordinator for the track that an applicant wishes to specialize in (Management, Finance, etc.). These committees typically give consideration to many factors (educational objectives, letters of recommendation, etc.) in addition to quantitative metrics to arrive at a decision. All students who wish to have a strong application for a PhD program are encouraged to gain research experience through activities such as working as a research assistant for a faculty member, writing a master's thesis, and/or presenting papers at academic conferences. Strong performance in courses in research methods and advanced statistics are also viewed positively. Students who wish to learn more about the admission process for a particular area of business administration are encouraged to contact the major field coordinator for that area.

CATEGORIES OF ADMISSION DECISIONS

An applicant is unconditionally admitted when all factors for consideration indicate very strong potential for academic success as a business doctoral student. When multiple factors indicate lack of potential, admission will be denied. Probationary admission is not available for the doctoral program.

A provisional decision to admit may be granted when the applicant meets criteria for unconditional admission but an item of applicant information has not been received by the Graduate Admissions (e.g., official test scores have not arrived). A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

ANNUAL PROGRESS EVALUATIONS

All doctoral students are expected to show steady progress toward their degree and to demonstrate satisfactory advances in their ability and motivation to conduct independent research throughout their program. During a student's program, a progress evaluation will be conducted near the end of the first year, but no later than 24 credit hours. After the first year, an annual progress evaluation will take place each subsequent year. The evaluation will be conducted by the major field coordinator/PhD advisor in consultation with a faculty committee. If the student has not yet passed all comprehensive examinations or does not have a formal dissertation committee, the faculty committee will consist of the PhD Committee for the major area. If the student has passed all comprehensive examinations and has a formal dissertation committee, the faculty committee will consist of the Dissertation Committee.

Upon completion of the evaluation, a recommendation of continuation or discontinuation in the program is made to the College of Business PhD program director for a final decision. When a discontinuation decision is made as a result of the first-year diagnostic evaluation, the student will be immediately discontinued from the PhD program. For a discontinuation decision in the annual progress review in the second year and beyond, the student will be placed on probation for one regular semester (Fall or Spring) during which he or she must demonstrate satisfactory improvement in his/her performance. At that time, the major field coordinator/PhD advisor, in consultation with the faculty committee and the PhD program director, will make a final decision on whether the improvements are satisfactory. An unsatisfactory decision at that time will result in the immediate discontinuation of the student from the PhD program.

During the annual progress reviews, reasons for poor performance include: grade point averages below minimum GPA requirements, unsatisfactory progress in completing coursework, unsatisfactory progress in completing the dissertation, and inadequate demonstration of ability and motivation to conduct independent research.

All students must maintain a GPA of 3.25 or higher to remain in good standing in the PhD program. Students whose GPA falls below 3.25 will be given a one-semester probationary period to raise their GPA to the 3.25 level or above. If, after one semester has passed, the student's GPA remains below 3.25, the student will be dismissed from the program. Any student who earns three grades of C or lower in the PhD program will be immediately dismissed from the program.

COMPREHENSIVE EXAMINATIONS

Students must demonstrate competence in their fields of study by the successful completion of comprehensive examinations. Written comprehensive examinations in each field will be administered at the start of each fall and spring semester of each year and may also be administered during the summer term. A student is eligible for a written comprehensive examination when that student has completed:

1. Any Business Foundation courses with a GPA of at least 3.25 and
2. prescribed coursework in the field with a GPA of at least 3.25.

If a student fails a written comprehensive examination and continues in that field, the examination must be retaken by the end of the next long semester. If a student fails a second comprehensive examination, that student will not be permitted to continue in the PhD program.

When a student successfully completes the written comprehensive examination, that student should schedule a comprehensive oral examination, which is administered by the student's Supervisory Committee. A student who fails the comprehensive oral examination is given a second oral examination within 12 months of the date of the first examination. If a student fails the second comprehensive oral examination, that student will not be permitted to continue in the PhD program.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

DISSERTATION

The Dissertation Committee consists of a minimum of three members, at least two of whom must be from the major field. There is no maximum number of faculty members that can serve on a committee, although committees of more than five are unusual. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from outside the department, either from outside the major field at UTA or a nationally or internationally recognized scholar not affiliated with UTA. Any committee member from outside UTA must receive approval from the Graduate Dean.

The dissertation must be completed within four years of the oral comprehensive examination.

If a student fails a written comprehensive examination and continues in that field, the examination must be retaken by the end of the next long semester. If a student fails a second comprehensive examination, that student will not be permitted to continue in the PhD program.

When a student successfully completes the written comprehensive examination, that student should schedule a comprehensive oral examination, which is administered by the student's Supervisory Committee. A student who fails the comprehensive oral examination is given a second oral examination within 12 months of the date of the first examination. If a student fails the second comprehensive oral examination, that student will not be permitted to continue in the PhD program.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

DISSERTATION

The Dissertation Committee consists of a minimum of three members, at least two of whom must be from the major field. There is no maximum number of faculty members that can serve on a committee, although committees of more than five are unusual. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from outside the department, either from outside the major field at UTA or a nationally or internationally recognized scholar not affiliated with UTA. Any committee member from outside UTA must receive approval from the Graduate Dean.

The dissertation must be completed within four years of the oral comprehensive examination.

Doctor of Philosophy in Business Administration (Management Science)

About This Program

The objective of the Doctor of Philosophy in Business Administration (Management Science) is primarily to develop scholars with an ability to teach and conduct independent research in the field of operations and supply chain management. The program prepares students for careers as researchers and teachers by providing thorough preparation in the theory of business administration and developing the skills needed to conduct high quality research in this area. The curriculum emphasizes and develops the rigorous analytical skills needed to make significant scholarly contributions in fields of business. Graduates of the program will assume significant roles in the world's educational and research institutions.

To support the Business Administration PhD, the College of Business offers graduate coursework in the following areas: accounting, banking and finance, business economics, business policy/strategic management, business statistics, research design, human resource management, insurance and risk management, international business management, investments and securities, management information systems, management sciences, marketing management and research, organizational behavior, organizational theory, production/operations management, supply chain management real estate, entrepreneurship, and taxation.

Competencies

1. Upon completion, students will be able to design and conduct original research that contributes to theoretical and empirical advancements in operations and supply chain management.
2. Upon completion, students will demonstrate mastery of core disciplinary knowledge and advanced scholarship in the field of operations and supply chain management.
3. Upon completion, students will be able to apply appropriate research methods and analytical techniques to develop and test field-specific theories and hypotheses with scientific rigor.
4. Upon completion, students will be able to communicate scholarly findings effectively through academic publications, conference presentations, and university-level teaching in operations and supply chain management.
5. Upon completion, students will be able to critically evaluate and synthesize operations and supply change management literature to generate novel insights and guide future research agendas in the discipline.

Admissions Criteria

Applicants who hold only an undergraduate degree, or fewer than 30 hours of graduate coursework, may be considered for admission. Such applicants should contact the PhD coordinator in operations and supply chain management prior to applying. Based on the coordinator's assessment, bachelor's entry students may be required to take up to 30 additional credit hours of coursework and dissertation-related credits to ensure they possess the competencies needed to successfully complete the program.

Admission to the PhD program is based upon the completion of the general admission requirements of Graduate Admissions. For PhD program admission, a score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) and a record of undergraduate and master's (if applicable) ~~master~~ level academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 550. The TOEFL cannot be waived, even for students holding a master's degree from a U.S. ~~The TOEFL cannot be waived, even when a student has a Master's degree from a US~~ university. International applicants who ~~that~~ score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit a résumé with their application that highlights professional and personal accomplishments, linguistic abilities, computer expertise, ~~expertise~~ and leadership experience. A statement of purpose, ~~purpose~~ which describes the applicant's academic and work background, research interests, and reasons for applying to the UTA PhD program, ~~program~~ is required as part of the application.

Multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE score and grade point averages on undergraduate and master level courses as calculated by the Graduate Admissions. No formula is used, ~~used~~ nor are weights assigned to these factors. There are no set minimum scores for the GMAT or GRE required for admission, ~~admission~~ and no cutoff scores are applied to ~~on~~ grade point averages. A standardized test score (GMAT or GRE) is not used as the ~~the~~ sole criterion for an applicant's admission decision.

PhD admission decisions are made by a committee headed by the major field coordinator for the track that an applicant wishes to specialize in (Management, Finance, etc.). These committees typically consider multiple factors, including educational objectives, letters of recommendation, and other relevant criteria, in addition ~~give consideration~~ to ~~many factors (educational objectives, letters of recommendation, etc.) in addition to~~ quantitative metrics, to ~~metrics to~~ arrive at a decision. All students who wish to have a strong application for a PhD program are encouraged to gain research experience through activities such as working as a research assistant for a faculty member, writing a master's thesis, and/or presenting papers at academic conferences. Strong performance in ~~in~~ courses in ~~in~~ research methods and ~~and~~ advanced statistics is ~~are~~ also viewed positively. Students interested in learning ~~who wish to learn~~ more about the admission process for a specific ~~particular~~ area of business administration are encouraged to contact the major field coordinator for that area.

CATEGORIES OF ADMISSION DECISIONS

An applicant is unconditionally admitted when all factors for consideration indicate very strong potential for academic success as a business doctoral student. When multiple factors indicate a lack of potential, admission will be denied. Probationary admission is not available for the doctoral program.

A provisional decision to admit may be granted when the applicant meets the criteria for unconditional admission, ~~admission~~ but an item of applicant information has not been received by the ~~the~~ Graduate Admissions (e.g., official test scores have not arrived). A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

UNIVERSITY AND COLLEGE FELLOWSHIP/SCHOLARSHIP AWARDS

Doctoral students who are newly admitted, have a minimum undergraduate grade point average of 3.0 as calculated by Graduate Admissions (and 3.0 at the graduate level), and enroll for nine semester credit hours will be eligible for available Dean's Doctoral Assistantship (DDA), fellowship ~~(DDA),fellowship~~ and/or scholarship support. A standardized test score (GMAT or GRE) is not used as the sole criterion for determining fellowship and/or scholarship eligibility.

Curriculum

All students must complete work in a major area field and a research field. Some major courses may be external to the College of Business, if deemed appropriate by the student's advisor. Examples include industrial engineering, mathematics, computer science, sociology, and psychology. Students admitted to the PhD program will choose courses in consultation with their major field coordinator, who serves as their academic advisor for the first two years of the program.

Program Completion

ANNUAL PROGRESS EVALUATIONS

All doctoral students are expected to show steady progress toward their degree and to demonstrate satisfactory advances in their ability and motivation to conduct independent research throughout their program. During a student's program, a progress evaluation will be conducted near the end of the first year, but no later than 24 credit hours. After the first year, an annual progress evaluation will take place each subsequent year. The evaluation will be conducted by the major field coordinator/PhD advisor in consultation with a faculty committee. If the student has not yet passed all comprehensive examinations or does not have a formal dissertation committee, the faculty committee will consist of the PhD Committee for the major area. If the student has passed all comprehensive examinations and has a formal dissertation committee, the faculty committee will consist of the Dissertation Committee.

Upon completion of the evaluation, a recommendation of continuation or discontinuation in the program is made to the College of Business PhD program director for a final decision. When a discontinuation decision ~~resulting from the first year diagnostic evaluation~~ is made as a result of the first-year diagnostic evaluation, ~~made,~~ the student will ~~immediately~~ be immediately discontinued from ~~discontinued in~~ the PhD program. For a discontinuation decision in the annual progress review in the second year and beyond, the student will be placed on probation for one regular semester (Fall or Spring) during which he or she must demonstrate satisfactory improvement in his/her performance. At that time, ~~time~~ the major field ~~major field~~ coordinator/ PhD advisor, ~~advisor~~ in consultation with ~~the faculty committee, and~~ the faculty committee and the PhD program director, will make a final decision on whether the ~~the~~ improvements are satisfactory. An unsatisfactory decision at that time will result in the immediate discontinuation of the student from ~~in~~ the PhD program.

During the annual progress reviews, reasons for poor performance include: grade point averages below minimum GPA requirements, unsatisfactory progress in completing coursework, unsatisfactory progress in completing the dissertation, and inadequate demonstration of ability and motivation to conduct independent research.

All students must maintain a GPA of 3.25 or higher to remain in good standing in the PhD program. Students whose GPA falls below 3.25 will be given a one-semester probationary period to raise their GPA to the 3.25 level or above. If, ~~If~~ after ~~that~~ one semester has passed, ~~passes,~~ the student's GPA remains ~~is still~~ below 3.25, the student will be dismissed from the program. Any student who earns three grades of C or lower ~~C~~ in the PhD program will be immediately dismissed from the program.

COMPREHENSIVE EXAMINATIONS

Students must demonstrate competence in their fields of study by the successful completion of comprehensive examinations. Written comprehensive examinations in each field will be administered ~~given~~ at the start of each fall and spring semester of each year and may also be administered ~~given~~ during the summer term. A student is eligible for a written comprehensive examination when that student has completed:

1. Any Business Foundation courses with a GPA of at least 3.25 and
2. prescribed coursework in the field with a GPA of at least 3.25.

If a student fails a written comprehensive examination and continues in that field, the examination must be retaken by the end of the next long semester. If a student fails a second comprehensive examination, that student will not be permitted to continue in the PhD program.

When a student successfully completes the written comprehensive examination, that student should schedule a comprehensive oral examination, ~~examination~~ which is administered by the student's Supervisory Committee. A student who fails the comprehensive oral examination is given a second oral examination within 12 months of the date of the first examination. If a student fails the second comprehensive oral examination, that student will not be permitted to continue in the PhD program.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

DISSERTATION

The Dissertation Committee consists of a minimum of three members, at least two of whom must be from the major field. There is no maximum number of faculty members that can serve on a committee, although committees of more than five are unusual. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from outside the department, either from outside the major field at UTA or a nationally or internationally recognized scholar not affiliated with UTA. ~~non-UTA scholar.~~ Any committee member from outside UTA must receive approval from the Graduate Dean.

The dissertation must be completed within four years of the oral comprehensive examination.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

DISSERTATION

The Dissertation Committee consists of a minimum of three members, at least two of whom must be from the major field. There is no maximum number of faculty members that can serve on a committee, although committees of more than five are unusual. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from outside the department, either from outside the major field at UTA or a nationally or internationally recognized scholar not affiliated with UTA. ~~non-UTA scholar.~~ Any committee member from outside UTA must receive approval from the Graduate Dean.

The dissertation must be completed within four years of the oral comprehensive examination.

Master of Business Administration

About This Program

The Master of Business Administration program prepares leaders and managers with or without previous business education for careers within all types of organizations. The faculty's research contributes to educational excellence. Different MBA delivery formats and certificates serve a wide variety of interests.

MBA FORMATS

Students pursuing an MBA may choose one of three available formats. In all formats, degree completion requires a total of 36 credit hours and the same curriculum requirements apply. Only one change of program between the different formats of the MBA will be allowed.

Flexible MBA

Offered in-person at our main campus in Arlington, the Flexible MBA format is designed for working professionals seeking an MBA offering maximum flexibility. In this format, courses are completed in 15-week sessions and students are able to complete their MBA degree in 15-24 months. Students choosing this format complete degree requirements at their own pace and may select one of thirteen available areas of specialization/concentration in which to focus their MBA. Admission to the Flexible MBA is available each Fall, Spring, and Summer.

Online MBA

Available in an asynchronous online delivery, the online MBA is designed for working professionals who prefer a fully online format due to learning preference, work obligations, or personal choice. This asynchronous program offers 15-week courses and allows students to complete their degree in as little as 15 months. Students in this format may pursue a general MBA degree or choose to concentrate their MBA in Management. Admission to the Online MBA is available each Fall, Spring, and Summer.

Cohort MBA (also referred to as CMBA)

Offering a combination of online course meetings on Monday nights and in-person course meetings on Saturday mornings in Fort Worth, the Cohort MBA format (CMBA) is designed for working professionals seeking the benefits of an accelerated degree timeline while still being able to focus on one course at a time. In this format, courses are taken in sequence, in accelerated 5- or 8-week sessions and students are able to complete their MBA

degree in 15 months. Students in this format may pursue a general MBA degree or choose to concentrate their MBA in Health Care Administration or Real Estate. Admission to the Cohort MBA is available each Fall.

Competencies

1. Upon completion, students will demonstrate an understanding of essential business functions, including accounting, finance, marketing, and operations management.
2. Upon completion, students will show evidence of problem solving and decisional ability in dealing with strategic and other business problems and situations.
3. Upon completion, students will articulate the values and practices associated with the ethical and legal responsibilities of managing organizations.
4. Upon completion, students will demonstrate competency in oral and written communication through presentations of clear and concise information.

Admissions Criteria

The MBA Graduate Advisor reviews all applications and determines if they qualify for unconditional admissions. Applicants who do not satisfy the conditions for admission are referred to the MBA Admissions Committee for consideration.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures in the Graduate Catalog.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the MBA Admissions Committee if they have a bachelor's degree with a GPA of 3.0 or higher (last 60 hours) from an AACSB-accredited college or university, or equivalent.

ADMISSION WITH COMMITTEE REVIEW

The MBA Admissions Committee will grant Unconditional Admission, Probationary Admission, Provisional Deferred Admission, or Deny Admission on the basis of holistic evaluation of the following factors:

- Transcript evaluations to ensure that the student can manage the academic rigor of the MBA program.
- Score on the GMAT, GMAT Focus, GRE, or EA.
- A professional resume that highlights the last two years of post-bachelor's work experience.
- Scores on three exams in Business Statistics (BSTAT), Economics (ECON), and Management (MANA) taken through a College of Business approved vendor.
- Personal statement of purpose.
- Letters of recommendation

PROVISIONAL ADMISSION

An applicant who has submitted all official transcripts prior to the admission deadline but has not provided supplemental documents required for the program in which they are pursuing admission may be granted provisional admission at the discretion of the program if the student appears to meet admission requirements. Complete and satisfactory credentials must be received by the admitting program before the end of the semester in which the student has registered in a provisional status. Provisional admission does not guarantee subsequent admission on an unconditional basis.

DEFERRED AND DENIED ADMISSION

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration. For an applicant lacking sufficient evidence to indicate potential for academic success as an MBA student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

MANA 5336	STRATEGIC MANAGEMENT (Capstone course - taken in second to last or last semester of program)	3
Electives		
Select fifteen hours of electives.		15
Total Hours		**36**

Substitutions

At the MBA Advisors discretion, a course substitution may be provided in the MBA if a student holds an undergraduate degree in an area of study that aligns with an MBA core course. A prerequisite is considered fulfilled when the student is granted a substitution of that specific required course. Required courses may not be taken as electives in the program.

Electives and Concentrations

Students can take courses in different areas (no concentration) or may choose to concentrate in a given area such as accounting, business analytics, digital markets, economics, finance, human resources, information systems, management, marketing, marketing research, operations management, health care administration, or real estate. Students can tailor the program to develop business skills and perspectives essential to career goals and objectives. Students may only have one concentration. Choosing to concentrate or not will not impact the degree name on the transcript or diploma. Both will read "Master of Business Administration."

Students may take electives in any of the curriculum areas of the MBA program. Students may take up to 12 semester hours in non-business coursework as part of their electives, subject to the approval of the MBA Advisor. An approved study abroad program or internship can also be used to satisfy an advanced elective requirements.

Program Completion

The MBA program follows the grade requirements for probation as specified under the general regulations of the Graduate Catalog. In addition, students must have at least a 3.0 grade point average in all coursework and area of concentration to graduate.

Master of Business Administration (Executive)

About This Program

The Master of Business Administration--Executive is designed to provide high-quality, graduate management education to mid-level and upper-level managers and executives. The program is tailored for seasoned professionals who are looking to enhance their strategic leadership abilities, explore complex business environments, and gain effective managerial practices in an ever-changing, global marketplace.

The program provides an opportunity for experienced professionals to obtain a master's degree in Business Administration on a schedule that minimizes disruption of work and personal pursuits. It includes a cohort class structure that offers a lock-step, planned curriculum in an executive setting. In other words, members of each class begin the program at the same point, move through the curriculum together, and typically complete the degree requirements for graduation as a group.

Competencies

1. Upon completion, students will demonstrate an understanding of essential business functions, including accounting, finance, marketing, and operations management.

2. Upon completion, students will show evidence of problem solving and decisional ability in dealing with strategic and other business problems and situations.
3. Upon completion, students will articulate the values and practices associated with the ethical and legal responsibilities of managing organizations.
4. Upon completion, students will demonstrate competency in oral and written communication through presentations of clear and concise information.

Admissions Criteria

UNCONDITIONAL ADMISSION

The EMBA admission process takes a holistic view of the candidate to determine the likelihood of success in the program and the extent to which each candidate will contribute to the overall success of the class. Factors taken into account in evaluating a candidate include:

- Completion of a four-year undergraduate degree or internationally recognized equivalent.
- Minimum of 5 years of professional work experience, with managerial experience recommended.
- High potential for advancement and proven academic capability
- Ability to contribute to the Executive MBA experience.
- Ability to read, write and speak English.

PROBATIONARY ADMISSION

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Any available test scores will not constitute the sole or primary basis for ending consideration of an applicant. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington.

Curriculum

The Master of Business Administration--Executive program curriculum is designed for business leaders who want to focus on current business trends, expand their leadership skills, and develop their executive persona.

Foundations

Master of Business Administration (Executive, International)

About This Program

The International Master of Business Administration--Executive is designed to provide high-quality, graduate management education to mid-level and upper-level managers and executives. The program covers all functional areas of business management and has an international focus in its course offerings. Other program content themes may include project management, total quality management, and strategic resource alignment.

The International EMBA is designed for mid-career professionals and upper-level managers who cannot afford the time required away from their jobs to earn a degree on a campus. Established in 2002, the program prepares professionals in China for global leadership positions.

The program consists of 12 courses (36 credit hours). A single course is offered every 6-8 weeks.

Competencies

1. Upon completion, students will demonstrate an understanding of essential business functions, including accounting, finance, marketing, and operations management.
2. Upon completion, students will show evidence of problem solving and decisional ability in dealing with strategic and other business problems and situations.
3. Upon completion, students will articulate the values and practices associated with the ethical and legal responsibilities of managing organizations.
4. Upon completion, students will demonstrate competency in oral and written communication through presentations of clear and concise information.

Admissions Criteria

UNCONDITIONAL ADMISSION

The EMBA admission process takes a holistic view of the candidate to determine the likelihood of success in the program and the extent to which each candidate will contribute to the overall success of the class. Factors taken into account in evaluating a candidate include:

- Completion of a four-year undergraduate degree or internationally recognized equivalent.
- Minimum of 5 years of professional work experience, with 2 years of managerial experience.
- High potential for advancement and proven academic capability
- Ability to contribute to the Executive MBA experience.
- Ability to read, write and speak English. If candidates do not have standardized tests results (e.g. TOEFL, IELTS), they will be required to take an in-house English test and pass an oral English interview. This requirement is waived for custom-designed cohorts for companies or government entities, which are taught in Mandarin.
- Strong interest in a US educational experience.

PROBATIONARY ADMISSION

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Any available test scores will not constitute the sole or primary basis for ending consideration of an applicant. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington.

Curriculum

The International EMBA program lasts approximately 18-24 months and is offered in a lock-step fashion, where each student takes the same course at the same time.

Foundations		
ACCT 5307	MEASUREMENT AND ANALYSIS FOR BUSINESS DECISION-MAKING	3

MANA 5339	ENTREPRENEURSHIP	
OPMA 5368	GLOBAL SUPPLY CHAIN MANAGEMENT	
OPMA 5361	OPERATIONS MANAGEMENT	
Total Hours		**36**

Program Completion

The program consists of 12 courses (36 credit hours) that cover all functional areas of business. A single course is offered every 6-8 weeks. Each course requires a total of 45 hours of student effort/work. This is accomplished through a combination of web-based assignments, face-to-face lectures by faculty from the partner university (under the direction of the UT Arlington faculty responsible for the course), guest lectures by local and international business leaders, and an intensive 4-day (32-36 hours) face-to-face immersion in the subject matter by UT Arlington faculty.

Master of Business Administration in Technology Management and Innovation

About This Program

The Master of Business Administration in Technology and Innovation (STEM MBA) is designed to meet the needs of students with a technical background who are interested in pursuing analytical and leadership roles in knowledge-based occupations. The analytical curriculum focuses on data-driven decision making and the application of statistical modeling, information technology management, and data analysis techniques. A core of essential cross-functional courses provides future leaders with managerial, communications, and analytical skills to advance career growth.

Competencies

1. Upon completion, students will be able to apply data science techniques to evaluate and model financial data.
2. Upon completion, students will gain an understanding of financial statements and their underlying measurement.
3. Upon completion, students will be able to apply analytical approaches to increase customer profitability based on insights gained from customer data.
4. Upon completion, students will be able to employ quantitative problem-solving techniques to evaluate new business opportunities.

5. Upon completion, students will be able to apply statistical analysis to formulate and implement corporate and business level strategies.
6. Upon completion, students will be able to apply project management skills to manage large technology problems.
7. Upon completion, students will be able to apply web and social analytic tools to improve business profitability.
8. Upon completion, students will be able to apply management information technologies to transform business processes and drive innovation.
9. Upon completion, students will be able to employ team-based work systems and business analytics to lead high performing organizations.

Admissions Criteria

The STEM MBA Graduate Studies Committee has three alternative sets of conditions that allow applicants to be admitted without review by the STEM MBA Admissions Committee. The STEM MBA Graduate Advisor reviews all applications and determines if they qualify for admission under one of these three sets of criteria. Applicants who do not satisfy the conditions for admission are referred to the STEM MBA Admissions Committee for consideration.

Admission to the STEM MBA program is based upon an acceptable score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and the record of one's undergraduate academic performance (typically the last 60 hours of the GPA is used as calculated by Graduate Admissions).

A GMAT or GRE score is not the sole criterion for determining admission to the MBA program. An applicant can also be admitted to the program on probation with a GPA of 3.0 and passing scores of 85 percent or greater on three business subject area exams taken through a College of Business approved vendor. A graduate grade point average is used when it is 3.0 or above and is based on at least 24 semester hours. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures in the Graduate Catalog.

To apply please visit: https://www.uta.edu/admissions/apply (https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.uta.edu%2Fadmissions%2Fapply&data=05%7C02%7Cmark.cooper%40uta.edu%7C1f0b73e95fba49b9a17f08dd08c474eb%7C5cdc5b43d7be4caa8173729e3b0a62d9%7C0%7C0%7C638676362161489760%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIwLjAuMDAwMCIsIlAiOiJXaW4zMiIsIkFOIjoiTWFpbCIsIldUIjoyfQ%3D%3D%7C0%7C%7C%7C&sdata=sU3EZ%2B4AqG3BMMtxw%2FfrdRAFPf0OTQOTJZGvPN%2BNNQI%3D&reserved=0)

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the STEM MBA Admissions Committee if they have a bachelor's degree (with a GPA of 3.0 or better) and take the GMAT scoring at least 500 with a 30th percentile or higher in the verbal and quantitative areas. The GRE is accepted but the GMAT is preferred.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW (GMAT/GRE WAIVER)

A waiver of the GMAT/GRE and unconditional admission will be considered for applicants who meet one of the following conditions:

- Have earned a 3.5 GPA (or higher) in two calculations (cumulative and last 60 hours) with an earned undergraduate degree from an AACSB (or EQUIS/AMBA) accredited school no more than seven academic years prior to the semester for which admission to the STEM MBA is sought.
- An earned graduate degree or a graduate certificate (at least 9 credit hours) from a professionally and/or regionally accredited school with a 3.0 GPA (or higher) for all graduate coursework. Probationary Admission.
- Applicants with a bachelor's degree and a GPA of 3.0 or better who choose not to take the GMAT can be admitted to the STEM MBA program on probation after earning passing scores of 85 percent or greater on three exams in Business Statistics (BSTAT), Economics (ECON), and Management (MANA) taken through a College of Business approved vendor. Modules are available in these areas for exam preparation. Retaking exams is permissible however successful completion of exams is required prior to admission. Upon successful completion of all three exams, the applicant will be admitted on a probationary basis to the MBA program.

PROBATIONARY ADMISSION

Applicants with a bachelor's degree and a GPA less than 3.0 may be admitted to the MBA program on probation by taking the GMAT or GRE and meeting minimum score requirements (as stated above). If GMAT/GRE minimum scores and at least 3.0 GPA are not met, the MBA Admissions Committee will review for admission decision. Applicants admitted on a probationary basis must complete the first two semesters of the MBA program with a cumulative GPA of 3.0 or better to gain unconditional admission.

DENIAL OF ADMISSION

All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

Master of Science in Health Care Administration

About This Program

The program in Health Care Administration is designed to provide graduate students an integrated, contemporary, and multidisciplinary education primarily for early and mid-careerists. Diverse topics are included in the curriculum, research and residences to provide:

1. An understanding of the modern health industry
2. Knowledge, skills and abilities to assume administrative roles in various organizations in the health industry
3. Opportunities to develop leadership skills
4. Interactions with diverse specialists in the health industry to evaluate and resolve administrative problems

The Master of Science in Health Care Administration program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

Competencies

1. Analytical Thinking: Upon completion of the program, the student will develop a deeper understanding of a situation, issue, or problem by breaking it down or tracing its implications step-by-step. It includes organizing the parts of a situation, issue, or problem systematically; making systematic comparisons of different features or aspects; setting priorities on a rational basis; and identifying time sequences, causal relationships, or if-then relationships.
2. Change Leadership: Upon completion of the program, the student will develop the ability energize stakeholders and sustain their commitment to changes in approaches, processes, and strategies.
3. Communication Skills 2 (Speaking & Facilitating): Upon completion of the program, the student will develop the ability to use spoken communications in formal and informal situations to convey meaning, build shared understanding, and productively move agendas forward.
4. Performance Measurement: Upon completion of the program, the student will develop the ability to understand and use statistical and financial metrics and methods to set goals and measure clinical as well as organizational performance; commits to and deploys evidence-based techniques.
5. Strategic Orientation: Upon completion of the program, the student will develop the ability to consider the business, demographic, ethno-cultural, political, and regulatory implications of decisions and develop strategies that continually improve the long-term success and viability of the organization.

Admissions Criteria

Admission to the MS in Health Care Administration (HCAD) program is based upon the completion of the general admission requirements of Graduate Admissions. For HCAD program admission a score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and record of one's undergraduate academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 575 (paper-based) or 230 (computer-based). Applicants are encouraged to submit with their application a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise and leadership experience. A standardized test score (GMAT or GRE) will not be used as the sole criterion for admitting applicants or the primary criterion for denying an applicant's admission to the HCAD program.

Multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE scores and grade point average as calculated by Graduate Admissions. These measures are integrated into a formula, or index, that multiplies the grade point average by 200 and adds the total GMAT score. Index factors are weighed equally at the outset of applicant evaluation. A graduate grade point average is used in the index when it is 3.0 or above and is based on at least 24 semester hours. For unconditional admission, the applicant's composite total from the index must be 1050 or higher and items 1 through 5 above should strongly indicate potential for successful academic performance as a graduate health care administration student.

Along with grade point average and GMAT or GRE scores, admission criteria include the following:

1. GMAT or GRE sub scores (verbal and quantitative)
2. GMAT or GRE writing sample
3. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
4. Educational objectives and quality of written expression of the application essay
5. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience
6. Undergraduate Major
7. General and specific program accreditation status of degree granting institution
8. Professional work experience
9. Professional certification or licensure
10. A personal interview, at the discretion of the program advisor

UNCONDITIONAL ADMISSION

The GMAT or GRE test may be waived for applicants with an earned graduate degree in an appropriate health care related discipline or profession.

The GMAT or GRE test may also be waived for applicants with five or more years of increasing responsibility in managerial, professional, and/or technical positions in the health care industry, and with a 3.0 grade point average on undergraduate work as calculated by Graduate Admissions; detailed work history required with application.

The GMAT or GRE test may also be waived for applicants who have (within the last 3 years) or will receive an undergraduate degree from UT Arlington with a GPA of 3.2 or higher, as calculated by the graduate school.

Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.0 as calculated by the Graduate School (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support.

A standardized test score (GMAT or GRE) will not be used as the sole criterion or the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

For an applicant with an index score below 1050, probationary admission may be available when at least three items of 1 through 5 above strongly indicate potential for successful academic performance as a graduate health care administration student. Items 6 through 10 will also be used to identify positive indicators for admission. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally, the student may be required to take deficiency courses.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

A provisional decision to admit may be granted when the applicant meets criteria for unconditional or probationary status, but one or more applicant credentials are incomplete. A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

For an applicant with an index score less than 1000 and other evidence that indicates lack of potential for academic success as a graduate health care administration student, admission will likely be denied. However, all applicant data will be carefully reviewed before an admission denial is made.

Curriculum

HCAD 5301	HEALTH CARE ADMINISTRATION I	3
HCAD 5305	FINANCIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	3
HCAD 5306	MANAGERIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	3
HCAD 5316	HEALTH CARE FINANCE	3
HCAD 5310	HEALTH CARE LAW	3

HCAD 5380	HEALTH CARE DATA ANALYTICS	3
HCAD 5390	STRATEGIC MANAGEMENT FOR HEALTH CARE ORGANIZATIONS	3
HCAD 5399	GRADUATE HEALTH CARE ADMINISTRATION INTERNSHIP	3
Total Hours		**45**

Together these courses provide the student with a general background in business and economics and industry relevant knowledge in all of the fundamental areas of managing health care organizations.

Program Completion

INTERNSHIP

The completion of an internship is a primary component of the program for students who do not have prior appropriate professional work experience in a health-related organization. The internship provides students the opportunity to acquire firsthand professional knowledge of and experience with the functioning of a health-related organization. The working internship requires the completion of 240 hours of approved work experience in a professional capacity and a final written report, related to the student's internship exposure, supervised by a member of the faculty of the degree program. The MS HCAD Advisor will provide overall supervision and coordination of the internship.

RESIDENCE/INTERNSHIP SUBSTITUTE

A student who has substantial and acceptable work experience in a supervisory or professional position may qualify for the internship substitute. Work experience is approved by the MS HCAD Advisor. Accordingly, a student may request to complete either of the following options.

1. Design, conduct and complete a supervised research project, an effort equivalent in scope to three (3) hours of graduate research-oriented courses, that is highly relevant to the student's intended future professional focus in lieu of a working internship; the project will be supervised by at least one member of the faculty of the degree program.
2. Complete an approved graduate course with significant research content highly relevant for the student's intended future professional field of specialty.

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- MANA 3318 MANAGING ORGANIZATIONAL BEHAVIOR
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MBA, students must complete the following graduate courses:

- OPMA 5361 OPERATIONS MANAGEMENT
- MANA 5360 LEADERSHIP AND TEAMS or MARK 5311 MARKETING
- A graduate elective chosen approved by advisor.

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete non-elective requirements for BBA/BS including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS	
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	
MANA 3318	MANAGING ORGANIZATIONAL BEHAVIOR	
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	
or BSTAT 3322	ADVANCED STATISTICS FOR BUSINESS ANALYTICS	
Complete elective requirements for BBA/BS including the following, which also count toward the MBA:		24
OPMA 5361	OPERATIONS MANAGEMENT	
MANA 5360	LEADERSHIP AND TEAMS	
or MARK 5311	MARKETING	
A graduate elective approved by advisor.

Post-Baccalaureate Certificate in Healthcare Administration

About This Program

The Post-Baccalaureate Certificate in Healthcare Administration offers students diverse topics in the curriculum, research and residences to provide:

- An understanding of the modern health industry
- Knowledge, skills and abilities to assume administrative roles in various organizations in the health industry
- Opportunities to develop leadership skills
- Interactions with diverse specialists in the health industry to evaluate and resolve administrative problems

The certificate requires a total of nine semester credit hours of coursework, which can be completed in conjunction with an existing Master's or PhD degree in any field or independently as a special student.

Competencies

1. Analytical Thinking: Upon the completion of this program, the student will develop a deeper understanding of a situation, issue, or problem by breaking it down or tracing its implications step-by-step. It includes organizing the parts of a situation, issue, or problem systematically; making systematic comparisons of different features or aspects; setting priorities on a rational basis; and identifying time sequences, causal relationships, or if-then relationships.
2. Communication Skills 2 (Speaking & Facilitating): Upon the completion of this program, the student will develop the ability to use spoken communications in formal and informal situations to convey meaning, build shared understanding, and productively move agendas forward.
3. Performance Measurement: Upon the completion of this program, the student will develop the ability to understand and use statistical and financial metrics and methods to set goals and measure clinical as well as organizational performance; commits to and deploys evidence-based techniques.
4. Change Leadership:Upon the completion of this program, the student will develop the ability to energize stakeholders and sustain their commitment to changes in approaches, processes, and strategies.
5. Strategic Orientation: Upon the completion of this program, the student will develop the ability to consider the business, demographic, ethno-cultural, political, and regulatory implications of decisions and develop strategies that continually improve the long-term success and viability of the organization.

Admissions Criteria

The certificate program is available to any student who has been admitted into graduate studies at UT Arlington. The student should contact the Graduate Advisor to declare the intent to earn the certificate before enrolling in courses to satisfy certificate requirements.

CHANGE OF PROGRAM TO THE MS HEALTH CARE ADMINISTRATION

A student in the Certificate Program must apply for a change of program and meet all admission requirements to enter the MS Health Care Administration.

Curriculum

Foundations		
HCAD 5301	HEALTH CARE ADMINISTRATION I	3
Specialization		

Select three from the following:		9
HCAD 5305	FINANCIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	
HCAD 5306	MANAGERIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	
HCAD 5310	HEALTH CARE LAW	
HCAD 5315	STATISTICAL METHODS FOR HEALTH CARE ADMINISTRATORS	
HCAD 5316	HEALTH CARE FINANCE	
HCAD 5330	SERVICE MARKETING MANAGEMENT	
HCAD 5333	ECONOMICS OF HEALTH	
HCAD 5337	ETHICS, LEADERSHIP, AND TEAMWORK	
HCAD 5340	HEALTH CARE STRATEGIC HUMAN CAPITAL	
HCAD 5350	HEALTH CARE INFORMATION SYSTEMS	
HCAD 5377	HEALTH CARE QUALITY ASSESSMENT	
HCAD 5380	HEALTH CARE DATA ANALYTICS	
HCAD 5390	STRATEGIC MANAGEMENT FOR HEALTH CARE ORGANIZATIONS	
Total Hours		**12**

Program Completion

To receive the certificate, all courses must be completed at UT-Arlington. The cumulative grade point average must be 3.0 or higher.

Post-Master's Certificate in Graduate Advanced Studies

About This Program

The Graduate Advanced Studies (Professional Development) Certificate Program offered by the College of Business is a business post-master's level non-degree program of study designed to meet the changing educational needs of managers, entrepreneurs, or executives.

This is an excellent way to update an MBA or other graduate-level business degree and to prepare for future management or executive-level positions. Candidates for this certificate program may register for a wide variety of excellent courses conveniently offered on weekday evenings and/or Saturdays.

While some candidates may complete their courses in as little as two semesters, others may spread their courses over a 3-year maximum time period.

Competencies

1. Upon completion, students will demonstrate advanced business knowledge and skills in the selected areas of study, appropriate to graduate-level academic and/or professional standards.
2. Upon completion, students will be able to apply specialized knowledge to analyze complex problems or scenarios relevant to the student’s chosen business field.
3. Upon completion, students will critically evaluate professional practices related to the business topics studied, demonstrating intellectual engagement and analytical thinking.

Admissions Criteria

This is a certificate program open to those holding a graduate degree in a business field. Applicants must meet normal MBA admission requirements and complete 12 - 21 semester hours of graduate courses in a specified area.

Curriculum

This broad array of classes is designed to sharpen the candidate's strategic awareness in their industry of choice. Managers or functional specialists completing 4 - 7 courses in one area of study may be awarded a professional development certificate for that area.

Advanced Studies	
Select 4 - 7 courses numbered 5000 or higher in one of the following areas:	12-21
Accounting (ACCT)	
Economics (ECON)	
Finance (FINA)	
Healthcare Administration (HCAD)	
Information Systems (INSY)	
Management (MANA)	
Marketing (MARK)	
Production and Operations Management (OPMA)	
Real Estate (REAE)	

Program Completion

To receive the certificate, all courses must be completed at UT Arlington. The cumulative grade point average must be 3.0 or higher.

Minor in Business Administration

About This Program

The Minor in Business Administration provides undergraduate students with a broad based introduction to fundamental business principles while allowing advanced study in particular areas of business interest.

Competencies

1. Upon completion, students will gain a basic understanding of business across disciplines.
2. Upon completion, students will demonstrate basic knowledge in specialized areas of business.
3. Upon completion, students will have business skills that may be translated to various industries as a complement to their major field of study.

Curriculum

Business Administration Foundations		
Select three of the following:		9
ACCT 2301	PRINCIPLES OF ACCOUNTING I	
ACCT 2302	PRINCIPLES OF ACCOUNTING II [1]	
BSTAT 2305	INTRODUCTORY STATISTICS FOR BUSINESS ANALYTICS	
ECON 2305	PRINCIPLES OF MACROECONOMICS	
ECON 2306	PRINCIPLES OF MICROECONOMICS	
FINA 2330	MONEY, FINANCE AND THE MODERN CONSUMER	
INSY 2303	INTRODUCTION TO M.I.S. AND DATA PROCESSING	
MANA 1301	BUSINESS IN A GLOBAL ENVIRONMENT	
MANA 2302	COMMUNICATIONS IN ORGANIZATIONS	
Specialization		
Select 9 hours in courses numbered 33xx or 43xx from one or more of the following areas: [1]		9
ACCT, BANA, BCOM, BLAW, BSTAT, BUSA, ECON, FINA, INSU, INSY, MANA, MARK, OPMA, REAE		
Total Hours		**18**

[1] Prerequisites must be met before enrollment. A student should consider prerequisites, identified in the catalog, when selecting courses to satisfy the minor requirement.

ACCT 3309 ACCOUNTING FOR MANAGERS may not be used to satisfy any minor requirement.

Program Completion

The College of Business:

- Requires half of the coursework for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

Advising Resource

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Economics

Department Overview

Economics examines how individuals, businesses, and societies interact. By studying economics, you can gain a better understanding of the costs and benefits of a course of action and thus make informed decisions. Decision-making skills are necessary in multiple areas of the economy including the government and business workplaces.

Economics teaches you to think critically and to solve problems, skills that are highly valued in the workplace. You learn not only how to find data, but how to work with that data and then logically explain insights gained from the analyses. Current research interests of economics faculty include topics

in technology, telecommunications, behavioral economics, forecasting, environment, labor, health, international trade, and international finance. The diverse skills and interests of the economics faculty will provide opportunities for learning and growth to the student in our modern economy.

COURSES

ECON 2110. SELECTED TOPICS IN ECONOMICS. 1 Hour.
Topics of current interest in economics. The subject title is to be listed in the class schedule. May be repeated for credit when the topic changes. Prerequisite: ECON 2305 or ECON 2306.

ECON 2305. PRINCIPLES OF MACROECONOMICS. 3 Hours. (TCCN = ECON 2301)
(ECON 2301). Elementary models of the macroeconomy. Measures of aggregate economic activity and unemployment and inflation, money and banking, monetary and fiscal policy, international trade and payments, and applications of theory to society's problems.

ECON 2306. PRINCIPLES OF MICROECONOMICS. 3 Hours. (TCCN = ECON 2302)
(ECON 2302) The science of choice; develops demand, supply, and the market mechanism for allocating society's scarce resources; analyzes the impact of different industry structures in the market; applies the tools of microeconomic analysis to various topics such as price controls and international trade.

ECON 2337. ECONOMICS OF SOCIAL ISSUES. 3 Hours.
Economic analysis and application of basic economic principles to a variety of social issues and topics. Students will become familiar with the U.S. economy, its structure, and how economics applies to an assortment of public policy topics such as crime, energy, immigration, drug use, prostitution, minimum wage, our aging population, healthcare, gender driven wages, recycling, and the macro economy, to name a few. In addition, current economic issues and events may be incorporated into the course via lecture and/or class discussions. This is a non-technical course which satisfies the core requirement for social and behavioral studies. Will not serve to meet degree requirements for College of Business Administration majors. Offered as ECON 2337 and AAST 2337; credit will be granted in only one department.

ECON 3301. THE ECONOMICS OF HEALTH. 3 Hours.
Applies economic analysis to the health sector; examines issues involving health insurance and how these issues have been addressed by the market and by the government; role of market structure in health care markets such as the hospital and pharmaceutical industries; compares the U.S. health care system to health care systems in other countries. Prerequisite: ECON 2306.

ECON 3302. THE ECONOMICS OF CRIME. 3 Hours.
Economic analysis of criminal activity and its impact on the allocation of scarce resources; economic models of criminal behavior, optimum allocation of criminal justice resources, public and private sector approaches to deterrence, and current issues such as gun control and drug abuse prevention. Prerequisite: ECON 2306.

ECON 3303. MONEY AND BANKING. 3 Hours.
Monetary and banking systems of the United States, including the roles that money and interest rates play in the economy, the functions and organization of financial markets, financial institutions, central banks, operations of monetary policy, recent developments in the financial industry and the response of monetary authority. Prerequisite: ECON 2305.

ECON 3304. PUBLIC SECTOR ECONOMICS. 3 Hours.
Examines various economic reasons that may justify government involvement in the economy with particular focus on the problems inherent in government intervention. It considers topics such as the efficiency and fairness of alternative taxing systems, the growth and effects of government debt, and public choice (how spending and taxing decisions are made). It analyzes various government programs such as Social Security, health care, expenditure programs for the poor, etc. Prerequisite: ECON 2306.

ECON 3305. LAWS AND ECONOMICS. 3 Hours.
A review of the economic effects of laws and legal institutions, including property rights, the common law of contracts and torts, regulations, and crime and punishment. Prerequisite: ECON 2306.

ECON 3306. SPORTS ECONOMICS AND BUSINESS. 3 Hours.
Economic principles applied to the analysis of professional and amateur sports. Topics include fan demand, team output decisions, league/conference organization, the societal costs and benefits of government financing of sports facilities, player value, and collective bargaining. The course is designed for both business and economics majors. Prerequisite: ECON 2306.

ECON 3310. MICROECONOMICS. 3 Hours.
Develops the theory of consumer and firm behavior using tools of marginal analysis. Students learn motivations behind consumer behavior (utility maximization) and firm behavior (profit maximization). This includes the features of competitive equilibrium, price discrimination, and imperfect competition models. Prerequisite: ECON 2306 and 60 credit hours.

ECON 3312. MACROECONOMICS. 3 Hours.
Aggregate economic performance, including economic growth and business cycles. Models and real data will be used. Interactions among private sector behavior, government policies, central bank actions and international events, and their effects on GDP, employment, growth, and prices will be studied. Prerequisite: ECON 2305, ECON 3303, and 60 credit hours.

ECON 3313. INDUSTRIAL ORGANIZATION AND PUBLIC POLICY. 3 Hours.
Explains market structure and its relation to strategic behavior, advertising, pricing and product differentiation decisions. Further topics include the organization of the firm, takeovers, mergers and acquisitions, research and development, and the various regulatory controls placed on firms and industries. Prerequisite: ECON 2306.

ECON 3317. ECONOMIC DATA LITERACY & VISUALIZATION. 3 Hours.
Students learn how to answer questions with real-world data by exploring the connections between variables visually. Data visualization software is used to perform analysis and present results in a clear and concise manner. Emphasis is placed on best practices in data visualization, applications, and hands-on data analysis. Prerequisite: BSTAT 2305.

ECON 3318. ECONOMIC DATA ANALYSIS. 3 Hours.
Students learn how to answer questions with real-world data by exploring the connections between variables. Programs are used to perform analysis and present results in a clear and concise manner. Emphasis is placed on applications and hands-on data analysis. Prerequisite: BSTAT 3321 or permission of instructor.

ECON 3322. BITCOIN AND ECONOMICS OF CRYPTOCURRENCIES. 3 Hours.
Bitcoin (BTC) is a digital asset with unique characteristics that spawned an industry of similar assets called cryptocurrencies. The course examines the evolution of digital money in the historical context of the U.S. financial system. Students will examine cryptocurrencies, with a focus on BTC, as a vehicle for wealth storage and as a transactions asset (money). The course will cover valuation of cryptocurrencies compared to other assets in the context of asset pricing theory at an introductory level. Prerequisite: ECON 2306.

ECON 3328. PRINCIPLES OF TRANSPORTATION. 3 Hours.
The application of microeconomic and statistical tools in the analysis of the various modes of transportation. Topics for discussion include transportation as a derived demand, regulation of transportation, mass transit, and international issues in transportation. Prerequisite: ECON 2306.

ECON 3335. ECONOMICS OF PUBLIC POLICIES. 3 Hours.
Applies the principles of microeconomics to a wide range of public policy topics, including education, energy, health care, immigration, drugs, crime, recycling, risk and safety, Social Security, sports stadiums, tax policy, and topics on the economics of the family. Prerequisite: ECON 2306.

ECON 3388. EUROPEAN ECONOMIC HISTORY, 1750 TO PRESENT. 3 Hours.
An economic analysis of historical events leading up to and following the Industrial Revolution, large-scale industry, early banking, commerce, Utopian movements, war, postwar economic integration and the continuing debate over economic globalization. Prerequisite: ECON 2305.

ECON 4191. STUDIES IN ECONOMICS. 1 Hour.
Advanced studies, on an individual basis, in the various fields of economics. Prerequisite: ECON 2306 and 90 credit hours and departmental permission.

ECON 4291. STUDIES IN ECONOMICS. 2 Hours.
Advanced studies, on an individual basis, in the various fields of economics. Prerequisite: ECON 2306 and 90 credit hours and departmental permission.

ECON 4300. ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS. 3 Hours.
The course includes the creation of documents that can include financial formulas and economic forecasting, industry-specific reports, and presentations incorporating the results of a financial or economic theory and corresponding research. The course will use a variety of learning methods including lecture, class discussion, case analysis and presentation, guest speakers, and written exercises. This course is required to be eligible to sit for the Certified Business Economic (CBE) Exam. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: BCOM 3360.

ECON 4302. ENVIRONMENTAL ECONOMICS. 3 Hours.
Economic forces that influence the quality of the environment; economic theory and environmental management; regulatory requirements for economic impact analysis; international issues including trade and implications for Third World economies. Prerequisite: ECON 2306.

ECON 4305. THE ECONOMICS OF DISCRIMINATION. 3 Hours.
Course reviews the economic theory of discrimination that arises from personal preference and social forces, that is revealed in numerous market situations. Empirical evidence of the impact on employment, careers, purchasing, business practice, and economic outcomes are studied. Students will prepare presentations on the topic. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: ECON 2306.

ECON 4306. COMPARATIVE ECONOMIC SYSTEMS. 3 Hours.
Studies how differing economies are organized with respect to market, command, and traditional institutions. Several empirical economies are evaluated and compared with respect to performance and efficiency. Each economy is placed within its unique historical and social context to explore why certain institutions work in one situation but may fail in others. Prerequisite: ECON 2306.

ECON 4311. MANAGERIAL ECONOMICS. 3 Hours.
Applies Economic Optimization as the fundamental methodology to guide decisions at the firm level. Microeconomic Theory provides the foundation for decision making and strategy. Topics include investment decisions, pricing, price discrimination, strategy, bargaining, uncertainty, moral hazard and adverse selection, and incentive structures for employees and for units of the firm. The class is real-world-oriented exploring actual decisions of firms. Prerequisite: ECON 2306 and 60 credit hours.

ECON 4316. DIGITIZATION, ECONOMICS AND STRATEGY. 3 Hours.
Economics and strategy applied to emerging online markets: the gig economy (e.g., Airbnb, Uber, Slashdot), digital entertainment (e.g., Spotify, Netflix, Hulu), and video gaming (e.g., World of Warcraft, Play Store, Twitch). Economic concepts covered will include platforms, pricing, product positioning, product bundling, social networks, and collaboration. Explores how various IT innovations have disrupted business models and the strategic implications of future innovations. Prerequisite: ECON 2306 or Consent of the instructor.

ECON 4318. ECONOMIC REGRESSION ANALYSIS CAPSTONE. 3 Hours.
The course builds on data analysis techniques learned in ECON 3318. Students explore the difference between correlation and causation and learn how to use advanced techniques to analyze causal relationships between variables. Students display their mastery of analysis through a capstone project and present their findings in a professional manner. Prerequisite: ECON 3318 or consent of instructor.

ECON 4319. ECONOMIC GROWTH AND DEVELOPMENT. 3 Hours.
The issues underlying vast differences in development among the nations of the world. Course covers the elements of theories of growth, the role of international trade, and issues of institutional structures related to economic progress in a nation. Prerequisite: ECON 2306.

ECON 4320. GAMES AND DECISION MAKING. 3 Hours.
Game theory studies the strategic interactions between two or more parties. These interactions are common in business, law, politics, and sports. Examples include analysis of "games" in the real world such as competition among firms, complex business decisions, and political campaigns. This course starts with the basics of game theory (such as Nash equilibrium and dominant strategies) and moves to more complicated games such as repeated and stochastic games, and auctions. The course includes in-class demonstrations, hands-on experiments, and real-world examples. Students will think analytically and frame strategic interactions by accessing the incentives of those involved through the tools discussed. Prerequisite: ECON 2306.

ECON 4321. INTERNATIONAL TRADE. 3 Hours.
The course provides an understanding of international trade (international movement of goods and services), migration (international movement of labor), and investment (cross-border movement of assets) theories. It is designed to better understand the implications of such theories as they relate to international business management. It helps managers deal with the opportunities and challenges created by the global environment. Prerequisite: ECON 2306.

ECON 4322. INTERNATIONAL FINANCE. 3 Hours.
The nature and instruments of international payments. International financial institutions and arrangements. Exchange rate, balance of payment, and income determination theories. Prerequisite: ECON 2305.

ECON 4323. MATHEMATICAL ECONOMICS. 3 Hours.
This course focuses on applying mathematical concepts to solve economic and business problems. Course will upgrade mathematical skills for graduate work in economics and business. The emphasis is on calculus and linear algebra and their economic applications. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: MATH 1315 or MATH 1316 and ECON 3310 and ECON 3312.

ECON 4324. MONETARY AND FISCAL POLICY. 3 Hours.
The effects of money on production and national income; quantity and commodity theories of money; various theories of interest rates; instruments and policies of Federal Reserve monetary action; proposals for monetary reform. Central bank systems. Prerequisite: ECON 2306 and ECON 3303 and 60 credit hours.

ECON 4325. ECONOMIC FORECASTING. 3 Hours.
The class presents methods that allow users to capture movement in data related to seasonality, trend and cycles to produce forecasts for economic date. Students are exposed to practical coding applications in software including R. Prerequisites: ECON 3318 or equivalent.

ECON 4330. HUMAN RESOURCE ECONOMICS. 3 Hours.
Application of economic principles to labor topics such as the demand for marriage, the demand for children, the economics of beauty, the economics of highly paid sports and entertainment stars, the effects of immigration on U.S. wages and employment, workplace discrimination, the effects of affirmative action policies, and the effects of minimum wage legislation. Prerequisite: ECON 2306.

ECON 4331. SEMINAR IN ECONOMICS. 3 Hours.
Readings and discussions of special topics in economics. Prerequisite: 60 or 90 credit hours and consent of instructor. May be repeated for credit with consent of department chair.

ECON 4391. STUDIES IN ECONOMICS. 3 Hours.
Advanced studies, on an individual basis, in the various fields of economics. Prerequisite: ECON 2306 and 90 credit hours and departmental permission.

ECON 4393. ECONOMICS INTERNSHIP. 3 Hours.
Practical training in economics. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

ECON 5182. INDEPENDENT STUDIES IN ECONOMICS. 1 Hour.
Extensive analysis of an economic topic. Prerequisite: Departmental Permission Required.

ECON 5199. GRADUATE ECONOMICS INTERNSHIP. 1 Hour.
Practical training in economics. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

ECON 5282. INDEPENDENT STUDIES IN ECONOMICS. 2 Hours.
Extensive analysis of an economic topic. Prerequisite: Departmental Permission Required.

ECON 5299. GRADUATE ECONOMICS INTERNSHIP. 2 Hours.
Practical training in economics. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

ECON 5300. ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS. 3 Hours.
This course focuses on developing industry-specific acumen necessary to work in the fields of economics, finance, marketing, management, and information systems. The course includes the creation of documents that can include financial formulas and economic forecasting, industry-specific reports, and presentations incorporating the results of a financial or economic theory and corresponding research. The course will use a variety of learning methods including lecture, class discussion, case analysis and presentation, guest speakers, and written exercises. This course is required to be eligible to sit for the Certified Business Economic (CBE) Exam.

ECON 5301. MATHEMATICAL ECONOMICS. 3 Hours.
Course is designed to upgrade mathematical skills for graduate work in economics and business. The emphasis is on calculus and linear algebra and their applications in economic analysis. Mathematical tools covered include optimization, comparative-statics analysis, and simple dynamic analysis. Prerequisite: MATH 1316 or other calculus course.

ECON 5305. THE ECONOMICS OF DISCRIMINATION. 3 Hours.
Course reviews the economic theory of discrimination that arises from personal preference and social forces, that is revealed in numerous market situations. Empirical evidence of the impact on employment, careers, purchasing, business practice, and economic outcomes is studied. Students will prepare presentations on the topic. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: Graduate student standing regardless of major.

ECON 5306. ENVIRONMENTAL ECONOMICS. 3 Hours.
An examination of the development of laws and policies that concern the environment followed by an application of economic analysis for environmental issues such as water use, air pollution, land controls, public lands, and global environmentalism. Other topics include: property rights, theories of regulation, and enviropreneurship. Participants will produce and present a case study on an environmental economic subject of interest.

ECON 5310. MICROECONOMIC THEORY. 3 Hours.
Development of marginal analysis and game theory tools in economics; focus on the analysis of consumer choice and decision making by firms; development of competitive model and various deviations from competition including the exercise of market power, externalities, and information asymmetries. Prerequisite: ECON 3310.

ECON 5311. ECONOMIC ANALYSIS. 3 Hours.
Provides an overview of microeconomic foundations of economic analysis with a focus on business applications. Topics include supply and demand, marginal analysis, pricing issues, and theory of the firm. An overview of macroeconomics is also provided, covering monetary and fiscal policy, inflation, growth, and international trade. Non-credit for MS in Economics.

ECON 5312. MACROECONOMIC THEORY. 3 Hours.
Study of contemporary macroeconomic theory and applications, including stylized facts of macroeconomics, the general framework for macroeconomic analysis, the analysis of modern macroeconomic models, and the long-run economic growth. Prerequisite: ECON 3312.

ECON 5313. DECISIONS AND STRATEGY. 3 Hours.
Decision analysis applied to pricing, hiring, investing, and partnering. Analyze conditions needed to create competitive advantage. Applications to decisions regarding: entering markets, launching products, developing informational advantages, establishing contractual and non-contractual relationships, and managing incentives within the organization.

ECON 5314. ECONOMIC ANALYSIS FOR BUSINESS DECISIONS. 3 Hours.
This course demonstrates how microeconomic theory can be used in business decision-making. Analytical tools are developed to study competitive analysis, strategic position and dynamics, internal organization of the firm, and the firm's strategic position in the supply chain. Through the use of real business information, the class provides an understanding of how to link economic theory with practice. Students will engage in empirical analysis. Prerequisite: ECON 5336 or BSAD 6317 concurrent.

ECON 5315. COMPETITION, INNOVATION, AND STRATEGY. 3 Hours.
Based on economic analysis, students develop the skills to assess the competitive landscape and identify appropriate strategic responses. Applications include: Strategic Pricing, Product Positioning, Project Selection, Entry/Exit, R&D Investments, Organizational Structure, and Supply Chain Incentives. Prerequisite: ECON 3310 or equivalent.

ECON 5316. DIGITAL BUSINESS TRANSFORMATION. 3 Hours.
Economics and strategy applied to emerging online markets: the gig economy (e.g., Airbnb, Uber, Slashdot), digital entertainment (e.g., Spotify, Netflix, Hulu), and video gaming (e.g., World of Warcraft, Play Store, Twitch). Economic concepts covered will include platforms, pricing, product positioning, social media, collaboration. Explores how various aspects of IT has transformed previous business models and how future developments could transform it further. Prerequisite: ECON 5313 or ECON 5314 or ECON 3310 or Consent of the instructor.

ECON 5317. DATA VISUALIZATION. 3 Hours.
Students learn how to answer questions with real-world data by exploring the connections between variables visually. Data visualization software is used to perform analysis and present results in a clear and concise manner. Emphasis is placed on best practices in data visualization, applications, and hands-on data analysis. Prerequisite: Graduate student standing.

ECON 5318. ECONOMICS OF SPORTS. 3 Hours.
Economic principles applied to the analysis of professional and amateur sports. Topics include fan demand, team output decisions, league/conference organization, the societal costs and benefits of government financing of sports facilities, player value, and collective bargaining. The course is designed for both business and economics majors. Prerequisite: ECON 5311 or equivalent.

ECON 5319. INTERNATIONAL TRADE AND INVESTMENT. 3 Hours.
The course provides an understanding of international trade, direct investment, and migration theories and policies pertaining to the movement of goods, services, assets, and labor across borders. It focuses on the implications of such theories and policies related to household welfare and international business management. It aims to provide a working knowledge of tools to help managers better navigate the opportunities and challenges in the global business environment. Prerequisite: ECON 5313 or ECON 5314 or ECON 3310 or consent of the instructor.

ECON 5321. GLOBAL BUSINESS ANALYTICS. 3 Hours.
This course provides a working knowledge of tools that influence the decisions multinational firms make in the global environment. It is designed to understand the implications of international trade, investment, and institutional theories as they relate to international business management. It focuses on how to test the implications of theories using global data sets. Participants will complete an empirical research project and present their findings. Prerequisite: ECON 5336 or BSAD 6317, or consent of the instructor.

ECON 5325. TRANSFER PRICING. 3 Hours.
Course concerns the theory, practice, strategy and taxation of intra-firm trade among affiliated entities of a multinational enterprise (MNE). Transfer pricing is important for maximizing profits, monitoring performance of segments of an MNE, establishing control over cash and income flows, advancing strategic objectives, and reducing overall corporate tax burden. Issues arise in accounting, economics, taxation, and law.

ECON 5327. MONETARY POLICY AND FINANCIAL SYSTEM ANALYSIS. 3 Hours.
This course reviews the link between financial systems, monetary policy, and the macro economy, with an emphasis on the role that financial markets and institutions play in the domestic and global business environment. Contemporary policy issues are considered and we study how monetary policy actions affect financial markets and institutions. Students will engage in empirical applications using actual data and simulation exercises. Prerequisite: ECON 5336 or BSAD 6317 concurrent.

ECON 5329. RESEARCH METHODS IN APPLIED ECONOMICS. 3 Hours.
Each student presents a replication of a published article that uses methods from Econometrics I/II, Forecasting, Forecasting and/or Time Series. The instructor will present replications of several published papers and assist students in choosing studies that they will attempt to replicate. Class meetings will focus on answering specific questions that arise as students carry out their replication exercises. The course concludes with student presentations, along with submission of a written report summarizing the replication effort and detailing the extent to which published results were replicable. The goal is to develop the skills to write quality papers using a variety of statistical techniques. Prerequisite: ECON 5336 or BSAD 6317.

ECON 5330. HUMAN RESOURCE ECONOMICS. 3 Hours.
This course studies labor supply decisions made by households, labor demand decisions made by firms, and the equilibrium wage differences that result from these decisions. Other topics include unemployment, human capital investments, efficiency wages and other incentive schemes, inequality, labor mobility and migration, and discrimination. Prerequisites: ECON 5311 or equivalent.

ECON 5331. PROJECT EVALUATION AND FEASIBILITY ANALYSIS. 3 Hours.
This course introduces feasibility analysis including demand/market evaluation, cost estimation, and benefit-cost analysis. Students gain the ability to apply economic analysis methods (present worth, annual cost, rate of return, benefit-cost ratios, and breakeven) to basic economic problems. Other issues include depreciation; risk and uncertainty; sensitivity analysis; and global economic factors that impact the economy and project funding. Students will perform an empirical evaluation of project feasibility using cost-benefit tools. Prerequisite: ECON 5314 or consent of instructor.

ECON 5332. GOVERNMENT, TAXES, AND BUSINESS STRATEGY. 3 Hours.
The interaction between government and business is broad. Effective business leadership requires the ability to analyze and respond to public policy. Economics provides a framework for understanding the incentives of consumers, businesses, bureaucrats, and civil servants in different policy environments and predicting their behavior in response to policy changes. This course focuses primarily on tax policy at the federal, state and local levels, including issues in corporate taxation, personal income tax, treatment of capital gains and loses, tax incidence, work-leisure choices, fiscal competition among state and local governments, capital flight, and fiscal federalism. Prerequisite: Graduate Standing.

ECON 5333. ECONOMICS OF HEALTH. 3 Hours.
Economic analysis applied to current health policy issues, including health expenditures, public and private insurance, incentives, provider education and labor markets, hospitals, prescription drugs, malpractice, long-term care, the Internet. and various proposals for reform.

ECON 5336. APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I. 3 Hours.
Develops an understanding of statistical and econometric techniques. Participants exploit real data and computational power to uncover patterns/trends and examine relationships. Focus on conceptual frameworks and the application of techniques to data sets in various fields. Participants learn to use statistical packages such as R and SAS to apply the tools to real data and will complete an empirical analysis paper. Prerequisite: Graduate standing.

ECON 5337. BUSINESS & ECONOMIC FORECASTING. 3 Hours.
The course analyzes univariate and multivariate methods that allow users to capture patterns in data related to seasonality, trend and other random components to produce forecasts that are useful in virtually any business environment. Participants gain practical experience coding in relevant software. By the end of the course, students will be able to use statistical tools to critically assess the usefulness of alternative methods, which range from simple exponential smoothing to those that use machine learning. Prerequisite: ECON 5336 or BSAD 6317 or BSTAT 5325 or consent of instructor.

ECON 5338. APPLIED TIME SERIES. 3 Hours.
Covers topics of time series data analysis popularly used in many fields, including economics and business. Begins with univariate analysis of time series data with the focus on ARIMA, GARCH model, and unit-root tests, and extends to multivariate analysis of distributed lag model, VAR, and cointegration tests. The last part of the course is devoted to discussion of popular nonlinear dynamic models, such as TAR and structural breaks, before moving on to dynamic panel data models. Since emphasis is put on empirical applications, students will spend time in the computer lab to apply the techniques they learn to a variety of time series data. Students will undertake empirical analysis using statistical software. Prerequisite: ECON 5336 or BSAD 6317.

ECON 5339. APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS II. 3 Hours.
The course covers cross-section, panel data, and limited dependent variables methods. Topics may include analysis of natural experiments/differences-in-differences, panel data methods, instrumental variable estimation, simultaneous equation models, sample selection corrections, and limited dependent variable and hierarchical models. Participants learn how to use statistical packages such as R, SAS, and STATA to apply these methods to data to examine causal relationships. They build an understanding of appropriate methods for different research design. Participants will complete an empirical research paper. Prerequisite: BSTAT 5325 or ECON 5336 or BSAD 6317 or the consent of the instructor.

ECON 5341. ADVANCED BUSINESS AND ECONOMIC DATA ANALYTICS. 3 Hours.
Students use advanced modeling and estimation techniques applied to large data sets collected by both business and government. The course includes assignments designed to give practical experience at applying the advanced statistical methods, culminating in a final project that includes a written report and class presentation. Projects will exploit data from various sources, such as sales transactions, individual health records, Internet search results, Twitter feeds, and environmental data. The advanced techniques covered may include data mining, statistical visualization, computational statistics, and other computer-intensive statistical methods. Prerequisite: ECON 5336 and ECON 5339; or BSAD 6317 and BSAD 6318.

ECON 5343. CAUSAL INFERENCE FOR BUSINESS DECISIONS. 3 Hours.
Students learn methods to identify and measure the outcomes of business decisions. In particular, students will learn various issues pertaining to the miss-attribution of causal effects. The course surveys multiple methods to overcome the misidentification problem. Students will engage in empirical analysis. Prerequisites: ECON 5336 or BSAD 6317 and ECON 5339 or BSAD 6318.

ECON 5382. INDEPENDENT STUDIES IN ECONOMICS. 3 Hours.
Extensive analysis of an economic topic. Prerequisite: Departmental Permission Required.

ECON 5391. SPECIAL TOPICS IN ECONOMICS. 3 Hours.
In-depth study of selected topics in economics. May be repeated when topics vary. Prerequisite: Departmental Permission Required.

ECON 5398. THESIS. 3 Hours.
Graded R/F only. Prerequisite: Permission of Graduate Advisor in Economics.

ECON 5399. GRADUATE ECONOMICS INTERNSHIP. 3 Hours.
Practical training in economics. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

ECON 5698. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: Permission of Graduate Advisor in Economics.

ECON 5998. THESIS. 9 Hours.
Graded P/F/R. Prerequisite: Permission of Graduate Advisor in Economics.

ECON 6310. ADVANCED MICROECONOMIC THEORY. 3 Hours.
Investigates the advanced neoclassical theory of microeconomics. The course develops formal models of consumer behavior, market structure, general equilibrium, and welfare. The objective of the course is to acquaint students with the analytical tools necessary to evaluate the formal literature in economics and to conduct scientific, hypothesis- driven statistical studies. Prerequisites: ECON 5301 and ECON 5310.

ECON 6312. ADVANCED MACROECONOMIC THEORY. 3 Hours.
Topics include dynamic general equilibrium analysis of model economies, monetary theory in overlapping generations models, advanced growth theory, and new open-economy macroeconomics. Prerequisites: ECON 5301 and ECON 5312.

Economics - Graduate Programs

Programs

MASTER'S DEGREE

- Economic Data Analytics MS (p. 331)

FAST TRACK

- BBA/BS to Economic Data Analytic MS Fast Track (p. 332)

Master of Science in Economic Data Analytics

About This Program

The Master of Science in Economic Data Analytics equips students to perform quantitative analysis based on economic logic. It emphasizes development of relevant economic theory and empirical tools needed by successful analysts.

Competencies

1. Economics students will demonstrate knowledge of how to apply economic theory to make business decisions.
2. Economics students will demonstrate a working knowledge of Econometrics, including the ability to interpret, critique, and estimate empirical models of economic behavior.
3. Economics students will demonstrate an ability to capture, cleanse, and analyze data for making business decisions.

Admissions Criteria

The Economics Graduate Advisor reviews all applications and determines if they qualify for unconditional admission. Applicants who do not satisfy the conditions for admission are referred to the Economics Admissions Committee for consideration.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures (p. 26) in the Catalog.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Economics Admissions Committee if they meet one of the following conditions.

- Applicant has a bachelor's degree from an accredited college or university in a related or sufficiently quantitative field with a minimum GPA of 3.0 in the last 60 hours of undergraduate work
- Applicant has a bachelor’s degree from an accredited college or university in a related or sufficiently quantitative field and scores at the 60th percentile or higher on the quantitative section of the GRE or GMAT.
- Applicant has a graduate degree from an accredited college or university in a related or sufficiently quantitative field with a minimum GPA of 3.0. Examples of quantitative fields are economics, data science, finance, marketing, business, and sociology. Examples of sufficiently quantitative fields are mathematics, statistics, physics, computer science, actuarial science, and engineering.

ADMISSION WITH COMMITTEE REVIEW

The Economics Admissions Committee will grant Unconditional Admission, Probationary Admission, Deferred Admission, or Deny Admission on the basis of holistic evaluation of the following factors. Weakness in some factors can be offset by strengths in other factors, and no single factor will be the sole criterion determining admissibility.

- Undergraduate and graduate record (number of quantitative course taken and grades earned in those courses, overall GPA, and GPA for the last 60 hours) and program accreditation status of the applicant's degree-granting institution.
  - Ideally, an applicant will have taken at least 5 quantitative courses, which could include statistics, data analysis, calculus, or other math-intensive courses.
- Score on the quantitative section of the GMAT/GRE, if taken.
- Professional work experience.
- Personal statement provided by the applicant addressing reasons for pursuing a graduate degree in Economic Data Analytics and reasons for any GPA deficiencies in previous undergraduate or graduate coursework.
- Letters of recommendation from individuals who can evaluate the applicant’s academic potential and readiness for graduate study in economics.

PROBATIONARY ADMISSION

If applicants do not meet the standards listed for unconditional admission, they will be considered for probationary admission after holistic examination of their application materials. Probationary admission requires that an applicant earn no grade less than a B in the first 9 hours of graduate coursework at UT Arlington.

DEFFERED ADMISSION

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration.

DENIAL OF ADMISSION

For an applicant lacking sufficient evidence to indicate potential for academic success as an Economic Data Analytics student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made.

Curriculum

Foundations		
ECON 5300	ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS	3
ECON 5314	ECONOMIC ANALYSIS FOR BUSINESS DECISIONS	3
ECON 5317	DATA VISUALIZATION	3
ECON 5327	MONETARY POLICY AND FINANCIAL SYSTEM ANALYSIS	3
ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I [1]	3
ECON 5337	BUSINESS & ECONOMIC FORECASTING	3
ECON 5339	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS II	3
ECON 5341	ADVANCED BUSINESS AND ECONOMIC DATA ANALYTICS	3
ECON 5343	CAUSAL INFERENCE FOR BUSINESS DECISIONS	3
INSY 5336	PYTHON PROGRAMMING	3
or BUSA 5344	SAS TOOLS FOR BUSINESS AND ECONOMICS	
or BUSA 5345	R FOR BUSINESS AND ECONOMIC ANALYSIS	
or BUSA 5322	DATA ANALYTICS WITH PYTHON AND MACHINE LEARNING	
Total Hours		**30**

[1] Course may be waived in favor of an elective if student has completed ECON 3318 and 4318 with a B or better. Must be approved by the graduate advisor.

BBA or BS in Business to Master of Science in Economic Data Analytics Fast Track

About This Program

Bachelor of Business Administration or Bachelor of Science in Business to Master of Science in Economic Data Analytics Fast Track enables outstanding senior undergraduate students in the College of Business to satisfy degree requirements leading to Economic Data Analytics MS while

completing their undergraduate studies. Pathways are available from any undergraduate degree in the College that includes the required fast track foundations courses.

Associated Programs

For detailed information about the programs associated with this Fast Track, refer to their individual degree pages.

Accounting BBA (p. 264)

Accounting BS (p. 266)

Business Analytics BS (p. 387)

Economics BBA (p. 335)

Economics BS (p. 338)

Entrepreneurship BBA (p. 406)

Finance BBA (p. 355)

Hospitality Management BBA (p. 409)

Human Resource Management BBA (p. 411)

Information Systems BBA (p. 381)

Information Systems BS (p. 390)

International Business BBA (Chinese) (p. 310)

International Business BBA (French) (p. 312)

International Business BBA (German) (p. 314)

International Business BBA (Korean) (p. 316)

International Business BBA (Russian) (p. 319)

International Business BBA (Spanish) (p. 321)

Management BBA (p. 413)

Marketing BBA (p. 429)

Operations & Supply Chain Management BBA (p. 384)

Real Estate BBA (p. 358)

Economic Data Analytics MS (p. 331)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS
- ECON 3312 MACROECONOMICS
- ECON 3318 ECONOMIC DATA ANALYSIS
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS, students must complete the following graduate courses:

- Three MS foundations courses approved by advisor.

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete non-elective requirements for BBA/BS including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS	
or ECON 3312	MACROECONOMICS	
ECON 3312	MACROECONOMICS	
ECON 3318	ECONOMIC DATA ANALYSIS	
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	
or BSTAT 3322	ADVANCED STATISTICS FOR BUSINESS ANALYTICS	
Complete elective requirements for BBA/BS including the following, which also count toward the MS:		24
Select 3 MS Foundations courses.		
MS Foundations		
Complete all of the following not taken in BBA/BS.		21
ECON 5300	ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS	
ECON 5314	ECONOMIC ANALYSIS FOR BUSINESS DECISIONS	
ECON 5317	DATA VISUALIZATION	
ECON 5327	MONETARY POLICY AND FINANCIAL SYSTEM ANALYSIS	
ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I	
ECON 5337	BUSINESS & ECONOMIC FORECASTING	
ECON 5339	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS II	
ECON 5341	ADVANCED BUSINESS AND ECONOMIC DATA ANALYTICS	
ECON 5343	CAUSAL INFERENCE FOR BUSINESS DECISIONS	
INSY 5336	PYTHON PROGRAMMING	
or BUSA 5344	SAS TOOLS FOR BUSINESS AND ECONOMICS	
or BUSA 5345	R FOR BUSINESS AND ECONOMIC ANALYSIS	
or BUSA 5322	DATA ANALYTICS WITH PYTHON AND MACHINE LEARNING	
Total Hours		**141**

Bachelor of Business Administration in Economics

About This Program

The Bachelor of Business Administration in Economics provides a broad overview of the behavior of people and firms in making decisions about the allocation of scarce resources and examines the structure of the economy as a whole.

Competencies

1. Upon completion, economics students will demonstrate knowledge of how to apply economic theory to make business decisions.
2. Upon completion, economics students will demonstrate a working knowledge of Econometrics, including the ability to interpret, critique, and estimate empirical models of economic behavior.\\n
3. Upon completion, economics students will demonstrate an ability to capture, cleanse, and analyze data for making business decisions.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Foundations		
General Core Requirements (p. 46)		42
Students are required to complete specific courses in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Mathematics select:		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
For Social & Behavioral Sciences select:		
ECON 2305	PRINCIPLES OF MACROECONOMICS	
For Component Area Option select:		
ECON 2306	PRINCIPLES OF MICROECONOMICS	
Business Foundations		
Additional hours required in general education core.		2
UNIV 1101	CAREER PREPARATION AND STUDENT SUCCESS	1
or UNIV 1131	STUDENT SUCCESS	
MANA 1301	BUSINESS IN A GLOBAL ENVIRONMENT	3
ACCT 2301	PRINCIPLES OF ACCOUNTING I	3
ACCT 2302	PRINCIPLES OF ACCOUNTING II	3
BSTAT 2305	INTRODUCTORY STATISTICS FOR BUSINESS ANALYTICS	3
INSY 2303	INTRODUCTION TO M.I.S. AND DATA PROCESSING	3
BCOM 3360	EFFECTIVE BUSINESS COMMUNICATION	3

BLAW 3310	LEGAL AND ETHICAL ENVIRONMENT OF BUSINESS	3

ECON 4300	ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS	3
or BCOM 4380	ADVANCED COMMUNICATIONS FOR BUSINESS	
Select two Economics courses numbered 3000 or higher.		6
Advanced Electives		
Select five non-Economics business courses numbered 3000 or higher.		15
Total Hours		**120**

DOUBLE MAJORS

Two double major options for the Bachelor of Business Administration (BBA) in Economics are available. Economics undergraduates who pursue one of the following double major programs will not have the option of participating in the fast track program in Business.

Completion of the double major is attained by including all of the following courses in the BBA Economics plan and completing with grades of C or better in each of the double major courses listed below:

BBA IN ECONOMICS AND FINANCE

Finance Specialization		
FINA 3315	INVESTMENTS	3
FINA 3317	FINANCIAL INSTITUTIONS AND MARKETS	3
FINA 4315	ADVANCED BUSINESS FINANCIAL ANALYSIS	3
Select one Finance course numbered 3000 or higher.		3
Advanced Electives		
ACCT 3311	FINANCIAL ACCOUNTING I	3
Select one Accounting course numbered 3000 or higher.		3
Total Hours		**18**

BBA IN ECONOMICS AND MARKETING

Marketing Specialization		
MARK 3324	CONSUMER BEHAVIOR	3
MARK 4311	MARKETING RESEARCH	3
MARK 4322	ADVANCED MARKETING MANAGEMENT AND STRATEGY	3
Select two Marketing courses numbered 3000 or higher.		6
Advanced Electives		
Select one Accounting course numbered 3000 or higher.		3
Total Hours		**18**

BBA IN ECONOMICS AND operations & supply chain management

Operations & Supply Chain Management Specialization		
OPMA 4302	SUPPLY CHAIN LOGISTICS	3
OPMA 4309	GLOBAL SUPPLY CHAIN MANAGEMENT	3
OPMA 4310	SUPPLY CHAIN ANALYTICS-THEORY AND PRACTICE	3
OPMA 4312	PURCHASING MANAGEMENT	3

Select one Operations Management course numbered 3000 or higher.	3
Total Hours	**15**

Bachelor of Science in Economics

About This Program

The Bachelor of Science in Economics will enable graduates to meet the needs of employers in the era of "big data" and provide a strong background for those who wish to proceed to graduate school. Students will be exposed to the latest data analysis and visualization programs used in the business world and gain analytic skills that are valuable to both employers and graduate schools.

Competencies

1. Upon completion, economics students will demonstrate an ability to capture, cleanse, and analyze data for making business decisions.
2. Upon completion, economics students will demonstrate knowledge of how to apply economic theory to make business decisions.
3. Upon completion, economics students will demonstrate a working knowledge of Econometrics, including the ability to interpret, critique, and estimate empirical models of economic behavior.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Minor in Economics

About This Program

The Minor in Economics should prepare the general Business student to use basic economic theory and apply it to business decision making scenarios.

Competencies

1. Upon completion, economics students will demonstrate knowledge of how to apply economic theory to make business decisions.
2. Upon completion, economics students will demonstrate a basic knowledge of Econometrics analysis focused on the ability to interpret empirical models of economic behavior.

Curriculum

Foundations		
ECON 2305	PRINCIPLES OF MACROECONOMICS	3
ECON 2306	PRINCIPLES OF MICROECONOMICS	3
ECON 3303	MONEY AND BANKING [1]	3
ECON 3310	MICROECONOMICS [1]	3
ECON 3312	MACROECONOMICS [1]	3
Elective		
ECON 2337	ECONOMICS OF SOCIAL ISSUES (Optional)	
Select any course numbered ECON 33xx or ECON 43xx. [1]		3
Total Hours		**18**

[1] Prerequisites must be met before enrollment in the course. A student should consider these when selecting courses to satisfy the minor requirement and when registering. For a complete list of prerequisites see the Catalog or the Business Undergraduate Advising Office.

Program Completion

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Finance and Real Estate

Department Overview

UTA's Department of Finance and Real Estate is committed to providing outstanding finance and real estate programs. Located in the center of the Dallas/Fort Worth Metroplex, UTA is in the midst of a dynamic employment market. With thirteen full-time faculty, the Department of Finance and Real Estate offers a full complement of classes in finance, including corporate finance, investments, financial institutions and capital markets, international

finance, financial modeling, personal finance, and insurance. The department also offers a full complement of classes in real estate, including real estate appraisal, development, finance, and investments.

Students gain valuable real-world experience through internships and part-time employment. They have access to a state-of-the-art financial markets lab and the opportunity to participate in the student-managed investment fund. Finance graduates pursue careers in managerial finance, banking, investment, brokerage, international money markets, insurance, financial planning, and mortgage activities. Real estate graduates work in environmental consulting, property tax, investment consulting, property development and management, property financing, mortgage banking, valuation, site analysis, and syndication. The department has two nationally recognized student organizations.

The Finance and Real Estate Department seeks excellence in providing education, research, and service to its constituencies. Our mission has several dimensions: to achieve and maintain a reputation of high quality in all our degree programs (undergraduate, master's and doctoral); to generate research that will enhance theory and its real-world application; and to provide requisite service in facilitating the fullest realization of the potential of all our fellow participants - students, businesses, governments and society at large.

COURSES

FINA 2330. MONEY, FINANCE AND THE MODERN CONSUMER. 3 Hours.
An analysis of consumer and financial behavior in present-day society. Against this backdrop, students understand how consumption choices define one's identity in society and understand the importance of value-oriented financial goals for the wellbeing of individuals, families, and society at large. Students also develop the critical-thinking and quantitative decision-making skills needed for responsible spending and financial choices.

FINA 3311. PERSONAL FINANCE. 3 Hours.
This course is designed to equip students with several personal finance tools. Topics include the time value of money for personal financial decision-making, personal financial statements, credit, budgeting, investment planning, insurance planning, and retirement planning. Prerequisite: Completion of 30 credit hours.

FINA 3313. BUSINESS FINANCE. 3 Hours.
Emphasizes the financing and investment decisions of the corporate manager. Topics include financial statement analysis, working capital management, capital budgeting, financing costs, financial planning, leverage, and how diversity affects firm valuations and access to financing. Prerequisite: ECON 2306, ACCT 2302, MATH 1315 (or permission of instructor), and 30 credit hours.

FINA 3315. INVESTMENTS. 3 Hours.
Principles governing the proper investment of personal and institutional funds, information sources, security analysis, exchanges and regulations. Formerly FINA 4313; credit will be granted only once. Prerequisite: ECON 2306, ACCT 2302, FINA 3313 (or concurrent enrollment) and 60 credit hours.

FINA 3317. FINANCIAL INSTITUTIONS AND MARKETS. 3 Hours.
The structure of financial institutions and markets in the United States and their interactions. How and why the institution has evolved, how it fits within the financial system, how it operates, what is its current impact, and what may its future role be. Formerly FINA 4314; credit will be granted only once. Prerequisite: ECON 2306, ACCT 2302, and 60 credit hours.

FINA 4191. STUDIES IN FINANCE. 1 Hour.
Advanced studies, on an individual basis, in the various fields of finance. Prerequisite: 90 credit hours and permission of department. May be repeated for credit with consent of department chair.

FINA 4291. STUDIES IN FINANCE. 2 Hours.
Advanced studies, on an individual basis, in the various fields of finance. Prerequisite: 90 credit hours and permission of department. May be repeated for credit with consent of department chair.

FINA 4311. MONEY AND CAPITAL MARKETS. 3 Hours.
This in-depth analysis of the development, characteristics, and significance of money and capital markets explores how the markets interrelate, interact, and impact the financing/investment decisions that are the basis of finance. Prerequisite: FINA 3315 (with a grade of C or better).

FINA 4315. ADVANCED BUSINESS FINANCIAL ANALYSIS. 3 Hours.
To develop an ability to recognize financial problems, analyze financial data, formulate alternative solutions, and render financial decisions. Case materials are used in studying financial problems. Management of investment in current and fixed assets, planning of profits, forecasting of cash requirements, capital budgeting, planning of methods of financing and capital structure, dividend policy, valuation of assets, and mergers. Prerequisite: FINA 3313 and FINA 3315.

FINA 4317. LENDING AND CREDIT ANALYSIS. 3 Hours.
This course is about principles governing lending and credit analysis. The course covers topics such as loan structuring, commercial lending process, qualitative analysis and credit rating analysis, and detecting problematic loans. Prerequisite: FINA 3313, FINA 3317 (or concurrent enrollment).

FINA 4318. PORTFOLIO MANAGEMENT AND SECURITY ANALYSIS. 3 Hours.
This course develops an understanding of portfolio management and security analysis by focusing on the analytical techniques and empirical results of investment theorists and practitioners. Risk, efficiency, diversification, fundamental analysis, and technical analysis as they apply to corporate finance, international finance, and investments will be examined. Prerequisite: FINA 3313.

FINA 4319. FINANCIAL DERIVATIVES. 3 Hours.
Topics included in this course are an introduction to options and futures markets, investment and risk management strategies using these derivative products, and pricing of options and futures contracts. Additional coverage includes basic swap agreements, exotic options, and corporate risk management. Prerequisite: FINA 3313.

FINA 4320. CAPITAL BUDGETING. 3 Hours.
Development of the logic and methodology of the capital budgeting decision. Measurement of cash flows, present value techniques, evaluation of capital investments, ranking of capital investments, analysis of risk, and administration of capital investments. Prerequisite: FINA 3313.

FINA 4324. INTERNATIONAL CORPORATE FINANCE. 3 Hours.
Issues and questions which concern financial management of international corporations. Analysis of the financing of investment abroad and the management of assets in differing financial environments. The foreign investment decision, cost of capital and financial structure for multinational decision making, management of foreign subsidiary working capital, and financial control of multinational operations. Prerequisite: FINA 3313.

FINA 4326. WEALTH AND EXCHANGE. 3 Hours.
This course provides students with an introduction to the principles of financial management in the setting of a philanthropic organization. The focus is on the primary financial topics of capital budgeting, capital structure, and working capital management which have been modified to consider the philanthropy setting. The study of capital budgeting examines how modifications to traditional NPV analysis can be implemented and justified in a setting without corporate income taxes. The study of capital structure examines how the traditional choice between debt and equity is replaced with a choice between fundraising or debt issuance. Debt issuance is further explored through an analysis of the characteristics of muni bond markets and how muni markets differ from corporate bond markets. The study of liquidity management and financial analysis focuses on those measures that are most useful and available for studying the financial condition of philanthropic organizations. Throughout the course, a focus is put on applied analysis using excel spreadsheets and incorporating real world data drawn from the financial statements, bond quotes, and regulatory filings of local philanthropic institutions. Prerequisite: This course is open only to non-finance majors, 30 credit hours.

FINA 4328. STUDENT MANAGED INVESTMENT FUND. 3 Hours.
This course provides a conceptual and theoretical foundation for the activities of selected student managers involved with the on-going operations of the student managed investment fund (SMIF). Using a blend of academic- and practitioner-oriented readings, projects, and group analytical sessions, managers will be introduced to both the conventional wisdom and state-of-the-art methods used in performing many of the Fund's functional tasks, including security research, security trading, and economic forecasting. After establishing a background in the technical aspects of managing a security portfolio, we will focus on developing a solid intuition about what an investment professional in each of these positions must know to do his or her job well. Prerequisite: FINA 3315 and departmental permission.

FINA 4331. SEMINAR IN FINANCE. 3 Hours.
Readings and discussion of special topics in Finance. Prerequisite: Junior or senior standing and consent of instructor. May be repeated for credit with consent of department chair.

FINA 4351. FINANCIAL MODELING. 3 Hours.
The focus is on computer applications in the major areas of finance. Financial Modeling integrates financial theory and practice through software-driven hands-on experience. Students will learn how to utilize financial concepts and practice within a software framework. Core concepts are drawn from corporate finance, investments, and financial institutions and markets. Examples of topics include: financial statement forecasting and consolidation, mergers and acquisitions, statistical approaches in finance, the Capital Asset Pricing Model, portfolio analysis, predictive models of different risk categories, bond and stock valuation, and market interest rate behavior. Learning is enhanced using a lecture-lab format. Prerequisite: FINA 3313.

FINA 4391. STUDIES IN FINANCE. 3 Hours.
Advanced studies, on an individual basis, in the various fields of finance. Prerequisite: 90 credit hours and permission of department. May be repeated for credit with consent of department chair.

FINA 4393. FINANCE INTERNSHIP. 3 Hours.
Practical training in finance. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: FINA 3313, 60 credit hours, and consent of department internship advisor.

FINA 5182. INDEPENDENT STUDIES IN FINANCE. 1 Hour.
Extensive analysis of a finance topic. Prerequisite: consent of instructor and department chair.

FINA 5199. GRADUATE FINANCE INTERNSHIP. 1 Hour.
Practical training in finance. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

FINA 5299. GRADUATE FINANCE INTERNSHIP. 2 Hours.
Practical training in finance. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

FINA 5311. BUSINESS FINANCIAL MANAGEMENT. 3 Hours.
Study of providing the organization with funds necessary for its operation and of achieving effective utilization of funds. Primary emphasis on financial decision-making within organizations, and techniques of financial analysis and forecasting. Prerequisite: ACCT 5307 or departmental permission.

FINA 5315. HEALTH CARE FINANCIAL MANAGEMENT. 3 Hours.
Analysis of financial problems with an emphasis on the application of financial management principles and concepts to health care organizations.

FINA 5317. LENDING AND CREDIT ANALYSIS. 3 Hours.
This course is about principles governing lending and credit analysis. The course covers topics such as loan structuring, commercial lending process, qualitative analysis and credit rating analysis, and detecting problematic loans. Prerequisite: FINA 5311 or departmental permission.

FINA 5323. INVESTMENTS. 3 Hours.
Application of economic theory and principles to investment decisions of individuals and financial institutions. Considers how psychological influences, diversity, and biases affect wealth creation. Students who successfully complete the course will have the knowledge to be productive in a diverse professional environment where state-of-the-art investment models and techniques are implemented. Prerequisite: FINA 5311 or departmental permission.

FINA 5327. FINANCIAL DERIVATIVES. 3 Hours.
Nature and functions of the various futures and options markets; hedging for risk reduction, speculative trading for profit; the role of futures and options in overall portfolio strategy, along with fundamental concepts such as basis, spreading, normal and inverted markets and money management. Prerequisite: FINA 5311 and FINA 5323.

FINA 5328. STUDENT MANAGED INVESTMENT FUND. 3 Hours.
This course provides a conceptual and theoretical foundation for the activities of selected student managers involved with the on-going operations of the student managed investment fund (SMIF). Using a blend of academic- and practitioner-oriented readings, projects, and group analytical sessions, managers will be introduced to both the conventional wisdom and state-of-the-art methods used in performing many of the Fund's functional tasks, including security research, security trading, and economic forecasting. After establishing a background in the technical aspects of managing a security portfolio, we will focus on developing a solid intuition about what an investment professional in each of these positions must know to do his or her job well. Prerequisite: A course in investments and departmental permission.

FINA 5329. PORTFOLIO AND SECURITY ANALYSIS. 3 Hours.
The use of economic and accounting data in the selection of securities. Examination of current and traditional techniques used by investment practitioners. Prerequisite: FINA 5311 and FINA 5323.

FINA 5330. REAL OPTIONS. 3 Hours.
Option approaches to evaluating firm capital budgeting decisions. Techniques for making investment decisions involving physical assets of nonfinancial firms. Prerequisite: FINA 5311.

FINA 5331. INTERNATIONAL FINANCE. 3 Hours.
Examines ways in which financial decision-making processes are altered by operation in a multinational environment. Includes the effects of devaluation expectations, foreign exchange and investment controls. Also, case study materials related to actual decisions by multinational firms. Prerequisite: FINA 5311.

FINA 5334. FINANCIAL INSTITUTIONS AND MARKETS. 3 Hours.
An examination of major financial institutions and markets with emphasis on trends affecting the current operations, competitive position, and overall future of the primary financial intermediaries and the financial markets. Prerequisite: FINA 5311, or concurrent enrollment.

FINA 5340. FINANCIAL APPLICATIONS. 3 Hours.
Analysis of financial problems of business concerns, presented in case materials. Considers determination of capital needs, choosing among alternative capital investments, planning methods of financing new capital expenditures, and planning recapitalizations, mergers, and reorganizations. Prerequisite: FINA 5311.

FINA 5350. MATHEMATICAL FINANCE. 3 Hours.
Intensive review of the mathematics necessary for graduate work in finance, with application to selected areas of business finance, investment analysis and financial markets. Prerequisite: FINA 5311.

FINA 5351. FINANCIAL MODELING FOR INVESTMENTS. 3 Hours.
Study of common financial modeling techniques are explored in this course. The primary focus is on portfolio optimization models and models used for pricing and analyzing derivative stock options, although most of these techniques have other applications. Students are provided with the opportunity to develop the skills needed to build financial models of their own. Prerequisite: FINA 5311 or departmental permission.

FINA 5352. FINANCIAL MODELING FOR CORPORATE ANALYSIS. 3 Hours.
This course focuses on the financial modeling in the major areas of corporate finance, including financial statement forecasting, bond and stock valuation, and merger and acquisition analysis using computer software such as Excel. A lecture-lab format will be used to integrate financial theory and practice through software-driven hands-on experience. Prerequisite: FINA 5311 or departmental permission.

FINA 5376. FINANCIAL DATA ANALYTICS. 3 Hours.
This course is a hands-on introduction to the application of data science techniques to visualize, condition, transform, and model financial data using R. Topics include: the layered grammar of graphics, security and portfolio returns, risk analysis, portfolio optimization and performance, publishing results using R Markdown, and an introduction to processing large data sets from public data sources, WRDS, and the SEC's Edgar database. Prerequisite: FINA 5311 or departmental permission.

FINA 5382. INDEPENDENT STUDIES IN FINANCE. 3 Hours.
Extensive analysis of a finance topic. Prerequisite: departmental permission.

FINA 5392. SELECTED TOPICS IN FINANCE. 3 Hours.
In depth study of selected topics in finance. May be repeated when topics vary. Prerequisite: departmental permission.

FINA 5398. THESIS. 3 Hours.
Thesis. FINA 5398 graded R (Research) or F only. Prerequisite: STAT 5325 and approval of Graduate Advisor.

FINA 5399. GRADUATE FINANCE INTERNSHIP. 3 Hours.
Practical training in finance. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

FINA 5698. THESIS. 6 Hours.
Thesis. Prerequisite: STAT 5325 and approval of Graduate Advisor.

FINA 6192. RESEARCH IN FINANCE. 1 Hour.
Independent study of advanced topics in finance under the direction of graduate faculty. May be repeated for credit when topics vary. Prerequisite: FINA 5311.

FINA 6292. RESEARCH IN FINANCE. 2 Hours.
Independent study of advanced topics in finance under the direction of graduate faculty. May be repeated for credit when topics vary. Prerequisite: FINA 5311.

FINA 6301. SEMINAR IN THE THEORY OF FINANCE. 3 Hours.
Development of the fundamental theories of modern finance from their microeconomic origins. Topics include: investment under uncertainty, asset pricing models, market equilibrium, market efficiency, and expected utility theory. Prerequisite: FINA 5311.

FINA 6311. SEMINAR IN THE THEORY OF CORPORATE FINANCE. 3 Hours.
Advanced theory of corporate finance. Capital budgeting, dividend policy, and capital structure. Prerequisite: FINA 5311.

FINA 6312. SEMINAR IN THE THEORY OF INVESTMENTS. 3 Hours.
Advanced theory of investments. Modern portfolio theory and the efficiency of capital markets. Prerequisite: FINA 5311.

FINA 6313. ADVANCED RESEARCH IN FINANCE. 3 Hours.
Analytical methods commonly applied in the academic finance literature. Topics such as factor analysis in arbitrage pricing models and techniques for identification of nonstationarities in risk. Prerequisite: FINA 5311 and STAT 5301.

FINA 6314. ADVANCED RESEARCH IN FINANCE II. 3 Hours.
Specialized and evolving techniques in financial research; topics such as identification of efficient markets, linear programming in capital budgeting, and multiple discriminant analysis in bankruptcy prediction and bond rating models. Prerequisite: FINA 5311 and STAT 5301.

FINA 6390. SEMINAR IN SPECIAL TOPICS IN FINANCE. 3 Hours.
Doctoral level coverage of advanced topics in finance. May be repeated for credit when topics vary. Prerequisite: FINA 5311.

FINA 6392. RESEARCH IN FINANCE. 3 Hours.
Independent study of advanced topics in finance under the direction of graduate faculty. May be repeated for credit when topics vary. Prerequisite: FINA 5311.

COURSES

INSU 4329. PROPERTY AND CASUALTY RISK MANAGEMENT. 3 Hours.
Fire, marine, and automobile insurance; business, professional, and personal liability insurance; theft insurance; disability and miscellaneous casualty coverage, surety bonds, rate structures, and multiple line contracts. Prerequisite: 60 credit hours.

INSU 4330. LIFE AND HEALTH RISK MANAGEMENT. 3 Hours.
Principles underlying the fields of life and health insurance. Types of life, health, and annuity contracts; determination of premiums; policy provisions, reserve provisions, and legal requirements. Prerequisite: 60 credit hours.

COURSES

REAE 3325. REAL ESTATE FUNDAMENTALS. 3 Hours.
A foundation for study and research in specialized areas such as real estate financing, real estate investment and counseling, real estate management, real estate development, and property appraising, as well as relevant social, legal, and policy issues. Formerly BUSA 3325; credit will be granted only once. Prerequisite: MATH 1315 or MATH 1316 or any other Calculus (or permission of instructor) and junior standing.

REAE 4191. STUDIES IN REAL ESTATE. 1 Hour.
Advanced studies, on an individual basis, in the various fields of real estate. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

REAE 4291. STUDIES IN REAL ESTATE. 2 Hours.
Advanced studies, on an individual basis, in the various fields of real estate. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

REAE 4314. REAL ESTATE DEVELOPMENT. 3 Hours.
The land conversion process including feasibility analysis, site selection, design, construction, and financial analysis. Land use controls, planning, and environmental constraints are also examined. Formerly REAE 4311; credit will be granted only once. Prerequisite: junior standing.

REAE 4319. REAL ESTATE FINANCE. 3 Hours.
Problems associated with real property financing. In-depth study of financial intermediaries who supply funds for real property investment. May be included as a part of the finance concentration. Formerly BUSA 4319; credit will be granted only once. Prerequisite: REAE 3325 (FINA 3313 may be substituted for non-real estate majors).

REAE 4321. REAL ESTATE INVESTMENT. 3 Hours.
The determination of financial feasibility for proposed real estate investments, the effect of income taxes and various financing patterns on the equity investment, and the criteria for proper decision making to maximize benefits for equity investors. Formerly REAE 4310; credit will be granted only once. Prerequisite: REAE 3325 (FINA 3313 may be substituted for non-real estate majors).

REAE 4331. SEMINAR IN REAL ESTATE. 3 Hours.
Readings and discussion of special topics in real estate. Prerequisite: Junior or senior standing and consent of instructor. May be repeated for credit with consent of department chair.

REAE 4334. REAL ESTATE APPRAISAL. 3 Hours.
Theory and methods of residential and income property appraisal. Market analysis, highest-and-best-use analysis, capitalization techniques, and market, cost, and income approaches to valuation and reconciliation of value indicators. Prerequisite: REAE 3325 (FINA 3313 may be substituted for non-real estate majors).

REAE 4391. STUDIES IN REAL ESTATE. 3 Hours.
Advanced studies, on an individual basis, in the various fields of real estate. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

REAE 4393. REAL ESTATE INTERNSHIP. 3 Hours.
Practical training in real estate. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

REAE 5182. INDEPENDENT STUDIES IN REAL ESTATE. 1 Hour.
Extensive analysis of a real estate topic. Prerequisite: departmental permission.

REAE 5199. GRAD REAL ESTATE INTERNSHIP. 1 Hour.
Practical training in real estate. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester house completed.

REAE 5299. GRAD REAL ESTATE INTERNSHIP. 2 Hours.
Practical training in real estate. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester house completed.

REAE 5301. SUSTAINABLE ISSUES IN THE BUILT ENVIRONMENT. 3 Hours.
A survey-based course that analyzes current and historical sustainability issues. The global and political nature of this evolving discipline is emphasized. Additionally, a macro view of the components currently embodied in the practice of sustainability will be examined and discussed.

REAE 5302. SUSTAINABLE STRATEGIES IN THE BUILT ENVIRONMENT. 3 Hours.
Business strategies that emphasize quantitative methods, asset allocation, socially responsible investing, and evaluation research.

REAE 5303. SUSTAINABLE POLICIES IN THE BUILT ENVIRONMENT. 3 Hours.
Governmental, regulatory, internal reporting, and policy development related to sustainability. Grant writing will also be explored.

REAE 5304. SUSTAINABLE PROJECTS IN THE BUILT ENVIRONMENT. 3 Hours.
A field-based study of buildings, developments, organizations, and companies that exemplify sustainable practices. Course will include elements of social networking and communication strategies.

REAE 5311. REAL ESTATE ANALYSIS. 3 Hours.
Survey of real estate finance, investment, valuation/market analysis, and urban development, including financial, physical, and social aspects of the real estate development process.

REAE 5312. INTERNATIONAL PROPERTY MARKETS. 3 Hours.
Property markets are characterized by significant institutional differences that affect the nature and performance of national markets. Analysis of socio-economic and cultural factors influencing the operation of international markets.

REAE 5313. GIS & PROPERTY ANALYSIS. 3 Hours.
The increasing availability of geographically referenced property data offers significant potential for real estate research and modeling. Covers fundamentals of Geographic Information Systems (GIS) (Concepts, principles, and functions) and essential skills for applying GIS to real estate industry problems.

REAE 5314. SEMINAR IN REAL ESTATE DEVELOPMENT. 3 Hours.
Topics relating to site selection, design, market analysis, financial feasibility, and management in the real estate development process.

REAE 5315. REAL ESTATE TRENDS & ISSUES. 3 Hours.
Analysis of specialized topics associated with emerging trends and issues in the real estate industry using current literature and case studies.

REAE 5316. ADAPTIVE REUSE & REDEVELOPMENT OF COMMERCIAL INVESTMENT REAL ESTATE. 3 Hours.
The tools and techniques associated with the market and financial feasibility analysis of adaptively reusing and redeveloping existing properties into economically viable commercial investment real estate.

REAE 5317. REAL ESTATE CONSTRUCTION MANAGEMENT. 3 Hours.
Topics relating to construction management for commercial investment real estate.

REAE 5318. SUSTAINABLE DEVELOPMENT. 3 Hours.
Sustainability perspectives about values, rights, property and what constitutes an optimum human environment; sustainability principles and case studies emphasizing on-the-ground, incentive-based commercial investment real estate development that balances economic growth with environmental quality. Projects will include those in urban areas as well as those in rural areas focusing on agricultural elements.

REAE 5319. SEMINAR IN REAL ESTATE FINANCE. 3 Hours.
Study of real property financing methods; analysis of cost of borrowing, sources of funds, and mortgage terms; emphasis on construction and permanent financing of commercial and industrial properties.

REAE 5320. TEXAS REAL ESTATE STUDY TOUR. 3 Hours.
A field-based study of Texas real estate markets, focusing on projects in Austin, San Antonio, Houston, and Dallas-Fort Worth.

REAE 5321. SEMINAR IN REAL ESTATE INVESTMENT. 3 Hours.
Introduction to analytical techniques, sources of financing, and other factors related to real estate investment. Stresses current developments and topics.

REAE 5322. COMMERCIAL LEASE ANALYSIS. 3 Hours.
Application of critical occupancy decisions such as comparative lease analysis, lease vs. purchase analysis, lease buyout analysis, and sale-leaseback analysis to optimize user space decisions.

REAE 5323. REAL ESTATE PROJECT STUDIO. 3 Hours.
Studio based course focused on a commercial real estate project.

REAE 5324. REAL ESTATE ECONOMICS. 3 Hours.
A review of the nature of urban areas and the development of the urban economics as an economic discipline. Emphasis will be on identifying location patterns in urban areas, policy issues, real estate and urban housing options, government issues in urban areas, and urban social problems. Students will utilize data analytics and projective techniques in developing projects based on current local urban real estate issues and opportunities.

REAE 5327. ADVANCED REAL ESTATE MARKET ANALYSIS. 3 Hours.
Study of advanced market analysis techniques and methods, including trend analysis and demand forecasting. Emphasis is on the application of these methods to commercial property markets.

REAE 5334. SEMINAR IN REAL ESTATE APPRAISAL. 3 Hours.
Market, cost, and income approaches with stress on income forecasting and capitalization.

REAE 5337. REAL PROPERTY LAW. 3 Hours.
Legal property theory underlying real estate transactions and relationships including estates and interests in land, conveyances, and mortgages.

REAE 5350. QUANTITATIVE METHODS FOR REAL ESTATE. 3 Hours.
Study of advanced statistical, modeling, and econometric techniques as applied to real estate markets. Emphasis on the integration of these techniques with traditional real estate analysis.

REAE 5382. INDEPENDENT STUDIES IN REAL ESTATE. 3 Hours.
Extensive analysis of a real estate topic. Prerequisite: departmental permission.

REAE 5392. SELECTED TOPICS IN REAL ESTATE. 3 Hours.
In-depth study of selected topics in real estate. May be repeated when topics vary. Prerequisite: REAE 5311.

REAE 5398. THESIS. 3 Hours.
Prerequisite: departmental permission.

REAE 5399. GRAD REAL ESTATE INTERNSHIP. 3 Hours.
Practical training in real estate. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

REAE 5698. THESIS. 6 Hours.
Prerequisite: departmental permission.

REAE 6390. SEMINAR IN SPECIAL TOPICS IN REAL ESTATE. 3 Hours.
Doctoral level coverage of advanced topics in real estate. May be repeated for credit when topics vary. Prerequisite: REAE 5311.

REAE 6392. RESEARCH IN REAL ESTATE. 3 Hours.
Independent study of advanced topics in real estate under the direction of graduate faculty. May be repeated for credit when topics vary. Prerequisite: REAE 5311.

Finance and Real Estate - Graduate

Programs

MASTER'S DEGREES

- Quantitative Finance MS (p. 347)
- Real Estate MS (p. 349)

FAST TRACKS

- BBA/BS Business to Quantitative Finance MS Fast Track (p. 351)
- Real Estate BBS to MA Fast Track (p. 353)

CERTIFICATE

- Real Estate Development Graduate Certificate (p. 354)

Master of Science in Quantitative Finance

About This Program

The Master of Science in Quantitative Finance is designed to provide a specialized, highly analytical graduate education to financial managers, financial analysts, and technical personnel.

Competencies

1. Quantitative Skills: upon completion, students will possess a thorough command of quantitative techniques for asset valuation and financing.
2. Computational Skills: upon completion, students will possess the computational skills required to successfully model asset valuation and financing using simulated and actual data.
3. Communication Skills: upon completion, students will possess oral and written communication skills to be able to communicate effectively with both non-technical financial managers and highly mathematical quantitative theorists with equal proficiency.
4. Research Skills: upon completion, students will possess the financial and mathematical skills required to conduct independent financial research.

Admissions Criteria

The Master of Science in Quantitative Finance (MSQF) graduate advisor reviews all applications and determines whether they qualify for unconditional admission. Applicants who do not satisfy the admission conditions are referred to the MSQF Admissions Committee for consideration.

An applicant whose native language is not English must demonstrate a sufficient level of skill in the English language to ensure success in graduate studies as defined by the Office of Graduate Admissions.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Unconditional admittance will be granted without the need for a review by the MSQF Admissions Committee to an applicant who holds a bachelor's degree with a GPA of 3.0 or above (last 60 hours), with either appropriate work experience or coursework in business or quantitative fields from an AACSB-accredited college or university, or equivalent.

Applicants without appropriate work experience or coursework in business or quantitative fields from an AACSB-accredited college or university, or equivalent, will be granted unconditional admittance without the need for a review by the MSQF Admissions Committee if they hold a bachelor's degree with a GPA of 3.2 or above (last 60 hours).

ADMISSION WITH COMMITTEE REVIEW

Applicants who do not meet the above GPA requirement will have their application reviewed by an admissions committee. Sufficient quantitative skills will be judged based on the following factors:

- A degree or certificate in a quantitative or business field.
- Quantitative or business coursework.
- Relevant business or professional experience.
- Coding or programming certification or experience.
- Undergraduate and graduate GPA (overall, major, or last 60 hours) and program accreditation status of the applicant's degree-granting institution.
- Score on the quantitative section of the GMAT or GRE (if taken).
- Financial or real estate modeling skills, relevant work experience or internships demonstrating applied quantitative skills.

By considering the totality of the applicants circumstances, including the factors listed above, the Graduate Studies Committee for MSQF will evaluate an applicant's readiness to successfully complete the graduate program. Depending on the committee's judgment, the decision may be to grant unconditional admission, probationary admission, deferred admission, or deny admission. The committee's decision is final.

PROBATIONARY ADMISSION

An applicant deemed deficient in the above criteria may be considered for probationary admission upon careful review of their materials. Probationary admission requires the student to maintain a 3.0 grade point average for the first two semesters of enrollment. Additionally, the student may be required to take deficiency courses.

DEFERRED AND DENIED ADMISSION

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration. For an applicant lacking sufficient evidence to indicate potential for academic success as an MSQF student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

Curriculum

Foundations		
FINA 5323	INVESTMENTS	3
FINA 5327	FINANCIAL DERIVATIVES	3
FINA 5350	MATHEMATICAL FINANCE	3
FINA 5351	FINANCIAL MODELING FOR INVESTMENTS	3
FINA 5352	FINANCIAL MODELING FOR CORPORATE ANALYSIS	3
FINA 5376	FINANCIAL DATA ANALYTICS	3
ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I	3
INSY 5336	PYTHON PROGRAMMING	3
Electives		
Select twelve hours of elective courses with advisor approval.		12
Total Hours		**36**

Program Completion

The remaining 12 hours of elective coursework are selected by the student, subject to the approval of the program advisor. Courses will be chosen from a list that includes:

1. finance elective classes (international finance, financial institutions, capital markets, real options, and capital budgeting),
2. economics (macroeconomic theory, econometrics, time series analysis),
3. mathematics (advanced calculus, real analysis, differential equations, stochastic processes, and numerical methods),
4. statistics (probability theory, mathematical statistics), and
5. computer science (programming languages, numerical methods, parallel processing, software engineering).

Students who do not have the appropriate background may have to take additional foundation coursework. Quantitative background appropriate to begin the MSQF program consists of a minimum of six credit hours of calculus and three credit hours each in linear algebra, statistics, and computer programming. Other foundation coursework would include at least three credit hours each of microeconomics and finance.

Master of Science in Real Estate

About This Program

The Master of Science in Real Estate program is designed to provide students an opportunity to obtain a better understanding of the mechanics of real estate decision-making in modern society and a greater depth of training in the discipline of real estate decision-making than is possible at the baccalaureate level.

Competencies

1. Upon completion, students will possess a thorough command of qualitative aspects and quantitative techniques for real estate valuation and financing.
2. Upon completion, students will possess the computational skills required to successfully model asset valuation and financing using commercially and/or publicly available data.
3. Upon completion, students will possess oral and written communication skills to be able to communicate effectively with real estate professionals with proficiency.
4. Upon completion, students will possess the quantitative tools required to conduct independent real estate research and to succeed in analytical roles in the commercial real estate industry.

Admissions Criteria

The MSRE Graduate Advisor reviews all applications and determines if they qualify for unconditional admission. Applicants who do not satisfy the admission conditions are referred to the MSRE Admissions Committee for consideration.

An applicant whose native language is not English must demonstrate a sufficient level of skill in the English language to ensure success in graduate studies as defined by the Office of Graduate Admissions.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Unconditional admittance will be granted without committee review to an applicant who holds a bachelor’s degree with a GPA of 3.0 or above (last 60 hours) from an AACSB-accredited college or university, or equivalent.

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- A degree or certificate in Business, Real Estate, or a related field.
- Coursework in Business, Real Estate, or a related field.
- Relevant business or professional experience in real estate.
- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree-granting institution.
- Score on the GMAT/GRE (including separate scores on the individual sections), if taken.
- Personal statement provided by the applicant.

- Programming skills (e.g., Python, R), real estate or financial modeling skills, relevant work experience or internships demonstrating applied quantitative skills.

By considering the totality of the applicant's circumstances, including the factors listed above, the MSRE Admissions Committee will evaluate an applicant's readiness to successfully complete the graduate program. Depending on the committee's judgment, the decision may be to grant unconditional admission, probationary admission, deferred admission, or deny admission. The committee's decision is final.

PROBATIONARY ADMISSION

An applicant deemed deficient in one or more of the above criteria may be considered for probationary admission upon careful review of their materials. Probationary admission requires the student to maintain a 3.0 grade point average for the first two semesters of enrollment. Additionally, the student may be required to take deficiency courses.

DEFERRED AND DENIED ADMISSION

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration. For an applicant lacking sufficient evidence to indicate potential for academic success as an MSRE student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

UNCONDITIONAL ADMISSION FOR GRADUATE CERTIFICATE IN REAL ESTATE DEVELOPMENT STUDENTS

Students who successfully complete the Graduate Certificate in Real Estate Development with a GPA of 3.0 or higher will be granted unconditional admission to the MSRE program.

Curriculum

Foundations		
REAE 5311	REAL ESTATE ANALYSIS	3
REAE 5321	SEMINAR IN REAL ESTATE INVESTMENT	3
REAE 5334	SEMINAR IN REAL ESTATE APPRAISAL	3
REAE 5319	SEMINAR IN REAL ESTATE FINANCE	3
REAE 5314	SEMINAR IN REAL ESTATE DEVELOPMENT	3
REAE 5315	REAL ESTATE TRENDS & ISSUES	3
REAE 5350	QUANTITATIVE METHODS FOR REAL ESTATE	3
Electives		
Select nine hours of elective courses with advisor approval.		9
Total Hours		**30**

Program Completion

A minimum of 30 semester hours is required. All classes must be approved by the Graduate Advisor in Real Estate. Students who do not have a bachelor's degree in business administration may have to take additional coursework (up to three semester hours) to acquire a sufficient general business foundation. Students may have foundation courses waived by the Graduate Advisor if they have completed equivalent courses.

Each student's program of work must be approved by the Real Estate Graduate Advisor and it must contain a minimum of 21 semester hours in approved advanced graduate real estate courses taken at The University of Texas at Arlington.

BBA or BS in Business to Master of Science in Quantitative Finance Fast Track

About This Program

The Bachelor of Business Administration or Bachelor of Science in Business to Master of Science in Quantitative Finance Fast Track enables outstanding senior undergraduate students in the College of Business to satisfy degree requirements leading to Quantitative Finance MS while completing their undergraduate studies. Pathways are available from any undergraduate degree in the College that includes the required fast track foundations courses.

ASSOCIATED PROGRAMS

For detailed information about the programs associated with this Fast Track, refer to their individual degree pages.

Finance BBA (p. 355)
Accounting BBA (p. 264)
Accounting BS (p. 266)
Economics BBA (p. 335)
Economics BS (p. 338)
Business Analytics BS (p. 387)
Entrepreneurship BBA (p. 406)
Human Resource Management BBA (p. 411)
Information Systems BBA (p. 381)
Information Systems BS (p. 390)
International Business BBA (Chinese) (p. 310)
International Business BBA (French) (p. 312)
International Business BBA (German) (p. 314)
International Business BBA (Korean) (p. 316)
International Business BBA (Russian) (p. 319)
International Business BBA (Spanish) (p. 321)
Management BBA (p. 413)
Marketing BBA (p. 429)
Operations & Supply Chain Management BBA (p. 384)

Quantitative Finance MS (p. 347)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- MANA 3318 MANAGING ORGANIZATIONAL BEHAVIOR
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS, students must complete the following graduate courses:

- FINA 5323 INVESTMENTS
- FINA 5351 FINANCIAL MODELING FOR INVESTMENTS, FINA 5352 FINANCIAL MODELING FOR CORPORATE ANALYSIS, or FINA 5376 FINANCIAL DATA ANALYTICS
- An MS foundations course or elective approved by advisor.

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete non-elective requirements for BBA/BS including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS	
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	
MANA 3318	MANAGING ORGANIZATIONAL BEHAVIOR	
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	
or BSTAT 3322	ADVANCED STATISTICS FOR BUSINESS ANALYTICS	
Complete elective requirements for BBA/BS including the following, which also count toward the MS:		24
FINA 5323	INVESTMENTS	
FINA 5351	FINANCIAL MODELING FOR INVESTMENTS	
or FINA 5352	FINANCIAL MODELING FOR CORPORATE ANALYSIS	
or FINA 5376	FINANCIAL DATA ANALYTICS	
An MS foundations course or elective approved by advisor.		
MS Foundations		
FINA 5327	FINANCIAL DERIVATIVES	3
FINA 5350	MATHEMATICAL FINANCE	3
Select all of the following not completed in BBA/BS:		6
FINA 5351	FINANCIAL MODELING FOR INVESTMENTS	
FINA 5352	FINANCIAL MODELING FOR CORPORATE ANALYSIS	
FINA 5376	FINANCIAL DATA ANALYTICS	
ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I	3
INSY 5336	PYTHON PROGRAMMING	3
MS Electives		
Select 9 hours if elective course is taken in baccalaureate program; if a foundations course is taken, select 12.		9
Total Hours		**147**

Bachelor of Business Administration in Real Estate to Master of Science in Real Estate Fast Track

About This Program

The Bachelor of Business Administration in Real Estate to Master of Science in Real Estate Fast Track enables outstanding senior undergraduate students in the College of Business to satisfy degree requirements leading to the Real Estate MS while completing their undergraduate studies. Pathways are available from any undergraduate degree in the College that includes the required fast track foundations courses.

Associated Programs

For detailed information about the programs associated with this Fast Track, refer to their individual degree pages.

Real Estate BBA (p. 358)
Real Estate MS (p. 349)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- REAE 3325 REAL ESTATE FUNDAMENTALS
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS Real Estate program, students must complete the following graduate courses:

- REAE 5311 REAL ESTATE ANALYSIS
- REAE 5314 SEMINAR IN REAL ESTATE DEVELOPMENT
- REAE 5334 SEMINAR IN REAL ESTATE APPRAISAL

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete non-elective requirements for BBA including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS	
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	
REAE 3325	REAL ESTATE FUNDAMENTALS

Post-Baccalaureate Certificate in Real Estate Development

About This Program

In keeping with the mission of The University of Texas at Arlington to provide lifelong learning opportunities, the Department of Finance and Real Estate now offers a Post-Baccalaureate Certificate in Real Estate Development. The program of study is designed to provide qualified real estate professionals advanced instruction in real estate development and allow them to further their professional development. This post-baccalaureate certificate provides an educational opportunity that is narrower in scope, and shorter in duration, than graduate degree programs. It is ideal for people transitioning from one sector of real estate into real estate development, or those in the process of satisfying education requirements for various professional real estate licenses.

Competencies

1. Upon completion, students will possess the knowledge to navigate the municipal entitlement approval processes for platting and zoning.
2. Upon completion, students will describe the roles of service, finance and construction consultants in the development process.
3. Upon completion, students will possess oral and written communication skills to be able to communicate effectively with real estate professionals, city staff and consultants with proficiency.
4. Upon completion, students will possess the tools required to conduct a basic market analysis.

Admissions Criteria

Admissions to the Post-Baccalaureate Certificate in Real Estate Development is based upon the general graduate admission requirements of the University. Generally applicants must have an undergraduate grade point average of at least 2.9 as calculated by Graduate Admissions. A graduate grade point average is used when the applicant has attained at least 24 graduate semester hours.

Applicants whose undergraduate GPA was less than a 2.9 may still be admitted to the Graduate Certificate in Real Estate Development program by meeting the admissions requirements for the MS Real Estate program.

USE OF COURSES TOWARD DEGREE PROGRAM

Students that initially enroll in the Post-Baccalaureate Certificate in Real Estate Development may later use up to 15 hours of coursework from the Certificate program toward the Master of Science in Real Estate degree.

Bachelor of Business Administration in Finance

About This Program

The Bachelor of Business Administration in Finance provides in-depth study on the management of money and draws upon concepts from economics, statistics, and mathematics to help investors and mangers make sound financial decisions. Finance is generally classified into three areas: corporate finance, investments and securities, and financial institutions.

Competencies

1. Discipline-Specific Knowledge: Upon completion, undergraduate finance majors will understand theory and application in finance, investments, and financial institutions. This also encompasses basic finance principles such as the time value of money, risk and return, asset valuation, capital structure, and the functioning of financial institutions and markets.
2. Critical Thinking and Problem-Solving Skills: Upon completion, undergraduate finance majors will be able to think logically about financial management problems. They should be able to choose and implement appropriate models and interpret outcomes so as to generate creative solutions to these problems.
3. Communication Skills: Upon completion, undergraduate finance majors will be able to communicate effectively, both orally and in writing. They should understand basic concepts of effective writing and public speaking.
4. Information Technology: Upon completion, undergraduate finance majors will be able to apply information technologies effectively.

Curriculum

Students must meet all lower-division requirements before enrolling for upper-division courses. Specified prerequisites are designated for certain courses.

Foundations	
General Core Requirements (p. 46)	42
Students are required to complete specific courses in certain core areas.	
For Communication select:	

ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Mathematics select:		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
For Social & Behavioral Sciences select:		
ECON 2305	PRINCIPLES OF MACROECONOMICS	
For Component Area Option select:		
ECON 2306	PRINCIPLES OF MICROECONOMICS	
Business Foundations		
UNIV 1101	CAREER PREPARATION AND STUDENT SUCCESS	1

REAE 4319	REAL ESTATE FINANCE
REAE 4321	REAL ESTATE INVESTMENT

DOUBLE MAJORS

Four Double Major options for the Bachelor of Business Administration (BBA) in Finance are available. Finance undergraduates who pursue one of the following Double Major programs will not have the option of participating in the Fast Track Program in Business.

Completion of the Double Major is attained by including all of the following courses in the BBA Finance plan and completing with grades of C or better in each of the double major courses listed below:

BBA in Finance and Accounting

Accounting Specialization		
ACCT 3303	INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS	3
ACCT 3311	FINANCIAL ACCOUNTING I	3
ACCT 3312	FINANCIAL ACCOUNTING II	3
ACCT 3315	PRINCIPLES OF FEDERAL INCOME TAX	3
ACCT 4302	COST ANALYSIS AND DECISION MAKING	3
ACCT 4318	AUDITING	3
ACCT 4304	MANAGEMENT PLANNING AND CONTROL	3
or ACCT 4325	GOVERNMENTAL ACCOUNTING	
Total Hours		**21**

BBA in Finance and Economics

Economics Specialization		
ECON 3303	MONEY AND BANKING	3
ECON 3310	MICROECONOMICS	3
ECON 3312	MACROECONOMICS	3
ECON 3317	ECONOMIC DATA LITERACY & VISUALIZATION	3
ECON 4300	ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS	3
or BCOM 4380	ADVANCED COMMUNICATIONS FOR BUSINESS	
Select any 3000/4000 level Economics course.		6
Total Hours		**21**

BBA in Finance and Real Estate

Real Estate Specialization		
BLAW 3314	REAL ESTATE LAW	3
REAE 3325	REAL ESTATE FUNDAMENTALS	3
REAE 4319	REAL ESTATE FINANCE (Advanced Finance Elective)	3
REAE 4334	REAL ESTATE APPRAISAL	3
Select any 3000/4000 level Real Estate course.		6
Total Hours		**18**

BBA in Finance and Marketing

Marketing Specialization		
MARK 3324	CONSUMER BEHAVIOR	3
MARK 4311	MARKETING RESEARCH	3
MARK 4322	ADVANCED MARKETING MANAGEMENT AND STRATEGY	3
Select any 3000/4000 level Marketing course.		6
Total Hours		**15**

Bachelor of Business Administration in Real Estate

About This Program

The Bachelor of Business Administration in Real Estate program provides the foundation and knowledge for students to develop real estate decision-making skills and critically analyze real estate opportunities.

Competencies

1. Discipline Specific Knowledge: Undergraduate real estate majors should understand theory and application in real estate, investments, and financial institutions. This also encompasses basic finance principles such as the time value of money, risk and return, asset valuation, capital structure, and the functioning of financial institutions and markets.
2. Critical Thinking and Problem-Solving Skills: Undergraduate real estate majors should be able to think logically about financial management problems in real estate. They should be able to choose and implement appropriate models and interpret outcomes so as to generate creative solutions to these problems.
3. Communication Skills: Undergraduate real estate majors should be able to communicate effectively, both orally and in writing. They should understand basic concepts of effective writing and public speaking.
4. Information Technology: Undergraduate real estate majors should be able to apply information technologies effectively. These technologies include word processing, spreadsheets, statistical and financial software, e-mail, and networks.

Curriculum

Students must meet all lower-division requirements before enrolling for upper-division courses. Specified prerequisites are designated for certain courses.

Certificate in Banking

About This Program

The Certificate in Banking prepares students for various roles in the commercial banking industry, such as credit analyst, relationship manager, business banker, loan officer, compliance officer, financial examiner, commercial real estate lender, business development manager, and risk manager. It gives students an in-depth understanding of banking principles, banking organizational structure and operations, financial instruments, and regulatory frameworks. The curriculum provides students with a comprehensive understanding of financial institutions and markets in the United States and teaches various applications relevant specifically to the banking industry using financial and accounting principles. Applying marketing and consultative sales principles provides students with skills to present banking products and services to clients and prospects of commercial banks. The Banking Certificate program is available to all business majors and other students with necessary accounting and finance prerequisites.

Competencies

1. Upon completion, students will understand financial statements and analyze cash flows using financial ratios.
2. Upon completion, students will be able to employ quantitative problem-solving techniques to evaluate key banking services such as granting loans and accepting deposits.
3. Upon completion, students will be able to identify, manage, and assess various forms of financial risks.
4. Upon completion, students will be able to maintain and develop relationships with bank customers.

Admissions Criteria

UT Arlington undergraduates in good standing (meeting a minimum cumulative GPA of 2.25) may earn the certificate. Non-degree seeking (certificate only) students must have gained admission to UT Arlington as non-degree/non-enrolled students. Prerequisites are required for the courses that need to be completed to earn the certificate.

Curriculum

Foundations		
ACCT 3308	FINANCIAL STATEMENT ANALYSIS FOR BANKING	3
FINA 3317	FINANCIAL INSTITUTIONS AND MARKETS	3
FINA 4317	LENDING AND CREDIT ANALYSIS	3
SALES 3344	SELLING FINANCIAL SERVICES AND PRODUCTS	3
Elective		
Select one from the following:		3
FINA 4315	ADVANCED BUSINESS FINANCIAL ANALYSIS	
FINA 4319	FINANCIAL DERIVATIVES	
FINA 4351	FINANCIAL MODELING	
FINA 4393	FINANCE INTERNSHIP	
REAE 4319	REAL ESTATE FINANCE	
Total Hours		**15**

Program Completion

Students must have a GPA of 2.25 or better in the five courses of the certificate. They must have a grade of C or higher in each of the five courses.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Information Systems and Operations Management

Department Overview

The Department of Information Systems and Operations Management (ISOM) offers a rich environment for studying and excelling in the fields of technology and/or operations. Students learn the business and technical skills for a more effective and efficient organization. Faculty are dedicated to teaching and nurturing students to help them achieve their full potential. ISOM fosters relationships with the community and works closely with industry to address their technology and operations needs.

The ISOM Department offers the BBA in Information Systems, BBA in Operations and Supply Chain Management, BS in Business Analytics, BS in Information Systems, an MS in Business Analytics, an MS in Information Systems, and a PhD in Business Administration with emphasis in Operations and Supply Chain Management or Information Systems. Students are prepared for a variety of careers in these fields.

COURSES

BANA 3308. INTRODUCTION TO BUSINESS ANALYTICS. 3 Hours.
This course introduces students to data mining and business analytics techniques that will enable them to draw actionable insights from data. In addition to tracing the evolution of ideas in Artificial Intelligence (AI), Machine Learning (ML), and Deep Learning (DL), the course provides hands-on exposure to state-of-the-art machine learning algorithms-such as linear, ensemble, and neural network models-that organizations rely on to derive business value. Prerequisite: BSTAT 3321 and INSY 3300.

BANA 3309. DATA VISUALIZATION AND BUSINESS INTELLIGENCE. 3 Hours.
This course introduces students to cutting-edge techniques for visualizing data and creating dashboards to facilitate data-driven decision making. Topics include fundamentals of SQL, preprocessing of data, examining principles and concepts underlying visual characteristics of data, exploring graphs and charts to draw insight from data, assessing the quality of datasets, and performing exploratory analysis. Creating dashboards and storytelling to communicate business insight will also be emphasized. Prerequisite: BSTAT 3321 and INSY 3300.

BANA 4308. ADVANCED DATA SCIENCE. 3 Hours.
This course provides an in-depth understanding of machine learning concepts and algorithms using Python. Students will receive hands-on training on supervised learning algorithms such as KNN, Naïve Bayes, Linear and Logistic Regression, Support Vector Machines, Decision Trees and Ensembles, and Artificial Neural Networks (ANNs). The course will also cover foundations of Natural Language Processing (NLP) and unsupervised learning algorithms such as K-Means, Hierarchical Clustering, and DBSCAN. Prerequisite: BANA 3308 and BANA 3309.

BANA 4311. ETHICAL AND SOCIAL ISSUES IN DATA SCIENCE. 3 Hours.
This course discusses ethical concerns and social issues related to the creation, storage, analysis, use, and dissemination of data arising from business applications of machine learning, artificial intelligence, predictive analytics and data science. Topics include fairness, validity, anonymity, privacy, ownership, human subject research and societal consequences of data analysis and use by business organizations. Prerequisite: BANA 3308.

BANA 4326. CAPSTONE IN BUSINESS ANALYTICS. 3 Hours.
This course covers advanced analytics techniques, such as Natural Language Processing, Deep Learning, and Reinforcement Learning. It also provides students an opportunity to apply their analytics skills to solve a real-world problem and present the efficacy of their solution from a business perspective. Communication and presentation skills will be emphasized. Prerequisite: BANA 4308.

BANA 4331. SEMINAR IN BUSINESS ANALYTICS. 3 Hours.
The course will be taught in a seminar style and will involve readings and discussions on advanced/special topics in Business Analytics. It may be repeated for credit with the consent of the department. Prerequisite: 60 or 90 credit hours and consent of instructor.

BANA 4393. BUSINESS ANALYTICS INTERNSHIP. 3 Hours.
The course will allow students to apply analytics concepts and principles to problems in a real-world setting. The course may be used as an advanced business elective only and will be graded on a pass/fail basis. No credit will be given for previous experience or activities. The course may not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

COURSES

BSTAT 2305. INTRODUCTORY STATISTICS FOR BUSINESS ANALYTICS. 3 Hours. (TCCN = BUSI 2305)
Guiding business and economic decision-making with the use of descriptive and inferential statistical techniques. Topics include the collection, description and summarization of business and economic data; probability as a foundation of business intelligence; discrete and continuous random variables, their probability and sampling distributions, and their application in business analytics; estimation and confidence intervals for (and tests of hypotheses regarding) the population mean in business settings; and correlation and linear regression analysis as business decision-making tools. Software is used to conduct analyses throughout the course.

BSTAT 3321. INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS. 3 Hours.
Informing business and economic decision-making with intermediate-level tools of business analytics. Topics can include the quality and representativeness of data; conditional probability; statistical independence; business applications of discrete and continuous probability distributions at the intermediate level; multiple-population inference; non-parametric methods; and intermediate regression analysis. Both spreadsheet and statistical software are used to conduct analyses throughout the course. Prerequisite: MATH 1308 or BSTAT 2305.

BSTAT 3322. ADVANCED STATISTICS FOR BUSINESS ANALYTICS. 3 Hours.
Advanced statistical methods oriented toward predictive analytics and multivariate methods in business settings. Topics can include experimental design; regression cross-validation; logistic regression; classification and regression trees; cluster analysis; factor analysis and multi-dimensional scaling; and time series analysis and forecasting. Prerequisite: BSTAT 3321.

BSTAT 5301. FOUNDATIONS OF ANALYTICS. 3 Hours.
Introduction to statistical learning for business analytics, designed to prepare graduate students to become competent consumers of data analytics and statistical information that they will encounter in their professional and personal lives. Students should be able to perform basic statistical analyses and to think critically when interpreting statistical results. Topics include data visualization, spreadsheet analytics, descriptive statistics, probability, estimations, hypothesis testing, and simple regression.

BSTAT 5303. QUANTITATIVE ANALYSIS. 3 Hours.
Study of the methods of quantitative analysis used in business administration. Topics include matrix algebra, systems of linear equations, differential and integral calculus, linear programming, classical optimization, and a survey of management science models. Prerequisite: MATH 1315.

BSTAT 5325. ADVANCED METHODS FOR ANALYTICS. 3 Hours.
Advanced statistical learning for business analytics designed to prepare graduate students to become competent producers and consumers of predictive analytics and statistical information and to use evidenced based managerial decision making in their careers. They should be able to recognize the strengths and weaknesses of applicable techniques and when additional expertise is required. Topics include multiple regression, correlation, logistic regression, discriminant analysis, clustering, and classification and regression trees. It is strongly recommended that students who have no recent courses in statistics take BSTAT 5301 prior to BSTAT 5325.

BSTAT 5330. Nonparametric Statistics. 3 Hours.
A survey of statistical tools which may be used when the normal assumptions of parametric statistics cannot be made; including procedures for categorical data, methods involving ranks, bootstrapping, and Kolmogorov-Smirnov type techniques. Cross-listed with BSAD 6330. Prerequisite: BSTAT 5325 or equivalent.

BSTAT 5360. COMPUTATIONAL TECHNIQUES FOR BUSINESS ANALYTICS. 3 Hours.
Computer software is the primary analytical tool for business analytics and modern research methods. Data analysts, statisticians, and researchers need technologies and skills using the computer as a tool for structuring and cleaning data sets, creating validation samples, conducting analyses, fitting models, simulating stochastic systems, model validation, and model presentation. Emphasis is placed on the use of data analytic software. Cross-listed with INSY 5360. Prerequisite: BSTAT 5325 or equivalent.

BSTAT 5392. SELECTED TOPICS IN BUSINESS STATISTICS. 3 Hours.
In-depth study of selected topics in business statistics. May be repeated when topics vary.

BSTAT 5399. GRADUATE BUSINESS ANALYTICS INTERNSHIP. 3 Hours.
Practical training in business statistics. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

BSTAT 6382. INDEPENDENT STUDIES IN BUSINESS STATISTICS. 3 Hours.
Extensive analysis of a business statistics topic.

COURSES

INSY 2303. INTRODUCTION TO M.I.S. AND DATA PROCESSING. 3 Hours. (TCCN = BCIS 1305)
Introduction to business data processing, computer programming, management information systems, and problems involved in business information processing systems. Selected software tools are presented and managerial applications are required. Formerly BUSA 2303; credit will be granted only once.

INSY 3300. INTRODUCTION TO PROGRAMMING. 3 Hours.
An introductory programming course that teaches students how to solve business problems using the scripting language, Python. Students will be exposed to object-oriented programming concepts, file handling, database access, and graphical user interfaces. Prerequisite: INSY 2303.

INSY 3303. COMPUTER NETWORKS AND DISTRIBUTED COMPUTING. 3 Hours.
Concepts of computer networks and data communications. Topics include principles of communication and networking protocols, hardware and software, architectures, and management issues. Formerly INSY 4304; credit will be granted only once. Prerequisite: INSY 2303.

INSY 3304. DATABASE MANAGEMENT SYSTEMS. 3 Hours.
Comprehensive coverage of database technology and applications. Data models, query processing (SQL), relational database design, and implementation. Topics covered are hierarchical, network, relational, and object-oriented models, data dictionaries, distributed databases, evaluation and selection of database management systems (DBMS), and data administration. Formerly INSY 4302; credit will be granted only once. Prerequisite: INSY 3300.

INSY 3305. INFORMATION SYSTEMS ANALYSIS AND DESIGN. 3 Hours.
This is a survey of the concepts and methods of information systems analysis and design, system development life cycle (SDLC) and methodologies associated with the SDLC. Course covers feasibility analysis, requirements definition, systems design, data design, coding design, programming, and implementation. Prerequisite: INSY 3304 and INSY 4305. INSY 4305 may be taken concurrently.

INSY 3330. INTRODUCTION TO E-COMMERCE. 3 Hours.
Examines current and projected developments in electronic commerce. Topics include the information technologies upon which electronic commerce is based, such as the telecommunications infrastructure; new perspectives on space, time and money in business; electronic consumers and advertising; the effect of e-commerce on logistics and supply chain management; electronic financial markets and digital payment mechanisms; marketing through digital storefronts and virtual corporations; new frontiers of business such as electronic auctions and business to business e-commerce; the relationship between e-commerce and successful business strategy; and finally, public policy. Formerly BUSA 3330; credit will be granted only once. Prerequisite: INSY 2303.

INSY 4191. STUDIES IN INFORMATION SYSTEMS. 1 Hour.
Advanced studies, on an individual basis, in the various fields of information systems. May be repeated for credit with consent of department chair. Prerequisite: Senior standing and permission of instructor.

INSY 4291. STUDIES IN INFORMATION SYSTEMS. 2 Hours.
Advanced studies, on an individual basis, in the various fields of information systems. May be repeated for credit with consent of department chair. Prerequisite: 90 credit hours and permission of instructor.

INSY 4305. ADVANCED APPLICATION DEVELOPMENT. 3 Hours.
This is a comprehensive Java programming course that not only covers the fundamental object-oriented programming (OOP) topics but also includes advanced Java programming concepts. Topics include structured programming concepts like control structures and methods as well as OOP concepts like encapsulation, composition, inheritance, polymorphism, dynamic binding, and interfaces. The course will also cover Swing components, exception and error handling, and the basics of file processing. Prerequisite: INSY 3300.

INSY 4306. ADVANCED SYSTEMS DEVELOPMENT. 3 Hours.
This course will address systems development, testing and deployment using Java. Students will be exposed to advanced Java concepts, including networking, multithreading, JDBC, advanced file handling, and regular expressions. The course will also cover web services and test-driven development using JUnits. Prerequisite: INSY 4305 and INSY 3305. INSY 3305 may be taken concurrently.

INSY 4307. CLOUD COMPUTING. 3 Hours.
This course teaches fundamental aspects of Cloud Computing including Virtualization, Cloud Infrastructure, Networking, and Autoscaling. Students will be taught both concept and practical skills through hands-on assignments using a major Cloud provider's environment (a base for Cloud certifications). Prerequisite: INSY 3300 or equivalent.

INSY 4312. INTRODUCTION TO CYBERSECURITY. 3 Hours.
This course provides an introduction to the field of Information Security. It covers terminology, history, management, technology and practice of Information Security. It will address topics in many of the Security Domains specified by ISC2. Prerequisite: INSY 3303.

INSY 4313. BLOCKCHAIN TECHNOLOGY. 3 Hours.
Students are introduced to fundamental concepts of blockchain technology. First, second, and third generation blockchain technologies are discussed. Students are also assigned case studies and recent research on blockchain to learn the latest developments in the industry.

INSY 4315. ADVANCED WEB DEVELOPMENT. 3 Hours.
Concepts and techniques for Web application development. The course will emphasize the use of Web development tools and techniques to develop web applications. Topics include web application development using technologies such as HTML/DHTML/XHTML, client-side scripting, XML/XSL and server-side scripting. Prerequisite: INSY 3300.

INSY 4321. MOBILE APP DEVELOPMENT. 3 Hours.
This course will provide a broad introduction to principles, techniques, and best practices needed to build user experiences for the web, mobile devices, and desktop environments. Coverage includes User Design, layouts, UX testing plans, and execution. The course focuses on using Cross-Platform Application Development to build native apps on multiple platforms like Android, iOS, and Windows. Students will use contemporary tools to build basic Multi-platform App UI. Prerequisite: INSY 3300.

INSY 4324. ENTERPRISE BUSINESS PROCESS DESIGN. 3 Hours.
This course introduces the concepts and practices of business process design and the execution of common business processes in enterprise resource planning (ERP) systems. Students will learn to describe key business processes, identify integration points across business processes, and understand the cross-functional nature of business processes. Prerequisite: Junior standing.

INSY 4325. ENTERPRISE SYSTEMS MANAGEMENT. 3 Hours.
Enterprise systems allow for the integration of firm-wide information. This course focuses on applying IT to satisfy the needs of an organization, and to improve its performance. Knowledge of enterprise systems and how to implement and manage them is essential for managers and for making better decisions. Through case studies and research projects, this course addresses various aspects of enterprise systems and their management, including data integration and standardization. It will also cover advanced topics such as data analytics, cloud computing, Blockchain, AI, and security and privacy. Prerequisite: Prerequisite or concurrent enrollment: INSY 3305 or BANA 4308.

INSY 4331. SEMINAR IN INFORMATION SYSTEMS. 3 Hours.
Readings and discussion of special topics in information systems. May be repeated for credit with consent of department. Prerequisite: 60 or 90 credit hours and consent of instructor.

INSY 4391. STUDIES IN INFORMATION SYSTEMS. 3 Hours.
Advanced studies, on an individual basis, in the various fields of information systems. May be repeated for credit with consent of department chair. Prerequisite: 90 credit hours and permission of instructor.

INSY 4393. INFORMATION SYSTEMS INTERNSHIP. 3 Hours.
Practical training in information systems. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

INSY 5182. INDEPENDENT STUDIES IN INFORMATION SYSTEMS. 1 Hour.
Extensive analysis of an information systems topic. Prerequisite: permission of instructor.

INSY 5199. GRADUATE INFORMATION SYSTEMS INTERNSHIP. 1 Hour.
Practical training in information systems. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

INSY 5299. GRADUATE INFORMATION SYSTEMS INTERNSHIP. 2 Hours.
Practical training in information systems. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

INSY 5303. MANAGEMENT OF INFORMATION TECHNOLOGIES. 3 Hours.
This course equips students with a comprehensive understanding of organizational information technologies and systems. It examines their roles and impacts within organizations, key management challenges, the strategic implications of technology, and best practices for leveraging IT to enhance decision-making and competitive advantage. By analyzing critical technologies and real-world applications, students will develop the skills needed to manage information systems effectively and navigate the complexities of IT-driven organizational change in a competitive environment. Prerequisite: MBA classification or consent of the instructor.

INSY 5309. OBJECT-ORIENTED BUSINESS PROGRAMMING. 3 Hours.
Topics include fundamental programming structures, objects and classes, inheritance, and other basic concepts related to OO programming.

INSY 5335. APPLIED DATABASE MANAGEMENT. 3 Hours.
Concepts, tools, and technologies associated with the design, implementation and management of large databases are presented. Topics include data models (with emphasis on E/R model and relational model), database design and implementation, database query language, transaction management, and distributed databases. Recent advances in data management are also discussed. Use of a commercial DBMS is required. Prerequisite: INSY 5309 or INSY 5336 or approval of MSIS Graduate Advisor.

INSY 5336. PYTHON PROGRAMMING. 3 Hours.
An introductory programming course that teaches students how to solve business problems using the scripting language, Python. Students will be exposed to object-oriented programming concepts, file handling, database access, and graphical user interfaces.

INSY 5337. DATA WAREHOUSING AND BUSINESS INTELLIGENCE. 3 Hours.
This course covers concepts, tools, and technologies associated with the design and implementation of data warehousing (DW) and business intelligence (BI) applications. Topics covered include data warehouse architecture and infrastructure, dimensional modeling, Extraction Transformation and Loading (ETL), On Line Analytical Processing (OLAP), data quality, and planning and implementation of a DW & BI application. The course objectives are met through a combination of lectures, class projects and homework assignments. Hands-on experience in developing and deploying a DW & BI application is provided. Prerequisite: INSY 5335 or consent of graduate advisor.

INSY 5339. PRINCIPLES OF BUSINESS DATA MINING. 3 Hours.
This course will cover the foundations of business data mining. It will examine tools and techniques from the fields of machine learning and statistics used in practical data mining for finding, and describing, structural patterns in data. Topics may include: Knowledge representation and different types of data; Techniques for data pre-processing, cleaning, reduction, transformation, and visualization; Methods for Classification, Clustering, and Association Rules, including Decision Trees, Rules, Naive Bayes, k Nearest Neighbor, Neural Networks, Regression (linear & logistic), A-Priori, K-means, and hierarchical and density-based clustering; Performance evaluation of data mining algorithms using metrics. This course uses real world data sets and widely used statistical packages and programming languages. Prerequisite: BSTAT 5325 or equivalent.

INSY 5341. ANALYSIS AND DESIGN. 3 Hours.
Analysis and design phase of systems development life cycle. Topics include systems survey, functional specification, interface specification, data design, program design, system testing, and implementation. Prerequisite: INSY 5335.

INSY 5342. ADVANCED SYSTEMS DESIGN. 3 Hours.
This course provides an understanding of state-of-the-art software development methodologies, including those that are fast emerging. The focus will be on how these new methods differ from traditional practices and what research opportunities they afford to IS researchers. There will be a strong emphasis on technical as well as on socio-technical aspects of software development in the context of these new methodologies. Prerequisite: INSY 5341.

INSY 5343. DATA COMMUNICATIONS AND NETWORKING. 3 Hours.
This course discusses technological and managerial issues related to building and managing networks that meet organizational needs, maximize competitive advantage, and protect networks and data from cyber security threats. It addresses fundamental concepts and applications related to data communications and networking including topics such as server architecture, network and transport layers, network design processes and tools, wired and wireless networking, and network security and management.

INSY 5344. BUILDING RESPONSIBLE AND ETHICAL AI APPLICATIONS. 3 Hours.
This course uses a combination of lectures and hands-on exercises to introduce students to the challenges of bias (in data and algorithms), transparency, accountability, explainability, and ethics in Artificial Intelligence (AI) and Machine Learning (ML) applications. Upon successful completion of the course, students will be able to detect biases in data, build explainable AI/ML applications, evaluate applications for fairness, and address ethical concerns associated with the deployment of AI systems. Prerequisite: INSY 5339.

INSY 5345. CLOUD COMPUTING - THEORY AND PRACTICE. 3 Hours.
Cloud Computing has become an important component in Digital Transformation and Analytics. This course covers technical aspects of Cloud Computing including Software Defined Networking, Virtual Machines, Data Storage, Cybersecurity, APIs, Load Balancing, Auto-Scaling, Containers, etc. In addition to learning concepts, students will also obtain the highly demanded technical skills through hands-on assignments using a major Cloud provider's environment (a base for Cloud certifications). Business aspects from the Cloud providers' and users' perspectives will also be addressed. Prerequisite: INSY 5336 or equivalent. May be taken concurrently.

INSY 5346. BUSINESS INNOVATION THROUGH BLOCKCHAIN TECHNNOLOGY. 3 Hours.
This course covers topics on components of blockchains, cryptocurrencies, smart contracts, tokens, and blockchain governance. Issues such as whether, how, and why businesses in a variety of industries are exploring Blockchain technology to devise potentially disruptive business strategies are also discussed.

INSY 5347. PRINCIPLES OF CYBER SECURITY. 3 Hours.
This course introduces fundamental concepts, terminologies, models, and practices in cyber security. It addresses managerial, technological, legal, and socio-political issues related to cyber security, and discusses how different fields of disciplines interact in this area. The course covers the common Body of Knowledge of security certification exams. Topics include emerging technologies and the risks, threats, and vulnerabilities associated with the digital world; ethical, legal, and social aspects of cyber security; risk management; security investigation and analysis. Prerequisite: INSY 5343. May be taken concurrently with INSY 5343.

INSY 5348. AI AND ANALYTICS FOR MANAGERS. 3 Hours.
Artificial Intelligence and Machine Learning (AI/ML) technologies offer new opportunities to analyze data, automate business processes, and transform business organizations. This course provides a broad overview of AI/ML technologies and their applications to solve business problems and support managerial decision making. Strategic and operational issues in deploying AI/ML technologies and creating a data-driven decision-making culture within the organization are discussed. A combination of classroom lectures and case analysis are used to provide a real-world perspective of operational and strategic issues related to development, deployment and management of AI/ML and data analytics technologies in business organizations.

INSY 5350. HEALTH CARE INFORMATION SYSTEMS. 3 Hours.
Addresses issues in the development, integration, and management of health care information systems. Specifically, topics in financial information systems, patient care systems, and health care delivery applications will be discussed. Both case studies and real life applications will be studied. Prerequisite: Cohort HCAD Major.

INSY 5352. TOPICS IN OBJECT TECHNOLOGY. 3 Hours.
Coverage of current topics in Object Technology to include the study of object-oriented agents, components, object request Brokers, distributed objects and related implementations of object-oriented software. Also includes the study of design patterns in object-oriented software design. Prerequisite: INSY 5309.

INSY 5355. MANAGING RISK IN INFORMATION SYSTEMS. 3 Hours.
This course provides a broad understanding of the fundamentals of risk management and applies them to the cyber security and digital risk management environments. It addresses how risk, threats, and vulnerabilities impact information systems, discusses strategies and approaches for mitigating risk, and introduces the anatomy of how to create a plan that reduces risk. Topics include risk management basics, risk assessment planning, risk mitigation planning, cost-benefit analysis, business continuity and disaster recovery planning. Prerequisite: INSY 5347.

INSY 5357. ENTERPRISE RESOURCE PLANNING. 3 Hours.
An introduction to enterprise resource planning (ERP), a business management paradigm that integrates all facets of the business, including planning, manufacturing, sales, finance and marketing. Course will cover both the methodology and practice of ERP using commercial software packages.

INSY 5360. COMPUTATIONAL TECHNIQUES FOR BUSINESS ANALYTICS. 3 Hours.
Computer software is the primary analytical tool for business analytics and modern research methods. Data analysts, statisticians, and researchers need technologies and skills using the computer as a tool for structuring and cleaning data sets, creating validation samples, conducting analyses, fitting models, simulating stochastic systems, model validation, and model presentation. Emphasis is placed on the use of data analytic software. Cross-listed with INSY 5360. Prerequisite: BSTAT 5325 or equivalent.

INSY 5373. INFORMATION SYSTEMS PROJECT MANAGEMENT. 3 Hours.
This course introduces students to the concepts and practices of project management and their importance to improving the success of information technology projects. Distinct aspects or characteristics of IT projects which cause these projects to behave differently in the corporate world than do other, non-technical, projects will be discussed.

INSY 5375. MANAGEMENT OF THE DIGITAL ENTERPRISE. 3 Hours.
This course explores the strategic applications of emerging digital technologies-including artificial intelligence, cloud computing, data analytics, blockchain, and the Internet of Things (IoT)-in driving business and societal transformations. Through in-depth analysis of a variety of real-world contemporary cases, and interactive presentations, students will gain practical insights into how firms harness digital tools to enhance decision-making, streamline operations, and create innovative business models. They will also learn how to evaluate and implement digital technologies that align with the business strategy and goals of an organization to ensure its long-term success.

INSY 5376. BIG DATA ANALYTICS. 3 Hours.
Machine Learning and Artificial Intelligence (AI) are transforming the way organizations harness data to draw business insights. This advanced course focuses on advanced machine learning techniques and deep learning algorithms. Students will receive hands-on training on deep learning models/architectures, including sequential and functional models, convolutional neural networks (CNNs), recurrent neural networks (RNNs), long-short term memory (LSTM), autoencoders, and adversarial networks. The foundations of distributed cluster-computing frameworks, including map-reduce and Spark will also be covered. Prerequisite: INSY 5378.

INSY 5377. WEB AND SOCIAL ANALYTICS. 3 Hours.
This course introduces the concepts, techniques, and tools of collecting and analyzing digital data on how users interface with an organization through the web and social media. The Internet and mobile technologies provide the vast sources of user data that describe or imply their behaviors, experiences, and attitudes. Analyzing these web (click) stream data and social media data serves the purposes of strengthening customer relationship management, improving online marketing (e.g. advertising, recommendation, pricing), and increasing the bottom line. The course will consist of lectures, case studies, hands-on exercises, and projects. Prerequisite: BSTAT 5325 or equivalent.

INSY 5378. DATA SCIENCE: A PROGRAMMING APPROACH. 3 Hours.
The world is awash in data and companies are now trying to discern patterns and predict behaviors of both consumers and competitors to gain and sustain a competitive advantage. This course provides an in-depth understanding of data preprocessing/feature engineering as well as machine learning concepts and algorithms using Python. Students will receive hands-on training on supervised learning algorithms such as KNN, Naïve Bayes, Linear and Logistic Regression, Support Vector Machines, Decision Trees and Ensembles, and Artificial Neural Networks (ANNs). The course will also cover the foundations of Natural Language Processing (NLP), Social Network Analysis, and unsupervised learning algorithms such as K-Means, Hierarchical Clustering, t-SNE, and DBSCAN. Prerequisite: INSY 5336 and INSY 5339.

INSY 5379. BUSINESS ANALYTICS CAPSTONE. 3 Hours.
This is a hands-on course that gives students an opportunity to apply their learning to real-world problems. Students will draw on their repertoire of analytical skills to work on one or more challenging projects. In-class discussions will include advanced topics in AI, Machine Learning, NLP, and other contemporary technologies. In addition to preparing a detailed report, students will present their findings to faculty and/or members of the business community. The course places considerable emphasis on problem-solving as well as on written and oral communication skills. Prerequisite: INSY 5378.

INSY 5380. SOCIAL NETWORK ANALYSIS. 3 Hours.
The enormous amount of data being generated by social networking sites as well as social media has the potential to provide insights into the behaviors of people and/or organizations. The course covers various aspects of social network analysis (SNA), including computation of structural characteristics of a network, analysis of ego and complete networks, position and role analysis, and statistical methods used in testing hypotheses related to social networks. In addition to covering the theoretical underpinnings of social networks, the course also emphasizes the analysis of real-world social network data using popular software applications/languages. Prerequisite: INSY 5336.

INSY 5382. INDEPENDENT STUDIES IN INFORMATION SYSTEMS. 3 Hours.
Extensive analysis of an information systems topic.

INSY 5392. SELECTED TOPICS IN INFORMATION SYSTEMS. 3 Hours.
In-depth study of selected topics in information systems. May be repeated when topics vary.

INSY 5398. THESIS. 3 Hours.
Graded F,R,P.

INSY 5399. GRADUATE INFORMATION SYSTEMS INTERNSHIP. 3 Hours.
Practical training in information systems. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

INSY 5698. THESIS. 6 Hours.
Graded F, R, P.

INSY 6182. INDEPENDENT STUDY IN INFORMATION SYSTEMS. 1 Hour.
Doctoral level study of information systems topics. Prerequisite: Doctoral standing.

INSY 6301. SEMINAR IN RESEARCH FOUNDATIONS. 3 Hours.
Integrative analysis of research in information systems, including research philosophies and methodologies, contemporary research topics, dissertation research and future directions for information systems research. Prerequisite: Doctoral standing.

INSY 6306. SEMINAR IN INFORMATION TECHNOLOGIES. 3 Hours.
Focuses on contemporary technology issues in IS development and deployment. Prerequisite: Doctoral standing and INSY 6301.

INSY 6307. SEMINAR IN IS MANAGEMENT. 3 Hours.
Focuses on managerial and organizational issues in IS. Prerequisite: Doctoral standing and INSY 6301.

INSY 6382. INDEPENDENT STUDIES IN INFORMATION SYSTEMS. 3 Hours.
Extensive analysis of an information systems topic.

INSY 6392. SELECTED TOPICS IN INFORMATION SYSTEMS. 3 Hours.
Advanced doctoral level topics in Information Systems. May be repeated when topics vary. Prerequisite: Doctoral standing.

COURSES

OPMA 3306. OPERATIONS MANAGEMENT. 3 Hours.
Introduction to concepts and problem-solving techniques important in operations management and production management. Topics include demand forecasting, capacity management, resource allocation, inventory management, supply chain management, quality control, project management. Prerequisite: Concurrent enrollment with BSTAT 3321 or BSTAT 3322.

OPMA 3308. OPERATIONS PLANNING AND CONTROL. 3 Hours.
Course covers operations planning and control systems in manufacturing and service organizations. Topics include inventory control, material requirements planning, Just-in-Time and lean manufacturing, production scheduling, capacity planning, operations planning and control software. Prerequisite: OPMA 3306.

OPMA 3310. PROJECT MANAGEMENT. 3 Hours.
Course covers concepts and issues important in effectively managing projects. Topics include project selection, project planning, negotiation, budgeting, scheduling, resource allocation, project control, project auditing, and project termination. Corequisite: OPMA 3306.

OPMA 4191. STUDIES IN OPERATIONS MANAGEMENT. 1 Hour.
Advanced studies, on an individual basis, in the various fields of operations management. May be repeated for credit with consent of department chair. Prerequisite: 90 credit hours and permission of instructor.

OPMA 4291. STUDIES IN OPERATIONS MANAGEMENT. 2 Hours.
Advanced studies, on an individual basis, in the various fields of operations management. May be repeated for credit with consent of department chair. Prerequisite: 90 credit hours and permission of instructor.

OPMA 4302. SUPPLY CHAIN LOGISTICS. 3 Hours.
Physical supply, in-plant movement and storage, and physical distribution which comprise logistics systems in industry. Topics include facility location, transportation, warehousing, inventory control, distribution networks, and logistics information systems. Prerequisite: OPMA 3306.

OPMA 4303. INTRODUCTION TO MANAGEMENT SCIENCES. 3 Hours.
Introduction to optimization and quantitative analysis of business problems. Topics include applications of linear and integer programming, network analysis, simulation, game theory, queuing theory, and other operations research tools. Prerequisite: OPMA 3306, may be taken concurrently.

OPMA 4307. QUALITY PLANNING AND ANALYSIS. 3 Hours.
Quality of products and services needed by society, to include consideration of quality costs and improvements, designing for quality, process controls, inspections, testing, acceptance sampling, management controls, and quality information systems. Prerequisite: OPMA 3306 and BUSA 3321/STAT 3321.

OPMA 4309. GLOBAL SUPPLY CHAIN MANAGEMENT. 3 Hours.
Course covers concepts and issues important in managing supply chains. A strategic view is taken of the way companies coordinate their operations with suppliers and customers in a global marketplace. The strategic use of information systems to better manage supply chains is also covered. Prerequisite: OPMA 3306 and OPMA 4302.

OPMA 4310. SUPPLY CHAIN ANALYTICS-THEORY AND PRACTICE. 3 Hours.
Analytics is used to assist decision makers to make well-informed data-driven decisions. The course covers Analytics techniques and tools used in Supply Chain. It covers various quantitative techniques and advanced technologies, such as data mining, big data, statistics, etc. In addition to learning concepts, students will also learn widely used advanced tools hands-on. Prerequisite: OPMA 3306 and basic computer knowledge.

OPMA 4312. PURCHASING MANAGEMENT. 3 Hours.
Examines the purchasing management role and responsibilities in the firm. This will cover issues of quality, solicitation techniques, source selection, pricing principles, legal aspects, value analysis, purchasing systems and ongoing administration of commercial, industrial and government contracts. Prerequisite: OPMA 3306 and OPMA 4302.

OPMA 4314. SERVICE OPERATIONS. 3 Hours.
Service operations make up the fastest-growing segment in economies throughout the developed world. This course is intended to help emerging business leaders understand challenges and opportunities inherent in the unique nature of service operations. This course emphasizes both strategic and tactical decision-making, with a focus on the effective design, delivery and improvement of service outputs. Prerequisite: OPMA 3306.

OPMA 4331. SEMINAR IN OPERATIONS MANAGEMENT. 3 Hours.
Readings and discussion of special topics in operations management. May be repeated for credit with consent of department chair. Prerequisite: Junior or senior standing and consent of instructor.

OPMA 4391. STUDIES IN OPERATIONS MANAGEMENT. 3 Hours.
Advanced studies, on an individual basis, in the various fields of operations management. May be repeated for credit with consent of department chair. Prerequisite: 90 credit hours and permission of instruction.

OPMA 4393. OPERATIONS MANAGEMENT INTERNSHIP. 3 Hours.
Practical training in operations management. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

OPMA 5199. GRADUATE OPERATIONS MANAGEMENT INTERNSHIP. 1 Hour.
Practical training in operations management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

OPMA 5299. GRADUATE OPERATIONS MANAGEMENT INTERNSHIP. 2 Hours.
Practical training in operations management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

OPMA 5321. INTRODUCTION TO MANAGEMENT SCIENCES. 3 Hours.
Introduction to optimization and quantitative analysis of business problems. Topics include applications of linear and integer programming, network analysis, simulation, game theory, queuing theory, and other operations research tools.

OPMA 5361. OPERATIONS MANAGEMENT. 3 Hours.
Introduction to concepts and problem-solving techniques important in production management and operations management. Topics include demand forecasting, capacity management, resource allocation, inventory management, supply chain management, quality control, and project management. Prerequisite: BSTAT 5301 or equivalent.

OPMA 5362. SERVICES OPERATIONS. 3 Hours.
Service operations make up the fastest-growing segment in economies throughout the developed world. This course is intended to help emerging business leaders understand challenges and opportunities inherent in the unique nature of service operations. This course emphasizes both strategic and tactical decision-making, with a focus on the effective design, delivery and improvement of service outputs. Prerequisite: OPMA 5361.

OPMA 5363. OPERATIONS PLANNING AND CONTROL. 3 Hours.
Course covers operations planning and control systems in manufacturing and service organizations. Topics include inventory control, material requirements planning, Just-In-Time and lean manufacturing, production scheduling, capacity planning, and operations planning and control software. Previous introductory course in operations management suggested.

OPMA 5364. PROJECT MANAGEMENT. 3 Hours.
Course covers concepts and issues important in effectively managing projects. Topics include project selection, project planning, negotiation, budgeting, scheduling, resource allocation, project control, project auditing, and project termination.

OPMA 5365. PURCHASING MANAGEMENT. 3 Hours.
Examines the purchasing management role and responsibilities in the firm. This will cover issues of quality, solicitation techniques, source selection, pricing principles, legal aspects, value analysis, purchasing systems and ongoing administration of commercial, industrial and government contracts. Prerequisite: OPMA 5361 and OPMA 5369.

OPMA 5367. QUALITY MANAGEMENT. 3 Hours.
Course focuses on quality of products and services needed by society. Topics include consideration of quality cost and improvements, designing for quality, process controls, inspections, testing, acceptance sampling, management controls, and quality information systems. Previous introductory course in statistics suggested.

OPMA 5368. GLOBAL SUPPLY CHAIN MANAGEMENT. 3 Hours.
Course covers concepts and issues important in managing supply chains. A strategic view is taken of the way companies coordinate their operations with suppliers and customers in a global marketplace. The strategic use of information systems to better manage supply chains is also covered. Previous introductory course in operations management suggested. Prerequisite: OPMA 5361 and OPMA 5369.

OPMA 5369. SUPPLY CHAIN LOGISTICS. 3 Hours.
Course covers physical supply, in-plant movement and storage, and physical distribution of materials, which comprise logistics systems in industry. Topics include facility location, transportation, warehousing, inventory control, distribution networks, and logistics information systems. Previous introductory course in operations management suggested. Prerequisite: OPMA 5361 or equivalent.

OPMA 5379. ORGANIZATIONAL RESEARCH PROJECT. 3 Hours.
Students conduct a research project at a local organization, focusing on applications of business concepts studied in their coursework. Prerequisite: Cohort MBA Major.

OPMA 5382. INDEPENDENT STUDIES IN OPERATIONS MANAGEMENT. 3 Hours.
Extensive analysis of an Operations Management topic.

OPMA 5389. INDEPENDENT STUDIES IN MILITARY ACQUISITION. 3 Hours.
This course is reserved for military officers in the Training with Industry or I-Grade programs at UT Arlington. Studies consist of an acquisition practicum with training at an assigned agency and a required seminar at UT Arlington.

OPMA 5392. SELECTED TOPICS IN OPERATIONS MANAGEMENT. 3 Hours.
In-depth study of selected topics in operations management. May be repeated when topics vary.

OPMA 5399. GRADUATE OPERATIONS MANAGEMENT INTERNSHIP. 3 Hours.
Practical training in operations management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities.

OPMA 5689. INDEPENDENT STUDIES IN MILITARY ACQUISITION. 6 Hours.
This course is reserved for military officers in the Training with Industry or I-GRAD programs at UT Arlington. Studies consist of an acquisition practicum with training at an assigned agency and a required seminar at UT Arlington.

OPMA 5989. INDEPENDENT STUDIES IN MILITARY ACQUISITION. 9 Hours.
This course is reserved for military officers in the Training with Industry or I-Grade programs at UT Arlington. Studies consist of an acquisition practicum with training at an assigned agency and a required seminar at UT Arlington.

OPMA 6370. SEMINAR IN OPERATIONS MANAGEMENT. 3 Hours.
Doctoral seminar that is a comprehensive and integrative study of operations management that focuses on theoretical frameworks, applications of models, and methods of analysis. Prerequisite: Doctoral standing.

OPMA 6371. INTEGRATED OPERATIONS STRATEGY AND RESEARCH. 3 Hours.
Linkages between the manufacturing and strategy development functions. Research issues within production/operations management. Current techniques/designs for achieving effective research. Prerequisite: Doctoral standing and previous introductory course in operations management suggested.

OPMA 6380. RESEARCH IN OPERATIONS MANAGEMENT. 3 Hours.
Independent research under the supervision of a faculty member. May be repeated for credit. Prerequisite: Doctoral standing.

OPMA 6382. INDEPENDENT STUDIES IN OPERATIONS MANAGEMENT. 3 Hours.
Extensive analysis of an operations management topic.

OPMA 6392. SPECIAL TOPICS IN OPERATIONS MANAGEMENT. 3 Hours.
Advanced doctoral level topics in Operations Management. May be repeated when topics vary. Prerequisite: Doctoral standing.

TRANSFER CREDIT

A maximum of 9 hours of advanced coursework may be transferred in from other AACSB-accredited schools if approved by the MSIS Graduate Advisor.

Master of Science in Business Analytics

About This Program

The Master of Science in Business Analytics is designed to prepare graduates to identify and implement opportunities for the strategic use of business analytics with an emphasis on business. Students gain knowledge of a broad range of disciplines and functions in the business as well as specialized knowledge of business analytics and its accompanying skill set. An intensive curriculum covering business intelligence, data mining, econometrics, marketing research, statistical techniques prepares students for careers in the field of business analytics.

Competencies

1. Upon completion, students will be able to perform feature engineering, including preprocessing both structured and unstructured data.
2. Upon completion, students will demonstrate an understanding of supervised and unsupervised algorithms, including the ability to build, tune, evaluate, and interpret various machine-learning models.
3. Upon completion, students will be able to align analytics solutions with business objectives.
4. Upon completion, students will be able to craft compelling data-driven narratives for business stakeholders.
5. Upon completion, students will be aware of the ethical implications of data use, including governance, fairness, bias, and transparency.

Admissions Criteria

Admission to the MS in Business Analytics (MSBA) program is based on completion of the general admission requirements of the Graduate School as specified under the Graduate Admissions Requirements and Procedures in the Catalog.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Graduate Studies Committee if they meet the following two criteria.

- Applicant holds an earned bachelor's degree from an AACSB-accredited college or university, or equivalent, with a minimum GPA of 3.00 on the last 60 hours of undergraduate work, and
- GMAT/GRE must have verbal and quantitative scores at the 50th percentile or higher.

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution;
- Score on the GMAT/GRE (including separate scores on the verbal and quantitative portions);
- Applicant's professional work experience and professional certification/licensure; and
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Studies Committee will evaluate an applicant's readiness to successfully complete the graduate program. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

Program Completion

The Master of Science in Business Analytics (MSBA) is a non-thesis program consisting of 33 semester hours to include the following required courses in the areas of business acumen and communication, data acquisition and architecture, and statistics and analytics. Electives sufficient to complete the program are selected with approval of the MSBA Graduate Advisor. When there is equivalent work/course experience, the student must meet with the MSBA Graduate Advisor to select alternate coursework.

Master of Science in Information Systems

About This Program

The Master of Science in Information Systems is designed to provide graduates with both a general knowledge of business and a specialized knowledge of information systems. Students are exposed to the theory, research, and practical applications of numerous information systems areas including management information systems, database management systems, systems analysis and design, and data communications; and may take electives in general systems concepts, electronic commerce, business analytics, problem formulation, computer science, management sciences, research, and other related fields. The program is designed to prepare students for information systems careers in business and industry, as well as in government and nonprofit organizations.

The Department of Information Systems and Operations Management provides two master's tracks: a thesis option and a thesis-substitute option. The thesis track provides preparation for entry into a PhD program. The thesis-substitute track provides the degree candidate greater flexibility in designing their program.

Competencies

1. Upon completion, students will be able to design and deploy data management systems to support business decision making and advanced analytics applications.
2. Upon completion, students will be able to plan, coordinate, and lead information systems projects, ensuring effective resource and team management.
3. Upon completion, students will be able to align IT initiatives with organizational goals, applying technology solutions to enhance business performance.
4. Upon completion, students will be able to employ analytical methods and critical thinking to address complex information systems challenges.
5. Upon completion, students will be able to develop and implement data governance, security, and privacy measures to protect organizational information assets.

Admissions Criteria

Admission to the MS in Information Systems (MSIS) program is based on completion of the general admission requirements as specified under the Graduate Admissions Requirements and Procedures in the Catalog.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Individuals who meet each of the following two conditions are given unconditional admission:

- Applicant holds an earned bachelor's degree from an AACSB-accredited college or university, or equivalent, with a minimum GPA of 3.00 on the last 60 hours of undergraduate work, and
- GMAT/GRE must have verbal and quantitative scores at the 50th percentile or higher.

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution;
- Score on the GMAT/GRE (including separate scores on the verbal and quantitative portions);
- Applicant's professional work experience and professional certification/licensure; and
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Studies Committee will evaluate an applicant's readiness to successfully complete the graduate program. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

INSY 5336	PYTHON PROGRAMMING	3
INSY 5373	INFORMATION SYSTEMS PROJECT MANAGEMENT	3
Thesis or Thesis Substitute Option		
Select one of the following options.		18-21
Thesis		18
Electives		
Select four courses numbered 5000 or higher with approval by the Graduate Advisor. [1]		
INSY 5698	THESIS	
Thesis Substitute		21
INSY 5375	MANAGEMENT OF THE DIGITAL ENTERPRISE	
Electives		
Select six courses numbered 5000 or higher with approval by the Graduate Advisor. [1]		
Total Hours		**30-33**

[1] Foundation courses may not be used as advanced electives.

Program Completion

THESIS OPTION

The MS Information Systems thesis student must be enrolled in six hours of thesis. Once the student is enrolled in the thesis course, continuous enrollment is expected. The student must be enrolled in six hours of thesis during the semester in which the thesis is defended and the final Master’s Examination is unconditionally passed. The degree candidate must defend the thesis in a final oral examination open to all members of the Faculty.

The thesis option consists of a minimum of 30 semester hours.

THESIS-SUBSTITUTE OPTION

The MS Information Systems thesis-substitute option electives can be chosen from a variety of offerings and can be customized to the student's interest. The student must meet with the MSIS Graduate Advisor to determine the appropriate coursework for the electives.

When there is equivalent coursework, the student must meet with the MSIS Graduate Advisor to select alternate coursework. An approved 3-credit hour graduate internship (INSY 5399 (https://catalog.uta.edu/search/?P=INSY%205399)) may also be taken as an elective. Students who do not have coursework in information systems will be required to take INSY 5309 or INSY 5336, INSY 5335, and INSY 5341 as part of their electives.

The non-thesis option consists of 33 semester hours.

BBA or BS in Business to Master of Science in Business Analytics Fast Track

About This Program

The Bachelor of Business Administration or Bachelor of Science in Business to Master of Science in Business Analytics Fast Track enables outstanding senior undergraduate students in the College of Business to satisfy degree requirements leading to Business Analytics MS while completing their undergraduate studies. Pathways are available from any undergraduate degree in the College that includes the required fast track foundations courses.

ASSOCIATED PROGRAMS

For detailed information about the programs associated with this Fast Track, refer to their individual degree pages.

Business Analytics BS (p. 387)

Economics BBA (p. 335)

Economics BS (p. 338)

Entrepreneurship BBA

Human Resource Management BBA (p. 411)

Information Systems BBA (p. 381)

Information Systems BS (p. 390)

International Business BBA (Chinese) (p. 310)

International Business BBA (French) (p. 312)

International Business BBA (German) (p. 314)

International Business BBA (Korean) (p. 316)

International Business BBA (Russian) (p. 319)

International Business BBA (Spanish) (p. 321)

Management BBA (p. 413)

Marketing BBA (p. 429)

Operations & Supply Chain Management BBA (p. 384)

Real Estate BBA (p. 358)

Business Analytics MS (p. 372)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- MANA 3318 MANAGING ORGANIZATIONAL BEHAVIOR
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS, students must complete the following graduate courses:

- BSTAT 5325 ADVANCED METHODS FOR ANALYTICS
- INSY 5336 PYTHON PROGRAMMING or INSY 5337 DATA WAREHOUSING AND BUSINESS INTELLIGENCE
- INSY 5339 PRINCIPLES OF BUSINESS DATA MINING

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program		
Complete non-elective requirements for BBA/BS including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS	
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	
MANA 3318	MANAGING ORGANIZATIONAL BEHAVIOR	
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	
or BSTAT 3322	ADVANCED STATISTICS FOR BUSINESS ANALYTICS	
Complete elective requirements for BBA/BS including up to three of the following, which also count toward the MS:		24
BSTAT 5325	ADVANCED METHODS FOR ANALYTICS	
INSY 5336	PYTHON PROGRAMMING	
INSY 5337	DATA WAREHOUSING AND BUSINESS INTELLIGENCE	
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	
MS Foundations

Post-Baccalaureate Certificate in Business Analytics

About This Program

The Post-Baccalaureate Certificate in Business Analytics is designed to enable students to acquire critical data science and analytics skills and apply these to solve traditional and new problems in their respective domains without having to enroll in a full Masters degree program.

Competencies

1. Upon completion, students will be proficient in Python for data analysis.
2. Upon completion, students will be able to apply statistical analysis and inference techniques to draw insights from structured and unstructured data.
3. Upon completion, students will be able to apply data-mining techniques to solve business problems.
4. Upon completion, students will be able to apply analytics techniques to draw insights from social media data.
5. Upon completion, students will be familiar with contemporary approaches to building responsible AI applications.

Admissions Criteria

Applicants qualify for admission into the Graduate Certificate in Business Analytics program if they meet the following admission criteria:

• An earned bachelor's degree from an accredited university, or equivalent, with a minimum GPA of 3.00 in the last 60 hours of undergraduate course work,

• 2 or more years of work experience in a related field, and

• Adequate quantitative skill demonstrated through college-level course work and/or work experience.

Curriculum

Foundations		
BSTAT 5325	ADVANCED METHODS FOR ANALYTICS	3
INSY 5336	PYTHON PROGRAMMING	3
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	3
INSY 5377	WEB AND SOCIAL ANALYTICS	3
or INSY 5344	BUILDING RESPONSIBLE AND ETHICAL AI APPLICATIONS	
Select one from the following:		3
INSY 5337	DATA WAREHOUSING AND BUSINESS INTELLIGENCE	
INSY 5378	DATA SCIENCE: A PROGRAMMING APPROACH	
ECON 5337	BUSINESS & ECONOMIC FORECASTING	
FINA 5376	FINANCIAL DATA ANALYTICS	
MANA 5329	HR METRICS AND ANALYTICS	
MARK 5337	MARKETING ANALYTICS AND INFORMATION MANAGEMENT	
Alternate elective with approval of graduate advisor		
Total Hours		**15**

Program Completion

Students must complete 15 graduate credit hours comprised of four required courses and one elective course, and maintain a grade point average of 3.0 or higher. All courses must be completed at UTA.

Course credit earned through the certificate can be used to meet course requirements for the MS Business Analytics (MSBA) if the student is accepted into the MSBA program.

Post-Baccalaureate Executive Certificate in Business Analytics

About This Program

In keeping with the mission of The University of Texas at Arlington to provide lifelong learning opportunities, the Department of Information Systems and Operations Management offers a Post-Baccalaureate Executive Certificate in Business Analytics. The program prepares management practitioners in advanced data analytics methodologies and enables them to practice data-driven decision making. This post-baccalaureate certificate provides an educational opportunity that is narrower in scope, and shorter in duration, than graduate degree programs. It is designed for working professionals who currently hold full-time employment and are interested in learning and applying business analytics techniques in their current roles but don't have the time or motivation to enroll in a full time traditional master's degree program. This program is usually offered in collaboration with a sponsoring organization.

Competencies

1. Upon completion, students will be proficient in performing feature engineering, including processing both structured and unstructured data.
2. Upon completion, students will demonstrate an understanding of supervised and unsupervised algorithms, including the ability to build, tune, evaluate, and interpret various machine-learning models.
3. Upon completion, students will be able to align analytics solutions with business objectives.
4. Upon completion, students will be proficient in using advanced Artificial Intelligence and Machine Learning techniques to solve real-world problems.

Admissions Criteria

To be considered for admission students must present the following:

- Bachelor's degree from an accredited university
- At least 3 years of relevant work experience
- Personal statement from the candidate
- Reference letter from supervisor/manager
- Successful interview with Program Advisor

Curriculum

Foundations		
BSTAT 5325	ADVANCED METHODS FOR ANALYTICS	3
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	3
INSY 5376	BIG DATA ANALYTICS	3

INSY 5378	DATA SCIENCE: A PROGRAMMING APPROACH	3
Total Hours		**12**

Program Completion

Students must complete 12 graduate credit hours and maintain a grade point average of 3.0 or higher. The certificate will be completed in about 6 months.

Students that initially enroll in the Executive Certificate in Business Analytics may later use up to 12 hours of coursework from the Certificate program toward the Master of Science in Business Analytics degree.

Bachelor of Business Administration in Information Systems

About This Program

The Bachelor of Business Administration in Information Systems provides students with a generalized business knowledge as well as specialized skills for addressing technical and operations needs of an organization. Students are prepared for a variety of jobs including business analyst, programmer/developer, systems designer, supply chain management, and operations process and control.

Competencies

1. Upon completion, students will be able to gather requirements for business applications and develop application software.
2. Upon completion, students will be able to design and implement databases to manage business data.
3. Upon completion, students will be able design and deploy computer networks to support business data communication.
4. Upon completion, students will demonstrate critical thinking and communication skills.

5. Upon completion, students will understand core business concepts in various functional areas and apply these concepts to develop, deploy, and manage information systems that effectively address strategic business challenges.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Foundations		
General Core Requirements (p. 46)		42
Students are required to complete specific courses in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Mathematics select:		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
For Social & Behavioral Sciences select:		
ECON 2305	PRINCIPLES OF MACROECONOMICS	
For Component Area Option select:		
ECON 2306	PRINCIPLES OF MICROECONOMICS	
Business Foundations		
Additional hours required in general education core.		2
UNIV 1101	CAREER PREPARATION AND STUDENT SUCCESS	1
or UNIV 1131	STUDENT SUCCESS	
MANA 1301	BUSINESS IN A GLOBAL ENVIRONMENT	3
ACCT 2301	PRINCIPLES OF ACCOUNTING I	3
ACCT 2302	PRINCIPLES OF ACCOUNTING II	3
BSTAT 2305	INTRODUCTORY STATISTICS FOR BUSINESS ANALYTICS	3
INSY 2303	INTRODUCTION TO M.I.S. AND DATA PROCESSING	3
BCOM 3360	EFFECTIVE BUSINESS COMMUNICATION	3
BLAW 3310	LEGAL AND ETHICAL ENVIRONMENT OF BUSINESS	3
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS	3
FINA 3313	BUSINESS FINANCE	3
MANA 3318	MANAGING ORGANIZATIONAL BEHAVIOR	3
MARK 3321	PRINCIPLES OF MARKETING	3
OPMA 3306	OPERATIONS MANAGEMENT	3
MANA 4322	STRATEGIC MANAGEMENT	3
Information Systems Specialization		
INSY 3300	INTRODUCTION TO PROGRAMMING	3
INSY 3303	COMPUTER NETWORKS AND DISTRIBUTED COMPUTING	3
INSY 3304	DATABASE MANAGEMENT SYSTEMS	3
INSY 3305	INFORMATION SYSTEMS ANALYSIS AND DESIGN	3
Select two Information Systems courses numbered 3000 or higher.		6
Advanced Electives		
Select five non-Information Systems business courses numbered 3000 or higher.		15
Select one Business or non-Business course numbered 3000 or higher. [1]		3
Total Hours		**120**

[1] The student concentrating in information systems is encouraged to take a computer science course as an outside elective. Required information systems electives and advanced business electives should be selected with the advice of an academic advisor.

DOUBLE MAJOR

A double major option for the Bachelor of Business Administration (BBA) in Information Systems is available. Information Systems undergraduates who pursue the following double major program will not have the option of participating in the fast track program in Business.

Completion of the double major is attained by including all of the following courses in the BBA Information Systems plan and completing with grades of C or better in each of the double major courses listed below.

BBA IN INFORMATION SYSTEMS AND ACCOUNTING

Accounting Specialization		
ACCT 3303	INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS	3
ACCT 3311	FINANCIAL ACCOUNTING I	3
ACCT 3312	FINANCIAL ACCOUNTING II	3
ACCT 3315	PRINCIPLES OF FEDERAL INCOME TAX	3
ACCT 4302	COST ANALYSIS AND DECISION MAKING	3
ACCT 4318	AUDITING	3
ACCT 4304	MANAGEMENT PLANNING AND CONTROL	3
or ACCT 4325	GOVERNMENTAL ACCOUNTING	
Advanced Electives		
Select one Economics course numbered 3000 or higher.		
Total Hours		**21**

Suggested Course Sequence

First Year

First Semester	Hours	Second Semester	Hours

College of Business Undergraduate Advising (https://www.uta.edu/academics/schools-colleges/business/undergraduate-advising/)

Bachelor of Business Administration in Operations & Supply Chain Management

About This Program

The Bachelor of Business Administration in Operations and Supply Chain Management provides a focus on business operations and supply chain networks used to create business value by improving the global supply chain. It focuses on understanding the many decisions directly related to the production and delivery of goods and services. These include strategic and routine decisions in both manufacturing and service organizations.

Competencies

1. Upon completion, students will demonstrate an understanding of the techniques necessary to run an organization at an operational, tactical and strategic level.
2. Upon completion, students will demonstrate an understanding of key supply chain, logistics, and purchasing processes and how to apply them to solve operations issues.
3. Upon completion, students will demonstrate the ability to write a report that communicates the concepts and methods of global supply chains and operations and their impact on corporate results.
4. Upon completion, students will demonstrate knowledge of statistical techniques for analyzing data and be able to apply them to support operational decision making.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Foundations		
General Core Requirements (p. 46)		42
Students are required to complete specific courses in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Mathematics select:		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
For Social & Behavioral Sciences select:		

ECON 2305	PRINCIPLES OF MACROECONOMICS	
For Component Area Option select:

OPTIONAL TRACKS FOR OPERATIONS AND SUPPLY CHAIN MANAGEMENT MAJORS

global supply chain management/international track

Students must select 15 hours from the following set of courses:

BLAW 4310	BASIC INTERNATIONAL LAW FOR BUSINESS	3
ECON 4306	COMPARATIVE ECONOMIC SYSTEMS	3
ECON 4321	INTERNATIONAL TRADE	3
FINA 4324	INTERNATIONAL CORPORATE FINANCE	3
MANA 4321	INTERNATIONAL MANAGEMENT	3
MARK 4325	INTERNATIONAL MARKETING	3

DOUBLE MAJORS

Two double major options for the Bachelor of Business Administration (BBA) in Operations and Supply Chain Management are available. Undergraduate students who pursue one of the following double major programs will not have the option of participating in the fast track program in Business.

Completion of the double major is attained by including all of the following courses in the BBA Operations and Supply Chain Management plan and completing with grades of C or better in each of the double major courses listed below:

BBA in OPERATIONS & supply chain management and mARKETING

Marketing Specialization

MARK 3324	CONSUMER BEHAVIOR	3
MARK 4311	MARKETING RESEARCH	3
MARK 4322	ADVANCED MARKETING MANAGEMENT AND STRATEGY	3
Select two Marketing courses numbered 3000 or higher.		6

Advanced Electives		
Select one Economics course numbered 3000 or higher.		3
Select one Accounting course numbered 3000 or higher.		3
Total Hours		**21**

BBA in OPERATIONS & supply chain management and mANAGEMENT

Management Specialization		
MANA 3319	CONTEMPORARY MANAGERIAL CHALLENGES	3
HRMN 3320	HUMAN RESOURCE MANAGEMENT	3
Select three Management courses numbered 3000 or higher.		9
Advanced Electives		
Select one Accounting course numbered 3000 or higher.		3
Select one Economics course numbered 3000 or higher.		3
Total Hours		**21**

BBA in OPERATIONS & supply chain management and ECONOMICS

Economics Specialization		
ECON 3303	MONEY AND BANKING	3
ECON 3310	MICROECONOMICS	3
ECON 3312	MACROECONOMICS	3
ECON 3317	ECONOMIC DATA LITERACY & VISUALIZATION	3
ECON 4300	ADVANCED COMMUNICATION FOR BUSINESS AND ECONOMIC PROFESSIONALS	3
or BCOM 4380	ADVANCED COMMUNICATIONS FOR BUSINESS	
Select two Economics courses numbered 3000 or higher.		6
Total Hours		**21**

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Bachelor of Science in Business Analytics

About the Program

Through the Bachelor of Science in Business Analytics students develop generalized business knowledge as well as specialized skills for addressing technical and operations needs of an organization. Students are prepared for a variety of jobs including business analyst, programmer/developer, systems designer, supply chain management, and operations process and control.

Competencies

1. Upon completion, students will be able to gather and preprocess data from various sources.
2. Upon completion, students will be able to employ data analysis and visualization techniques to support organizational decision making.
3. Upon completion, students will understand various machine learning techniques and their applications to solve business problems.
4. Upon completion, students will demonstrate critical thinking and communication skills.

5. Upon completion, students will understand core business concepts in various functional areas and be able to apply data analytics to support decision making in these areas.

Curriculum

Students must meet all lower division requirements before enrolling in upper division courses. Specified prerequisites are designated for certain courses.

Foundations		
General Core Requirements (p. 46)		42
Students must complete specific classes in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I

Bachelor of Science in Information Systems

About This Program

The Bachelor of Science in Information Systems is a recognized STEM program emphasizing the development and management of information technologies to improve business processes and support business strategies.

Competencies

1. Upon completion, students will be able to gather requirements for business applications and develop application software.
2. Upon completion, students will be able to design and implement databases to manage business data.
3. Upon completion, students will be able design and deploy computer networks to support business data communication.
4. Upon completion, students will demonstrate critical thinking and communication skills.
5. Upon completion, students will understand core business concepts in various functional areas and apply these concepts to develop, deploy, and manage information systems that effectively address strategic business challenges.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Minor in Business Analytics

About This Program

Students pursuing a Minor in Business Analytics receive a broad-based introduction to the technical and business concepts included within the field of business analytics and associated skill sets.

Competencies

1. Upon completion, students will be proficient in Python for data analysis.
2. Upon completion, students will be able to apply statistical analysis and inference techniques to draw insights from structured and unstructured data.
3. Upon completion, students will be proficient in creating visualizations and drawing business insights from them.
4. Upon completion, students will be able to apply machine-learning techniques to solve business problems.

Curriculum

Foundations		
BSTAT 3321	INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS [1,2]	3
INSY 3300	INTRODUCTION TO PROGRAMMING [1, 2]	3
BANA 3308	INTRODUCTION TO BUSINESS ANALYTICS [1]	3
BANA 3309	DATA VISUALIZATION AND BUSINESS INTELLIGENCE [1]	3
BANA 4308	ADVANCED DATA SCIENCE [1]	3
Select one from the following:		3
BANA 4311	ETHICAL AND SOCIAL ISSUES IN DATA SCIENCE	
BANA 4331	SEMINAR IN BUSINESS ANALYTICS	
Total Hours		**18**

[1] Mandatory Prerequisites: Prerequisites MUST be met before enrollment in the course. A student should consider this when selecting courses to satisfy the minor requirement and when registering. For a complete list of prerequisites see the Undergraduate Catalog or the Business Undergraduate Advising Office.

[2] Must earn a B or better in BSTAT 3321 (or equivalent) and INSY 3300.

Program Completion

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses, unless a different grade is designated below.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Certificate in Business Analytics

About This Program

The undergraduate Certificate in Business Analytics is designed to introduce data science and analytics knowledge and skills to College of Business majors. The certificate requires a total of twelve semester credit hours of course work, which can be completed in conjunction with an existing College of Business undergraduate degree.

Competencies

1. Upon completion, students will be proficient in Python for data analysis.
2. Upon completion, students will be able to apply statistical analysis and inference techniques to draw insights from structured and unstructured data.
3. Upon completion, students will be proficient in creating visualizations and drawing business insights from them.
4. Upon completion, students will be able to apply machine-learning techniques to solve business problems.

Admissions Criteria

The certificate is available to undergraduate students in good standing in the College of Business with a B in both BSTAT 3321 and INSY 3300.

Curriculum

Foundations		
INSY 3300	INTRODUCTION TO PROGRAMMING [1]	3
BANA 3308	INTRODUCTION TO BUSINESS ANALYTICS	3
BANA 3309	DATA VISUALIZATION AND BUSINESS INTELLIGENCE	3
Select one from the following:		3
BANA 4311	ETHICAL AND SOCIAL ISSUES IN DATA SCIENCE	
BANA 4308	ADVANCED DATA SCIENCE	
Total Hours		**12**

[1] Must earn a B in INSY 3300.

To receive the certificate, all courses must be completed at UT Arlington with at least a grade of C in each.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Management

Department Overview

The Management Department offers BBA's in Management, Entrepreneurship, Human Resource Management, Hospitality Management and a BS in Hospitality Management. We also offer an MS in Human Resource Management, and a PhD in Business Administration with emphasis in Strategic

Management, Organizational Behavior, Human Resource Management, and International Business. The department offers courses that support the Master of Business Administration and Master of Health Care Administration degrees, as well as many of the College's other graduate programs.

The Department of Management is committed to providing a high quality educational experience for students to develop the knowledge and skills necessary for leadership roles in business and society. Programs strive to provide students with the planning, problem-solving, critical thinking, and interpersonal skills needed to be successful in their roles as managers and leaders.

COURSES

ENTR 3325. ENTREPRENEURSHIP: THE NEW VENTURE CREATION PROCESS. 3 Hours.
This course provides an introduction to the principles of entrepreneurship. Topics include the role of the entrepreneur, self-analysis of entrepreneurship readiness, opportunity recognition, market research and product development activities, legal issues, sources of capital, budgeting, and cash flow. Upon completion, students should have an understanding of the entrepreneurial process and issues faced by entrepreneurs. Prerequisite: 60 credit hours.

ENTR 4333. CREATIVITY, TECHNOLOGY, AND INNOVATION. 3 Hours.
Waves of innovations are disrupting nearly every sphere of modern life. This course helps you understand and experience just how creative entrepreneurs in either start-up or corporate environments do it. Working with others, using cutting-edge case studies, experiential exercises, and field research, you will consider how innovations across a broad range of emerging technologies meet the market, financial, and environmental demands of a diverse set of current and future stakeholders. Prerequisite: 60 credit hours.

ENTR 4334. DIGITAL ENTREPRENEURSHIP. 3 Hours.
This course introduces students to technologies that an entrepreneur can leverage to support various business activities. Students will be exposed to digital business tools including cloud, mobile, social, data analytics, and software-driven services. Students will gain a conceptual foundation and practical knowledge on using different technical tools to support decision-making and business strategy in entrepreneurial ventures. Prerequisite: 60 hours.

ENTR 4338. ENTREPRENEURIAL FINANCE. 3 Hours.
This course prepares the student to effectively plan for, execute, and control the financial aspects of a new venture. Topics include analyzing financial and accounting information for cash flow management and assessing business performance, identifying and evaluating sources of capital for emerging and small businesses, and strategies for growing and harvesting firms. This course cannot serve as a FINA or ACCT elective. Prerequisite: ACCT 3309 and MANA 3325 or permission of the instructor.

ENTR 4339. PITCHING THE ENTREPRENEURIAL IDEA. 3 Hours.
The course is designed to assist students in developing high quality business ideas, plans and pitches. The course also seeks to provide students with the resources, not only to develop comprehensive, complete and concise business strategies, but to assist students in actually launching their new businesses. Students are expected to participate in the Maverick Entrepreneurship Program and Award (MavPitch) and to compete for a share of cash prizes when offered. Prerequisite: MANA 3325 or with permission of the instructor.

ENTR 4345. SOCIAL ENTREPRENEURSHIP. 3 Hours.
Social entrepreneurship has its roots in the broader field of entrepreneurship, but differs in the fact that social entrepreneurs have a primary goal of creating social impact rather than personal or shareholder wealth. This course is intended for students from any discipline who have an interest in making a difference in communities locally and throughout the world. The course will introduce entrepreneurial concepts including social enterprise, impact investing/SROI, social marketing/movements, behavioral economics, strategic CSR practices and legal formation. This course includes a self-directed project to address a societal problem using the disciplines taught in class. Prerequisite: 60 credit hours.

COURSES

HRMN 3320. HUMAN RESOURCE MANAGEMENT. 3 Hours.
This course is a survey of the human resource management function in organizations. Topics include HR planning, job design, recruitment, selection, training, compensation, performance appraisal, and employee relations. The course focuses on how these practices can be crafted to help support business strategy and develop competitive advantage. Prerequisite: 60 credit hours.

HRMN 4320. EMPLOYMENT LAW. 3 Hours.
An introduction to employment law and labor relations for managers and human resource professionals. Topics include: the nature of the employment relationship, fair labor standards, workplace health and safety, collective bargaining, equal employment opportunity and unlawful discrimination, sexual harassment, and workplace privacy. Prerequisite: 60 credit hours.

HRMN 4328. HUMAN RESOURCE STAFFING AND PERFORMANCE MANAGEMENT. 3 Hours.
Covers the areas of employee selection and performance management systems. Topics include: recruitment strategies, methods of selection, development and validation of selection and employee appraisal instruments, and implementation of performance management processes. Prerequisite: MANA 3318 and MANA 3320.

HRMN 4342. COMPENSATION AND BENEFITS MANAGEMENT. 3 Hours.
This course is an introduction to compensation and benefits administration. Attention will be given to the means by which compensation equity is achieved in organizations. Topics covered include job analysis and design, job evaluation, development, the use of wage and salary surveys, and benefit policies and practices. The benefits part of the course will include a discussion of public and private benefit programs and pension plans. Prerequisite: MANA 3318 and MANA 3320.

HRMN 4343. TRAINING AND DEVELOPMENT. 3 Hours.
This course provides students with a practical approach to training and development in contemporary business environments. Components of training design, including needs assessment, objectives, and evaluation and control of the training and development functions. Prerequisite: MANA 3318 or MANA 3319.

COURSES

LSHP 1101. INTRODUCTION TO LEADERSHIP. 1 Hour.
A continuation of the Goolsby BNSF Early Leader Freshman Interest Group that will strengthen students' skills that lead to success in business. Faculty and staff will assist in implementing individualized corrective measures. Technical writing will be taught and evaluated. Elective only; does not count as a part of the professional certification requirements. Pass-fail grades will be awarded. For entering freshmen or entering transfer students.

LSHP 2302. LEADERSHIP AND COMMUNICATION IN ORGANIZATIONS. 3 Hours.
This course focuses on the development of leadership and interpersonal business communication skills. The following topics are also addressed: verbal and nonverbal communication, dyadic and organizational communications, communication roles and relationships, small-group work, networking, and the diagnosis and improvement of organizational communications. Credit will not be granted for both MANA 2302 and LSHP 2302. Prerequisite: Admission to the BNSF Early Leaders Program of the Goolsby Leadership Academy.

LSHP 3319. CONTEMPORARY MANAGERIAL & LEADERSHIP CHALLENGES. 3 Hours.
This course will provide students the opportunity to evaluate and provide solutions for some of the most challenging managerial and leadership issues facing organizations today, based on direct input from area employers. Students will engage in discussion, analyze cases, conduct verbal and written presentations, and participate in other experiential activities to explore topics and develop competencies that help organizations effectively lead people to meet these challenges. Emphasis on developing applied skills required in contemporary organizations. Credit will not be granted for both MANA 3319 and LSHP 3319. Prerequisite: Admission to the Goolsby Leadership Academy.

LSHP 4191. STUDIES IN LEADERSHIP. 1 Hour.
Advanced studies, on an individual basis, in the various fields of leadership and management. Prerequisite: MANA 4322; LSHP 4313.

LSHP 4311. LEADER AS COMMUNICATOR. 3 Hours.
Helps students excel in written and oral communication skills. Assignments include writing short papers, making oral presentations, and learning to critique one another. This course provides a perspective on leadership in formal organizations with emphasis on communication, exercising influence, decision-making, and conflict management. Prerequisite: Admission to the Goolsby Leadership Academy.

LSHP 4312. LEADER ETHICS. 3 Hours.
Addresses rule-based, consequential, and virtue ethics by examining intentions, actions, and consequences of individual behavior. The course emphasizes the development of character and personal integrity. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

LSHP 4313. SENIOR & EXECUTIVE LEADERSHIP. 3 Hours.
This course introduces and compares the traditional levels of leadership within organizations-front line, middle, senior, and executive. Primary focus is on senior and executive leadership, including a series of lectures by senior leaders and executives who provide insight into their respective roles and unique leadership skills and development. Prerequisite: Admission to the Goolsby Leadership Academy.

LSHP 4314. GLOBAL MARKETPLACE. 3 Hours.
Designed to assist Goolsby Scholars become competent in an intercultural world. The heart of the course is aimed at preparing for and participating in a study abroad experience to understand and appreciate cultural, business, and human diversity. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

LSHP 4315. EXECUTIVE INTERNSHIP. 3 Hours.
This internship experience places Goolsby Fellows in field settings with executives from the college's Advisory Council and other executive leaders in specialized areas for students. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

COURSES

MANA 1301. BUSINESS IN A GLOBAL ENVIRONMENT. 3 Hours.
This course provides a survey of economic systems, forms of business ownership, and considerations for running a business. Students will learn various aspects of business, management of organizations, leadership, and decision-making. Financial topics are introduced including accounting, money and banking, and securities markets. Also included are discussion of business challenges in the legal and regulatory environment business ethics, social responsibly and international business. Emphasis is the dynamic role of business in everyday life.

MANA 2302. COMMUNICATIONS IN ORGANIZATIONS. 3 Hours.
This course focuses on the development of interpersonal business communication skills in the following areas: group communication, written communication (collaborative writing and business letters, memorandums and reports), oral communication (business presentation, meetings and interviews), and listening. The following topics are also addressed: verbal and nonverbal communication, dyadic and organizational communications, communication roles and relationships, small-group communication, communication networks, and the diagnosis and improvement of organizational communications. MANA 2302 will satisfy the cultural and social studies requirement in the College of Business Administration.

MANA 3318. MANAGING ORGANIZATIONAL BEHAVIOR. 3 Hours.
This course is an introduction to the factors that influence individual and group behavior in organizations. Emphasizing findings from the field of organizational behavior, topics covered include: individual differences and diversity, social information processing, work attitudes, stress, work motivation, power and influence, negotiation, teams, leadership, and organizational research. An OB lab is required. The grade for this course requires the completion of both the lecture component and the OB lab. Prerequisite: 30 credit hours.

MANA 3319. CONTEMPORARY MANAGERIAL CHALLENGES. 3 Hours.
This course will provide students the opportunity to evaluate and provide solutions for some of the most challenging managerial issues facing organizations today. Students will engage in discussion, analyze cases, conduct verbal and written presentations, and participate in other experiential activities to explore topics that help organizations effectively manage people to meet these challenges. Emphasis on developing applied skills required in contemporary organizations. Prerequisite: 60 credit hours.

MANA 3321. NONPROFIT AND VOLUNTEER MANAGEMENT. 3 Hours.
This course focuses on leadership and management of nonprofit staff and volunteers. Nonprofit and philanthropic organizations have unique challenges in strategic staffing and stakeholder management. This course addresses topics related to selection, motivation, and retention of volunteers and staff including development officers. Prerequisite: 30 credit hours.

MANA 4191. STUDIES IN MANAGEMENT. 1 Hour.
Advanced studies, on an individual basis, in the various fields of management. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

MANA 4291. STUDIES IN MANAGEMENT. 2 Hours.
Advanced studies, on an individual basis, in the various fields of management. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

MANA 4321. INTERNATIONAL MANAGEMENT. 3 Hours.
With greater globalization of economies and industries, managers are being increasingly challenged to manage organizations within a global context. This course seeks to provide students with the skills, knowledge and sensitivity required to be successful managers in organizations and organizational units within a multinational environment. Topics covered include the analysis of environmental forces, the characteristics of international strategies and the importance of organizational design and strategic control in the management of multinational enterprises. Prerequisite: 60 credit hours.

MANA 4322. STRATEGIC MANAGEMENT. 3 Hours.
An integrative learning experience that focuses on the role of top management in integrating an organization's internal functional activities and external environmental forces. Emphasis is placed on defining economic, technological, ethical, political, and social factors affecting an organization and their consideration in setting goal, strategies, and operating policies. This course serves as the capstone offering for the business major. Prerequisite: ACCT 2301 and ACCT 2302, BUSA/STAT/BSTAT 3321, ECON 2305 and ECON 2306, FINA 3313, MANA 3318, MARK 3321, and a declared business major. One of the following junior level courses may be taken concurrently: BSTAT 3321, FINA 3313, MANA 3318 or MARK 3321.

MANA 4325. LEADERSHIP IN ORGANIZATIONS. 3 Hours.
This course provides a managerial perspective on leadership in formal organizations. Emphasis is placed on team-building, exercising influence, decision-making, and conflict management. Prerequisite: MANA 3318.

MANA 4326. DIVERSITY IN ORGANIZATIONS. 3 Hours.
This course examines the implications of employee diversity in organizations, an issue of increasing importance. It includes study of the changing demographics of workers, including multiple demographic groups and areas of difference important to organizational treatment and outcomes. This course examines research on treatment, access, and customer discrimination. Legislation related to diversity is also reviewed. This course also provides suggestions for individuals and organizations to increase opportunities and outcomes for workers of all backgrounds. Offered as MANA 4326, AAST 4326 and GWSS 4326; credit will be granted in only one department. Prerequisite: Junior standing.

MANA 4329. DISABILITY & WORK. 3 Hours.
Explores the complex relationship between disability and work within the United States from a current and historical perspective. Topics include study of the Americans with Disabilities Act; research on the diversity, population, and changes in proportions of people with disabilities; employment rates and experiences of people with disabilities; attitudes and perspectives surrounding and affecting the employment opportunities and experiences of people with disabilities; and ways to provide inclusive, non-discriminatory workplaces. Offered as MANA 4329 and DS 4329; credit will only be granted once. Prerequisite: 60 hours or MANA 4326 or Disability Studies permission.

MANA 4330. TEAM MANAGEMENT. 3 Hours.
This course examines the critical input, process and outcomes variables in the design of and maintenance of highly effective work teams. Topics include: team composition, team norms, team decision-making strategies, intra-team and inter-team conflict, team building, management of effective work teams, and team-based organizational structures. Prerequisite: MANA 3318.

MANA 4331. SEMINAR IN MANAGEMENT. 3 Hours.
Readings and discussion of special topics in management. Prerequisite: Junior or senior standing and consent of instructor. May be repeated for credit with consent of department chair.

MANA 4340. BUSINESS AND SOCIETY. 3 Hours.
Explores the roles of business organizations and their relationships with individuals, governments, and other businesses from the perspectives of ethics, ideology, and corporate responsibility. Prerequisite: 60 credit hours.

MANA 4341. NEGOTIATIONS AND CONFLICT RESOLUTION. 3 Hours.
This course is designed to better understand the nature of conflict and its resolution through persuasion, collaboration, and negotiation. Students will learn theories of interpersonal and organizational conflict and its resolution as applied to personal, corporate, historical, and political contexts. Students will assess their own styles, skills, and values, and develop techniques to better resolve disputes, achieve objectives, and exert influence. Prerequisite: MANA 3318.

MANA 4390. CAREER DEVELOPMENT AND PROFESSIONAL SKILLS. 3 Hours.
Presents practical and theoretical perspectives on career and professional development. Includes self-assessment, career plan development, interviewing skills, readings and exercises designed to lead to a better understanding of yourself and the job market. Prerequisite: 60 credit hours.

MANA 4391. STUDIES IN MANAGEMENT. 3 Hours.
Advanced studies, on an individual basis, in the various fields of management. Prerequisite: Senior standing and permission of instructor. May be repeated for credit with consent of department chair.

MANA 4393. MANAGEMENT INTERNSHIP. 3 Hours.
Practical training in management. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing, declared major in the College of Business, 2.5 GPA, and permission of undergraduate business advisor.

MANA 5182. INDEPENDENT STUDIES IN MANAGEMENT. 1 Hour.
Extensive analysis of a management topic.

MANA 5199. GRADUATE MANAGEMENT INTERNSHIP. 1 Hour.
Practical training in management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Admission to a College of Business graduate degree program, 9 graduate credit hours, and 3.0 GPA.

MANA 5299. GRADUATE MANAGEMENT INTERNSHIP. 2 Hours.
Practical training in management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Admission to a College of Business graduate degree program, 9 graduate credit hours, and 3.0 GPA.

MANA 5312. MANAGING THE ENTERPRISE. 3 Hours.
Basic exploration of organizations in their environments. The elementary tools of management, which include: organizational objectives, social responsibility and ethics, policies, plans, and decision making; the design of organizations and jobs; the production and technology aspects of organization; the elements of leadership, behavior, and communication; and the elements of control and performance evaluation.

MANA 5320. ORGANIZATIONAL BEHAVIOR. 3 Hours.
Systematic study of behavioral problems in the complex organization. Analyzes the interaction of environmental and internal factors and their effects upon organizational behavior. The course is placed within the context of the organization process.

MANA 5321. COMPLEX ORGANIZATIONS. 3 Hours.
Provides the foundation for an in-depth knowledge of several important theories of management and organization. Attention to study of organizations, organizational effectiveness, comparative analysis of organizations, and the organization and its environment. Relates empirical findings and theoretical hypotheses with applied management concepts. Prerequisite: MANA 5312.

MANA 5322. COMPENSATION & REWARD SYSTEMS. 3 Hours.
Management of compensation systems in business and other organizations; concepts models and practices related to wage and salary levels and structures; perceived equitable pay; individual performance appraisal, rewards and satisfaction; benefits and employee services.

MANA 5323. TRAINING AND DEVELOPMENT. 3 Hours.
Introduces employee training and development in organizations from a comprehensive theoretical and applied perspective facilitating skill acquisition. Specific topics discussed generally include needs assessment, learning theory and transfer of learning, various training methods, program design, training evaluation, training methods, career management, and employee development.

MANA 5324. TEAM AND GROUP BEHAVIOR. 3 Hours.
A study in team and group dynamics, critical processes and practices. Topics include team composition and development, problem solving strategies and performance, conflict management, leadership process and work team strategies.

MANA 5325. LABOR AND EMPLOYEE RELATIONS. 3 Hours.
Examines union-management relations and considers the structure and functioning of the economic and social forces of importance at the policy level within both the firm and the union. Also considers non-union employee relationships.

MANA 5326. ORGANIZATION DEVELOPMENT AND CHANGE. 3 Hours.
Theories and applications associated with organization development and change with specific focus on improving organizational effectiveness. Topics include changing organizational culture with an understanding of ethical and value considerations, role of the organization development practitioner; processes associated with organization change, employee empowerment, developing high performance teams and high performing systems, and learning organizations.

MANA 5327. HUMAN RESOURCE LAW. 3 Hours.
Coverage of statutory and case law in the employment setting. Emphasis placed on employment discrimination, compensation and benefits law; government agencies which administer and enforce employment laws are also reviewed.

MANA 5329. HR METRICS AND ANALYTICS. 3 Hours.
This course focuses on the fundamental logic, metrics, and methods necessary for conducting HR analytics. It provides the analytical and critical thinking skills necessary for HR decision-making. This course does involve the analysis of data and the use of basic statistical techniques, but its emphasis is on application and real-world problem solving.

MANA 5330. NEGOTIATIONS & CONFLICT MANAGEMENT. 3 Hours.
This course focuses on developing students negotiating skills in a variety of contexts. Throughout the course students will diagnose negotiation situations, strategize and plan for negotiations, and learn how to engage in more effective negotiations. The course also focuses on developing interpersonal conflict resolution skills and strategies.

MANA 5331. MANAGEMENT OF MULTINATIONAL ENTERPRISES. 3 Hours.
Focuses on the international dimensions of strategy and organization and provides a framework for formulating strategies in an increasingly complex global economy. The course seeks to provide students with an understanding of the cultural, political, competitive, technological, legal, and demographic environments in which multinational firms operate. It then examines the nature of global competition by exploring the characteristics of global industries and strategies that have been successful in an international context. Also covered are issues related to organizational design and strategic control in the management of multinational enterprises.

MANA 5332. MANAGING DIVERSITY IN ORGANIZATIONS. 3 Hours.
Examines implications of employee diversity in organizations, including human resource and organizational behavior issues related to aspects of diversity. Includes study of the changing demographics of workers, effects of diversity on organizational performance, and ways of effectively managing in organizations having applicants, employees, and customers from diverse backgrounds. Research on diversity issues is examined, as are process of stereotyping and myths and misperceptions about diversity issues. Legislation related to diversity is also reviewed.

MANA 5333. INNOVATION, CREATIVITY AND ENTREPRENEURSHIP. 3 Hours.
Waves of innovations are disrupting nearly every sphere of modern life. This course helps you understand and experience just how creative entrepreneurs in either start-up or corporate environments do it. Working with others, using cutting-edge case studies, experiential exercises, and field research, you will consider how innovations across a broad range of emerging technologies meet the market, financial, and environmental demands of a diverse set of current and future stakeholders. You will have an opportunity to put learning into practice.

MANA 5334. ORGANIZATION CONSULTING & RESEARCH. 3 Hours.
Explores internal and external consulting to business organizations. Emphasis on the management of the change process through the stages of data gathering, diagnosis, analysis, and recommendation.

MANA 5336. STRATEGIC MANAGEMENT. 3 Hours.
Strategic management uses a general management perspective in addressing issues related to the formulation and implementation of corporate and business level strategy. The course involves developing the ability to identify issues, evaluate strategic options and understand the organizational process by which strategies get formed and executed. It builds on the knowledge gained in functional area courses and uses case studies and projects to improve students' analytical and decision-making skills. Prerequisite: Must be taken in last semester or with permission of the Graduate Advisor.

MANA 5337. ETHICS AND THE BUSINESS ENVIRONMENT. 3 Hours.
Strategically examines ethical systems and selected ethical issues across a variety of professional settings. Particular emphases are placed on leadership, corporate governance, globalization, diversity, inclusion, sustainability, and emerging technology.

MANA 5338. CAREERS & MANAGING IN A CHANGING ENVIRONMENT. 3 Hours.
Presents practical and theoretical perspectives on careers and managing in a changing work environment. Includes self assessment, career plan development, informational interviews, readings and exercises designed to lead to a better understanding of managing self and others.

MANA 5339. ENTREPRENEURSHIP. 3 Hours.
New venture opportunity assessment, formation, and development in startup and corporate environments. Students will understand the role of entrepreneurship in the economy and the attributes of entrepreneurial behavior. Students will learn how to assess the market and financial feasibility of a new venture as well as understand how to use equity and debt financing, how to select between starting up, franchising, or buying a business, how to lead the growing company, and how to address family business dilemmas. The cornerstone of the course will be a feasibility assessment project that leads to a business plan for a new venture of the student's choice. For the project, students can explore either an original new venture idea, an already existing venture concept (for example, a franchise), or a new business opportunity in need of assessment for an existing firm or their current employer.

MANA 5340. STRATEGIC HUMAN RESOURCE MANAGEMENT. 3 Hours.
Emphasizes strategic perspective of modern human resource management theory and practice. Topics include human resource planning, staffing, training and development, compensation, performance appraisal, and labor and employee relations.

MANA 5341. STAFFING AND PERFORMANCE MANAGEMENT. 3 Hours.
This course covers employee recruitment, selection and performance appraisal. Topics include: recruitment strategies and methods, methods of employee selection, performance planning, development and validation of appraisal instruments, implementation and conduct of performance appraisal, and performance feedback and counseling.

MANA 5342. PREVENTIVE STRESS MANAGEMENT. 3 Hours.
Examines the organizational demands that cause stress. Identifies the psychophysiology of the stress response and the individual/organizational costs of distress. Emphasis is placed on the principles and methods of preventive stress management, such as social support, exercise, and the relaxation response.

MANA 5344. EVIDENCE-BASED MANAGEMENT. 3 Hours.
Evidence-based management is the process of translating principles and findings based on best evidence into organizational practice. This class covers the organizational and interpersonal sides of data and information. You will develop the skills and knowledge necessary to use data and analytics to inform management practice and make better decisions. Through case examples and classroom discussion you will learn skills in internal consulting, issue selling, data interpretation and presentation. While the focus is on the practical application of business intelligence, the skills learned in this course will allow all managers to make evidence based decisions through data collection, analysis and presentation.

MANA 5345. SOCIAL ENTREPRENEURSHIP. 3 Hours.
Social entrepreneurship has its roots in the broader field of entrepreneurship, but differs in the fact that social entrepreneurs have a primary goal of creating social impact rather than personal or shareholder wealth. This course is intended for students from any discipline who have an interest in making a difference in communities locally and throughout the world. The course will introduce entrepreneurial concepts including social enterprise, impact investing/SROI, social marketing/movements, behavioral economics, strategic CSR practices and legal formation. This course includes a self-directed project to address a societal problem using the disciplines taught in class.

MANA 5348. HUMAN RESOURCE BUSINESS STRATEGY. 3 Hours.
Designed with the human resource professional in mind, this course analyzes the role of human resource management in developing and executing business strategy. Central to this course is an examination of how contemporary organizations use human resource management to enhance organizational capabilities and achieve strategic objectives.

MANA 5350. EFFECTIVE LEADERSHIP. 3 Hours.
This graduate course uses self-assessment testing with feedback, case studies, selected readings, and guest lectures from successful leaders and top executive coaches to create a learning laboratory for mature and motivated graduate students of leadership.

MANA 5360. LEADERSHIP AND TEAMS. 3 Hours.
One of the most difficult challenges that organizations face is acquiring developing, and retaining high talent human capital. This course is concerned with effective leadership, team-based work systems, and talent management for building high performance organizations.

MANA 5382. INDEPENDENT STUDIES IN MANAGEMENT. 3 Hours.
Extensive analysis of a management topic.

MANA 5392. SELECTED TOPICS IN MANAGEMENT. 3 Hours.
In-depth study of selected topics in management. May be repeated when topics vary.

MANA 5398. THESIS. 3 Hours.
Thesis MANA 5398 graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

MANA 5399. GRADUATE MANAGEMENT INTERNSHIP. 3 Hours.
Practical training in management. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Admission to a College of Business graduate degree program, 9 graduate credit hours, and 3.0 GPA.

MANA 5698. THESIS. 6 Hours.
Thesis MANA 5698 graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

MANA 6182. INDEPENDENT STUDIES IN MANAGEMENT. 1 Hour.
Extensive analysis of a management topic.

MANA 6282. INDEPENDENT STUDIES IN MANAGEMENT. 2 Hours.
Extensive analysis of a management topic.

MANA 6318. SEMINAR IN ORGANIZATIONAL THEORY. 3 Hours.
Advanced study in the theory and research of organizations.

MANA 6328. SEMINAR IN BUSINESS POLICY. 3 Hours.
Advanced study in the theory and research bases of business policy and strategic management.

MANA 6329. ADVANCED RESEARCH METHODS. 3 Hours.
In-depth coverage of selected topics in the design of research and analysis of data; topics include philosophy of science, theory of measurement, complex experimental and quasi-experimental designs.

MANA 6338. SEMINAR IN ORGANIZATIONAL BEHAVIOR. 3 Hours.
Advanced study in the theory and research of organizational behavior.

MANA 6348. SEMINAR IN HUMAN RESOURCE MANAGEMENT. 3 Hours.
Advanced study in employee selection, performance appraisal, compensation, training and development, human resource policy and strategy, and other areas of human resource management.

MANA 6382. INDEPENDENT STUDIES IN MANAGEMENT. 3 Hours.
Extensive analysis of a management topic.

MANA 6390. ADVANCED TOPICS IN MANAGEMENT. 3 Hours.
In-depth study of selected topics in management. May be repeated when topics vary.

MANA 6392. RESEARCH IN ADMINISTRATION. 3 Hours.
Independent research under supervision of a faculty member.

Master of Science in Human Resources Management

About This Program

The Master of Science in Human Resources Management combines the experience of industry leaders with the expertise of renowned scholars to offer entry-level and mid-career human resource professionals with the tools they need to enhance their professional practice and career trajectories. The graduate-level professional degree program offers a responsive, research-based, and practice-oriented curriculum that combines a breadth of study in business management strategy with deep study in the functional areas of human resource management. The coursework in this content-rich curriculum is taught by distinguished scholars and industry-leading professionals who lead students in bridging the gap between cutting-edge management theory and the real-world demands of professional human resource practice. The program prepares students for human resource management careers in business and industrial firms, as well as government and nonprofit organizations

The Master of Science in Human Resources Management is accredited by the Association to Advance Collegiate Schools of Business-International (AACSB-International).

The Master of Science in Human Resources Management curriculum aligns with the Society for Human Resource Management's recommended requirements for Human Resource degree programs.

The Master of Science in Human Resources Management curriculum is certified to meet the guidelines for the HRCI re-accreditation.

Competencies

1. Upon completion, students will demonstrate knowledge and understanding of the functional areas of human resource management including staffing, training and development, compensation, and performance management.
2. Upon completion, students will demonstrate abilities in quantitative analysis and evidence-based decision-making in HR.
3. Upon completion, students will demonstrate ability to aid in organizational decision-making through applied research and organizational consulting.
4. Upon completion, students will demonstrate knowledge and understanding of HR law and its implications for organizations.
5. Upon completion, students will demonstrate knowledge of models of strategic human resource management and tools for aligning HR practices with organizational strategy.

Admissions Criteria

Admission to the Master of Science in Human Resource Management (MSHRM) program is based upon the completion of the general admission requirements of Graduate Admissions. For admission into the MSHRM program an acceptable score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and acceptable academic undergraduate performance are required. The GMAT is strongly preferred.

Students for whom English is not their native language must also take the Test of English as a Foreign Language Internet Based Test (TOEFL iBT), or International English Language Testing System (IELTS).

A standardized test score (GMAT or GRE) will not be used as the sole criterion or the primary criterion for determining an applicant's admission to the MSHRM program. Specifically, multiple criteria are used to make admission decisions. Unconditional acceptance is based on consideration of all the information listed below and the decision to deny admission is not based on any single criterion.

Applicants are encouraged to submit with the application a résumé that highlights professional and personal accomplishments, linguistic abilities, computer expertise and HR experience.

Along with the grade point average and GMAT or GRE scores, admission criteria include the following:

1. An undergraduate grade point average of 3.00 on a 4.0 scale, as calculated by Graduate Admissions, is typical of a successful candidate. This will be integrated into a formula or index that multiplies approximately the last 60 hours of the undergraduate GPA by 200 and adds the resulting value to the GMAT Score. An index score greater than 1100 is typical of a successful candidate.
2. GMAT sub scores (verbal and quantitative) are also considered in the admission decision. A GMAT total score greater than 500 is typical of a successful candidate.
3. A GRE quantitative percentile greater than 50% and Verbal percentile greater than 50% is typical of a successful applicant.
4. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures in the Graduate Catalog.
5. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
6. Educational objectives and quality of written expression of the 200 word application essay.
7. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
8. General and specific program accreditation status of degree-granting institution.
9. Professional work experience.
10. Professional certification or licensure.

UNCONDITIONAL ADMISSION

For unconditional admission, the applicant's composite total from the index must be 1100 or higher.

Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.00 as calculated by Graduate Admissions (or 3.00 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT) will not be used as the sole criterion or the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

Applicants with demonstrated English proficiency and either 1) an undergraduate grade point average of 3.00 on a 4.0 scale as calculated by Graduate Admissions, or 2) GMAT or GRE quantitative and verbal sub-scores at or above the 30th percentile respectively may be considered for probationary admission. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

A provisional decision to admit may be granted when the applicant meets criteria for unconditional or probationary status but one or more applicant credentials are incomplete. A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

Curriculum

Most students complete the non-thesis track toward the degree. For students who are accepted into the thesis track, student complete the same 27 hours of required classes and one three hour elective course. Six hours of thesis credits are typically taken in the final semester. The thesis will involve working closely with one or more members of the graduate faculty from the Department of Management on a research project in a specialized area of interest in human resource management.

International Business BBA (Spanish) (p. 321)
Management BBA (p. 413)
Marketing BBA (p. 429)
Operations & Supply Chain Management BBA (p. 384)
Real Estate BBA (p. 358)

Human Resources Management MS (p. 401)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- MANA 3318 MANAGING ORGANIZATIONAL BEHAVIOR
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS, students must complete at least three of the following graduate courses:

- BSTAT 5325 ADVANCED METHODS FOR ANALYTICS
- MANA 5322 COMPENSATION & REWARD SYSTEMS
- MANA 5323 TRAINING AND DEVELOPMENT
- MANA 5341 STAFFING AND PERFORMANCE MANAGEMENT
- A graduate elective approved by advisor.

An undergraduate student who successfully completes the fast track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Curriculum

Baccalaureate Program

Complete non-elective requirements for BBA/BS including the following used to determine eligibility for the fast track:		96
ECON 3310	MICROECONOMICS

Post-Baccalaureate Certificate in Entrepreneurship

About This Program

The Post-Baccalaureate Certificate in Entrepreneurship provides students with skills and training in: identifying innovations and market opportunities, writing a business plan, obtaining funding, and launching a new company. The certificate enhances a student's general education, academic major and/or career preparation in innovation and entrepreneurship. All students will take a common course that will present the fundamentals of entrepreneurship. Two additional courses will be taken, based on the students' interests, drawn from a list of approved courses across academic disciplines.

The certificate requires a total of nine semester credit hours of coursework, which can be completed in conjunction with an existing master's or PhD degree in any field or independently as a special student.

Competencies

1. Upon completion students will be able to identify business opportunities and access market needs.
2. Upon completion students will be able to apply critical thinking, adaptability to navigate uncertainty in making business decisions.
3. Upon completion students will be able to demonstrate knowledge and understanding of translating ideas into actionable business strategies.

Admissions Criteria

- Graduate students in good standing at UT Arlington may complete the certificate.
- Students not enrolled in a graduate program (special, certificate only students) must present for admission:
  - a bachelor's degree from an accredited university, and
  - a GPA of 3.0 for last 60 hours of undergraduate coursework.

Curriculum

Foundations		**3**

Certificate in Entrepreneurship

About This Program

The Certificate in Entrepreneurship provides students with skills and training in: identifying innovations and market opportunities, writing a business plan, obtaining funding, and launching a new company. The certificate enhances a student's general education, academic major and/or career preparation in innovation and entrepreneurship. All students will take a common course that will present the fundamentals of entrepreneurship. Two additional courses will be taken, based on the students' interests, drawn from a list of approved courses across academic disciplines. This certificate is designed for current UT Arlington students and can be earned as part of a degree program at both the undergraduate and graduate level. It can also be earned by non-degree seeking students as a stand-alone certificate.

Competencies

1. Upon completion students will be able to identify business opportunities and access market needs.
2. Upon completion students will be able to apply critical thinking, adaptability to navigate uncertainty in making business decisions.
3. Upon completion students will be able to demonstrate knowledge and understanding of translating ideas into actionable business strategies.

Admissions Criteria

- Undergraduate students in good standing (meeting a minimum cumulative GPA of 2.0) at UT Arlington may pursue the certificate.
- Non-degree seeking (certificate only) students must have gained admission to UT Arlington as a non-degree/non-enrolled student.

Curriculum

Foundations		**3**
ENTR 3325	ENTREPRENEURSHIP: THE NEW VENTURE CREATION PROCESS	
Specialization		
Select two from the following, reflecting appropriate area of study.		6
ART 4382	ENTREPRENEURSHIP IN THE ARTS	
ENGR 4302	ENGINEERING ENTREPRENEURSHIP	
ENTR 4333	CREATIVITY, TECHNOLOGY, AND INNOVATION	
ENTR 4345	SOCIAL ENTREPRENEURSHIP	
ENTR 4338	ENTREPRENEURIAL FINANCE	
ENTR 4339	PITCHING THE ENTREPRENEURIAL IDEA	
MARK 4320	PRODUCT AND BRAND STRATEGY	
Total Hours		**9**

Program Completion

To receive the certificate, all courses must be completed at UT Arlington with a grade of B or higher.

Advising Resources

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

Certificate in Managing Diversity & Inclusion

About This Program

The Certificate in Managing Diversity and Inclusion in Organizations will provide students with an in-depth look at diversity in areas such as race, gender, sexual orientation, ethnicity, age, disability, and family status among individuals, organizations, and society from a business perspective. The certificate equips students with knowledge and skills related to developing and managing diverse applicants, employees, customers, and constituents. The certificate is established in response to a growing demand for awareness in all areas of diversity and its impact on individuals, organizations, and society. The certificate is available to business and non-business majors as well as non-degree seeking students as a stand-alone certificate.

Competencies

1. Upon completion students will recognize diverse perspectives influencing business decisions.
2. Upon completion students will identify asset-based approaches to managing differences in the workplace.
3. Upon completion students will recall global frameworks for examining cross-cultural/multicultural differences.

Admissions Criteria

UT ARLINGTON DEGREE-SEEKING STUDENTS (ANY MAJOR)

Applicants must be in good academic standing with a minimum of 2.00 cumulative GPA.

NON-DEGREE SEEKING STUDENTS

Applicants must have earned 60 semester hours of college-level academic credit and gained admission to UT Arlington as a non-degree-seeking student.

Curriculum

All students will complete a common course that will present the foundation for the study of diversity in organizations, and two additional business electives based on their interest.

Foundations		
MANA 4326	DIVERSITY IN ORGANIZATIONS	3
Electives		
Select two from the following:		6
ECON 4305	THE ECONOMICS OF DISCRIMINATION	
MANA 4321	INTERNATIONAL MANAGEMENT	
MANA 4329	DISABILITY & WORK	
MARK 4325	INTERNATIONAL MARKETING	
MARK 4335	MULTICULTURAL MARKETING	
Total Hours		**9**

Program Completion

The Managing Diversity and Inclusion in Organizations Certificate requires nine credit hours, which can be completed in conjunction with an existing undergraduate degree in any field or independently by a non-degree seeking student. Students must complete the appropriate prerequisites before enrolling in program courses. All nine hours must be completed at UT Arlington with a 2.50 average GPA. A minimum of two B's and one C must be earned to reach the required 2.5 GPA in certificate coursework. A grade of D or F will not be accepted for any certificate courses.

Marketing

Department Overview

Marketing is critically important to businesses. Top management realizes that a company must understand the marketplace and buyer needs and wants if it is to grow and compete effectively. Marketing centers on the customer and focuses on processes aimed at creating, delivering, and communicating value to customers.

The discipline of marketing will provide you with outstanding career opportunities in professional selling, marketing research, advertising, purchasing, distribution management, product development, wholesaling, and product management. The demand for marketing professionals continues to grow as today's organizations place greater emphasis on effective marketing as a means of achieving their goals.

Ever increasing worldwide competition, expanding global market, and accelerating technological advancements provide exciting business challenges that UTA's marketing curriculum is uniquely designed to address. With a diverse faculty experienced in both practical and theoretical applications, the marketing department at UTA provides insightful learning opportunities that will equip you with the knowledge to meet the challenges of the new economy.

COURSES

BCOM 3360. EFFECTIVE BUSINESS COMMUNICATION. 3 Hours.
Principles and practice of effective communication with business organizations. Students will be exposed to theories of persuasion, argumentation and advocacy. Techniques to achieve group compromise and conflict resolution are also emphasized. A business professionalism lab is required. The grade for this course requires the completion of both the lecture component and the professionalism lab. Prerequisite: 30 credit hours.

BCOM 4380. ADVANCED COMMUNICATIONS FOR BUSINESS. 3 Hours.
Students develop written and oral communication skills. Multiple individual professional writing projects will be produced and critiqued. Grammar, sentence structure, and word choice in the business setting will be developed. Students will deliver multiple oral presentations and learn their strategy, techniques, and tips for succinct communications. Non-verbal communication will be reviewed. Prerequisite: BCOM 3360.

BCOM 5175. BUSINESS COMMUNICATIONS. 1 Hour.
Course focuses on effective oral and written communication skills for business leaders. Discusses advanced techniques for improved business writing and presentation skills. Also stresses presentation media and computer graphics for reports and presentations.

BCOM 5375. ADVANCED BUSINESS COMMUNICATION THEORY & PRACTICE. 3 Hours.
Examines theories of effective oral and written communication for managers, including conflict resolution, emotional intelligence, and others. Discusses techniques for improved research, report writing and presentation. Integrates presentation media and computer graphics for reports and presentations.

COURSES

MARK 3321. PRINCIPLES OF MARKETING. 3 Hours.
Principles of marketing explores the theory and application of marketing concepts. The marketing variables of products, channels, prices, and promotion and how they relate to marketing decisions about assessing the marketing environment, segmentation, targeting, and positioning, new product introduction, managing brands, and social media marketing among others are discussed. Students learn these concepts through a mix of discussions, lectures, and assignments. Prerequisite: 30 credit hours.

MARK 3322. PROFESSIONAL SELLING. 3 Hours.
Presents sales principles and skills required by today's professional salesperson, with emphasis on the business-to-business selling environment. Students will enhance development of a variety of skills that will serve for a lifetime. These lifetime skills include the following: communication skills, critical thinking, building relationships with customers, and ethical decision making. Prerequisites: MARK 3321 with a grade of C or better, or Junior Standing.

MARK 3323. INTEGRATED MARKETING COMMUNICATION / ADVERTISING. 3 Hours.
A managerial approach to coordinating all promotional activities including advertising, direct marketing, sales promotion, personal selling, public relations/publicity, and internet marketing/social media, to produce a unified, market-focused message. Message development and media analysis/ placement are examined within the context of the role each promotional tool plays in marketing strategy development. Prerequisite: MARK 3321 with grade of C or better.

MARK 3324. CONSUMER BEHAVIOR. 3 Hours.
Examine how consumers decide and engage in the acquisition, consumption, and disposition of goods and services. In doing so, develop a better understanding of how a firm's marketing efforts can be optimally deployed to create value for consumers. Understand the role of consumer behavior in your life, business strategy, policy making, and society. Students will learn several internal and external influences of consumer behavior motivation, cognition, and learning. Prerequisite: MARK 3321 with a grade of C or better.

MARK 3332. PHILIANTHROPY, FUNDRAISING, AND PROFESSIONAL SELLING. 3 Hours.
Presents known and effective selling techniques required by today's development officers in their efforts to cultivate relationships with donors. Students will enhance skills that will serve for a lifetime, including communications skills, critical thinking, building donor relationships, and ethics-based decision making. Students will learn how to address the key differences between for-profit and non-profit organizations' view of their mission and bottom line focus. Prerequisite: MARK 3321 with a grade of C or better and junior standing.

MARK 3342. MARKETING AND PHILANTHROPIC STRATEGY. 3 Hours.
This course applies the principles of marketing to the promotion of philanthropic initiatives. Consumer behavior theories are used to explain why individuals and corporations give and help others. Precepts from strategic marketing are also applied as students learn how to design and implement a strategic giving program. Prerequisite: MARK 3321 with a grade of C or better and junior standing.

MARK 3370. SOCIAL MEDIA MARKETING. 3 Hours.
Go behind the scenes and discover the marketing side of social media. Learn how to manage your personal and professional brand online. Understand how organizations are utilizing social media platforms to engage in social listening, social media advertising, influencer marketing, social media marketing campaigns, and more. A conceptual foundation and practical approach for developing a social media plan and tracking social media metrics will be presented. Students will gain hands-on experience using social media strategically to achieve desired marketing goals through an immersive-learning simulation project. Students will also earn relevant online certifications to build their resume. Prerequisite: MARK 3321 grade of C or better.

MARK 4191. STUDIES IN MARKETING. 1 Hour.
Advanced studies, on an individual basis, in the various fields of marketing. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

MARK 4291. STUDIES IN MARKETING. 2 Hours.
Advanced studies, on an individual basis, in the various fields of marketing. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

MARK 4303. RETAIL MARKETING. 3 Hours.
Students are introduced to the world of retailing through the consumer's perspective and from a managerial viewpoint. Topics studied include types of retailers, consumer buying behavior, retail site locations, merchandising, store layout and design and customer service. Students gain practical knowledge through projects, retail site visits, and relevant case studies. Special attention is paid to the retail mix, multichannel retailing, and retail marketing strategies. Prerequisite: MARK 3321 with grade of C or better.

MARK 4308. MANAGEMENT AND LEADERSHIP OF THE SALES FORCE. 3 Hours.
This course covers topics ranging from strategic solutions to tactical sales. It focuses on sales management and leadership targeted toward implementation of complex sales solutions. The course concerns sales managers' roles of planning and executing go-to-market strategy. Hiring, motivation, decision-making, conflict/negotiation strategies, coaching, ethical decision making, and retaining a high-performance team are examined in an interpersonal context with a focus on expanding and retaining long-term profitable customer relations as vital to the impact on firm performance. Prerequisites: MARK 3322 with a grade of C or better.

MARK 4310. DIGITAL MARKETING. 3 Hours.
Students will examine how organizations are adapting to new interactive digital strategies for online research, development of digital strategy, and implementation of marketing online. Topics include search engine optimization, online advertising, web analytics, social media, email marketing, web development, mobile marketing, and reputation management. Upon completion, students will be able to understand 1) how consumers utilize digital technology, 2) the impact of digital marketing on the decision-making process, and 3) how to integrate digital marketing and technology with existing marketing practices. Prerequisite: MARK 3321 with grade of C or better.

MARK 4311. MARKETING RESEARCH. 3 Hours.
Designed to make students intelligent users of marketing research data. Students will explore the interrelationship between marketing research and marketing management for both the client and supplier. Upon completion of this course, students will understand methods for designing research projects, utilizing secondary data, generating primary data, sampling of human populations, questionnaire design, and data analysis. Prerequisite: MARK 3321 with a grade of C or better and BSTAT 3321.

MARK 4320. PRODUCT AND BRAND STRATEGY. 3 Hours.
This course is about understanding product and brand strategy adopted by firms, existing and new. We will begin the journey by understanding new product design and innovation with examples [including prototyping] and culminate in how new products become established brands through the product life cycle by way of strategic components such as price, distribution, packaging, promotion and brand extensions. Prerequisite: MARK 3321 with a grade of C or better.

MARK 4322. ADVANCED MARKETING MANAGEMENT AND STRATEGY. 3 Hours.
Advanced marketing management and strategy helps students look at marketing strategy in light of the strategy of the firm. It is helpful for students pursuing careers in marketing and management. Students will learn how to 1) develop marketing strategies for creating customers, 2) evaluate an organization's opportunities for creating customer value, 3) create a defensible position for the organization, and 4) evaluate competitive advantage in terms of financial value. Prerequisite: MARK 3321, MARK 3324 and MARK 4311 with grades of C or better, and 90 credit hours.

MARK 4325. INTERNATIONAL MARKETING. 3 Hours.
This class examines the impact of sociocultural, economic, technological, governmental, and demographic factors on the international marketing mix. Students will develop a culturally intelligent perspective of environmental factors that must be taken into consideration when formulating marketing strategies of businesses operating in the global marketplace. Prerequisite: MARK 3321 with a grade of C or better.

MARK 4331. SEMINAR IN MARKETING. 3 Hours.
Readings and discussion of special topics in marketing. Prerequisite: Junior or senior standing and consent of instructor. May be repeated for credit with consent of department chair.

MARK 4335. MULTICULTURAL MARKETING. 3 Hours.
This course involves readings and discussion of topics related to multicultural marketing. The primary focus will be on how to apply the principles of marketing to identify and reach the growing ethnic subcultures in the U.S. population. Careful consideration will be given to the historical context and ethical implications of these marketing activities. Practical aspects of business development will also be emphasized. Prerequisite: MARK 3321 with a grade of C or better.

MARK 4391. STUDIES IN MARKETING. 3 Hours.
Advanced studies, on an individual basis, in the various fields of marketing. Prerequisite: 90 credit hours and permission of instructor. May be repeated for credit with consent of department chair.

MARK 4393. MARKETING INTERNSHIP. 3 Hours.
Practical training in marketing. Analysis of theory applied to real life situations. May be used as an advanced business elective only; graded on a pass/fail basis. No credit will be given for previous experience or activities. May not be repeated for credit. Prerequisite: Junior standing and consent of department internship advisor.

MARK 5142. ADVANCED TOPICS IN MARKETING RESEARCH. 1 Hour.
Presentation and analysis of cutting edge topics in marketing research.

MARK 5182. INDEPENDENT STUDIES IN MARKETING. 1 Hour.
Extensive analysis of a marketing topic.

MARK 5199. GRADUATE MARKETING INTERNSHIP. 1 Hour.
Practical training in marketing. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

MARK 5282. INDEPENDENT STUDIES IN MARKETING. 2 Hours.
Extensive analysis of a marketing topic.

MARK 5299. GRADUATE MARKETING INTERNSHIP. 2 Hours.
Practical training in marketing. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

MARK 5311. MARKETING. 3 Hours.
Survey of activities involved in marketing. Emphasis is on developing a managerial point of view in planning and evaluating marketing decisions of the firm. Analyzes decisions with respect to products, price, channel, and promotional variables and considers questions relating to cost efficiency, demand, social responsibility and regulations.

MARK 5320. BUYER BEHAVIOR. 3 Hours.
Marketing begins and ends with the customer. This course introduces students to the study of consumer behavior. It is taught from the perspective of a marketing consultant who requires knowledge of consumer behavior in order to create, implement, and evaluate effective marketing strategies for clients. The course examines many concepts and theories from the behavioral sciences and analyzes their value in crafting marketing strategies. The course combines lecture and discussion of research based literature, both of which are aimed at providing an in-depth understanding of customer marketplace behavior with a focus on application to consumption and marketing decision making situations.

MARK 5326. INTEGRATED MARKETING COMMUNICATION. 3 Hours.
A managerial approach to coordinating all promotional activities, including direct marketing, advertising, sales promotion, personal selling, public relations, publicity and packaging to produce a unified market-focused message. Message development, placement and timing are examined within the context of the role each type of promotion plays in marketing strategy development. Additional topics examined include media definition and analysis, the communication process, legal and ethical considerations, and budgeting. Prerequisite: MARK 5311.

MARK 5327. RESEARCH FOR MARKETING DECISIONS. 3 Hours.
Overview of information needs of the marketing decision-maker. Emphasis on methods and techniques that may be employed for the collection and analysis of primary data. Major topics include design of research projects, generating primary data, questionnaire design, samplings for survey research, experimental design, controlling data collection, and data analysis.

MARK 5328. PRODUCT MANAGEMENT. 3 Hours.
Management of the firm's product or service offerings. Topics include new product development, new product screening, evaluation of existing products, product line and mix analysis, product abandonment decisions, the brand manager's role, the new product planning department, and others. Emphasis on the development of meaningful criteria for decision-making in the product area and on the development of information systems to suggest, screen, and monitor products. Prerequisite: MARK 5311 or MARK 5327 or Consent of the Program Director.

MARK 5329. SALES AND SALES MANAGEMENT. 3 Hours.
Examines the skills required for successful personal selling and sales management in today's world, with emphasis on industrial markets. Discusses the links between business trends and the resulting need for new approaches to the sales management challenges of planning, implementing, and evaluating a sales program. Special topics include the strategic importance of the sales force, customer/supplier partnering, multi-function collaboration, technology's role in altering traditional customer-access channels, the organization of the sales function for profitability vs. revenue, and the development of effective major account strategies.

MARK 5330. SERVICES MARKETING MANAGEMENT. 3 Hours.
Examines conceptual frameworks and management practices particularly relevant to organizations in service industries, including health care, education, financial services, retailing, non-profit organizations, and others in which the core product is a service instead of a good. The course examines many concepts and theories from the service marketing industry and analyzes their value in crafting marketing strategies. Emphasis is on problem solving unique to these types of organizations. Prerequisite: MARK 5311.

MARK 5331. INTERNATIONAL MARKETING. 3 Hours.
Management of marketing in international business. Includes marketing research, pricing, promotion, and distribution in the international environment. Examines marketing problems arising from various degrees of foreign involvement (exports, licensing, foreign subsidiaries). Prerequisite: MARK 5311.

MARK 5332. BUSINESS-TO-BUSINESS MARKETING. 3 Hours.
Marketing strategies for businesses targeting other businesses. Included are frameworks for analysis of marketing opportunities. Business-to-business e-commerce is examined. Prerequisite: MARK 5311.

MARK 5334. STRATEGIC INTERNET MARKETING. 3 Hours.
Through theoretical investigation, brainstorming, and case analysis, students develop the skills and strategies that are necessary for effective marketing via electronic media. With particular emphasis on Internet-based media, topics include developing an online corporate identity, online market research, interactive and database Web site strategies, creating and maintaining Web site content, proactive marketing tactics, analysis of Web site statistics, measuring online marketing results, and development of a strategic Internet marketing plan. Prerequisite: MARK 5311.

MARK 5335. RETAILING, FRANCHISING, AND ENTREPRENEURSHIP. 3 Hours.
Course offers exposure to elements of retail management, franchising, and entrepreneurship, including planning, promotion, pricing, and merchandising. Prerequisite: MARK 5311.

MARK 5337. MARKETING ANALYTICS AND INFORMATION MANAGEMENT. 3 Hours.
Course focuses on the fundamental concepts of customer relationship management and application of analytics approaches to solve real-world problems. The course covers topics including marketing data bases and computer-based research systems designed for the collection, storage, usage, and reporting of disaggregated data. Students will be instructed on how to increase customer profitability based on insights gained from customer data. Case studies and data analysis projects are utilized. Prerequisite: MARK 5311 or equivalent or consent of the Program Director.

MARK 5338. APPLIED QUALITATIVE RESEARCH IN BUSINESS. 3 Hours.
This hands-on course explores qualitative research techniques to deeply understand the motivators and barriers in buyer and user experiences. Students will master research design, data collection, analysis, and insight generation through practical applications. Learn to conduct and analyze interviews, focus groups, ethnographic studies, usability testing interviews, customer journey mapping, and other emerging qualitative methodologies while developing skills in research planning, execution, analysis, and presentation of findings to business stakeholders. Prerequisite: MARK 5327 or Permission from Program Director.

MARK 5340. MARKETING STRATEGY. 3 Hours.
A case course designed to give the student an opportunity to utilize the managerial and analytical tools that he or she has acquired. Uses case studies which require a realistic diagnosis of company problems, development of alternative courses of action, and the formulation of specific recommendations. Prerequisite: MARK 5311 and two additional MARK graduate courses.

MARK 5341. CONTEMPORARY TOPICS IN MARKETING RESEARCH. 3 Hours.
Stay ahead in the dynamic field of marketing research through an in-depth exploration of industry-demanded techniques and topics. This course adapts yearly to reflect emerging research methodologies, tools, and best practices. Through a combination of lectures, expert presentations, and detailed case studies, students will gain a thorough understanding of the latest qualitative and quantitative research skills required by leading marketing research organizations and corporate research teams. Prerequisite: MARK 5327.

MARK 5342. ADVANCED TOPICS IN MARKETING RESEARCH II. 3 Hours.
This companion course to MARK 5341 focuses on quantitative topics in marketing research. Typical topics include geographical information systems, non-parametric statistics, data mining, measurement issues and questionnaire design and neuro-marketing. Prerequisite: consent of Program Director.

MARK 5343. MULTIVARIATE MODELS FOR BUSINESS DECISIONS. 3 Hours.
Gain essential skills for data-driven business and marketing decisions with a focus on analysis techniques such as factor analysis, multiple regression, discriminant analysis, logistic regression, and conjoint analysis. Gain hands-on experience in interpreting results to address complex marketing challenges effectively. Prerequisite: MARK 5327, BSTAT 5325, or permission of the MSMR Program Director.

MARK 5344. BUSINESS PREDICTION & CLASSIFICATION TOOLS. 3 Hours.
Master advanced multivariate techniques to solve real-world business challenges. This course covers cluster analysis, MANOVA, multidimensional scaling, correspondence analysis, confirmatory factor analysis, and structural equation modeling, with hands-on software training for effective analysis and interpretation. Equip yourself with essential tools for high-impact decision-making in complex business environments. Prerequisite: MARK 5327, BSTAT 5325, or Permission from Program Director.

MARK 5350. MULTICULTURAL RESEARCH METHODS. 3 Hours.
This course extends the student's knowledge beyond traditional survey research concepts to include specific knowledge about the common sources of bias associated with studies of U.S. multicultural populations, such as Blacks, Hispanics and Asians. The topical coverage is multi-disciplinary and focuses on cultural and linguistic biases related to sampling, translations, questionnaire design, data collection methods, weighting, and statistical analysis. Attention is also devoted to issues related to focus group research and GIS analysis. Assignments will include readings, exercises, analysis of survey data files and Census data, and reporting of results. Prerequisite: BSTAT 5301 or equivalent.

MARK 5370. SOCIAL MEDIA MARKETING. 3 Hours.
The course studies social media as a tool for listening to engaging with customers and other significant audiences and for delivering marketing communications. Through interactive class projects students will learn best practices for managing social media channels and platforms. The course discusses examines the fundamentals for developing crafting a social media marketing plan and examines including metrics for monitoring and evaluating the effectiveness of social media campaigns. Ethical and legal issues related to privacy, security, content and crowdsourcing are also presented.

MARK 5382. INDEPENDENT STUDIES IN MARKETING. 3 Hours.
Extensive analysis of a marketing topic.

MARK 5396. MARKETING RESEARCH INTERNSHIP I. 3 Hours.
The internship involves part-time or full-time training and work experience in a company approved by the MSMR program advisor.

MARK 5397. MARKETING RESEARCH INTERNSHIP II. 3 Hours.
This is a continuation of Internship I and involves part-time or full-time work experience in a company approved by the MSMR program advisor. The student will be assigned primary responsibility for at least one marketing research project during Internship I or II. At the completion of the course, the student will present a research paper to the MSMR faculty.

MARK 5398. THESIS. 3 Hours.
Prerequisite: STAT 5325 and approval of Graduate Advisor.

MARK 5399. GRADUATE MARKETING INTERNSHIP. 3 Hours.
Practical training in marketing. Analysis of theory applied to real life situations. Course counts as an elective and has a pass/fail grade. No credit will be given for previous experience or activities. Prerequisite: Minimum nine graduate semester hours completed.

MARK 5698. THESIS. 6 Hours.
Prerequisite: STAT 5325 and approval of Graduate Advisor.

MARK 6302. CONSUMER BEHAVIOR I. 3 Hours.
Study of current thought and research underlying individual and group marketplace behavior. Theories from the behavioral sciences are applied to consumer behavior from descriptive, predictive and normative perspectives. Topics include consumer knowledge, attitude theory, persuasion, affect, and social influence. The course draws from the literature in marketing, psychology, and behavioral economics. The course will enable students to conceptualize, operationalize, and develop research ideas.

MARK 6303. CONSUMER BEHAVIOR II. 3 Hours.
This course complements the Consumer Behavior I doctoral seminar. Building on a portion of that seminar, the course focuses on a few topics (e.g. automaticity in consumer behavior, consumer choice processes) that have the following characteristics: 1) the topics are the subjects of emerging research in consumer behavior, 2) students can gain an in-depth understanding of the theoretical underpinnings of these topics, and 3) the materials are such that students can develop innovative research projects on marketing and consumer behavior related to the topics covered in the class. Prerequisite: MARK 6302.

MARK 6305. MARKETING MODELS I. 3 Hours.
Study of basic models of market and consumer behavior with particular attention to the use of classical statistical methods such as ordinary and generalized least squares, factor analysis, discriminant analysis and correspondence analysis, cluster analysis, and canonical correlation. Applications include perceptual mapping, multiattribute modeling, conjoint analysis, and product planning models. Prerequisite: STAT 5325.

MARK 6310. MARKETING STRATEGY AND MANAGEMENT. 3 Hours.
Examination of the latest research and thought in marketing and business strategy. Topics include marketing programming; product, price, promotion, and distribution decisions, marketing audits, and the design, implementation and evaluation of marketing strategies and tactics. An objective of the course is the development of innovative research ideas on marketing strategy related to the topics covered in the class.

MARK 6311. MARKETING STRATEGY AND MANAGEMENT II. 3 Hours.
In increasingly global and competitive markets, sustainable competitive advantage takes on increasing importance. Further, in many industries, product differentiation no longer provides a decisive edge over competition. This course complements the Marketing Strategy and Management I doctoral seminar. Building on a portion of that seminar, the course focuses on a few topics (e.g. transformation of a product-centric organization to a customer centric organization, organizational change, organizational agility, and technology-enabled relationship management) that will allow students to examine areas of emerging research in marketing strategy, gain an in-depth understanding of the theoretical underpinnings of the selected topics, and develop innovative research projects on marketing strategy related to the topics covered in the class. Prerequisite: MARK 6310.

MARK 6327. ADVANCED MARKETING RESEARCH METHODS. 3 Hours.
Major topics include design of research projects, generating primary data, questionnaire design, sampling for survey research, experimental design, controlling data collection, and data analysis. Coverage of scientific techniques for collecting and analyzing data; includes research paradigms, measurement, and design. Emphasis on theory and application of survey research including classical test theory, item response theory, sampling, questionnaire construction, validity and reliability assessment and data reduction.

MARK 6331. ADVANCED GLOBAL MARKETING THEORY. 3 Hours.
Examines the antecedents and consequences of global marketing. Includes the politics of global marketing, emerging global strategies, the latest concepts of market entry and development, and global marketing performance and evaluation.

MARK 6390. TOPICS IN MARKETING. 3 Hours.
Advanced doctoral level work in special topics in marketing. May be repeated when topics vary.

MARK 6392. INDEPENDENT STUDY IN MARKETING. 3 Hours.
Doctoral level analysis of marketing topic.

Marketing - Graduate

Program

MASTER'S DEGREE

- Marketing Research MS (p. 424)

FAST TRACK

- BBA/BA to Marketing Research MS Fast Track (p. 427)

Master of Science in Marketing Research

About This Program

Marketing research is essential for strategic planning, helping business leaders make informed decisions that reduce risks and maximize returns. In a competitive market, companies must consistently conduct research to refine products and services and understand shifts in buyer needs and preferences. Effective marketing research ensures companies know their target audience, what they want, and how to attract them.

The Master of Science in Marketing Research program is one of only a few in the country that offers a broad-based education in research methods and analytic techniques applied to solve business problems related to product development, branding and positioning, customer experience, pricing, and product distribution, making our graduates sought-after business insights professionals.

Students complete coursework in research methodology, analytical techniques, and specialized business topics, along with one internship, all of which are designed to produce professional researchers capable of developing insight-driven strategies to support business decisions.

The program is open to all applicants with at least a bachelor's degree, but is particularly well-suited for those with an undergraduate degree in one of the following areas:

- Behavioral Sciences (Anthropology / Psychology / Sociology)
- Business (Accounting / Economics / Finance / Management)
- Communication Studies (Advertising, Communication Technology, Public Relations)
- Computer Science / Data Science / Information Systems
- Marketing / Marketing Research
- Mathematics / Statistics
- Product Design and Development/UX/UI Design/Engineering

Competencies

1. Upon completion, students will be able to discern the organization’s need for marketing research.
2. Upon completion, students will be able to design the blueprint for execution of a primary marketing research effort.
3. Upon completion, students will be able to discover insights from data through analysis and exploration.
4. Upon completion, students will be able to disseminate insights with recommendations for organizational actions.

Admissions Criteria

The MSMR Graduate Advisor reviews all applications and determines if they qualify for unconditional admissions. Applicants who do not satisfy the conditions for admission are referred to the MSMR Admissions Committee for consideration.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures in the Graduate Catalog.

Unconditional Admission without Committee Review

Applicants qualify for unconditional admission without the need for review by the MSMR Admission Committee if they have a bachelor’s degree with a GPA of 3.0 or higher from an AACSB-accredited college or university (or equivalent) and have an overall score at or above the 30th percentile on the GMAT exam or have scores at the 30th percentile or higher in both the verbal and quantitative areas of the GRE exam. The GRE is accepted but the GMAT is preferred.

GMAT/GRE Waiver

A waiver of the GMAT/GRE and unconditional admission will be considered for applicants who meet one of the following conditions:

- Have earned a 3.5 GPA (or higher) in two calculations (cumulative and last 60 hours) with an earned undergraduate degree from an AACSB accredited college or university, or equivalent.
- An earned graduate degree or a graduate certificate (at least 9 credit hours) from a professionally and/or regionally accredited school with a 3.0 GPA (or higher) for all graduate coursework.

Admission with Committee Review

Applicants who do not meet the requirements for unconditional admission without committee review may still be granted unconditional or probationary admission upon review by the MSMR admissions committee upon a holistic review of their application. While no one factor serves as the primary determinant of admission and standardized test scores are not strictly required, it is recommended that applicants who lack prior work experience in the market research industry submit scores on the GMAT (preferred) or GRE exams to enhance the overall quality of their application. These applicants must also:

- Submit a statement of purpose of 250 words or more. Candidates' Statement of Purpose should express their educational objectives and indicate a clear interest in the field of marketing research and/or insights.
- Submit a resumé or CV that clearly details the candidate's professional experience.
- Provide two letters of recommendation from person's familiar with the applicant's academic background who can speak to the applicant's potential for success in graduate school.

The MSMR admissions committee will grant Unconditional Admission, Probationary Admission, Provisional Admission, Defer or Deny admission based on the holistic review of all these factors, along with a transcript evaluation to determine how academically prepared the student is for the rigor of the MSMR program.

When applicants are admitted on a probationary basis, they must complete the first two semesters of the MSMR program (at least 12 hours) with a cumulative GPA of 3.0 or better to gain unconditional admission.

Provisional Admission

An applicant who has submitted all official transcripts prior to the admission deadline but has not provided supplemental documents (i.e., official GMAT or GRE test scores and letters of recommendation) may be granted provisional admission at the discretion of the program director and or review committee if the student appears to meet admission requirements. Complete and satisfactory credentials must be received by the admitting program before the end of the semester in which the student has registered in a provisional status. Provisional admission does not guarantee subsequent admission on an unconditional basis.

Deferred and Denied Admission

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration. For an applicant lacking sufficient evidence to indicate potential for academic success as an MSMR student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

Curriculum

Foundations		
MARK 5320	BUYER BEHAVIOR	3

[1] MARK 5337 may only replace BSTAT 5325 as a required course with the approval of the MSMR advisor. Only students whose prior coursework demonstrates a strong background in statistics will be allowed to use MARK 5337 as a required course in place of BSTAT 5325.

Program Completion

Internship

The Marketing Research Internship (MARK 5396) represents an integrative component of the MSMR program. Although the program has built relationships with some companies, MSMR students are ultimately responsible for securing their own internship.

Students must have completed nine hours of graduate marketing coursework (three MARK courses) prior to enrolling in an internship course. Most students enroll in the internship during the summer term following their first year in the program.

Internships must meet criteria established to ensure the opportunity to apply research skills developed in the MSMR curriculum. Basic internship criteria include the following:

- Intern tasks and responsibilities must include marketing research; duties may also include marketing, sales, and/or database management
- There must be an experienced research professional on staff, providing guidance and direction on the design and execution of research in a business context.
- Interns should have the opportunity to be involved in all aspects of research, including design, planning, management, and delivery of results, providing them with experience with research from start to finish.
- Employment must:
  - Be for a minimum of 150 hours (four weeks full-time, 8 weeks part-time).
  - Align with one term on the University academic calendar (fall, spring, summer).

The MSMR Program Director will:

- Review and approve internship opportunities in advance.
- Secure an intern performance assessment from the employer at the close of the internship.
- Provide the intern with feedback and direction based on the performance assessment.

Marketing Research MS (p. 424)

Admissions Criteria

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better

- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed at UTA Arlington 12 hours of undergraduate fast track foundation courses with a minimum GPA of 3.5:

- ECON 3310 MICROECONOMICS or ECON 3312 MACROECONOMICS
- FINA 3313 BUSINESS FINANCE
- MARK 3321 PRINCIPLES OF MARKETING
- BSTAT 3321 INTERMEDIATE STATISTICS FOR BUSINESS ANALYTICS or BSTAT 3322 ADVANCED STATISTICS FOR BUSINESS ANALYTICS

For automatic admission to the MS Marketing Research program, students must complete the following graduate courses:

- BSTAT 5325 ADVANCED METHODS FOR ANALYTICS or MARK 5337 MARKETING ANALYTICS AND INFORMATION MANAGEMENT
- MARK 5327 RESEARCH FOR MARKETING DECISIONS
- APPROVED MARK Elective

An undergraduate student who successfully completes the fast-track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to graduate study. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

Bachelor of Business Administration in Marketing

About This Program

The Bachelor of Business Administration in Marketing provides knowledge centered on a customer centric view of the market, long-term customer satisfaction, and the development of mutually beneficial relationships. The discipline of marketing prepares students for exciting and rewarding career opportunities where they serve their internal and external customers.

Competencies

1. Upon completion, marketing students will understand how managers apply the marketing concept in an ever-changing environment.
2. Upon completion, marketing students will demonstrate the ability to perform and interpret a market analysis.
3. Upon completion, marketing students will demonstrate competency in developing a professional marketing plan.
4. Upon completion, marketing students will demonstrate competency in oral and written communication.
5. Upon completion, marketing students will show evidence of strategic problem-solving decision making.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Foundations		
General Core Requirements (p. 46)		42
Students are required to complete specific courses in certain core areas.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Mathematics select:		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
For Social & Behavioral Sciences select:		
ECON 2305	PRINCIPLES OF MACROECONOMICS	
For Component Area Option select:		
ECON 2306	PRINCIPLES OF MICROECONOMICS	
Business Foundations		
Additional hours required in core.		2
UNIV 1101	CAREER PREPARATION AND STUDENT SUCCESS	1
or UNIV 1131	STUDENT SUCCESS

College of Business Undergraduate Advising (https://www.uta.edu/academics/schools-colleges/business/undergraduate-advising/)

Certificate in Sales

About This Program

The Sales Certificate prepares students for a challenging and rewarding career in the sales profession. The program will enhance students' abilities to sell themselves, their ideas, as well as products and services. It also equips students with knowledge and skills related to managing mutually beneficial relationships with customers. The program stresses the ethical aspects of sales, deemed a necessary prerequisite for sustainable growth. The Sales Certificate is built on a strong theoretical background but emphasizes applications and practice. The program is available to both business and non-business majors.

For additional information or questions about the undergraduate certificate, please contact the College of Business Undergraduate Advising Office at 817-272-3368 or ugadvise@uta.edu.

Competencies

1. Upon completion, students will demonstrate the ability to engage in sales conversations with professional buyers.
2. Upon completion, students will demonstrate the ability to create an informative, objective, ethical sales presentation.
3. Upon completion, students will understand the importance of and the role of sales force in achieving an organization’s strategic plan.

Admissions Criteria

Students seeking admission to the Sales Certificate program must have completed 45 hours of college credit with a minimum GPA of 2.0 at UT Arlington.

Curriculum

Foundations		
MARK 3322	PROFESSIONAL SELLING	3
MARK 4308	MANAGEMENT AND LEADERSHIP OF THE SALES FORCE	3
Non-Major or Major Option		**3**
Non-majors must complete the following before taking foundations courses:		
MARK 3321	PRINCIPLES OF MARKETING	
or BCOM 3360	EFFECTIVE BUSINESS COMMUNICATION	
Business majors select one of the following:		

BCOM 4380	ADVANCED COMMUNICATIONS FOR BUSINESS
MANA 4341	NEGOTIATIONS AND CONFLICT RESOLUTION
MARK 3370	SOCIAL MEDIA MARKETING
MARK 4303	RETAIL MARKETING
MARK 4393	MARKETING INTERNSHIP (Marketing majors only; other business majors must enroll in sales internships through their respective departments and the actual work performed in the internship must be sales focused.)

Program Completion

To remain eligible for the Sales Certificate program, all students must maintain a GPA of 2.0 or better with a minimum grade of C in every course taken as part of the Sales Certificate course.

Students who earn grades of D or F in two Sales Certificate program courses will be dismissed from the program.

Advising Resource

Freshmen students will meet with advisors in the University Advising Center for at least one semester before transitioning to the College of Business.

College of Education

College Overview

The University of Texas at Arlington's College of Education strives to promote a collaborative culture of excellence in research, teaching, and service. Our goal is to enliven students' lives, to provide them with unique experiences built on high standards, to encourage them to think critically and creatively, and to instill in them a lifetime commitment to learning and service to their communities.

The vision of the College of Education is rooted in the mission of the University of Texas at Arlington to serve the citizens of Texas, the United States, and the world through research, teaching, and service. Our programs are dedicated to the development of intellectual leaders who are prepared to participate in professional, social, and technological change. We prepare professionals who work collaboratively with PK-20 education colleagues and others to improve learner outcomes, promote the advancement of the field through ongoing professional development, the use of evidence-based and innovative practices, and advocate on behalf of all learners and the education profession.

The college currently offers bachelors, masters, and doctoral degrees through its academic units: the Departments of Teacher and Administrator Preparation and Higher Education, Adult Learning, and Organizational Studies. Students may also pursue professional teacher, administrator, and other certifications.

Programs leading to educator and administrator certification in the state of Texas are accredited by the Texas Education Agency.

Higher Education, Adult Learning, and Organizational Studies

Department Overview

Educators play a pivotal role in the development of the thinkers, leaders, and innovators of tomorrow. In the Department of Higher Education, Adult Learning, and Organizational Studies, we support the leadership and development of individuals seeking to understand and advance PK-20 educational leadership practice, policy, and research. We offer master's programs in instructional learning design technologies and mind, brain, and education, along with a doctoral program in educational leadership and policy studies.

Graduate Programs (p. 447)

Undergraduate Programs (p. 457)

COURSES

EDAD 1130. FOUNDATIONS OF LEADERSHIP. 1 Hour.
Student leadership trainers, under the supervision of the staff in the Department of Student Activities, facilitate class discussion and assist students in identifying the necessary skills for effective leadership in university organizations and in both personal and professional settings. Topics include: leadership vs. management communication, leadership styles and personality traits, emotionally intelligent leadership, ethical leadership, leadership and change, and diversity and cultural awareness. Opportunities are provided for group problem solving, and team interaction and collaboration. Elective only and does not count as part of the professional certification requirements. Pass-Fail grades will be awarded.

EDAD 1330. INTRODUCTION TO LEADERSHIP & DIVERSITY, EQUITY, AND INCLUSION. 3 Hours.
Study the dimensions of leadership and its application to diversity, equity, and inclusion. Students will explore social identities development and power dynamics that result in inequalities within various systems. Students will also unpack cultural identities, life experiences, and world views on leadership relationships.

EDAD 2330. THEORIES IN LEADERSHIP. 3 Hours.
Review leadership theories and practices from critical perspectives. Students will deconstruct common concepts and theories of leadership and reconstruct how leadership can be used for social change. Students will have an opportunity to develop skills necessary to employ socially just leadership processes and practice.

EDAD 4330. CAPSTONE IN LEADERSHIP STUDIES. 3 Hours.
The primary purpose of this course is to revisit the themes introduced throughout the minor coursework. The course is intended to generate critical thought, reflection, and application of leadership development for social change. This class serves as the capstone that will draw upon students' leadership approaches, DEI, career aspirations, and community engagement to help students consider change in daily tasks and relationships. Students will have opportunities to engage with research to reimagine leadership for social change. Prerequisite: EDAD 2330, EDAD 1330.

EDAD 4390. SELECTED TOPICS IN LEADERSHIP. 3 Hours.
An examination of different topics related to leadership. This seminar may be repeated for credit as the topic changes.

EDAD 4391. INDEPENDENT RESEARCH. 3 Hours.
An examination of selected topics related to leadership. Can be repeated for credit with permission.

EDAD 5190. SELECTED TOPICS IN EDUCATION. 1 Hour.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDAD 5191. INDEPENDENT RESEARCH. 1 Hour.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. Can be repeated for credit with permission.

EDAD 5199. PROBATIONARY CERTIFICATION INTERNSHIP. 1 Hour.
This course provides mentoring and supervision to UTA Educational Leadership and Policy Studies students employed as assistant principals or principals while on a Probationary Certificate and not enrolled in either EDAD 5389 or EDAD 5399. Individuals must reenroll in EDAD 5199 while on probation, which is initially issued for one calendar year.

EDAD 5290. SELECTED TOPICS IN EDUCATION. 2 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDAD 5291. INDEPENDENT RESEARCH. 2 Hours.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. Can be repeated for credit with permission.

EDAD 5302. EDUCATIONAL TECHNOLOGY PLANNING. 3 Hours.
This course is designed to help prepare future educational administrators in assessing, revising, or developing a technology plan for their school, district, or campus. Students will explore the overall concepts of technology, new applications of technology, and how they apply to educational standards, such as the National Educational Technology Standards for Teachers (NETS-T) and the Technology Standards for School Administrators (TSSA).

EDAD 5303. TEACHER LEADERSHIP FOR SCHOOL IMPROVEMENT. 3 Hours.
Examine formal/informal leadership in schools emphasizing the roles and contributions of teachers as leaders of instructional improvement at the classroom and school levels. Study organizational dynamics and school culture from theoretical and practical perspectives for improving teaching and learning. Develop leadership strategies for shaping professional learning communities.

EDAD 5304. DATA-DRIVEN ASSESSMENT. 3 Hours.
Examine the impact of national and state-level education standards on curriculum, instruction, out-of-class experiences, and in-class and out-of-class assessment practices. Examine the structure and uses of both standardized, formative, summative, culturally-responsive, and multimodal assessments. Examine methods for using assessment data to design differentiated instruction and out-of-class experiences that meet varying student needs. Some of the topics will be examined in relation to assessment and institutional servingness for racially and ethnically minoritized students, such as Hispanic college students.

EDAD 5305. CURRICULUM DESIGN, IMPLEMENTATION, AND EVALUATION. 3 Hours.
The emphasis of this course is an examination of theory and research in curriculum development, implementation, and evaluation. The areas of focus include challenges principals face regarding curriculum leadership, implementing and maintaining rigorous curriculum and instruction, understanding a teacher's perspective about curriculum and instruction, the impact of ensuring an aligned curriculum, distributed leadership in curriculum design, implementation, and evaluation, improvement through planning, monitoring, and feedback, the importance of coaching teachers, and understanding the impact of the instructional leader.

EDAD 5306. COACHING AND CONSULTATION SKILLS. 3 Hours.
Examine various methods of coaching at the individual teacher, grade-level or subject-area team, and whole-school levels. Includes in-class instructional demonstrations, teacher observations and providing feedback, coaching through team meetings, and providing whole-school professional development. Also effective ways of including school administrators in instructional improvement.

EDAD 5307. TEACHER LEADERSHIP POLICY TRENDS AND ISSUES. 3 Hours.
Examines current national and state-level trends and policies in teacher leadership. Reviews research on the effects of various models of teacher leadership on instructional improvement.

EDAD 5309. ADVANCED INSTRUCTIONAL STRATEGIES. 3 Hours.
A study of advanced models of teaching, including concept attainment, inductive thinking, inquiry, cognitive growth, non-directive group investigation, laboratory training, simulation and the training model. Research in teacher effectiveness and demonstration of various models will be required.

EDAD 5312. ORGANIZATIONAL THEORY AND LEADERSHIP IN HIGHER EDUCATION. 3 Hours.
This is an introductory course on the theory and research of behavior in informal and formal organizational settings within the context of PK-20 education. Topics include basic conceptions of behavior, motivation, attitudes and group functioning. Emphasis is on understanding the processes of organizing and organization behavior at the individual, group, and institutional levels of analysis.

EDAD 5315. RESEARCH PRACTICUM. 3 Hours.
Examination of basic concepts and procedures necessary for empirical research investigations within classroom contexts, experimental design, data collection and interpretation, and statistical analysis.

EDAD 5321. EDUCATIONAL RES. 3 Hours.

EDAD 5322. EDUCATIONAL RESEARCH AND EVALUATION. 3 Hours.
An overview of basic concepts and procedures necessary for analyzing, designing, and conducting quantitative and qualitative educational studies. Topics include familiarization with educational journals, associations, funding agencies, accreditation procedures, program evaluation, sampling procedures, data collection, and statistical analyses.

EDAD 5330. LEADERSHIP IN THE INSTRUCTIONAL SETTING PRACTICUM. 3 Hours.
Examination of current research on effective instructional organizations and classroom instruction in today's schools, on characteristics of school leadership, and on the role and function of the teacher as instructional leader. Topics include the essential components of instruction, developing instructional-management systems, evaluating student and teacher performance, assisting colleagues to monitor and improve instructional skills, school climate and leadership styles as they impact on school improvement. This is the second course of the practicum experience. Prerequisite: EDAD 5389.

EDAD 5340. THE GLOBAL COLLEGE STUDENT. 3 Hours.
The purpose of the course is to explore and understand the nature, culture, and development of the College Student in an international context. The course focuses on examining a range of development theories that offer insight into the processes of student learning, growth, and development during the college years with focus on international students. The course will discuss student development models worldwide to better understand how to integrate the international students on American campuses.

EDAD 5341. INTERNATIONAL HIGHER EDUCATION ADMINISTRATION AND STUDENT AFFAIRS. 3 Hours.
The course is designed to introduce students to the organization, management, and philosophy of higher education administration and student affairs at post-secondary institutions. It explores the range of services and organizations associated with the wide range of positions that exist in student and academic affairs and helps students gain a better understanding of the potential career opportunities that await them after graduation. The course explores issues related to the integration of international students on American campuses as well as new initiatives designed for this student population.

EDAD 5344. INTERNATIONAL PERSPECTIVES ON COMMUNITY COLLEGE EDUCATION. 3 Hours.
This course will provide students with the philosophical and historical foundations of the American community college system and equivalent institutions worldwide. The course will examine current issues including, but not limited to, the evolution of the community college baccalaureate, principles of accreditation, institutional effectiveness, workforce development, and federal oversight of community colleges. Students will also explore how international students are integrated on community college campuses.

EDAD 5347. TRENDS AND ISSUES IN GLOBAL HIGHER EDUCATION. 3 Hours.
The course is designed to introduce students to key issues affecting higher education today. Through diverse and critical readings, the students explore issues such as access and equity, affirmative action, academic freedom, college costs, and strategic change. The course content is designed from an international and comparative perspective.

EDAD 5350. AMERICAN COLLEGE STUDENT. 3 Hours.
The purpose of the course is to explore and understand the nature, culture, and development of the American College Student. The course focuses on examining a range of development theories that offer insight into the processes of student learning, growth, and development during the college years.

EDAD 5351. HIGHER EDUCATION ADMINISTRATION AND STUDENT AFFAIRS. 3 Hours.
The course is designed to introduce students to the organization, management, and philosophy of higher education administration and student affairs at post-secondary institutions. It explores the range of services and organizations associated with the wide-range of positions that exist in student and academic affairs and helps students gain a better understanding of the potential career opportunities that await them after graduation.

EDAD 5352. HIGHER EDUCATION LAW. 3 Hours.
The purpose of this course is to provide students with the fundamental cases of higher education law for administrators. Topics of this course may include the legal structure of higher education, separation of church and state, religion, academic freedom, employment and tenure, due process, computer-related legal issues, copyright, students' rights of speech and expression, search and seizure, desegregation, tort liability, contracts and collective bargaining.

EDAD 5353. HIGHER EDUCATION FINANCE. 3 Hours.
This course will provide knowledge of the theoretical basis for use of tax funds for education, student fees and tuition, state methods for financing, planning, cost benefit, budgeting, federal role, capital outlay, and the relationships between educational objectives and resource allocations.

EDAD 5354. THE AMERICAN COMMUNITY COLLEGE. 3 Hours.
This course will provide students with the philosophical and historical foundations of the American community college system. Students will explore current issues including, but not limited to, the evolution of the community college baccalaureate, principles of accreditation, institutional effectiveness, workforce development/career readiness, and federal oversight of community colleges. In addition, barriers and strategies to improve throughputs in PK-20 will be discussed, highlighting the role of the community college in that pipeline process and how additional designations such as Hispanic Serving Institution (HSI) can further enhance their ability to transform the education system. This course benefits learners interested in higher education and those who aspire to be professors, researchers, policy analysts, and/or administrators at institutions of higher education.

EDAD 5355. HIGHER EDUCATION CURRICULUM. 3 Hours.
An examination of theory and research in curriculum development, implementation, and evaluation in higher education settings. Emphasis will be on current trends in the content areas.

EDAD 5356. HISTORY, PRINCIPLES, AND PHILOSOPHY OF HIGHER EDUCATION ADMINISTRATION. 3 Hours.
This course is for current and prospective faculty, administrators, and staff seeking to learn about the American higher education system. The topics addressed include the history, recent developments, and strategies for future management and administration, finance, organization, governance, and the mission and role of higher education in American society.

EDAD 5357. HIGHER EDUCATION TRENDS AND ISSUES. 3 Hours.
The course is designed to introduce students to key issues affecting higher education today. Through diverse and critical readings, the students explore issues such as access and equity, affirmative action, faculty, academic freedom, college costs, and strategic change.

EDAD 5360. LEADERSHIP THEORY. 3 Hours.
Focus is on leadership, organization, and administration of schools. The importance of campus culture, climate, vision and ethics will be stressed throughout standards-based instruction, case studies, developmental activities, readings, reflections and field experiences. The importance of appropriate principal induction will be stressed along with the concepts of the principal as scholar-practitioner and proactive leader. An emphasis will be placed on continuous school improvement and a commitment to professional development.

EDAD 5363. ADVANCED EDUCATIONAL RESEARCH. 3 Hours.
An in-depth coverage of selected topics in the design of research and the collection and analysis of data. Topics include multivariate analyses, experimental and quasi-experimental designs, development and selection of data collection instruments, focus group interviewing, observational research, the delphi method, and interpretive analysis.

EDAD 5365. LEADING LEARNING ORGANIZATIONS. 3 Hours.
The change process in educational settings serves to focus this course. Moving along the continuum of change theories, the planning, adoption, implementation and institutionalization of change are explored across public school and post-secondary learning organizations.

EDAD 5376. EDUCATIONAL GOVERNANCE. 3 Hours.
Focus on the appointed and elected entities and bureaucracies that determine and implement policy in public education.

EDAD 5377. CONTEMPORARY ISSUES IN EDUCATION. 3 Hours.
An exploration of selected controversial issues in contemporary education will include research that discusses the relevance of context and culture in designing and measuring student success. Such topics will also include contemporary analysis of policy and perspectives on educational leaders' ability to promote student success in various PK-20 environments, such as the Hispanic-Serving Institution (HSI), etc. Symposium/seminar/lecture format.

EDAD 5379. SUPERINTENDENCY INTERNSHIP. 3 Hours.
Provides experiences in the various roles and responsibilities of a superintendent of schools under the direction of a school district mentor and a university supervisor. An internship project will be developed in consultation with public school and university personnel.

EDAD 5380. DIVERSITY AND EQUITY IN EDUCATION. 3 Hours.
Effective leadership, instruction, and management strategies for work in diverse educational settings. Designed to provide increased self-awareness and insight into issues of diversity and equity such as culture, ethnicity, exceptionality, gender, language, and socioeconomic status. Demographic issues along with urban and suburban educational settings will also be addressed.

EDAD 5381. GOVERNANCE, POLITICAL AND LEGAL ASPECTS OF EDUCATION. 3 Hours.
Focus on the legal foundation of public education, political theory, and application of political skills in working with school personnel, students, parents, and community organizations. The role of the law, court rulings, and the politics of school governance at the federal, state, and local levels will be addressed.

EDAD 5382. FOUNDATIONS OF EDUCATIONAL ADMINISTRATION. 3 Hours.
Will address the various aspects of instructional leadership roles and responsibilities of central office as well as building level administrators and supervisors. Topics included will be history of educational administration, educational philosophy, the global understanding of administrative roles in urban and rural settings, and professional organizations, as well as an overview of educational reforms, site-based management, governance, instructional management, evaluation, exchanging ideas, making changes, coaching beginning teachers, mentoring of teachers and peers, and a diverse community.

EDAD 5383. THE PRINCIPALSHIP. 3 Hours.
The Principalship will address the role of the campus leader in the leadership, organization and administration of schools. The importance of campus culture, climate, vision and ethics will be stressed throughout standards-based instruction, case studies, developmental activities, readings, reflections and field experiences. The importance of appropriate principal induction will be stressed along with the concepts of the principal as scholar-practitioner and proactive leader. An emphasis will be placed on continuous school improvement and a commitment to professional development.

EDAD 5384. RESOURCE MANAGEMENT IN EDUCATION. 3 Hours.
School finance, educator compliance training, as well as auxiliary areas of resource management, will be addressed. The emphasis will be on the use of technology, alternative models of financing and budgeting, and sources of revenue from the federal, state, and local levels as well as from private sources. The course is designed to assist administrators in developing an understanding of the functions, operation, and evaluation of auxiliary services which support the educational program.

EDAD 5388. EDUCATIONAL POLICY ISSUES IN THE PUBLIC SCHOOLS. 3 Hours.
Examination of positions on policy issues of importance in education.

EDAD 5389. ADMINISTRATIVE PRACTICUM. 3 Hours.
Designed to provide prospective educational administrators job-related experiences under supervision in an appropriate educational setting. An approved professional study is designed in relationship to the intern's interest and past experiences. Can be repeated for credit with approval of advisor.

EDAD 5390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. Such topics will be grounded in research that supports PK-20 student success in and out-of-the classroom as well as educational leaders' success in various types of institutions, such as the Hispanic-Serving Institution (HSI), etc. This seminar may be repeated for credit as the topic changes.

EDAD 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. Can be repeated for credit with permission.

EDAD 5395. FUTURISTIC LEADERSHIP ROLES IN SCHOOL ADMINISTRATION. 3 Hours.
Concepts and skills to prepare educational leaders for learner-centered schools and to anticipate and foster the professional development of all staff and parents in the learning community.

EDAD 5399. CAPSTONE PRACTICUM IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES. 3 Hours.
The course focus will be on collaborative inquiry and action research in the individual classroom, team, school, and/or professional learning community. Each student will identify, research, design and initiate addressing a real problem at their work site. Students will leave this course and graduate from the program with a research presentation as part of their informal professional portfolio. Successful completion of the Capstone Internship will fulfill the comprehensive examination requirements for the graduate degree and/or certification. Requirements of EDAD 5399 will include, but not be limited to, those collaboratively established by University faculty and school administrative personnel. EDAD 5389 and EDAD 5330 are prerequisites for EDAD 5399 for students in Master of Education in Educational Leadership and Policy Studies with Principal Certificate Courses and Principal Certification Preparation Only programs. Prerequisite: EDAD 5389, EDAD 5330.

EDAD 6179. SUPERINTENDENCY PRACTICUM. 1 Hour.
Provides experiences in the various roles and responsibilities of a superintendent of schools under the direction of a school district mentor and a university supervisor. An internship project will be developed in consultation with public school and university personnel.

EDAD 6279. SUPERINTENDENCY PRACTICUM. 2 Hours.
Provides experiences in the various roles and responsibilities of a superintendent of schools under the direction of a school district mentor and a university supervisor. An internship project will be developed in consultation with public school and university personnel. Prerequisite: permission of advisor.

EDAD 6301. INTRODUCTION TO DOCTORAL STUDIES. 3 Hours.
This course provides an introduction to doctoral and PK-20 education studies. It also includes a discussion of the dissertation process and doctoral student journey and practices for successful doctoral study. Students will explore the purpose and function of scholarly writing, practice fundamental writing and editing skills, and utilize APA style requirements. It should be noted that discussion is a critical component of learning, so this pedagogic approach will be central to the course as well. Prerequisite: ELPS doctoral program admittance required.

EDAD 6304. INTRODUCTION TO EDUCATIONAL RESEARCH. 3 Hours.
The purpose of this course is to introduce doctoral students to different approaches to educational research and to alternative frames and paradigms of interpretation (e.g., constructivism, feminism, poststructuralism, critical theory, etc.). This course will also explore ethical issues throughout the research process. Students will be introduced to research questions relevant to various qualitative, quantitative, and mixed methods research designs.

EDAD 6308. INTRODUCTION TO QUALITATIVE RESEARCH. 3 Hours.
In this introductory course, students will learn about various epistemologies, philosophies, theories, logics, designs, and practices of qualitative research by studying more than and beyond the popularized methodologies in education research. Engaging with qualitative scholarly literature, we will learn about the strategies and tools of designing qualitative research including frameworks, data collection methods, relational responsibilities, positionality, ethics, and the tensions surrounding them.

EDAD 6310. INTRODUCTION TO STATISTICS. 3 Hours.
This course examines introductory statistical methods and their implications for educational research and evaluation. Students will be introduced to descriptive statistics, confidence intervals, hypothesis testing, Type I and Type II errors, and ethical issues. Through statistical software applications (e.g., SAS, SPSS, R, Stata, etc.), students will also gain hands-on experience such as running and interpreting t-tests, ANOVA, correlation, and Chi-square.

EDAD 6315. ADVANCED STATISTICS. 3 Hours.
This course examines advanced statistical methods through a basic introduction to measurement analysis in educational research focusing on procedures, including factorial and repeated ANOVA, MANOVA, ANCOVA, multiple regression, logistic regression, multivariate analysis, reliability, exploratory, and confirmatory factor analysis. Students will learn to develop an advanced understanding of these methods and conduct data analysis using relevant statistical applications (e.g., JMP, R, SAS, SPSS, Stata, etc.).

EDAD 6318. ADVANCED QUALITATIVE RESEARCH. 3 Hours.
This course is designed to provide students with both theoretical and practical opportunities to explore qualitative research in various educational contexts. The course focuses on advancing qualitative data collection and analysis through both analog and digital strategies and tools. Students will help support each other in developing and implementing independent, small-scale research projects relevant to PK-20 education and write a research paper on their qualitative studies. Prerequisite: EDAD 6308.

EDAD 6320. K-16 PHILOSOPHY & HISTORY POLICY RESEARCH. 3 Hours.
Analysis of the roles of history, philosophy, culture, and values in shaping educational policy. Topics include the Greek Academies, the Medieval Universities, Progressivism, Neo-Conservatism, and Postmodern perspectives, as necessary antecedents to the K-16 movement. Detailed analysis of the roles, history, philosophy, culture, and values for public school and policy making within institutions of higher education.

EDAD 6325. EDUCATIONAL POLICY ANALYSIS. 3 Hours.
This advanced policy course enables students to identify relevant educational principles, practices, and processes of policy analysis. Students engage in policy analysis of historic and contemporary PK-20 education policies and will develop and apply policy analysis in their area of interest using current research on specific education policy (their own or from other studies) as a shared context for learning.

EDAD 6327. K-16 POLICY & LAW ANALYSIS RESEARCH. 3 Hours.
A study of principles and practices involved in policy analysis research in educational settings and critical analysis of the legal underpinnings of public K-16 education with particular emphasis on the United States Constitution.

EDAD 6330. INTRODUCTION TO EDUCATION POLICY. 3 Hours.
This course provides a comprehensive introduction to micro and macro-level policy-related issues and topics, theories, methodologies, and analysis within the diverse contexts of PK- 20 education.

EDAD 6331. LEADERSHIP IN THE K-12 INSTRUCTIONAL SETTING. 3 Hours.
Examination of current research on effective instructional organizations and classroom instruction in today's schools, on characteristics of school leadership, and on the role and function of the teacher as instructional leader. Topics include the essential components of instruction, developing instructional-management systems, evaluating student and teacher performance, assisting colleagues to monitor and improve instructional skills, school climate and leadership styles as they impact on school improvement. For doctoral students only.

EDAD 6335. K-16 ACCOUNTABILITY POLICY RESEARCH. 3 Hours.
A comprehensive course covering the research about and role of outcomes assessment in institutional accountability and accreditation. Addresses the relationship between outcomes assessment and strategic planning. Exploration of outcomes assessment in public schools and institutions of higher education.

EDAD 6340. ORGANIZATIONAL THEORIES IN EDUCATION. 3 Hours.
This is an introductory course on the theory and research of behavior in informal and formal organizational settings within the context of PK-20 education. Topics include basic conceptions of behavior, motivation, attitudes and group functioning. Emphasis is on understanding the processes of organizing and organization behavior at the individual, group, and institutional levels of analysis.

EDAD 6342. K-16 ORGANIZATIONAL & LEADERSHIP THEORY RESEARCH. 3 Hours.
In depth study of theories of organizing , the ways in which they are evidenced in educational organizations and the ways in which they influence leaders and learning. Analysis of both classical and contemporary theories, and their application in K-16 settings.

EDAD 6343. CONTEXTS OF EDUCATION. 3 Hours.
This course offers students an interdisciplinary introduction to in/formal PK-20 education and schooling, while critically studying past, present, and future opportunities and possibilities of education around the globe. Through the study and application of various educational concepts and theories, issues and trends, and intersectionalities, this course interrogates and reimagines diverse educational contexts across various historical, economic, philosophical, social, and cultural, political, economic dimensions. Prerequisite: ELPS doctoral program admittance required.

EDAD 6345. K-16 HUMAN RESOURCES LEADERSHIP RESEARCH. 3 Hours.
Human resource needs in educational settings, including faculty and staff recruitment, selection, evaluation, retention, promotion, tenure, grievances, and leadership and personnel development.

EDAD 6350. K-16 CURRICULUM LEADERSHIP RESEARCH. 3 Hours.
Foundations, principles, and issues of curriculum, including vertical alignment and the middle college concept. Exploration of curriculum development in both public schools and institutions of higher education. Analysis of the role of articulation agreements.

EDAD 6351. HIGHER EDUCATION AND STUDENT AFFAIRS ADMINISTRATION. 3 Hours.
The course is designed to introduce students to the organization, management, and philosophy of higher education administration and student affairs at post-secondary institutions. It explores the range of services and organizations associated with the wide-range of positions that exist in student and academic affairs and helps students gain a better understanding of the potential career opportunities that await them after graduation. For doctoral students only.

EDAD 6352. HIGHER EDUCATION LAW. 3 Hours.
The purpose of this course is to provide students with the fundamental cases of higher education law for administrators. Topics of this course may include the legal structure of higher education, separation of church and state, religion, academic freedom, employment and tenure, due process, computer-related legal issues, copyright, students' rights of speech and expression, search and seizure, desegregation, tort liability, contracts and collective bargaining. For doctoral students only.

EDAD 6353. HIGHER EDUCATION FINANCE. 3 Hours.
This course will provide knowledge of the theoretical basis for use of tax funds for education, student fees and tuition, state methods for financing, planning, cost benefit, budgeting, federal role, capital outlay, and the relationships between educational objectives and resource allocations. For doctoral students only.

EDAD 6354. American Community College. 3 Hours.
This course will provide students with the philosophical and historical foundations of the American community college system. Students will explore current issues including, but not limited to, the evolution of the community college baccalaureate, principles of accreditation, institutional effectiveness, workforce development, and federal oversight of community colleges. For doctoral students only.

EDAD 6355. K-16 STUDENT SERVICES LEADERSHIP RESEARCH. 3 Hours.
Analysis of the student services, co-curricular, extracurricular, and auxiliary enterprise functions of both public schools and institutions of higher education. Particular emphasis on the relationship with the institutions' stated curricula, purposes, and institutional missions.

EDAD 6356. HISTORY, PRINCIPLES, AND PHILOSOPHY OF HIGHER EDUCATION ADMINISTRATION. 3 Hours.
This course is for current and prospective faculty, administrators, and staff seeking to learn about the American higher education system. The topics addressed include the history, recent developments, and strategies for future management and administration, finance, organization, governance, and the mission and role of higher education in American society. For doctoral students only.

EDAD 6357. HIGHER EDUCATION TRENDS AND ISSUES. 3 Hours.
The course is designed to introduce students to key issues affecting higher education today. Through diverse and critical readings, the students explore issues such as access and equity, affirmative action, faculty, academic freedom, college costs, and strategic change. For doctoral students only.

EDAD 6358. AMERICAN COLLEGE STUDENT. 3 Hours.
The purpose of the course is to explore and understand the nature, culture, and development of the American College Student. The course focuses on examining a range of development theories that offer insight into the processes of student learning, growth, and development during the college years. For doctoral students only.

EDAD 6359. HIGHER EDUCATION CURRICULUM. 3 Hours.
An examination of theory and research in curriculum development, implementation, and evaluation in higher education settings. Emphasis will be on current trends in the content areas. For doctoral students only.

EDAD 6360. EDUCATIONAL LEADERSHIP THEORY. 3 Hours.
This course focuses on major theoretical perspectives on PK-20 educational leadership, how these perspectives are studied and advanced through empirical research. Students will examine theory and empirical research on topics such as leadership effects on student learning; challenges in leading educational organizations; and the relationships among leaders' knowledge, skills, and dispositions and their leadership preparation and effectiveness.

EDAD 6365. K-16 LEADING LEARNING ORGANIZATIONS RESEARCH. 3 Hours.
Buildling on organizational and leadership theories and their use in educational organizations, this course focuses on the study of change theory and its uses in leading learning organizations in times of change.

EDAD 6370. RESEARCH LITERATURE REVIEW AND METHODS. 3 Hours.
This course provides an overview of the concepts necessary for creating an extensive, integrative, systematic literature review. Course content will include step-by-step instructions on crafting a literature review by selecting and defining a topic; creating thematic boundaries; developing literature search strategies; analyzing strategies; identifying literature gaps and limitations; applying citation and reference styles; and writing the review.

EDAD 6371. PERSONNEL & SCHOOL LAW. 3 Hours.
Focuses on understanding the relationship between motivation and the management of human resources; articulate the basics of team management and group facilitation; identify proper procedures for recruiting, assignment, and inducting personnel; and recognize the legal requirement for suspension, transfer, reduction in force and dismissal of professional personnel. Prerequisite: permission of advisor.

EDAD 6373. THE SUPERINTENDENCY. 3 Hours.
This course introduces candidates to the many facets of the superintendency with a focus on the challenges facing the superintendent today. Topics include: exercising collaborative leadership, developing a strong organizational culture, dealing with the politics of education, building strong superintendent-board relations, managing the problems of school reform, and planning. Instruction is problem-oriented and included field-based experiences.

EDAD 6374. ADVANCED SCHOOL BUSINESS ADMINISTRATION. 3 Hours.
Survey principles of public school finance at the local, state, and federal levels. Examines the school budgeting process, methods of school funds accounting and techniques of school business management. Prerequisite: permission of advisor.

EDAD 6376. Educational Governance. 3 Hours.
Focus on the appointed and elected entities and bureaucracies that determine and implement policy in public education. For doctoral students only.

EDAD 6378. ADVANCED CURRICULUM AND PROGRAM ASSESSMENT. 3 Hours.
Focuses on the processes of implementing district-wide curriculum, programs, and other innovations in school systems. Topics include: recent research on the implementation of change in curriculum and instruction, trends in education, strategic and contextual planning, program and student assessment and accountability, and national curriculum projects. Prerequisite: permission of advisor.

EDAD 6380. K-16 RESEARCH PRACTICUM I. 3 Hours.
An In depth research experience that provides an opportunity for participants to work with an experienced faculty researcher on cutting edge K-16-related research. The practicum experience will be personalized to best meet the individual student's needs, aptitudes, and aspirations in the context of the K-16 research arena.

EDAD 6381. POLITICAL AND LEGAL ASPECTS OF K-12 EDUCATION. 3 Hours.
Focus on the legal foundation of public education, political theory, and application of political skills in working with school personnel, students, parents, and community organizations. The role of the law, Ct rulings, and the politics of school governance at the federal, state, and local levels will be addressed. For doctoral students only.

EDAD 6383. The Principalship. 3 Hours.
Examination of current research on effective instructional organizations and classroom instruction in today's schools, on characteristics of school leadership, and on the role and function of the teacher as instructional leader. Topics include the essential components of instruction, developing instructional-management systems, evaluating student and teacher performance, assisting colleagues to monitor and improve instructional skills, school climate and leadership styles as they impact on school improvement. For doctoral students only.

EDAD 6384. RESOURCE MANAGEMENT IN K-12 EDUCATION. 3 Hours.
School finance, as well as auxiliary areas of resource management, will be addressed. The emphasis will be on the use of technology, alternative models of financing and budgeting, and sources of revenue from the federal, state, and local levels as well as from private sources. The course is designed to assist administrators in developing an understanding of the functions, operation, and evaluation of auxiliary services which support the educational program. For doctoral students only.

EDAD 6385. K-16 RESEARCH PRACTICUM II. 3 Hours.
A research experience in K-16 research that provides an opportunity for participants to experience the process research with an experienced university professional. The experience will be individualized to best meet the student's needs, aptitudes, and aspirations in the context of K-16 research.

EDAD 6390. DOCTORAL RESEARCH SEMINAR. 3 Hours.
This seminar course offers doctoral students advanced, individualized writing support to help them complete their comprehensive examinations and prepare for research writing and doctoral dissertation work. Students will analyze, synthesize, integrate, apply, generalize, and expand upon research knowledge and skills gained during their program of study.

EDAD 6391. INDEPENDENT RESEARCH. 3 Hours.
Research for independent study over topic agreed upon between student and instructor. Can be repeated for credit with permission. For doctoral students only.

EDAD 6392. SELECTED TOPICS IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES. 3 Hours.
Topics within PK-20 education may vary by semester and per instructor, and may afford students the opportunity for choice within the cohort design. Selected topics courses will provide opportunities for faculty to teach courses in their areas of expertise that meet students' needs, aptitudes, and aspirations. Examples of selected topics that may be offered in leadership research include: K-16 governance, IDEA & ADA, and higher education finance. May be repeated for credit with permission of instructor.

EDAD 6399. DISSERTATION. 3 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree, and permission of major professor. Graded P/F.

EDAD 6699. DISSERTATION. 6 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree, and permission of major professor. Graded R/F/P/W.

EDAD 6999. DISSERTATION. 9 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree, and permission of major professor. Graded P/R/F.

EDAD 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken twice. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

EDADIR 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. Can be repeated for credit with permission.

EDADIR 6391. INDEPENDENT RESEARCH. 3 Hours.
Research for independent study over topic agreed upon between student and instructor. Can be repeated for credit with permission. For doctoral students only.

COURSES

EDCO 5241. A STUDY OF THE ETHICAL, LEGAL, AND PROFESSIONAL ISSUES IN SCHOOL COUNSELING. 2 Hours.
A study of the ethical, legal, and professional issues involved in the provision of guidance and counseling services in an educational setting. Content includes issues of confidentiality and privileged communication, record keeping, malpractice, client rights, counselor responsibilities, codes of ethics, and relevant laws.

EDCO 5242. TESTING AND ASSESSMENT IN SCHOOL COUNSELING. 2 Hours.
A study of the nature, characteristics, and ethical uses of psychological tests and assessment instruments in an educational setting. Included are measurements of intelligence, aptitude, achievement, interest, and personality.

EDCO 5243. THE SCHOOL GUIDANCE PROGRAM. 2 Hours.
Guidance counselors provide a variety of services in addition to counseling. Career and mental health informational services, mediation and crisis intervention services are included as well as working with parents, community resources, and the instructional staff.

EDCO 5300. Counseling Students in Schools, Part 1. 3 Hours.
During this capstone course and practicum, candidates will attend a three-hour evening course, and must complete a minimum of 80 of their 160 practicum hours in an approved public school. This will include individual counseling, small group counseling, consulting activities, guidance activities delivered to classrooms, planning, testing and test interpretation, and other activities as directed by the site-based mentor counselor and by a UTA supervisor. Additionally, there will be required every-other-Friday two-hour-after-school seminars at UTA.

EDCO 5301. Counseling Students in Schools, part 2. 3 Hours.
This course is a follow up to EDCO 5300 and will also include required every-other-Friday afternoon two-hour-after-school seminars. Candidates will complete their practicum activities this semester by finishing their total of 160 (minimum) supervised hours in their approved public school along with all other course requirements. A university supervisor and a site-based mentor counselor will provide practicum supervision.

EDCO 5340. ADVANCED HUMAN GROWTH AND DIVERSITY. 3 Hours.
This advanced course includes the theories of psychosocial, cognitive, and biological development as well as the characteristics and needs of special populations including gifted and talented and special education. Also included is research on gender, culture, ethnicity, socioeconomic status, intellect, lifestyle, and other issues of relevance for educators and students in today's schools.

COURSES

EDUC 2101. EXPLORING TEACHING. 1 Hour.
An opportunity to experience a mentorship with public school students while exploring the impact Gardner's Multiple Intelligences and personality profiles play in the learning environment. Ten hours of mentorship required. Academic credit awarded. Service Learning course.

EDUC 2302. THE PROFESSIONAL EDUCATOR. 3 Hours.
This course introduces students to the teaching profession. Professionalism, ethics, learning theory and historical foundations, advocacy, and current trends and issues in education will be examined. Students will develop a personal philosophy of education. This course fulfills the University requirement for either UNIV 1101 or UNIV 1131.

EDUC 2330. STUDENT LEADER EFFECTIVENESS TRAINING. 3 Hours.
Identifies the philosophy and theories of leadership, leadership styles, and contemporary leadership issues for any student who desires to pursue their leadership education. Practical application of leadership skills are developed through interactive class discussions, analyzing case studies, and group problem-solving and role-playing experiences. Elective only and does not count as part of the professional education certification requirements.

EDUC 3301. TEACHING DIVERSE LEARNERS. 3 Hours.
A survey course that focuses on effective differentiated instruction, assessment, and management strategies for working with diverse learners to build capacity for constructing a culturally responsive learning environment. Designed to provide increased self-awareness and insight into issues of diversity. Additionally, students will examine education law and models related to diverse learners as well as strategies for working with parents and families of diverse learners. Students will evaluate multicultural context, demographics, and practices at a local school. This course requires students to spend a minimum of 20 hours a semester in a K-12 classroom.

EDUC 3333. STEM EDUCATION IN THE PK-12 CONTEXT. 3 Hours.
Methods and materials for integrated STEM teaching and learning in the PK-12 context. Emphasis on developing best practices for an integrated context that combines and makes connections between science, technology, engineering, and mathematics. This includes, but is not limited to, project and problem-based learning, real world problem solving, inquiry-based instruction, computational thinking, and engineering design. Includes field-experience in a PK-12 STEM setting.

EDUC 3390. SPECIAL TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 4316. FOUNDATIONS OF EDUCATION. 3 Hours.
The course introduces students to the teaching profession. Historical foundations, professionalism, school law (including special education law), diversity in education, effective communication, family involvement, and current trends and issues in education will be examined. Students will also examine personal reasons for wanting to teach and will create a personal philosophy of education. Field observation required. (2-1).

EDUC 4318. POSITIVE CLASSROOM MANAGEMENT. 3 Hours.
A survey of effective strategies of classroom management based on contemporary research. Particular attention will be paid to creating proactive learning environments through positive behavioral interventions and supports. Outcomes students will demonstrate include: instructional management and application of positive behavioral supports, procedures of assessment for planning classroom management; understanding of functional behavior assessment, a continuum of behavioral support, and the role of behavioral strategies in instructional classroom management; and understanding classroom management systems and instructional formats.

EDUC 4319. CLASSROOM ASSESSMENT. 3 Hours.
This course will introduce students to classroom assessment strategies that are used to inform teaching. Focus will include ways to interpret standardized test results and also create and use authentic classroom-based assessments to design and deliver differentiated instruction. Data-based instructional decisions will also be introduced. Course will include a field-based component.

EDUC 4325. WOMEN IN SCIENCE. 3 Hours.
Explores the role of women in science. Emphasis on gender and science, the history of women in science, gender equity in the classroom, strategies for the retention of women scientists, the current culture/climate for women in science, and contemporary women in science. Offered as EDUC 4325, SCIE 4325, and GWSS 4325. Credit will be granted only once.

EDUC 4331. KNOWING AND LEARNING IN MATH AND SCIENCE. 3 Hours.
Restricted to students in the UTeach Arlington program. Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment. Three lecture hours a week for one semester; additional hours may be required. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment in either.

EDUC 4332. CLASSROOM INTERACTIONS. 3 Hours.
Restricted to students in the UTeach Arlington program. Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Prerequisite: C or better in SCIE 1202 or C or better in SCIE 1334; C or better in EDUC 4331 or concurrent enrollment.

EDUC 4333. MULTIPLE TEACHING PRACTICES IN MATH AND SCIENCE. 3 Hours.
Restricted to students in the UTeach Arlington program who have earned a passing score on the preliminary portfolio. Multiple research-based teaching practices including foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of inquiry-based, problem-based/project-based learning classrooms. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Prerequisite: C or better in EDUC 4332; formal admission to program.

EDUC 4340. HUMAN GROWTH AND DEVELOPMENT. 3 Hours.
Prerequisite to subsequent courses in teacher education. Physical, social, emotional, and cognitive growth patterns from conception to early adulthood, emphasizing familial, cultural, societal, and genetic determinants of behavior. Topics include developmental characteristics of children and adolescents including exceptional learners and students with special needs.

EDUC 4341. ORGANIZATION AND MANAGEMENT OF INSTRUCTION IN SECONDARY SCHOOLS. 3 Hours.
Emphasizes the importance of organizing, developing, and adapting management systems to enhance learning in classroom environments. Managing the teaching-learning process, applying a variety of assessment techniques, motivation, and adapting management styles to meet student needs. This course involves a two-hour lecture and two-hour application of lecture/theory. The two-hour application of lecture/theory will require students to spend time in a K-12 classroom during normal school hours, 8 a.m.-4 p.m., Monday-Friday.

EDUC 4342. APPLICATIONS OF INSTRUCTION IN MIDDLE/SECONDARY SCHOOL CLASSROOMS. 3 Hours.
Field-based applications of inquiry-based curriculum planning and instructional theory and methods. Includes writing and implementing unit and instructional goals and objectives, using instructional lesson models to meet teacher appraisal criteria including utilization of classroom technology and audiovisual aids, planning for individual needs, and evaluating student progress. This course involves a lecture and application of lecture/theory. The application of lecture/theory will require students to spend time in a Grades 4-12 classroom during normal school hours, Monday-Friday, for typically one day a week throughout the semester.

EDUC 4343. TEACHING SOCIAL STUDIES IN THE SECONDARY SCHOOL. 3 Hours.
Methods and materials for social studies teaching and learning at the secondary school level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field-experience in a social studies classroom in a local middle or high school. The application of lecture/theory will require students to spend time in a grades 7-12 social studies classroom during normal school hours, Monday-Friday, for typically one day a week throughout the semester.

EDUC 4344. TEACHING IN MIDDLE/SECONDARY SCHOOL SCIENCE CLASSROOMS. 3 Hours.
Methods and materials for inquiry-based science teaching and learning at the middle/secondary level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field experience in a PK-12 classroom setting.

EDUC 4345. TEACHING IN MIDDLE/SECONDARY SCHOOL MATHEMATICS CLASSROOMS. 3 Hours.
Methods and materials for inquiry-based mathematics teaching and learning at the middle/secondary level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field experience in a PK-12 classroom setting.

EDUC 4346. SECONDARY SCHOOL CULTURE AND THE TEACHING PROFESSION. 3 Hours.
School cultures, effective schools and teaching practices, stages of professional development, foundations of American schools, legal and ethical aspects, and societal demands on the school.

EDUC 4347. SECONDARY SCHOOL INTERNSHIP WITH TECHNOLOGY APPLICATIONS. 3 Hours.
Supervised and directed professional practice in a local secondary school. The student will be assigned to a public school site for five hours per week. Weekly seminars are required. Internship must be taken the semester prior to residency. Theory from technology will be applied during internship assignment.

EDUC 4352. TEACHING DIVERSE POPULATIONS. 3 Hours.
Effective instruction, assessment, and management strategies for working in diverse educational settings. Designed to provide increased self-awareness and insight into issues of diversity such as culture, ethnicity, exceptionality, gender, language, religion, and socioeconomic status. This course involves a two-hour lecture and two-hour application of lecture/theory. The two-hour application of lecture/theory will require students to spend time in a K-12 classroom during normal school hours, 8 a.m.-4 p.m., Monday-Friday.

EDUC 4390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 4391. CONFERENCE COURSE. 3 Hours.
Independent study in the preparation of a project or a paper on a research topic; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: permission of instructor.

EDUC 4647. CLINICAL TEACHING IN MIDDLE/SECONDARY SCHOOL/ALL-LEVEL CLASSROOMS. 6 Hours.
Supervised and directed clinical teaching in student's targeted area of certification. The student will be assigned full time for the Independent School District calendar. Required seminars provide students with theories/backgrounds/strategies to integrate and apply during clinical teaching. Students will apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis of practice. Prerequisite: Office of Educational Field Experiences approval required.

EDUC 5190. SELECTED TOPICS IN EDUCATION. 1 Hour.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5191. INDEPENDENT RESEARCH. 1 Hour.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5263. READING AND DEVELOPMENT. 2 Hours.
This course will focus on the acquisition of reading skills in the typically developing child. Sub-skills and precursors of reading such as visual and phonological processing will be examined from a neurological point of view. This foundational knowledge will then be applied to researching reading difficulties as well as the teaching and learning in the classroom for typically developing students and those with reading difficulties.

EDUC 5290. SELECTED TOPICS IN EDUCATION. 2 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5291. INDEPENDENT RESEARCH. 2 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5305. EFFECTIVE TEACHING AND LEARNING FOR 21ST CENTURY EC-12 STUDENTS. 3 Hours.
Students gain understanding of the nature of learning and the purpose of education as the pedagogical foundation to teaching in any discipline. Students develop knowledge of state and national standards and apply these standards vertically and horizontally in preparing high quality teaching and learning experiences. Students gain experience critically analyzing disciplinary content, instructional models, lessons, curricula, and research literature. Students learn to construct and test instructional models using activities that focus attention on diversity, authentic assessments, intellectual, social and emotional development, interdisciplinary connections, and technology.

EDUC 5309. ADVANCED TEACHING MODELS FOR DIVERSE LEARNERS. 3 Hours.
Students engage in the advanced study and design of curriculum models with an understanding of cognitive development, pedagogical content knowledge (PCK), and learning progressions. Students learn in-depth analyses of how students learn and how to appropriately differentiate instruction. Students learn culturally responsive teaching practices and gain skill in developing learning experiences that attend to teaching diverse learners.

EDUC 5310. DIVERSE POPULATIONS IN TODAY'S SCHOOLS. 3 Hours.
An overview of the diverse populations in today's schools and effective instruction, assessment, and management strategies for working in diverse educational settings. Urban, suburban, and rural school communities and populations will be addressed with special attention to issues of human growth and development, culture, ethnicity, exceptionality, gender, language, religion and socioeconomic status. This course application of lecture/theory which will require students to spend a minimum of 20 hours in a K-12 classroom during normal school hours.

EDUC 5314. EFFECTIVE CLASSROOM INSTRUCTION. 3 Hours.
Designed to provide teachers with skills and competencies based on research findings on effective teaching and instruction related to promoting student academic achievement. Includes identifying, developing, and practicing instructional variables that affect teacher performance and student learning tasks. Includes field-experience in a local middle or high school based on teacher candidate's certification program. The application of lecture/theory will require candidates to spend time in a grades 7-12 classroom during normal school hours, Monday-Friday.

EDUC 5315. CLINICAL TEACHING. 3 Hours.
Supervised clinical teaching in candidate's area of certification. Candidates will be assigned full-time according to school district calendar. Required seminars provide candidates with theory to integrate and apply during clinical teaching. This experience will help candidates apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis.

EDUC 5321. EDUCATIONAL RESEARCH. 3 Hours.
Examination of basic concepts and procedures necessary for empirical research investigations within classroom contexts, experimental design, data collection and interpretation, and statistical analysis.

EDUC 5322. EDUCATIONAL RESEARCH AND EVALUATION. 3 Hours.
An overview of basic concepts and procedures necessary for analyzing, designing, and conducting quantitative and qualitative educational studies. A focus on educational research, including empirical research, investigations data collection and interpretation, and statistical analysis. Also, a focus on educational evaluation including accreditation, personnel appraisal, and educational programs and materials.

EDUC 5329. CLASSROOM MANAGEMENT AND DISCIPLINE. 3 Hours.
Analysis of the variables that affect teacher and student behavior in the classroom. Survey of effective strategies of classroom management and discipline based on contemporary research. Particular attention to individual student differences in settings such as gifted and talented, handicapped, and learning disabled.

EDUC 5330. LEADERSHIP IN THE INSTRUCTIONAL SETTING. 3 Hours.
Examination of current research on effective instructional organizations and classroom instruction in today's schools, on characteristics of school leadership, and on the role and function of the teacher as instructional leader. Topics include the essential components of instruction, developing instructional-management systems, evaluating student and teacher performance, assisting colleagues to monitor and improve instructional skills, school climate and leadership styles as they impact on school improvement.

EDUC 5358. THEMATIC SCIENCE FOR ELEMENTARY AND SECONDARY TEACHERS. 3 Hours.
Professional development program for elementary and secondary science teachers who will examine a variety of instructional strategies. The course will provide a broad spectrum of content from all areas of science and provide opportunities to participate in investigations, field trips and seminars. The course will facilitate the implementation of a thematic science curriculum in elementary and secondary schools through research-based practices.

EDUC 5359. ENVIRONMENTAL SCIENCE FOR ELEMENTARY AND SECONDARY TEACHERS. 3 Hours.
Designed for elementary, middle and high school teachers who will examine a variety of environmental education issues and instructional strategies for classroom and outdoor settings. The course will provide a broad spectrum of content from all areas of science and will provide opportunities to participate in field trips, science investigations and seminar sessions. It will facilitate the implementation of an environmentally based curriculum in schools using best practices.

EDUC 5360. INTRODUCTION TO MIND, BRAIN, AND EDUCATION. 3 Hours.
Students will explore central themes and issues in the field of learning sciences, which incorporates cognitive and educational psychology, along with neuroscience, to help educators teach better and students learn better. This course also offers a number of exercises to help students become researchers as well as consumers of research.

EDUC 5361. INTRODUCTION TO EDUCATIONAL NEUROSCIENCE. 3 Hours.
This course is designed to provide an introduction to foundational areas of neuroscience such as brain anatomy and brain mapping techniques and its applications to education. Students will study different viewpoints of links between education and neuroscience and develop their own notions of what educational questions might be answered with brain-based techniques.

EDUC 5362. THE NEUROSCIENCE OF TYPICAL & ATYPICAL LANGUAGE DEVELOPMENT. 3 Hours.
This course will examine the many levels of language including phonetics, phonology, semantics, syntax and pragmatics from both functional and neuroscientific perspectives. This will be closely tied to language acquisition and early language development. The focus on the pre-reading years will provide a solid basis for further study of literacy-related skills and overall learning. Sub-skills and precursors of reading will be examined from a neurological point of view and applied to researching reading difficulties as well as the teaching and learning in the classroom. Course offered as EDUC 5362 and SPED 5309; co-list credit will be granted only as one.

EDUC 5363. THE NEUROSCIENCE OF TYPICAL & ATYPICAL DEVELOPMENT OF MATHEMATICAL AND REASONING ABILITY. 3 Hours.
The course focuses on the development of problem-solving, logical, numeracy, and mathematical skills from a cognitive neurocognitive perspective. Woven throughout the course is attention to cognitive biases in scientific thinking. Two prominent features of the course include neuroplasticity as a result of organic and environmental pressures and brain-based disorders (dyscalculia, ADHD, autism) and adaptive strategies.

EDUC 5364. EPISTEMOLOGY AND NEUROSCIENCE. 3 Hours.
Students will explore the basic principles of reasoning and knowledge construction as well as their psychological and neurobiological underpinnings. Students compare and contrast the deductive and inductive methods used in decision-making and belief-forming processes. The course also highlights the role of the frontal cortex and limbic system in how learners address and resolve questions and challenges in varying contexts. The goal of the course is to offer students the theoretical structures and critical strategies necessary for assessing their own work toward the completion of the capstone project as well as for analyzing the outcomes it generates. The skills acquired in this course are widely transferrable and can help the student to become a better consumer and producer of pedagogical and scientific research.

EDUC 5365. THEORETICAL AND CONCEPTUAL MODELS IN MIND, BRAIN, AND EDUCATION. 3 Hours.
This course is designed to help students connect cognitive science to instructional practice. Students examine the roles that cognitive models play in learning and in designing lessons and curricula. The cognitive models in this course are used to provide a framework for recognizing possible strategies for improving or re-designing curricula, as well as build lessons or interventions that fit their working context. Students are expected to take part in a prototype curriculum, analyze how it was constructed and to use their insights to build a modest curriculum over the course of the semester.

EDUC 5366. EVALUATING AND DEBUNKING EDUCATIONAL INTERVENTIONS. 3 Hours.
This course focuses on making sense of the impact of interactions between educational variables in complex systems like classrooms and schools. Being able to predict outcomes in dynamic environments requires understanding that the variables themselves can change as a result of interacting with each other, which influences how we understand systems from neural networks to school districts. The general sense of the course will be to understand certain behaviors/characteristics of dynamic systems from the examination and analysis of exemplars from multiple domains. We also examine how areas of the brain demonstrate these characteristics and use them to implement certain functionalities, and in turn examine the implications of these functionalities on curriculum and instruction.

EDUC 5367. RESEARCH METHODS IN MIND, BRAIN, AND EDUCATION. 3 Hours.
This course presents an overview of the process of scientific inquiry, while fostering an understanding of research paradigms used by researchers in MBE. The primary course goals are to support students in developing a framework for their capstone project in MBE, and help them identify the research tools and methods necessary to carry out the capstone project. To support this work students analyze research from MBE as well as the wider literature to identify relevant tools, techniques and methodologies. As students develop expertise with the tools and techniques that are relevant to their capstone project they are expected to share that knowledge with their peers.

EDUC 5368. CONDUCTING RESEARCH IN MIND, BRAIN, AND EDUCATION. 3 Hours.
The goal of this course is to help students in the Mind, Brain and Education program complete their capstone project. Students work collaboratively with fellow students and with faculty oversight to prepare a poster presentation that summarizes their capstone work, as well as choose a local, national or international conference to present their work.

EDUC 5370. INTRODUCTION TO GIFTED AND TALENTED CHILDREN. 3 Hours.
Psychological characteristics of gifted and talented children. Introduction to identification techniques, educational programs, instructional approaches, and special problems.

EDUC 5371. MEASUREMENT AND ASSESSMENT OF GIFTED AND TALENTED CHILDREN. 3 Hours.
Tests, formal and informal measures, and systems for identification and selection of the gifted and talented student. Basic test construction theory, test interpretation, and test uses.

EDUC 5372. METHODS, MATERIALS, AND CURRICULUM FOR THE GIFTED AND TALENTED. 3 Hours.
Curriculum theory and curriculum design for the gifted student. Methodology for implementing practical and theoretical objectives for gifted instruction.

EDUC 5373. CREATIVITY: THEORIES, MODELS, AND APPLICATION. 3 Hours.
The concept of and current research on creativity, the nature and assessment of creative thinking, as well as methods of fostering creativity.

EDUC 5374. PRACTICUM. 3 Hours.
Participation in a gifted and talented setting supervised by a university and/or school district representative. A wide range of practical experiences will be emphasized. Graded P/F/R.

EDUC 5380. DIVERSITY IN EDUCATIONAL SETTINGS. 3 Hours.
Effective leadership, instruction, and management strategies for work in diverse educational settings. Designed to provide increased self-awareness and insight into issues of diversity such as culture, ethnicity, exceptionality, gender, language, religion, and socioeconomic status. Demographic issues along with urban and suburban educational settings will also be addressed.

EDUC 5390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5394. UNDERSTANDING AND DESIGNING EDUCATIONAL RESEARCH. 3 Hours.
In this introductory course, students learn about different types of educational research methods and study designs that can be applied to real-world settings. Furthermore, students learn about how to write measurable research questions, ethically collect data, and be introduced to qualitative, quantitative, and mixed methods study designs. At the conclusion of this course, students should be able to understand the basics of educational research to determine whether it would be appropriate for implementation in a real-world authentic setting.

EDUC 5395. DESIGNING CLASSROOM RESEARCH. 3 Hours.
In this course, students will develop their own classroom educational research project. Their designed study will be based in the literature in their educational field and focus on classroom research questions and problems that will inform teaching practices. In this course, students will develop an individual research problem statement, argue the significance of the problem, complete a written literature review and logical chain of reasoning related to the stated problem, write specific research questions to investigate the problem in educational settings, and design a research study (methodology) that will effectively investigate their research questions. Students design a research study that shows promise for improving education, written as the first three chapters of a scholarly classroom action research project. Prerequisite: EDUC 5394. For M.Ed.T. students, this course is to be taken in the final semester of the masters' degree program. For M.Ed. students, this course is to be taken in the semester just prior to the final semester of the masters' degree program, and in the semester immediately preceding EDUC 5397.

EDUC 5396. EEG Laboratory and Experimental Design. 3 Hours.
This course is an introduction to EEG technique, covering experimental design, recording, analysis, and interpretation of brainwaves.

EDUC 5397. IMPLEMENTING AND DISSEMINATING CLASSROOM RESEARCH. 3 Hours.
In this advanced course, students will build on the knowledge gained in EDUC 5394/EDUC 5367 to specifically focus on how to collect, analyze, and interpret different types of data grounded in a variety of educational research methods. This course is split into three sections focusing on quantitative data analyses/interpretations (e.g., correlations, t-tests, and regressions), qualitative data analyses/interpretations (e.g., thematic analysis, content analysis, and summative analysis), and mixed methods analyses/interpretations. At the conclusion of this course, students should be able to collect, analyze, and interpret different types of data commonly used in educational classrooms to make data driven decisions. Prerequisite: EDUC 5394 or EDUC 5367.

EDUC 5398. THESIS. 3 Hours.
Requires an individual research project in the individual's area of concentration. Graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

EDUC 5600. COUNSELING STUDENTS IN SCHOOLS. 6 Hours.
The focus of this capstone course will be individual and group counseling theories and techniques for pre k-12 students in an educational setting. Special techniques are included for substance abuse, and for using group play therapy. Knowledge of Diagnostic and Statistical Manual of Mental Disorders, 4th. Edition (DSM IV) will be covered for purposes of diagnosis and for outside referral when necessary. Three hours in a supervised counseling practicum in area schools or with school children will be required.

EDUC 5698. THESIS. 6 Hours.
Requires an individual research project in the individual's area of concentration. Graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

Higher Education, Adult Learning, and Organizational Studies - Graduate

Programs

DOCTORAL DEGREE

- Educational Leadership and Policy Studies PhD (p. 447)

MASTER'S DEGREE

- Instructional and Learning Design Technology MEd (p. 449)
- Mind, Brain, and Education MEd (p. 452)

CERTIFICATE

- Instructional and Learning Design Technology Graduate Certificate (p. 454)
- Hispanic Serving Leadership Preparation Graduate Certificate (p. 456)

Doctor of Philosophy in Educational Leadership and Policy Studies

About This Program

Doctor of Philosophy in Educational Leadership and Policy Studies is designed for candidates who seek to enter careers in research, institutional assessment, policy analysis, institutional leadership, higher education administration, or the professoriate. The program challenges the conventional wisdom that higher education and PK-12 education are different worlds by bringing together scholars and students from all levels of education to work and study together. Particularly, the program focuses on narrowing achievement gaps by studying and creating efficacious transitions within the educational experience. Working from the premise that all people can learn at high levels, the program includes the study of the systemic barriers at all levels of education that prevent so many children, adolescents, and adults from being as successful as they possibly can be. In addition to becoming

experts in their particular area of inquiry, graduates will have a broad foundation in the study of educational leadership and policy at all levels. Students in the PhD program will be part of a cohort throughout their coursework.

Competencies

1. Upon completion, students will be able to evaluate and apply research-based policies and leadership strategies to improve educational systems across PK-12 and higher education.
2. Upon completion, students will be able to design, execute, and disseminate original research using qualitative, quantitative, or mixed-methods approaches to advance knowledge in educational leadership and policy.
3. Upon completion, students will be able to engage in interdisciplinary collaboration and effectively convey complex research and policy insights to diverse stakeholders, including educators, policymakers, and the broader community.

Admissions Criteria

A select number of qualified applicants are admitted each session to the cohort-based program. Each cohort begins coursework during the fall semester. Specific guidelines for applying to this program are found on the departmental website. Admission into this program is very competitive. The departmental admissions committee considers prior educational experiences, prior work experiences, GRE scores, a statement of interest, professional references, and so forth. Meeting admission standards does not guarantee admission to the program.

In addition to the general Office of Graduate Studies admission requirements, applicants must meet the following requirements for unconditional admission.

- Master's degree in education or other field appropriate for the doctorate in Educational Leadership and Policy Studies.
- Grade point minimum average of 3.5 out of a possible 4.0 from the master's degree.
- Successful applicants for unconditional admission are expected to present a minimum of two of the following three Graduate Record Examination (GRE) scores: (1) verbal minimum score of 153, (2) quantitative score of 144, and (3) written analytical minimum score of 4 or equivalent.
- Applicants who do not meet the minimum score requirement for a standardized test will be considered for probationary admission status when other factors are taken into account in a holistic review.
- A minimum score of 79 on the Test of English As a Foreign Language Internet Based Test (TOEFL iBT) for applicants whose native language is not English.
- At least three years of documented experience in a work environment in which the primary professional responsibility at any level has been education (e.g., teaching, administration, curriculum development, professional development, post-secondary education, government or private industry settings) is recommended.
- Admission is very competitive. Meeting admission standards does not guarantee admission to the program.
- Applicants who have been suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

BA-PHD TRACK IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES, WITH HIGHER EDUCATION ADMINISTRATION EMPHASIS

Students accepted in the MEd with Higher Education Administration Emphasis can elect, with program approval, to pursue the integrated BA-PhD track which allows students to start doctoral work earlier and transfer into the PhD program upon completion of 30 semester credit hours and after two evaluations of their academic progress. These students go through an early PhD program admission process within the ELPS Department as soon as they have completed a minimum 18 semester credit hours in the master's program.

Program Completion

DISSERTATION

The dissertation is the culmination of the PhD program and represents a distinct contribution to the field of knowledge. A dissertation defense is required.

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education of UT Arlington will be evaluated on Professional Dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by Committee on continuation or dismissal from the College of Education.

Master of Education in Instructional and Learning Design Technology

About This Program

The MEd in Instructional and Learning Design Technology is a 30-hour, 100% online graduate degree. The program of study provides PreK-12 teachers, university professors, corporate instructors/trainers, and other education professionals the opportunity to enhance their theoretical knowledge and practical skills for the design, development, and integration of education programs supported by technology

Competencies

1. Upon completion, students will be able to differentiate, interpret, and critique theories and research in the field of educational technology.
2. Upon completion, students will be able to analyze integrative approaches to planning and implementation of learning technologies in live and online environments.
3. Upon completion, students will be able to identify instructional strategies and technologies to create and support meaningful learning environments.
4. Upon completion, students will be able to develop a teaching philosophy to guide inclusive and culturally responsive teaching practices, and demonstrate knowledge of customizing online instruction based on student needs, demographics, and exceptionalities.

Admissions Criteria

Admission to the Master of Education is competitive. Some qualified students may not be admitted if demand exceeds the program’s capacity to serve all applicants. All students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator

preparation programs. Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UTA will lead to certification in their state.

UNCONDITIONAL ADMISSION

Applicants demonstrating the following may be offered admission without conditions.

1. Earned bachelor's degree
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA in the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Proof of two or more years of relevant experience as a trainer or educator in corporate, military, K12 or higher education settings (for example, HR professional, principal, training manager, instructional designer, teacher, administrator or professor) through submission of professional resume.
4. Statement of interest (no more than 500 words)

PROBATIONARY ADMISSION

Applicants demonstrating the following may be offered probationary admission.

1. Earned bachelor's degree
2. Undergraduate transcripts with at least a 2.75 GPA during the last 60 hours or at least a 2.75 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 2.75 GPA in the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Applicants who have less than 2 years of relevant experience and have a GPA of at least 2.75 must submit a professional resume in order for admission to be considered.
4. Statement of interest (no more than 500 words)
5. Students granted probationary admission must earn a B or better in the first 6 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following.

1. In order to receive educator certification in Texas, you must pass a criminal history background check.If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
2. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Program Completion

TIME TO DEGREE

The degree must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies. Coursework that is more than six years old at the time of program completion cannot be used toward meeting degree the requirements. Coursework that is more than five years old cannot be used toward state certification requirements for licensure (further restrictions may apply, depending on program).

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education will be evaluated on professional dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by committee on continuation or dismissal from the College of Education.

EDUCATOR PREPARATION PROGRAM GUIDELINES

For certification-eligible candidates, per 19 TAC 228.40, (d) an Educator Preparation Program (EPP) shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion.

OUT-OF-STATE STUDENTS

The Texas Education Agency (TEA) requires candidates seeking certification to complete all practica in a TEA-approved site. Out-of-state students who do not complete the practicum at a UTA College of Education and TEA-approved site and meet all other TEA requirements do not qualify for Texas educator certification. If seeking certification outside of Texas, please work with your state agency in the state in which you are seeking certification to determine eligibility and to complete any additional requirements. Please note that after successful completion of your UTA College of Education degree, you may request a memo indicating your degree completion. UTA cannot recommend out-of-state students for certification and cannot recommend out-of-state students to take Texas certification exam(s). Additionally, UTA faculty and staff cannot complete out-of-state form requests for individuals seeking certification, licensure, and/or endorsements in another state according to TEA.

CHANGES

Program requirements may change as state/TEA certification requirements change.

Master of Education in Mind, Brain, and Education

About This Program

The Master of Education in Mind, Brain, and Education integrates research in cognitive and educational psychology as well as neuroscience to identify effective teaching methods as well as gain a deeper understanding of learning. The degree is a 30-hour, non-thesis, non-certification program, focused on integrating cognitive science, neuroscience, and education to challenge and inform pedagogy. The program focuses on the potential and limits of cognitive neuroscience in education and the central role educators can play in shaping research agendas in MBE. Graduates serve their community and the field by completing projects during coursework. Applications are reviewed three times per year.

Competencies

1. Upon completion, students will be able to identify how to improve teaching and learning in formal and informal settings.
2. Upon completion, students will be able to research from cognitive science, neuroscience, and educational psychology to improve teaching methods.
3. Upon completion, students will be able to design effective learning environments that incorporate instructional and technological innovations.
4. Upon completion, students will be able to recognize how educators can play a key role in shaping research agendas in mind, brain and education applications.

Admissions Criteria

Admission to the Master of Education in Mind, Brain, and Education is competitive. Some qualified students may not be admitted if demand exceeds the program's capacity to serve all applicants. All students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs. Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UTA will lead to certification in their state.

UNCONDITIONAL ADMISSION

Requires:

1. Proof of two or more years of relevant experience.
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA on the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Two professional letters of reference. Letters from supervisors are strongly encouraged. Applicants for the M.Ed. in Special Education submit a personal statement of interest. Applicants for M.Ed. in Special Education who are not certification seeking submit only a personal statement of interest rather than letters of reference.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills "other screening instrument" as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

PROBATIONARY ADMISSION

1. Applicants who have less than 2 years of relevant experience and have a GPA of at least 3.0 and two letters of reference, may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration. MEd in Special Education program applicants may also be admitted on a probationary status with less than 2 years of relevant work experience, and a personal statement of interest.
2. Students granted probationary admission must maintain a 3.0 (B or better) GPA in the first 9 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills "other screening instrument" as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following.

1. In order to receive educator certification in Texas, you must pass a criminal history background check.If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
2. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Post-Baccalaureate Certificate in Instructional and Learning Design Technology

About This Program

The Post-Baccalaureate Certificate in Instructional and Learning Design Technology develops expertise in educational technology. This 12-hour, 100% online gradate certificate offers PreK-12 teachers, university professors, corporate instructors/trainers, and other education professionals the opportunity to enhance their theoretical knowledge and practical skills for the design, development, and integration of education programs supported by technology.

Programs of study emphasize teaching using educational technology and recommended practices for online learning design.

Competencies

1. Upon completion, students will be able to differentiate, interpret, and critique theories and research in the field of educational technology.
2. Upon completion, students will be able to analyze integrative approaches to planning and implementation of learning technologies in live and online environments.
3. Upon completion, students will be able to identify instructional strategies and technologies to create and support meaningful learning environments.
4. Upon completion, students will be able to develop a teaching philosophy to guide inclusive and culturally responsive teaching practices, and demonstrate knowledge of customizing online instruction based on student needs, demographics, and exceptionalities.

Admissions Criteria

UNCONDITIONAL ADMISSION

Unconditional admission may be offered to those presenting:

1. Earned bachelor’s degree
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA in the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Proof of two or more years of relevant experience as a trainer or educator in corporate, military, K12 or higher education settings (for example, HR professional, principal, training manager, instructional designer, teacher, administrator or professor) through submission of professional resume.
4. Statement of interest (no more than 500 words)

PROBATIONARY ADMISSION

Probationary admission may be offered to those presenting:

1. Earned bachelor’s degree
2. Undergraduate transcripts with at least a 2.75 GPA during the last 60 hours or at least a 2.75 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 2.75 GPA in the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.

3. Applicants who have less than 2 years of relevant experience and have a GPA of at least 2.75 must submit a professional resume in order for admission to be considered.
4. Statement of interest (no more than 500 words)
5. Students granted probationary admission must earn a B or better in the first 6 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

Post-Baccalaureate Certificate in Hispanic Serving Leadership Preparation

About This Program

The Post-Baccalaureate Certificate in Hispanic Serving Leadership Preparation provides a path for PK-12 educational leaders, as well as community college, and other college and university professionals who want to specialize in learning how to serve the LatinX population, and also discover what it means to lead within a Hispanic Serving Institution. Those who enroll in this certificate will discover ways to systemically improve the PK-20 pipeline for all students and specifically improve institutional metrics for their LatinX students.

Students who participate in this certificate program may apply coursework in which they earned an A, B, or C to the degree requirements for an MEd in Educational Leadership and Policy Studies, Higher Education Administration emphasis, after applying for and being accepted into that master's degree program.

Competencies

1. Participants who complete this certificate will be able to explain the need for institutional leaders to become more proactive in designing effective pathways for LatinX student success using published research and theories.
2. Participants who complete this certificate will be able to identify and implement at least 3 student learning and development theories applicable to improving LatinX student success.
3. Participants who complete this certificate will be able to identify and implement at least 3 student in-class and out-of-class strategies designed to improve LatinX student success.
4. Participants who complete this certificate will be able to identify at least 3 institutional practices and/or policies that may need to be refined in order to improve LatinX student success.
5. Participants who complete this certificate will be able to explain and implement the process(es) to effectively assess and improve LatinX student success.

Admissions Criteria

Apply for admissions to the certificate program through UTA. Minimum criteria for admissions include:

1. Bachelor's degree from an accredited college or university,
2. Cumulative GPA of 3.0 or higher,
3. Resume/Curriculum Vitae documenting K-16 educational career experience, and
4. 500 word interest letter that addresses your goals for pursuing the Hispanic Serving Leadership Preparation Graduate Certificate.

After being admitted, students must maintain a GPA of 3.0 or above with no grade lower than C in order to continue in the program. For successful HSI completion, students must enroll and successfully complete all of the required coursework, a total of 12 units.

Minor in Interdisciplinary Leadership

About This Program

The Interdisciplinary Leadership Minor (ILM) program is ideal for those seeking to address diversity, equity, and inclusion (DEI) issues and enact social change through leadership. The courses are designed to increase students' competencies for individual and collective social reflection, analysis, skill development, and action. Regardless of a student's academic major, this minor seeks to engage career readiness strategies to prepare students for relational, ethical, and global leadership across multiple disciplines, workplaces, and communities. The 18-hour Interdisciplinary Leadership Minor is open to all degree-seeking students.

Competencies

1. Upon completion, students#will examine#how their positionalities, identities, and experiences impact #leadership.
2. Upon completion, students will demonstrate a basic understanding of leading in different communities and contexts.
3. Upon completion, students will recognize leadership skills and strategies within various historical, organizational, political, or societal contexts and perspectives.
4. Upon completion, students will develop#an ongoing commitment to diversity, equity, inclusion advocacy work, interventions, or both#within their leadership#approaches.

Teacher and Administrator Preparation

Department Overview

Educators play a pivotal role in the development of the thinkers, leaders, and innovators of tomorrow. In the Department of Teacher and Administrator Preparation, we recognize the importance of providing future education professionals with the skills and knowledge they need to help all learners achieve their full potential. We offer bachelor's programs in elementary, bilingual and ESL, middle-level, and secondary education, as well as advanced programs in educational leadership, literacy studies, math education, science education, and other areas. Programs leading to educator and administrator certification in the state of Texas are accredited by the Texas Education Agency.

Arlington, TX 76019-0227

COURSES

BEEP 3381. INTRODUCTION TO SPECIAL LANGUAGE PROGRAMS. 3 Hours.
Legal foundations and historical development of bilingual education, dual language, and special language programs will be introduced. Various models of bilingual education and English as a Second Language will be examined. An overview of special education, gifted and talented, and compensatory education legislation and its impact on the implementation of special language programs will be examined.

BEEP 4302. IMPLEMENTATION OF EC-6 DUAL LANGUAGE CURRICULUM MODELS. 3 Hours.
This course addresses programmatic, cultural, academic and linguistic considerations for the creation, implementation and maintenance of dual language curriculum models in EC-6 settings. In the course students will explore and implement various research-based teaching methods and strategies used in effective programs. It will also cover key components of dual language teaching and learning, including curriculum alignment (e.g., horizontal, vertical, spiral), language separation, and parent collaboration. Prerequisite: BEEP 4305.

BEEP 4305. BILITERACY DEVELOPMENT IN DUAL LANGUAGE PROGRAMS. 3 Hours.
Analysis of the structure of English and Spanish including phonology, morphology, syntax, semantics, lexicon, and pragmatics. Topics also include language interference and cross-linguistic transfer to promote biliteracy.

BEEP 4306. FAMILY LITERACY AND SECOND LANGUAGE ACQUISITION. 3 Hours.
Examines the relationships among family literacy, second-language acquisition, and literacy development in children. The course provides opportunities for students to explore a variety of home-school literacy programs designed to facilitate the development of literacy skills in parents and support reading and writing at home. Specific focus on theories regarding the relationship between first and second language acquisition and early education. Prerequisite: BEEP 3381.

BEEP 4311. MATH IN DUAL LANGUAGE SETTINGS. 3 Hours.
Integration of mathematic concepts in relation to the cognitive and linguistic development of English learners (ELs). Analysis of the State curriculum for mathematics in K-6. Design and implementation of instruction in dual language settings. Field experience required. Prerequisite: BEEP 3381.

BEEP 4312. SCIENCE AND HEALTH EDUCATION IN DUAL LANGUAGE SETTINGS. 3 Hours.
Integration of science and health concepts in relation to the cognitive and linguistic development of English learners (ELs). Analysis of the State curriculum for health and science in K-6. Design and implementation of instruction in dual language settings. Field experience required.

BEEP 4314. CREATIVE ARTS AND SOCIAL STUDIES IN DUAL LANGUAGE SETTINGS. 3 Hours.
Integration of visual arts, music, and social studies with a focus on instructional processes and skills for increasing children's understanding and appreciation of aesthetics. Implementation of the Texas Curriculum in Social Studies and Art Education in EC-6 dual-language classrooms; field experience required.

BEEP 4319. ASSESSMENT OF CULTURALLY AND LINGUISTICALLY DIVERSE STUDENTS IN EC-6 SETTINGS. 3 Hours.
Study of formal and informal assessment instruments and techniques for assessing the language development and literacy of English Learners(ELs) in EC-6 classrooms. Also, focus on diagnosing literacy learning strengths and needs.

BEEP 4366. SPANISH FOR TEACHERS IN DUAL LANGUAGE PROGRAMS: AN IMMERSION APPROACH. 3 Hours.
Development of Spanish proficiency for bilingual education teacher candidates through an immersion approach. Emphasis on concepts, functions and the scenarios used in the Spanish proficiency examination required for bilingual education teacher candidates.

BEEP 4382. LITERACY INSTRUCTION IN SPANISH FOR THE BILINGUAL CLASSROOM. 3 Hours.
Focuses on the development of literacy for bilingual children. Specific emphasis will be placed on the rationale, methods, and materials for literacy instruction in Spanish. The successful transition from first-language literacy instruction to literacy instruction in English will also be addressed. The course will be delivered in Spanish and students will be exposed to content and techniques to master the oral and written components of the Spanish language proficiency test required to become certified in bilingual education. Prerequisite: BEEP 4305, BEEP 4302.

BEEP 4384. LITERACY METHODS FOR ESL/BILINGUAL CLASSROOMS. 3 Hours.
The rationale and implementation of various instructional methods for English learners (ELs) will be discussed. Examination of language instruction for students at different stages of development. Sheltered English instruction for the teaching of content areas will also be presented. Students will be assigned to a special language program to examine methods of instruction and modifications for language minority children. Prerequisite: BEEP 3381, BEEP 4306.

BEEP 4385. SHELTERED ENGLISH INSTRUCTION. 3 Hours.
Analysis of the linguistic, cognitive, academic and cultural considerations required to provide meaningful and developmentally appropriate content area instruction to English language learners (ELLs) in PK-6. Prerequisite: BEEP 3381.

BEEP 4687. CLINICAL TEACHING IN EC-6 BILINGUAL/ESL CLASSROOMS. 6 Hours.
Full-time supervised and directed clinical teaching in EC-6 bilingual and ESL classrooms. Clinical teaching must immediately follow the field experience semester. Prerequisites: BEEP 4311, BEEP 4312, and BEEP 4314.

BEEP 5315. CLINICAL TEACHING. 3 Hours.
Clinical teaching in candidate's certification area(s). This semester-long experience will help candidates apply theory and research to practice.

BEEP 5318. FOUNDATIONS IN BILINGUAL EDUCATION. 3 Hours.
Analyzes the development of bilingual education in the United States. Introduces bilingual education program models and discusses research findings on their effectiveness.

BEEP 5321. ESL METHODS FOR EC-6 LEARNERS. 3 Hours.
Compares first and second-language acquisition processes. Identifies effective teaching practices to meet the needs of English learners (ELs). Analyzes elements from Spanish that can affect the acquisition of literacy in English. Offered as BEEP 5321 and LIST 5361. Credit will only be counted towards one program.

BEEP 5361. LANGUAGE LEARNING: EDUCATIONAL PERSPECTIVES PRACTICUM II. 3 Hours.
The practicum provides opportunities to apply effective instructional practices in teaching ESL students. Deals with the relationship between first and second language acquisition and literacy, dialect, linguistics, culture; nature and definition of language; overview of linguistic science and language with pedagogical applications.

BEEP 5362. LITERACY INSTRUCTION IN ESL/BILINGUAL SETTINGS. 3 Hours.
This course bridges theory to practice, stressing how the relationship between first and additional language acquisition and development can inform teaching ESL/bilingual students. Provides opportunities to apply effective instructional practices in teaching students to foster development in speaking, listening, reading, and writing within a framework of cultural understanding.

BEEP 5363. LITERACY DEVELOPMENT IN ENGLISH AND SPANISH. 3 Hours.
Focuses on the development of literacy in bilingual students with specific emphasis on the rationale, methods, and materials for literacy instruction in the student's home language. Attention to evaluating and supplementing first-language literacy materials and supporting the successful transition from first-language literacy instruction to literacy instruction in English.

BEEP 5364. LITERACY INSTRUCTION IN SPANISH IN THE CONTENT AREAS. 3 Hours.
Focuses on methods and materials for teaching content-area subjects in the student's home language. Additional focus on supporting the transition from home-language instruction to English-language instruction.

BEEP 5365. ORGANIZATION & ADMINISTRATION OF DUAL LANGUAGE PROGRAMS. 3 Hours.
Analysis of the research background and implementation of various models of dual language instruction. Insight of the process, data collection, and reporting requirements of the state and federal special populations legislation. This course requires an internship with the office of Federal Programs and/or the office of Bilingual/ESL Education in local school districts. Prerequisite: BEEP 5318.

BEEP 5366. SPANISH FOR SCHOOL ADMINISTRATORS & TEACHERS. 3 Hours.
Development of Spanish proficiency for teachers and administrators through an immersion approach. Emphasis on concepts and terminology related to education, program administration, community involvement, and communication with Spanish-speaking parents. This course can be repeated.

BEEP 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for course substitution or a topic agreed upon between the student and instructor. May be repeated for credit with permission.

COURSES

EDML 4300. PRE-ADOLESCENT/ADOLESCENT GROWTH AND DEVELOPMENT. 3 Hours.
Prerequisite to subsequent courses in teacher education. Physical, social, emotional, and cognitive growth patterns from emphasizing familial, cultural, societal, and genetic determinants of behavior. Topics include the following: developmental characteristics of pre-adolescents/ adolescents including exceptional learners and students with special needs, a variety of disabilities (Learning Disabled, Emotionally Disabled, Behavior Disorders, Attention Deficit Hyperactivity Disorder, etc.), the creation and purpose of Individual Education Plans, concepts, and forms, as well as the IDEA law, its application and ethical considerations. The course also includes a field component.

EDML 4350. NATURE & CURRICULUM NEEDS OF THE YOUNG ADOLESCENT LEARNER. 3 Hours.
Examines the curriculum, instruction, and organization of middle grades schools. Provides a substantial knowledge base in the nature and needs of early adolescents, as well as in middle school curriculum, instruction, and behavior management. A variety of instructional approaches will be discussed including the purpose and need for appropriate language, behavior, and disability modifications, inclusion, resource, content mastery, and others. Theory and practice in the teaching of students with special needs will be addressed. The course also includes a field component. Prerequisite: Admitted to the Middle Level Program.

EDML 4360. TEACHING STUDENTS WITH SPECIAL NEEDS - A SURVEY. 3 Hours.
Theory and practice in the teaching of students with special needs, including a survey of the variety of disabilities (LD, ED, physical handicapped, conduct, ADD, ADHD, etc.), the creation and purpose of Individual Education Plans, concepts and forms. The IDEA law and its application, and ethical considerations. A variety of instructional approaches will be discussed including the purpose and need for appropriate modifications, inclusion, resource, consult, content mastery and others. Special emphasis will be the State basic skills assessment and the State developed alternative assessment.

EDML 4370. SOCIAL STUDIES & DIVERSITY IN THE MIDDLE LEVEL GRADES. 3 Hours.
Examination of materials, methods, content, and assessment learning experiences associated with middle level social studies. Content areas include history, geography, economics, government, citizenship, culture, science, technology, and society. Prerequisites: EDML 4300 & EDML 4350; BEEP 4384; LIST 4343.

EDML 4371. SCIENCE IN THE MIDDLE LEVEL GRADES. 3 Hours.
Instructional approaches, management, materials, and effective teaching practices pertinent to teaching science in the middle level grades; the organization of science content and the selection and implementation of lesson designs which utilize a hands-on approach promoting discovery and inquiry. This Inquiry course involves a two-hour lecture and two-hour application of lecture /theory. The two-hour application of lecture/theory will require students to spend time in a 4-8 classroom during normal school hours. Prerequisites: EDML 4300, EDTC 4301, and EDML 4350.

EDML 4372. MATHEMATICS IN THE MIDDLE LEVEL GRADES. 3 Hours.
Curriculum standards, methods, and effective teaching practices as proposed by the National Council of Teachers of Mathematics for the middle level; the organization of mathematics content with an emphasis on using manipulatives and technology to teach math. This inquiry course involves a two-hour lecture and two-hour application of lecture/theory. The two-hour application of lecture/theory will require students to spend time in a 4-8 classroom during normal school hours. Prerequisite: EDML 4350.

EDML 4676. MIDDLE LEVEL FIELD-BASED EXPERIENCE. 6 Hours.
Supervised and directed field-based experience, Monday through Thursdays. Candidates will be placed in two settings: an early grade (4,5,6) and late grade (6,7,8) experience as well as in two content areas. Prerequisite: EDML 4300, EDML 4350, LIST 4343, and BEEP 4384. This course must be taken just prior to student teaching (EDML 4677).

EDML 4677. MIDDLE LEVEL CLINICAL TEACHING. 6 Hours.
Supervised and directed clinical teaching experience in an approved field setting, Monday through Friday. Candidates will be assigned for the Independent School District (ISD) calendar. Candidates will be placed in two settings: an early grade (4,5,6) and late grade (6,7,8) experience as well as in two content areas. Required seminars will provide candidates with theory to integrate and apply during clinical teaching. Prerequisites: LIST 4378.

EDML 5302. SCIENCE IN THE MIDDLE GRADES. 3 Hours.
The examination of instructional strategies, materials, current research, and technology pertinent to teaching science in the middle grades; the scope and sequence of science content and implementation of instructional approaches to accommodate diverse student populations.

EDML 5303. MATHEMATICS IN THE MIDDLE GRADES. 3 Hours.
The examination of instructional strategies, materials, current research, and technology pertinent to teaching mathematics in the middle grades; the scope and sequence of math content and the selection and implementation of instructional approaches to accommodate diverse student populations.

EDML 5304. SOCIAL STUDIES IN THE MIDDLE GRADES. 3 Hours.
An examination of content, methods, current research, and learning theory appropriate for social studies education in the middle grades. Special attention to methods that promote analytical and evaluative abilities necessary for participatory democracy in a culturally diverse society.

EDML 5308. MIDDLE GRADES ORGANIZATION, INSTRUCTION, AND MANAGEMENT. 3 Hours.
The examination of principles, theories, and research related to developmentally responsive middle level programs, effective instruction and effective strategies of classroom management. Attention is given to the employment of a variety of approaches for developing an appropriate climate to meet the varying needs of the middle level student.

EDML 5315. CLINICAL TEACHING. 3 Hours.
Clinical teaching in candidate's certification area(s). This longitudinal experience will help candidates apply theory and research to practice.

EDML 5328. PREADOLESCENT/ADOLESCENT GROWTH, DEVELOPMENT, AND LEARNING THEORY. 3 Hours.
Course will focus on physical, social, emotional, and cognitive growth patterns of 10- to 15-year-old children, emphasizing familial, cultural, societal, and genetic determinants of behavior. Attention is given to current research regarding the developmental characteristics of adolescents, including exceptional learners and students with special needs.

EDML 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

COURSES

EDTC 4201. TECHNOLOGY APPLICATIONS. 2 Hours.
This course is for K-12 educators who are interested in integrating technology into teaching and learning. Its focus is on the technology applications Texas Essential Knowledge and Skills (TEKS). Participants should gain a greater understanding of the technology applications TEKS and how to introduce them into curriculum. Study and application of technology use in educational environments. Topics include: instructional learning and computer software.

EDTC 4301. TECHNOLOGY APPLICATIONS. 3 Hours.
This course is for K-12 educators who are interested in integrating technology into teaching and learning. Focus is on the technology applications Texas Essential Knowledge and Skills (TEKS). Participants should gain a greater understanding of the technology applications TEKS and how to introduce them into curriculum. Study and application of technology use in educational environments. Topics include: instructional learning and computer software.

EDTC 5190. SELECTED TOPICS IN EDUCATION. 1 Hour.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDTC 5191. INDEPENDENT RESEARCH. 1 Hour.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. May be repeated for credit with permission.

EDTC 5290. SELECTED TOPICS IN EDUCATION. 2 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDTC 5291. INDEPENDENT RESEARCH. 2 Hours.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. Can be repeated for credit with permission.

EDTC 5300. INTRODUCTION TO FOUNDATION OF EDUCATION INSTRUCTIONAL DESIGN AND TECHNOLOGY. 3 Hours.
Analysis of integrating TEKS, computers and related technologies in education. Topics include issues and concerns prior to integration, use of software in teaching and learning, identifying resources and strategies for use of the World Wide Web, and creating instructional activities into and across curriculum.

EDTC 5301. CURRENT APPLICATIONS OF TECHNOLOGY IN EDUCATION. 3 Hours.
Study of technology use in educational environments. Topics include: instructional, learning, assessment, and management applications; a review of current research on selection, evaluation, and integration of appropriate media; and computer hardware, software, and multimedia.

EDTC 5302. INTERNET IN EDUCATION. 3 Hours.
Course is designed to aid educators and training professionals in developing robust techniques for locating, utilizing, and creating Internet resources for professional productivity and research.

EDTC 5310. COMPUTER APPLICATIONS IN CURRICULUM AND INSTRUCTION. 3 Hours.
Designed for both elementary and secondary teachers; skills and methods necessary to implement computer applications within the curriculum. Methods for managing the computer in the classroom, courseware telecommunications within the curriculum.

EDTC 5320. WEB AUTHORING. 3 Hours.
Study of Web site planning, development and HTML tagging. Topics include: storyboards, content creation, Web site tagging with browser independent tags, use of color and fonts to communicate concepts, interactivity by design, ethical use of and respect for intellectual property, understand copyright, fair use, patent, and trademarks, the Master Technology Teacher Standards (EC-12) and the Standards for Basic Endorsement in Educational Computing and Technology Literacy.

EDTC 5330. DESKTOP PUBLISHING. 3 Hours.
Study of desktop publishing planning, development, and production. Topics include: desktop publishing terminology, basic design theory, principles of form and design, guidelines for desktop publishing, ethical use of and respect for intellectual property, understand copyright, fair use, patent, and trademarks, the Master Technology Teacher Standards (EC-12) and the Standards for Basic Endorsement in Educational Computing and Technology Literacy.

EDTC 5340. MULTIMEDIA. 3 Hours.
Study of multimedia planning, development, and implementation that maximize the use of technology, student learning, and teacher effectiveness. Topics include: methodologies for tutorials, hypermedia, drills, simulations, educational games, open-ended learning environments, testing, Web-based learning, interactivity by design, ethical use of and respect for intellectual property, understand copyright, fair use, patent, and trademarks, the Master Technology Teacher Standards (EC-12) and the Standards for Basic Endorsement in Educational Computing and Technology Literacy.

EDTC 5390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDTC 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over topic agreed upon between student and instructor. May be repeated for credit with permission.

COURSES

EDUC 2101. EXPLORING TEACHING. 1 Hour.
An opportunity to experience a mentorship with public school students while exploring the impact Gardner's Multiple Intelligences and personality profiles play in the learning environment. Ten hours of mentorship required. Academic credit awarded. Service Learning course.

EDUC 2302. THE PROFESSIONAL EDUCATOR. 3 Hours.
This course introduces students to the teaching profession. Professionalism, ethics, learning theory and historical foundations, advocacy, and current trends and issues in education will be examined. Students will develop a personal philosophy of education. This course fulfills the University requirement for either UNIV 1101 or UNIV 1131.

EDUC 2330. STUDENT LEADER EFFECTIVENESS TRAINING. 3 Hours.
Identifies the philosophy and theories of leadership, leadership styles, and contemporary leadership issues for any student who desires to pursue their leadership education. Practical application of leadership skills are developed through interactive class discussions, analyzing case studies, and group problem-solving and role-playing experiences. Elective only and does not count as part of the professional education certification requirements.

EDUC 3301. TEACHING DIVERSE LEARNERS. 3 Hours.
A survey course that focuses on effective differentiated instruction, assessment, and management strategies for working with diverse learners to build capacity for constructing a culturally responsive learning environment. Designed to provide increased self-awareness and insight into issues of diversity. Additionally, students will examine education law and models related to diverse learners as well as strategies for working with parents and families of diverse learners. Students will evaluate multicultural context, demographics, and practices at a local school. This course requires students to spend a minimum of 20 hours a semester in a K-12 classroom.

EDUC 3333. STEM EDUCATION IN THE PK-12 CONTEXT. 3 Hours.
Methods and materials for integrated STEM teaching and learning in the PK-12 context. Emphasis on developing best practices for an integrated context that combines and makes connections between science, technology, engineering, and mathematics. This includes, but is not limited to, project and problem-based learning, real world problem solving, inquiry-based instruction, computational thinking, and engineering design. Includes field-experience in a PK-12 STEM setting.

EDUC 3390. SPECIAL TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 4316. FOUNDATIONS OF EDUCATION. 3 Hours.
The course introduces students to the teaching profession. Historical foundations, professionalism, school law (including special education law), diversity in education, effective communication, family involvement, and current trends and issues in education will be examined. Students will also examine personal reasons for wanting to teach and will create a personal philosophy of education. Field observation required. (2-1).

EDUC 4318. POSITIVE CLASSROOM MANAGEMENT. 3 Hours.
A survey of effective strategies of classroom management based on contemporary research. Particular attention will be paid to creating proactive learning environments through positive behavioral interventions and supports. Outcomes students will demonstrate include: instructional management and application of positive behavioral supports, procedures of assessment for planning classroom management; understanding of functional behavior assessment, a continuum of behavioral support, and the role of behavioral strategies in instructional classroom management; and understanding classroom management systems and instructional formats.

EDUC 4319. CLASSROOM ASSESSMENT. 3 Hours.
This course will introduce students to classroom assessment strategies that are used to inform teaching. Focus will include ways to interpret standardized test results and also create and use authentic classroom-based assessments to design and deliver differentiated instruction. Data-based instructional decisions will also be introduced. Course will include a field-based component.

EDUC 4325. WOMEN IN SCIENCE. 3 Hours.
Explores the role of women in science. Emphasis on gender and science, the history of women in science, gender equity in the classroom, strategies for the retention of women scientists, the current culture/climate for women in science, and contemporary women in science. Offered as EDUC 4325, SCIE 4325, and GWSS 4325. Credit will be granted only once.

EDUC 4331. KNOWING AND LEARNING IN MATH AND SCIENCE. 3 Hours.
Restricted to students in the UTeach Arlington program. Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment. Three lecture hours a week for one semester; additional hours may be required. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment in either.

EDUC 4332. CLASSROOM INTERACTIONS. 3 Hours.
Restricted to students in the UTeach Arlington program. Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Prerequisite: C or better in SCIE 1202 or C or better in SCIE 1334; C or better in EDUC 4331 or concurrent enrollment.

EDUC 4333. MULTIPLE TEACHING PRACTICES IN MATH AND SCIENCE. 3 Hours.
Restricted to students in the UTeach Arlington program who have earned a passing score on the preliminary portfolio. Multiple research-based teaching practices including foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of inquiry-based, problem-based/project-based learning classrooms. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Prerequisite: C or better in EDUC 4332; formal admission to program.

EDUC 4340. HUMAN GROWTH AND DEVELOPMENT. 3 Hours.
Prerequisite to subsequent courses in teacher education. Physical, social, emotional, and cognitive growth patterns from conception to early adulthood, emphasizing familial, cultural, societal, and genetic determinants of behavior. Topics include developmental characteristics of children and adolescents including exceptional learners and students with special needs.

EDUC 4341. ORGANIZATION AND MANAGEMENT OF INSTRUCTION IN SECONDARY SCHOOLS. 3 Hours.
Emphasizes the importance of organizing, developing, and adapting management systems to enhance learning in classroom environments. Managing the teaching-learning process, applying a variety of assessment techniques, motivation, and adapting management styles to meet student needs. This course involves a two-hour lecture and two-hour application of lecture/theory. The two-hour application of lecture/theory will require students to spend time in a K-12 classroom during normal school hours, 8 a.m.-4 p.m., Monday-Friday.

EDUC 4342. APPLICATIONS OF INSTRUCTION IN MIDDLE/SECONDARY SCHOOL CLASSROOMS. 3 Hours.
Field-based applications of inquiry-based curriculum planning and instructional theory and methods. Includes writing and implementing unit and instructional goals and objectives, using instructional lesson models to meet teacher appraisal criteria including utilization of classroom technology and audiovisual aids, planning for individual needs, and evaluating student progress. This course involves a lecture and application of lecture/theory. The application of lecture/theory will require students to spend time in a Grades 4-12 classroom during normal school hours, Monday-Friday, for typically one day a week throughout the semester.

EDUC 4343. TEACHING SOCIAL STUDIES IN THE SECONDARY SCHOOL. 3 Hours.
Methods and materials for social studies teaching and learning at the secondary school level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field-experience in a social studies classroom in a local middle or high school. The application of lecture/theory will require students to spend time in a grades 7-12 social studies classroom during normal school hours, Monday-Friday, for typically one day a week throughout the semester.

EDUC 4344. TEACHING IN MIDDLE/SECONDARY SCHOOL SCIENCE CLASSROOMS. 3 Hours.
Methods and materials for inquiry-based science teaching and learning at the middle/secondary level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field experience in a PK-12 classroom setting.

EDUC 4345. TEACHING IN MIDDLE/SECONDARY SCHOOL MATHEMATICS CLASSROOMS. 3 Hours.
Methods and materials for inquiry-based mathematics teaching and learning at the middle/secondary level. Emphasis on establishing a productive classroom environment, curriculum planning, implementation of effective instructional strategies, integration of educational technologies, and assessing student learning. Includes field experience in a PK-12 classroom setting.

EDUC 4346. SECONDARY SCHOOL CULTURE AND THE TEACHING PROFESSION. 3 Hours.
School cultures, effective schools and teaching practices, stages of professional development, foundations of American schools, legal and ethical aspects, and societal demands on the school.

EDUC 4347. SECONDARY SCHOOL INTERNSHIP WITH TECHNOLOGY APPLICATIONS. 3 Hours.
Supervised and directed professional practice in a local secondary school. The student will be assigned to a public school site for five hours per week. Weekly seminars are required. Internship must be taken the semester prior to residency. Theory from technology will be applied during internship assignment.

EDUC 4352. TEACHING DIVERSE POPULATIONS. 3 Hours.
Effective instruction, assessment, and management strategies for working in diverse educational settings. Designed to provide increased self-awareness and insight into issues of diversity such as culture, ethnicity, exceptionality, gender, language, religion, and socioeconomic status. This course involves a two-hour lecture and two-hour application of lecture/theory. The two-hour application of lecture/theory will require students to spend time in a K-12 classroom during normal school hours, 8 a.m.-4 p.m., Monday-Friday.

EDUC 4390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 4391. CONFERENCE COURSE. 3 Hours.
Independent study in the preparation of a project or a paper on a research topic; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: permission of instructor.

EDUC 4647. CLINICAL TEACHING IN MIDDLE/SECONDARY SCHOOL/ALL-LEVEL CLASSROOMS. 6 Hours.
Supervised and directed clinical teaching in student's targeted area of certification. The student will be assigned full time for the Independent School District calendar. Required seminars provide students with theories/backgrounds/strategies to integrate and apply during clinical teaching. Students will apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis of practice. Prerequisite: Office of Educational Field Experiences approval required.

EDUC 5190. SELECTED TOPICS IN EDUCATION. 1 Hour.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5191. INDEPENDENT RESEARCH. 1 Hour.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5263. READING AND DEVELOPMENT. 2 Hours.
This course will focus on the acquisition of reading skills in the typically developing child. Sub-skills and precursors of reading such as visual and phonological processing will be examined from a neurological point of view. This foundational knowledge will then be applied to researching reading difficulties as well as the teaching and learning in the classroom for typically developing students and those with reading difficulties.

EDUC 5290. SELECTED TOPICS IN EDUCATION. 2 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5291. INDEPENDENT RESEARCH. 2 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5305. EFFECTIVE TEACHING AND LEARNING FOR 21ST CENTURY EC-12 STUDENTS. 3 Hours.
Students gain understanding of the nature of learning and the purpose of education as the pedagogical foundation to teaching in any discipline. Students develop knowledge of state and national standards and apply these standards vertically and horizontally in preparing high quality teaching and learning experiences. Students gain experience critically analyzing disciplinary content, instructional models, lessons, curricula, and research literature. Students learn to construct and test instructional models using activities that focus attention on diversity, authentic assessments, intellectual, social and emotional development, interdisciplinary connections, and technology.

EDUC 5309. ADVANCED TEACHING MODELS FOR DIVERSE LEARNERS. 3 Hours.
Students engage in the advanced study and design of curriculum models with an understanding of cognitive development, pedagogical content knowledge (PCK), and learning progressions. Students learn in-depth analyses of how students learn and how to appropriately differentiate instruction. Students learn culturally responsive teaching practices and gain skill in developing learning experiences that attend to teaching diverse learners.

EDUC 5310. DIVERSE POPULATIONS IN TODAY'S SCHOOLS. 3 Hours.
An overview of the diverse populations in today's schools and effective instruction, assessment, and management strategies for working in diverse educational settings. Urban, suburban, and rural school communities and populations will be addressed with special attention to issues of human growth and development, culture, ethnicity, exceptionality, gender, language, religion and socioeconomic status. This course application of lecture/theory which will require students to spend a minimum of 20 hours in a K-12 classroom during normal school hours.

EDUC 5314. EFFECTIVE CLASSROOM INSTRUCTION. 3 Hours.
Designed to provide teachers with skills and competencies based on research findings on effective teaching and instruction related to promoting student academic achievement. Includes identifying, developing, and practicing instructional variables that affect teacher performance and student learning tasks. Includes field-experience in a local middle or high school based on teacher candidate's certification program. The application of lecture/theory will require candidates to spend time in a grades 7-12 classroom during normal school hours, Monday-Friday.

EDUC 5315. CLINICAL TEACHING. 3 Hours.
Supervised clinical teaching in candidate's area of certification. Candidates will be assigned full-time according to school district calendar. Required seminars provide candidates with theory to integrate and apply during clinical teaching. This experience will help candidates apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis.

EDUC 5321. EDUCATIONAL RESEARCH. 3 Hours.
Examination of basic concepts and procedures necessary for empirical research investigations within classroom contexts, experimental design, data collection and interpretation, and statistical analysis.

EDUC 5322. EDUCATIONAL RESEARCH AND EVALUATION. 3 Hours.
An overview of basic concepts and procedures necessary for analyzing, designing, and conducting quantitative and qualitative educational studies. A focus on educational research, including empirical research, investigations data collection and interpretation, and statistical analysis. Also, a focus on educational evaluation including accreditation, personnel appraisal, and educational programs and materials.

EDUC 5329. CLASSROOM MANAGEMENT AND DISCIPLINE. 3 Hours.
Analysis of the variables that affect teacher and student behavior in the classroom. Survey of effective strategies of classroom management and discipline based on contemporary research. Particular attention to individual student differences in settings such as gifted and talented, handicapped, and learning disabled.

EDUC 5330. LEADERSHIP IN THE INSTRUCTIONAL SETTING. 3 Hours.
Examination of current research on effective instructional organizations and classroom instruction in today's schools, on characteristics of school leadership, and on the role and function of the teacher as instructional leader. Topics include the essential components of instruction, developing instructional-management systems, evaluating student and teacher performance, assisting colleagues to monitor and improve instructional skills, school climate and leadership styles as they impact on school improvement.

EDUC 5358. THEMATIC SCIENCE FOR ELEMENTARY AND SECONDARY TEACHERS. 3 Hours.
Professional development program for elementary and secondary science teachers who will examine a variety of instructional strategies. The course will provide a broad spectrum of content from all areas of science and provide opportunities to participate in investigations, field trips and seminars. The course will facilitate the implementation of a thematic science curriculum in elementary and secondary schools through research-based practices.

EDUC 5359. ENVIRONMENTAL SCIENCE FOR ELEMENTARY AND SECONDARY TEACHERS. 3 Hours.
Designed for elementary, middle and high school teachers who will examine a variety of environmental education issues and instructional strategies for classroom and outdoor settings. The course will provide a broad spectrum of content from all areas of science and will provide opportunities to participate in field trips, science investigations and seminar sessions. It will facilitate the implementation of an environmentally based curriculum in schools using best practices.

EDUC 5360. INTRODUCTION TO MIND, BRAIN, AND EDUCATION. 3 Hours.
Students will explore central themes and issues in the field of learning sciences, which incorporates cognitive and educational psychology, along with neuroscience, to help educators teach better and students learn better. This course also offers a number of exercises to help students become researchers as well as consumers of research.

EDUC 5361. INTRODUCTION TO EDUCATIONAL NEUROSCIENCE. 3 Hours.
This course is designed to provide an introduction to foundational areas of neuroscience such as brain anatomy and brain mapping techniques and its applications to education. Students will study different viewpoints of links between education and neuroscience and develop their own notions of what educational questions might be answered with brain-based techniques.

EDUC 5362. THE NEUROSCIENCE OF TYPICAL & ATYPICAL LANGUAGE DEVELOPMENT. 3 Hours.
This course will examine the many levels of language including phonetics, phonology, semantics, syntax and pragmatics from both functional and neuroscientific perspectives. This will be closely tied to language acquisition and early language development. The focus on the pre-reading years will provide a solid basis for further study of literacy-related skills and overall learning. Sub-skills and precursors of reading will be examined from a neurological point of view and applied to researching reading difficulties as well as the teaching and learning in the classroom. Course offered as EDUC 5362 and SPED 5309; co-list credit will be granted only as one.

EDUC 5363. THE NEUROSCIENCE OF TYPICAL & ATYPICAL DEVELOPMENT OF MATHEMATICAL AND REASONING ABILITY. 3 Hours.
The course focuses on the development of problem-solving, logical, numeracy, and mathematical skills from a cognitive neurocognitive perspective. Woven throughout the course is attention to cognitive biases in scientific thinking. Two prominent features of the course include neuroplasticity as a result of organic and environmental pressures and brain-based disorders (dyscalculia, ADHD, autism) and adaptive strategies.

EDUC 5364. EPISTEMOLOGY AND NEUROSCIENCE. 3 Hours.
Students will explore the basic principles of reasoning and knowledge construction as well as their psychological and neurobiological underpinnings. Students compare and contrast the deductive and inductive methods used in decision-making and belief-forming processes. The course also highlights the role of the frontal cortex and limbic system in how learners address and resolve questions and challenges in varying contexts. The goal of the course is to offer students the theoretical structures and critical strategies necessary for assessing their own work toward the completion of the capstone project as well as for analyzing the outcomes it generates. The skills acquired in this course are widely transferrable and can help the student to become a better consumer and producer of pedagogical and scientific research.

EDUC 5365. THEORETICAL AND CONCEPTUAL MODELS IN MIND, BRAIN, AND EDUCATION. 3 Hours.
This course is designed to help students connect cognitive science to instructional practice. Students examine the roles that cognitive models play in learning and in designing lessons and curricula. The cognitive models in this course are used to provide a framework for recognizing possible strategies for improving or re-designing curricula, as well as build lessons or interventions that fit their working context. Students are expected to take part in a prototype curriculum, analyze how it was constructed and to use their insights to build a modest curriculum over the course of the semester.

EDUC 5366. EVALUATING AND DEBUNKING EDUCATIONAL INTERVENTIONS. 3 Hours.
This course focuses on making sense of the impact of interactions between educational variables in complex systems like classrooms and schools. Being able to predict outcomes in dynamic environments requires understanding that the variables themselves can change as a result of interacting with each other, which influences how we understand systems from neural networks to school districts. The general sense of the course will be to understand certain behaviors/characteristics of dynamic systems from the examination and analysis of exemplars from multiple domains. We also examine how areas of the brain demonstrate these characteristics and use them to implement certain functionalities, and in turn examine the implications of these functionalities on curriculum and instruction.

EDUC 5367. RESEARCH METHODS IN MIND, BRAIN, AND EDUCATION. 3 Hours.
This course presents an overview of the process of scientific inquiry, while fostering an understanding of research paradigms used by researchers in MBE. The primary course goals are to support students in developing a framework for their capstone project in MBE, and help them identify the research tools and methods necessary to carry out the capstone project. To support this work students analyze research from MBE as well as the wider literature to identify relevant tools, techniques and methodologies. As students develop expertise with the tools and techniques that are relevant to their capstone project they are expected to share that knowledge with their peers.

EDUC 5368. CONDUCTING RESEARCH IN MIND, BRAIN, AND EDUCATION. 3 Hours.
The goal of this course is to help students in the Mind, Brain and Education program complete their capstone project. Students work collaboratively with fellow students and with faculty oversight to prepare a poster presentation that summarizes their capstone work, as well as choose a local, national or international conference to present their work.

EDUC 5370. INTRODUCTION TO GIFTED AND TALENTED CHILDREN. 3 Hours.
Psychological characteristics of gifted and talented children. Introduction to identification techniques, educational programs, instructional approaches, and special problems.

EDUC 5371. MEASUREMENT AND ASSESSMENT OF GIFTED AND TALENTED CHILDREN. 3 Hours.
Tests, formal and informal measures, and systems for identification and selection of the gifted and talented student. Basic test construction theory, test interpretation, and test uses.

EDUC 5372. METHODS, MATERIALS, AND CURRICULUM FOR THE GIFTED AND TALENTED. 3 Hours.
Curriculum theory and curriculum design for the gifted student. Methodology for implementing practical and theoretical objectives for gifted instruction.

EDUC 5373. CREATIVITY: THEORIES, MODELS, AND APPLICATION. 3 Hours.
The concept of and current research on creativity, the nature and assessment of creative thinking, as well as methods of fostering creativity.

EDUC 5374. PRACTICUM. 3 Hours.
Participation in a gifted and talented setting supervised by a university and/or school district representative. A wide range of practical experiences will be emphasized. Graded P/F/R.

EDUC 5380. DIVERSITY IN EDUCATIONAL SETTINGS. 3 Hours.
Effective leadership, instruction, and management strategies for work in diverse educational settings. Designed to provide increased self-awareness and insight into issues of diversity such as culture, ethnicity, exceptionality, gender, language, religion, and socioeconomic status. Demographic issues along with urban and suburban educational settings will also be addressed.

EDUC 5390. SELECTED TOPICS IN EDUCATION. 3 Hours.
An examination of different topics related to education. This seminar may be repeated for credit as the topic changes.

EDUC 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

EDUC 5394. UNDERSTANDING AND DESIGNING EDUCATIONAL RESEARCH. 3 Hours.
In this introductory course, students learn about different types of educational research methods and study designs that can be applied to real-world settings. Furthermore, students learn about how to write measurable research questions, ethically collect data, and be introduced to qualitative, quantitative, and mixed methods study designs. At the conclusion of this course, students should be able to understand the basics of educational research to determine whether it would be appropriate for implementation in a real-world authentic setting.

EDUC 5395. DESIGNING CLASSROOM RESEARCH. 3 Hours.
In this course, students will develop their own classroom educational research project. Their designed study will be based in the literature in their educational field and focus on classroom research questions and problems that will inform teaching practices. In this course, students will develop an individual research problem statement, argue the significance of the problem, complete a written literature review and logical chain of reasoning related to the stated problem, write specific research questions to investigate the problem in educational settings, and design a research study (methodology) that will effectively investigate their research questions. Students design a research study that shows promise for improving education, written as the first three chapters of a scholarly classroom action research project. Prerequisite: EDUC 5394. For M.Ed.T. students, this course is to be taken in the final semester of the masters' degree program. For M.Ed. students, this course is to be taken in the semester just prior to the final semester of the masters' degree program, and in the semester immediately preceding EDUC 5397.

EDUC 5396. EEG Laboratory and Experimental Design. 3 Hours.
This course is an introduction to EEG technique, covering experimental design, recording, analysis, and interpretation of brainwaves.

EDUC 5397. IMPLEMENTING AND DISSEMINATING CLASSROOM RESEARCH. 3 Hours.
In this advanced course, students will build on the knowledge gained in EDUC 5394/EDUC 5367 to specifically focus on how to collect, analyze, and interpret different types of data grounded in a variety of educational research methods. This course is split into three sections focusing on quantitative data analyses/interpretations (e.g., correlations, t-tests, and regressions), qualitative data analyses/interpretations (e.g., thematic analysis, content analysis, and summative analysis), and mixed methods analyses/interpretations. At the conclusion of this course, students should be able to collect, analyze, and interpret different types of data commonly used in educational classrooms to make data driven decisions. Prerequisite: EDUC 5394 or EDUC 5367.

EDUC 5398. THESIS. 3 Hours.
Requires an individual research project in the individual's area of concentration. Graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

EDUC 5600. COUNSELING STUDENTS IN SCHOOLS. 6 Hours.
The focus of this capstone course will be individual and group counseling theories and techniques for pre k-12 students in an educational setting. Special techniques are included for substance abuse, and for using group play therapy. Knowledge of Diagnostic and Statistical Manual of Mental Disorders, 4th. Edition (DSM IV) will be covered for purposes of diagnosis and for outside referral when necessary. Three hours in a supervised counseling practicum in area schools or with school children will be required.

EDUC 5698. THESIS. 6 Hours.
Requires an individual research project in the individual's area of concentration. Graded "R" (Research) or "P" (Pass) or "F" (Fail) only. Prerequisite: Permission of Graduate Advisor required.

COURSES

EDUCIR 5391. INDEPENDENT RESEARCH. 3 Hours.
Research for thesis substitute or equivalent over a topic agreed upon between the student and instructor. May be repeated for credit with permission.

COURSES

LIST 4326. SECONDARY READING. 3 Hours.
This course focuses on the scope of reading instruction in the secondary schools and the processes and skills for reading. Students explore programs, trends, and issues related to secondary reading instruction along with comprehension and word study instruction, the integration of reading with writing and oral communication, selection of print materials competency, and an examination of visual literacy and the media.

LIST 4343. CONTENT AREA READING AND WRITING. 3 Hours.
Explores methods of teaching reading, writing, and study skills across the curriculum. Emphasis on text structure and the differences between narrative and expository text, graphic organizers, and the reading/writing process as applied to informational text. Classroom adaptations for culturally and linguistically diverse populations in the content areas are also addressed.

LIST 4373. LITERACY LEARNING FOR EC-6 STUDENTS: READING AND WRITING. 3 Hours.
Comprehensive literacy approach to teaching with an emphasis on guided reading and writing. Theoretical models, principles of teaching reading and writing using a variety of instructional strategies, the role of foundational literacy learning, effective program organization, assessment, and classroom management.

LIST 4374. LITERACY LEARNING FOR EC-6 STUDENTS: LITERATURE AND LANGUAGE. 3 Hours.
Comprehensive approach to literacy instruction. Emphasis on using genres of children's literature to promote language and literacy development. Instructional models and techniques for using children's literature across the curriculum. Use of appropriate media and non-print materials, selection and evaluation of literature, and strategies for stimulating and expanding children's response to literature.

LIST 4376. ASSESSMENT IN LITERACY LEARNING. 3 Hours.
Examines a variety of formal and informal literacy assessment tools and techniques. Also focuses on diagnostic procedures for identifying literacy learning strengths and needs. Students will apply reading and writing assessment and instructional strategies with children.

LIST 4378. TEACHING READING, WRITING, AND LITERATURE IN THE MIDDLE LEVEL GRADES. 3 Hours.
Theory and practice in the teaching of literacy for the middle level grades, including various instructional approaches to reading, writing, listening, and speaking; motivating student readers and writers; vocabulary; comprehension, strategies for various writing modes, purposes, and audiences; and the basic components of assessment. This course includes a field experience component, which requires students to work with middle grade students during normal school hours.

LIST 4390. SELECTED TOPICS IN LITERACY. 3 Hours.
An examination of different topics related to literacy. This seminar may be repeated for credit as the topic changes.

LIST 4391. CONFERENCE COURSE. 3 Hours.
Independent study in the preparation of a project in a paper on a research topic; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Consent of instructor.

LIST 5315. LITERACY THEORY TO PRACTICE. 3 Hours.
Designed as an introduction to comprehensive literacy education. Provides students the opportunity to explore theory, research, and knowledge in the field of literacy, including teaching diverse learners and students for whom English is an additional language.

LIST 5316. LITERACY THEORY TO PRACTICE - PRACTICUM I. 3 Hours.
Designed as an introduction to comprehensive literacy education. Provides students the opportunity to explore the theory, research, and knowledge in the field of literacy, including teaching diverse learners and students for whom English is an additional language, with application through field experiences in schools and classrooms.

LIST 5317. LITERACY LEADERSHIP AND COACHING: PRACTICUM III. 3 Hours.
This practicum is the capstone experience for students in the M.Ed. with Literacy Studies Emphasis. The course provides an opportunity to synthesize the theory and research related to literacy that has been presented in the program, to explore literacy program development and the implementation of technology in literacy programs, and to participate in professional leadership.

LIST 5325. UNDERSTANDING LITERACY RESEARCH. 3 Hours.
Designed as an introduction and exploration of literacy research. Provides the opportunity to read broadly in the area of literacy research to become aware of current trends and methodologies. Emphasizes the tools for critically consuming literacy research and utilizing existing research in personal examinations of literacy topics and questions.

LIST 5326. PRE-ADOLECENT & ADOLESCENT LITERACY. 3 Hours.
Focuses on literacy theory, research, and practice as it relates to pre-adolescents and adolescents. Addresses sociocultural, cognitive, linguistic, psychological, and developmental influences on literacy. Explores the development of curricular designs for teaching reading/language arts in middle and secondary schools including reading, writing, oral communication, literature, and digital literacy.

LIST 5345. CONTENT AREA READING AND WRITING. 3 Hours.
Explores methods of teaching reading, writing, and study skills across the curriculum. Emphasis on text structure and the difference between narrative and expository text, graphic organizers, and the reading/writing process as applied to informational text. Classroom adaptations for culturally and linguistically diverse populations in the content areas also will be addressed.

LIST 5346. TEACHING THE WRITING PROCESS. 3 Hours.
Current research and theory on the writing process, how children develop as writers, the teacher's role, the learning environment, and motivation, assessment, and evaluation in writing. Current approaches to digital writing and multimodal writing will be explored.

LIST 5350. LITERACY ASSESSMENT. 3 Hours.
Formal and informal assessment of student literacy learning, and diagnosis of student literacy learning strengths and needs.

LIST 5353. LITERATURE FOR CHILDREN AND YOUNG ADULTS. 3 Hours.
Selection, evaluation, and use of current literature published for children and young adults.

LIST 5354. MULTICULTURAL LITERATURE FOR CHILDREN AND YOUNG ADULTS. 3 Hours.
Study of literature for children and young adults which reflects the experiences representing cultural, ethnic, geographic, linguistic, gender, ability, and other dimensions of diversity. Consideration of selection guidelines, evaluation of literary quality as well as cultural authenticity and teaching applications, including adaptations for culturally and linguistically diverse populations.

LIST 5361. EDUCATIONAL PERSPECTIVES IN LANGUAGE AND LITERACY LEARNING-PRACTICUM II. 3 Hours.
This practicum-based course bridges theory to practice, addressing how to support student diversity through culturally relevant and equitable teaching frameworks. The course will introduce strategies to support multilingual students and students experiencing reading difficulties. Provides opportunities to apply effective, equity-based instructional practices to classroom practice.

LIST 5362. LITERACY INSTRUCTION IN ESL/BILINGUAL SETTINGS. 3 Hours.
This course bridges theory to practice, stressing how the relationship between first and additional language acquisition and development can inform teaching ESL/bilingual students. Provides opportunities to apply effective instructional practices in teaching students to foster development in speaking, listening, reading, and writing within a framework of cultural understanding.

LIST 5373. FOUNDATIONS OF LITERACY LEARNING IN EC-6 CLASSROOMS. 3 Hours.
Comprehensive approach to literacy instruction in EC-6 classrooms with an emphasis on reading and writing including the critical areas of phonics, phonemic awareness, word study, vocabulary, fluency, comprehension, and writing. In addition, the course examines various theoretical models of literacy along with the principles of teaching reading and writing using a variety of instructional strategies, effective program organization, assessment, and classroom management.

LIST 5381. NATIONAL WRITING PROJECT PART I. 3 Hours.
An intensive institute in which teachers learn ways to improve student writing abilities by improving their own teaching and learning of writing. Students participate in an intensive literature review related to the area of writing instruction. Prerequisite: Students must apply and be invited to participate in this course. Concurrent enrollment in LIST 5382.

LIST 5382. NATIONAL WRITING PROJECT PART II. 3 Hours.
An intensive institute in which teachers learn ways to improve student writing abilities by improving their own teaching and learning of writing. For this part of the workshop, students build on their literature review by writing a research proposal and developing research-based writing instruction. In addition, professional development training for classroom teachers is provided. Prerequisite: Students must apply and be invited to participate in this course. Concurrent enrollment in LIST 5381.

LIST 5383. WRITING FOR PROFESSIONAL PUBLICATION. 3 Hours.
This course focuses instructor and peer interaction as students conduct literacy-related research, analyze data, write up the results, and disseminate their completed study to a professional journal. A comprehensive study of professional journals and their requirements for submission is included in this course. Prerequisite: LIST 5385 or program advisor approval.

LIST 5384. ADVANCED PEDAGOGY OF WRITING. 3 Hours.
This course focuses on strategies for teaching prewriting, drafting, revising, editing, and publishing through writing workshop, literature focus units, and thematic units as well as through the content areas. Both writing assessment with rubrics and evaluation with portfolios are studied. Students compose both expository and expressive pieces as well as design and micro teach mini lessons and a web-based integrated writing unit. Prerequisite: LIST 5346, or LIST 5381, and LIST 5382, or program advisor approval.

LIST 5385. DESIGNING LITERACY RESEARCH. 3 Hours.
This course is designed to build on the LIST 5325, Understanding Literacy Research, by providing an exploration of the process for quantitative, mixed methods or qualitative research design. Includes an examination of various research designs related to language and literacy development including models such as case studies, ethnography, observations and interviews. Students are lead through the research process including forming a theoretical epistemology, formulating research questions, reviewing literature, selecting methods of data collection, interpretation and analysis of data and writing a research proposal. Students will be expected to complete this research focus in the program capstone experience, LIST 5317. Prerequisite: LIST 5325.

LIST 5390. SELECTED TOPICS IN READING. 3 Hours.
An examination of different topics each semester, with a focus on subjects related to reading, writing, oral language, and literacy.

LIST 5391. INDEPENDENT RESEARCH IN READING. 3 Hours.
Individual or small group research project on a literacy-related topic agreed upon between student(s) and instructor. May be repeated for credit with permission.

COURSES

LISTIR 5391. INDEPENDENT RESEARCH IN READING. 3 Hours.
Individual or small group research project on a literacy-related topic agreed upon between student(s) and instructor. May be repeated for credit with permission.

COURSES

MAED 5351. WHOLE NUMBERS, RATIONAL NUMBERS, & OPERATIONS. 3 Hours.
In this course students engage in activities and problem solving on concepts related to whole numbers, rational numbers and operations. Students in the course will learn to utilize research-based, problem-based teaching methods to promote K-12 student understanding. Students will experience how K-12 students learn these concepts as they themselves engage in computation and problem solving activities transferrable to classroom practice. In this course, students will engage in experiences to learn and teach their K-12 students on using numbers, number systems and their structure, operations and algorithms, quantitative reasoning, and technology.

MAED 5352. PATTERNS & ALGEBRA. 3 Hours.
This course engages students in problem-based teaching and curriculum development to help children learn problem solving and critical thinking with an emphasis on patterns, relations, functions, algebraic reasoning, analysis, and technology. The course incorporates research shown effective in helping children develop necessary skills for algebraic reasoning as a foundation for higher level mathematics learning.

MAED 5353. PROBABILITY & STATISTICS. 3 Hours.
In this course students will engage in learning experiences and readily usable curricula for teaching K-12 students concepts of probability and statistics, their applications, and technology. Students will examine K-12 student learning and research-based practices that best help them understand these mathematical concepts and that will promote their development of probabilistic reasoning abilities.

MAED 5354. PROBLEM SOLVING. 3 Hours.
In this course, students experience and practice innovative curricula for teaching and learning problem solving. Students engage in hands-on activities and apply various problem solving techniques, using mathematical processes to reason mathematically, to solve mathematical problems, to make mathematical connections within and outside of mathematics, and to communicate mathematically. Students learn to identify relevant and irrelevant variables in problems and work through problems to arrive at meaningful solutions. Students examine research on ways to help K-12 students become effective problem solvers as transferrable to other mathematics topics and subjects across the curriculum.

MAED 5355. CONCEPTUAL GEOMETRY. 3 Hours.
In this course students will experience and incorporate active learning curricula that utilize a variety of manipulative materials, diagrams, models, and pictures to study geometry and spatial reasoning. The students will learn effective, research-based practices for teaching geometry and examine ways to best help K-12 students build geometric and spatial understandings as a foundation for later, more complex abstract visualizations.

MAED 5356. MEASUREMENT. 3 Hours.
This course focuses on inquiry-based, problem-based curricula that help K-12 students learn concepts of measurement including units of measure, standardization, and error. Students will learn to use teaching techniques that will promote K-12 students' understanding as well as the application of measurement concepts to other subjects and to everyday life experiences.

COURSES

SCED 5351. PHYSICAL SCIENCE - PROPERTIES AND CHANGES IN MATTER. 3 Hours.
This course provides an in depth study of the properties and changes in matter and how to teach these concepts to students in grades K-12 science. Students study matter by engaging in inquiry and field/laboratory investigations using scientific processes, critical thinking, and problem solving. The course will help students learn to teach these physical science concepts to K-12 students using inquiry models.

SCED 5352. PHYSICAL SCIENCE - FORCE & ENERGY. 3 Hours.
In this course, students gain scientific knowledge about characteristics and interactions among matter, force, and energy with interdisciplinary and everyday life connections. Topics experienced through laboratory/field based investigations include: gravity, work, friction, acceleration, volume, length, distance, light, forms of energy, electricity, heat, and simple machines. The course will help students learn to teach these physical science concepts to K-12 students using inquiry models.

SCED 5353. EARTH SCIENCE - STRUCTURES, MOVEMENT, & CHANGES IN EARTH & SPACE. 3 Hours.
Through laboratory investigations, students gain knowledge of the various constructive and destructive forces that shape and alter the Earth's surfaces such as plate tectonics, volcanoes, earthquakes, erosion, weathering and deposition, as well as conservation of resources. The course will include studies of rock identification, and the rock cycle, as well as geologic time and the fossil record. The course includes study of earth, moon and planetary characteristics and motions. The course will enable students to teach these earth science concepts to K-12 students using inquiry models.

SCED 5354. EARTH SCIENCE - WATER PROPERTIES, DISTRIBUTION, THE WATER CYCLE, & WEATHER. 3 Hours.
Students gain understanding of the importance of water including the topics of cohesion, adhesion, surface tension, and capillary action. Water distribution on Earth is analyzed using maps and charts, with connections to geographic and climatic characteristics of the various regions. Water, as a major factor in weather, along with other meteorological variables such as air pressure, humidity, dew point, and cloud formation will be studied and weather patterns will be tracked over time using technology and maps. The course will provide students with the knowledge and skills required to teach these earth science concepts to K-12 students using inquiry models.

SCED 5355. LIFE SCIENCE - UNITY & DIVERSITY OF LIFE & LIFE PROCESSES. 3 Hours.
This course will explore living organisms and classification of organisms. The course will focus on the unity of life including the cell and cell components and the life functions, as well as the diversity of life including a look at pathogenic agents including bacteria and viruses. The course will analyze the structure and function of DNA and genetics. The course will include comparative anatomy and physiology studies of organisms. Students will learn how to teach these life science concepts to K-12 students using inquiry models.

SCED 5356. LIFE SCIENCE - CYCLES IN NATURE, ADAPTATIONS, AND ENVIRONMENTAL SCIENCE. 3 Hours.
This course analyzes life, biochemical, and geochemical cycles within the natural world and how they impact ecological systems and environment. Students conduct laboratory and field investigations to examine and recognize various plant and animal adaptations. Science topics include camouflage, mimicry, body coverings, mouthparts, habitats. Math-science integrations include estimations, relationships, graphing, and number sense. Inquiry models will be used to help students learn to teach these life science concepts to K-12 students.

COURSES

SPED 3301. CHARACTERISTICS OF INDIVIDUALS WITH DISABILITIES. 3 Hours.
This course focuses on the characteristics of students with mild disabilities and their (a) related academic and social outcomes, and (b) implications for assessment and intervention. The course is specifically designed for students who seek certification in teaching children with mild disabilities, to include children who are defined by Federal and state regulations as experiencing learning disabilities (LD), intellectual disability (ID), emotional and/or behavioral disabilities (EBD), and attention deficit disorders/hyperactivity disorders (ADD/ADHD).

SPED 3302. APPLIED BEHAVIOR ANALYSIS FOR TEACHERS. 3 Hours.
This course is designed to present students with applied behavior analysis strategies and tactics to ensure they are able to make effective instructional decisions and to evaluate the results of those decisions. Procedures covered in class include those to accelerate, decelerate, and maintain student academic and social behavior. Application of learning theory, measurement procedures, and verification of functional relationships will be emphasized. Knowledge of current significant research in Applied Behavior Analysis will be facilitated through research readings.

SPED 4301. STRATEGIES FOR TEACHING INDIVIDUALS WITH HIGH INCIDENCE DISABILITIES: READING AND WRITING. 3 Hours.
This course is designed to prepare future special educators to plan and provide content area instruction to elementary and secondary students with mild disabilities in reading and writing. Course content will include information on assessment, curriculum and instruction, and the professional role as a teacher of students with mild disabilities.

SPED 4302. COLLABORATIVE PRACTICES AND TRANSITION PLANNING IN SPECIAL EDUCATION. 3 Hours.
The purpose of this course is to learn about the concepts, tools, and strategies considered essential for effective collaboration and teamwork. Methods of collaborating and consulting with other professionals in the field of education and family members of students with disabilities will be discussed. Transition planning and collaborative interagency issues related to transition will be examined. Context, process, and content of collaborative school consultation will be presented.

SPED 4303. ADVANCED CONTENT AREA STRATEGIES FOR TEACHING INDIVIDUALS WITH DISABILITIES. 3 Hours.
This course is designed to prepare future special educators to plan and provide content area instruction to elementary and secondary students with disabilities across the content areas. Course content will include information on assessment, curriculum and instruction, and the professional role as a teacher of students with disabilities.

SPED 4304. ASSISTIVE TECHNOLOGY. 3 Hours.
This course will address the use of technology in special education, including microcomputers, interactive video, auditory and visual enhancement, and other adaptive devices with individuals experiencing disabilities including learning disabilities, intellectual impairments, sensory and physical impairments. Current developments and research findings concerning rehabilitative, adaptive, and learning technologies applied to needs of individuals with learning, intellectual, physical, or sensory disabilities will also be addressed. Topics include selection and evaluation, instructional and administrative applications, and personal productivity tools.

SPED 4307. SPECIAL EDUCATION LEGAL AND POLICY ISSUES. 3 Hours.
This introductory course will discuss historical legal foundations of special education and the present legal and policy challenges facing the field. Course content will include information on the Individuals with Disabilities Education Act, the Americans with Disabilities Act, and Section 504 of the Vocational Rehabilitation Act. Students will also understand how important rules from the court system have interpreted laws governing special education and how current policies and issues could impact special education. At the undergraduate level, special focus will be given to applied aspects of the law (e.g., Individualized Education Plans; ARD meetings, etc.).

SPED 4601. PRACTICUM IN SPECIAL EDUCATION. 6 Hours.
This course is designed to provide practical opportunities for the pre-service candidate to develop skills in assessment and instruction of individuals with severe disabilities. In addition to providing direct services, an important component of the practicum is to collaborate with both classroom and school staff regarding all aspects of service provision. Finally, general professional protocol is emphasized in this course including dependability, attitude, and communication skills (both written and spoken).

SPED 4687. CLINICAL TEACHING IN EC-6 AND SPECIAL EDUCATION. 6 Hours.
Supervised and directed clinical teaching in student's targeted area of certification. The student will be assigned full time for the Independent School District calendar. Required seminars provide students with theory to integrate and apply during clinical teaching. Students will apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis of practice. Prerequisite: Completion of program coursework, program approval.

SPED 5301. CHARACTERISTICS OF INDIVIDUALS WITH DISABILITIES. 3 Hours.
This introductory course focuses on the characteristics of students with mild disabilities and their (a) related academic and social outcomes, and (b) implications for assessment and intervention. The course is specifically designed for students who seek certification in teaching children with mild disabilities, to include children who are defined by Federal and state regulations as experiencing learning disabilities (LD), intellectual disability (ID), emotional and/or behavioral disabilities (EBD), and attention deficit disorders/hyperactivity disorders (ADD/ADHD). Graduate level students' understanding will be assessed and measured through additional readings and assignments designed to encourage deeper thinking regarding classroom level interventions for students with disabilities.

SPED 5302. APPLIED BEHAVIOR ANALYSIS FOR TEACHERS. 3 Hours.
This course is designed to present students with applied behavior analysis strategies and tactics to ensure they are able to make effective instructional decisions and to evaluate the results of those decisions. Procedures covered in class include those to accelerate, decelerate, and maintain student academic and social behavior. Application of learning theory, measurement procedures, and verification of functional relationships will be emphasized. Graduate level students' understanding will be assessed and measured through the direct application of concepts in the field and a written functional behavioral assessment inclusive of a behavior intervention plan.

SPED 5303. COLLABORATIVE PRACTICES AND TRANSITION PLANNING IN SPECIAL EDUCATION. 3 Hours.
This course focuses on the concepts, tools, and strategies considered essential for effective collaboration and teamwork. Methods of collaborating and consulting with other professionals in the field of education and family members of students with disabilities will be discussed. Transition planning and collaborative interagency issues related to transition will be examined. Graduate students will facilitate a mock ARD and transition planning meeting.

SPED 5304. INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES. 3 Hours.
This course is designed to prepare future special educators to plan and provide specialized instruction to elementary and secondary students with mild disabilities in reading, writing, mathematics, and across the content areas. Course content will include information on assessment, curriculum and instruction, and the professional role as a teacher of students with mild disabilities. Graduate students will demonstrate mastery of evidence-based practices for students with disabilities by teaching a lesson.

SPED 5305. ADVANCED LEARNING DISABILITIES. 3 Hours.
This course is designed to teach the definitions, characteristics, theories, and etiologies of students with specific learning disabilities. Students will analyze definitions of specific learning disabilities from the Individuals with Disabilities Education Act and professional learning disability organizations. Students will also analyze research describing the nature and characteristics of learning disabilities and how to best serve these students in an educational setting.

SPED 5306. ASSISTIVE TECHNOLOGY. 3 Hours.
This course will address the use of technology in special education, including microcomputers, interactive video, auditory and visual enhancement, and other adaptive devices with individuals experiencing disabilities including learning disabilities, intellectual impairments, sensory and physical impairments. Students will examine current developments and conduct research concerning rehabilitative, adaptive, and learning technologies applied to needs of individuals with disabilities.

SPED 5307. SPECIAL EDUCATION LEGAL AND POLICY ISSUES. 3 Hours.
This introductory course will discuss historical legal foundations of special education and the present legal and policy challenges facing the field. Course content will include information on the Individuals with Disabilities Education Act, the Americans with Disabilities Act, and Section 504 of the Vocational Rehabilitation Act. Students will also understand how important rules from the court system have interpreted laws governing special education and how current policies and issues could impact special education. At the undergraduate level, special focus will be given to applied aspects of the law (e.g., Individualized Education Plans; ARD meetings, etc.).

SPED 5308. ADVANCED INTELLECTUAL DISABILITIES. 3 Hours.
This course is designed to teach the definitions, characteristics, theories, and etiologies of students with intellectual disabilities. Students will analyze definitions of intellectual disabilities from the Individuals with Disabilities Education Act and professional intellectual disability organizations. Students will also analyze research describing the nature and characteristics of intellectual disabilities and how to best serve these students in an educational setting.

SPED 5309. THE NEUROSCIENCE OF TYPICAL & ATYPICAL LANGUAGE DEVELOPMENT. 3 Hours.
This course will examine the many levels of language including phonetics, phonology, semantics, syntax and pragmatics from both functional and neuroscientific perspectives. This will be closely tied to language acquisition and early language development. The focus on the pre-reading years will provide a solid basis for further study of literacy-related skills and overall learning. Sub-skills and precursors of reading will be examined from a neurological point of view and applied to researching reading difficulties as well as the teaching and learning in the classroom. Course offered as EDUC 5362 and SPED 5309; co-list credit will be granted only as one.

SPED 5310. ADVANCED BEHAVIORAL DISORDERS. 3 Hours.
This course will cover advanced principles, concepts, and practices related to educating students with Emotional/Behavioral Disorders and other IDEA disabilities categories with behaviorally related characteristics. Emphasis will be on school-based services, including advanced instructional and behavioral interventions for improving academic, social, and behavioral outcomes, as well as mental health and juvenile justice services.

SPED 5311. CLASSROOM ASSESSMENT OF STUDENTS WITH DISABILITIES. 3 Hours.
This course is designed to equip teachers with practical assessment strategies for students with a wide range of disabilities. Course content will include standardized norm-referenced assessments, curriculum-based assessment, curriculum-based measurement, and other progress monitoring strategies. Students will create various assessment tools and plans to collect meaningful instructional data from students with disabilities.

SPED 5312. SPECIAL EDUCATION FIELD EXPERIENCE. 3 Hours.
This course is designed to engage students in multiple field-based activities such as, direct observations, functional-behavior assessments, data-based instruction and decision making, and research as part of an independent field experience. At the conclusion of the field experience, students will be assessed on a written product and presentation (e.g., portfolio, research poster). Prerequisite: All other courses in program sequence; requires approval.

SPED 5313. SINGLE SUBJECT RESEARCH. 3 Hours.
This course is designed to provide students an introductory overview of single subject research methodology. Course content will include quality indicators of single subject research that can lead to identifying effective interventions. Students will design and implement a single-subject experiment.

SPED 5314. CURRENT TOPICS IN SPECIAL EDUCATION AND RESEARCH. 3 Hours.
This course is designed to discuss current events in special education with a focus on both practice and research. Students will think critically about intended and unintended consequences of various policy and practice issues. Specific topics for the course will be influenced by current policy concerns, problems of practice, and student interests.

SPED 5315. MULTI-TIERED SYSTEM OF SUPPORT. 3 Hours.
This course will focus on multi-tiered system of support frameworks for integrating instruction, evidence-based interventions, and assessments to meet the academic and behavior needs of all students. Specific frameworks such as, response to intervention and positive behavioral interventions and supports will be emphasized as systems for prevention of disabilities and identification of students with learning disabilities and emotional and behavioral disorders.

SPED 5316. ADVANCED APPLIED BEHAVIORAL ANALYSIS. 3 Hours.
This course is designed to present graduate students in special education with applied behavior analysis strategies and tactics to ensure they are able to make effective instructional decisions and to evaluate the results of those decisions in accordance with the master's degree program and initial and advanced licensure standards. This course is intended for students with foundational knowledge of Applied Behavior Analysis (ABA). Students will be required to plan, implement, and evaluate an applied behavior analysis project with a student in an educational setting.

SPED 5317. AUTISM SPECTRUM DISORDERS. 3 Hours.
This course focuses on the characteristics and issues encountered by individuals who experience autism spectrum disorders. Students will analyze definitions of ASD provided by IDEA, DSM-V, and professional organizations. Emphasis will be on characteristics, school-based and post-secondary supports, Applied Behavior Analysis (ABA), and assistive technology.

SPED 5318. MEDICAL AND PHYSICAL MANAGEMENT OF STUDENTS WITH MULTIPLE DISABILITIES. 3 Hours.
This course is designed to provide students with an examination of how the medical and physical needs of students affect a teacher's design of instruction. The medical and physical aspects of a wide variety of orthopedic, musculoskeletal and sensory disorders, as well as the educational models of intervention and service delivery for individuals with multiple disabilities will also be discussed.

SPED 5319. METHODS OF TEACHING STUDENTS WITH MODERATE/SEVERE DISABILITIES AND AUTISM. 3 Hours.
This course is designed to prepare future special educators to plan and provide specialized instruction to elementary and secondary students with moderate/severe disabilities and Autism Spectrum Disorders. Course content will include information on assessment and evidence-based instructional practices for academic, functional, adaptive, and behavioral skills. Students will demonstrate mastery of evidence-based practices for students with moderate/severe disabilities and Autism Spectrum Disorders and receive feedback on the implementation of these practices.

SPED 5320. CHARACTERISTICS OF STUDENTS WITH SEVERE DISABILITIES. 3 Hours.
This course focuses on the characteristics and issues encountered by individuals who experience severe and profound levels of intellectual disabilities. Characteristics addressed include learning, behavioral, social-emotional, and communicative abilities. Special emphasis is placed on implementing evidence-based practices and empirically supported treatments.

SPED 5601. CLINICAL TEACHING. 6 Hours.
Supervised and directed clinical teaching in student's targeted area of certification. The student will be assigned full time for the Independent School District calendar. Required seminars provide students with theory to integrate and apply during clinical teaching. Students will apply theory and research to practice through daily teaching and interaction with students, major assignments, and data analysis of practice. Prerequisite: Must complete all other courses in sequence first; permission required.

Master of Education in Curriculum and Instruction (Literacy Studies)

About This Program

The Master of Education in Curriculum and Instruction with an emphasis in Literacy Studies (MEd in C&I--Literacy Studies) is a fully online, 30 credit hour, non-thesis degree designed for teachers who want to refresh their teaching credentials with advanced coursework in literacy studies. Students in the program have the option to pursue the Reading Specialist or English as a Second Language professional certificate.

Our MEd in C&I–Literacy Studies is one of the top in Texas. Since our program was established in 1998, 100% of of our students who take the Texas Education Agency's Reading Specialist exam pass within their first two attempts -- giving our graduates the expertise they need to address the literacy-learning needs of all students.

Note, however, that the M.Ed. in C&I--Literacy Studies is a master's degree program only and does confer initial teacher certification in Texas.

Competencies

1. Professional Dispositions: students will be able to display positive professional dispositions during courses and practicum settings.
2. Understanding and Engaging in Research: The candidate is able to identify problems and employ one or more research methodologies to develop solutions or understandings.
3. Planning, Instruction, and Assessment: The candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Admission to Master of Education (MEd) in Curriculum and Instruction is competitive. Some qualified students may not be admitted if demand exceeds the program’s capacity to serve all applicants. All students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs. Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UTA will lead to certification in their state.

UNCONDITIONAL ADMISSION

Requires:

1. Proof of two or more years of relevant experience.
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA on the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Two professional letters of reference. Letters from supervisors are strongly encouraged. Applicants for the M.Ed. in Special Education submit a personal statement of interest. Applicants for M.Ed. in Special Education who are not certification seeking submit only a personal statement of interest rather than letters of reference.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills “other screening instrument” as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

PROBATIONARY ADMISSION

1. Applicants who have less than 2 years of relevant experience and have a GPA of at least 3.0 and two letters of reference, may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration. MEd in Special Education program applicants may also be admitted on a probationary status with less than 2 years of relevant work experience, and a personal statement of interest.
2. Students granted probationary admission must maintain a 3.0 (B or better) GPA in the first 9 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills “other screening instrument” as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and

August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following.

1. In order to receive educator certification in Texas, you must pass a criminal history background check.If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
2. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Program Completion

TIME TO DEGREE

The degree must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies. Coursework that is more than six years old at the time of program completion cannot be used toward meeting degree the requirements. Coursework that is more than five years old cannot be used toward state certification requirements for licensure (further restrictions may apply, depending on program).

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education will be evaluated on professional dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as "unacceptable" in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by committee on continuation or dismissal from the College of Education.

EDUCATOR PREPARATION PROGRAM GUIDELINES

For certification-eligible candidates, per 19 TAC 228.40, (d) an Educator Preparation Program (EPP) shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion.

OUT-OF-STATE STUDENTS

The Texas Education Agency (TEA) requires candidates seeking certification to complete all practica in a TEA-approved site. Out-of-state students who do not complete the practicum at a UTA College of Education and TEA-approved site and meet all other TEA requirements do not qualify for Texas educator certification. If seeking certification outside of Texas, please work with your state agency in the state in which you are seeking certification to determine eligibility and to complete any additional requirements. Please note that after successful completion of your UTA College of Education degree, you may request a memo indicating your degree completion. UTA cannot recommend out-of-state students for certification and cannot recommend out-of-state students to take Texas certification exam(s). Additionally, UTA faculty and staff cannot complete out-of-state form requests for individuals seeking certification, licensure, and/or endorsements in another state according to TEA.

CHANGES

Program requirements may change as state/TEA certification requirements change.

Master of Education in Curriculum and Instruction (Math Education)

About This Program

Designed for mathematics educators, the Master of Education in Curriculum and Instruction mathematics education specialization provides practicing teachers with current findings in research and best instructional practices in mathematics education. The 30-hour degree includes core courses in curriculum design, instructional strategies and diversity in education. Also included are courses in education research methods and a concentration in mathematics or mathematics education.

This online MEd program is designed for teachers in K-12 school settings, as well as for curriculum developers and coordinators, district content specialists, and those in a variety of alternative educational settings such as museums, zoos, nature centers and corporate education/outreach divisions. In addition, their relevance for students in elementary through high school age ranges, the program strategies and content can be applied in early childhood, college and adult education where mathematics learning is emphasized.

Individuals holding a bachelor's degree at an accredited university in any field of study are eligible to apply.

Master of Education in Curriculum and Instruction (Math Education) is a master's degree program only and does not lead to initial teacher certification in Texas.

Competencies

1. Professional Dispositions: graduates will be able to display positive professional dispositions during courses and practicum settings.
2. Understanding and Engaging in Research: the candidate is able to identify problems and employ one or more research methodologies to develop solutions or understandings.
3. Planning, Instruction, and Assessment: the candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Admission to Master of Education (MEd) in Curriculum and Instruction is competitive. Some qualified students may not be admitted if demand exceeds the program’s capacity to serve all applicants. All students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs.

Master of Education in Curriculum and Instruction (Open)

About This Program

Our Master of Education in Curriculum and Instruction – Open Option is a non-thesis, hybrid program with a mix of online and in-person courses. Our MEd is intentionally designed to give educators the flexibility to personalize their path toward an advanced degree.

This 30 credit hour degree offers 10 courses, including four required courses and six focus area courses that are chosen with approval from the program director (all courses must be 5000-level or higher, and two of the focus area courses must be EDUC classes). From engineering to theater, the focus area courses can be within nearly any field. And the required Education courses help ensure you have the expertise to excel as an educator.

Master of Education in Curriculum and Instruction (Open Option) is a master's degree program only and does not lead to initial teacher certification.

Competencies

1. Professional Dispositions: graduates will be able to display positive professional dispositions during courses and practicum settings.
2. Understanding and Engaging in Research: The candidate is able to identify problems and employ one or more research methodologies to develop solutions or understandings.

Admissions Criteria

Admission to Master of Education (MEd) in Curriculum and Instruction is competitive. Some qualified students may not be admitted if demand exceeds the program’s capacity to serve all applicants. Master of Education in Curriculum and Instruction (Science Education)

About This Program

The Master of Education in Curriculum and Instruction – Science Education is a non-thesis degree designed for teachers who wish to specialize in advanced coursework in science education.

This fully online degree provides opportunities to develop advanced teaching, research, and leadership skills that align with the latest research and theories in science instruction. Graduates are prepared to analyze their own teaching and make adjustments where needed. They also gain an understanding of the overall state of education and the link between the theory and practice of teaching.
The graduate program emphasizes teaching science to K-12 students, using problem and inquiry-based teaching strategies consistent with science disciplines and centered on how people learn. Science content is emphasized in the context of how to teach that content to students.

Master of Education in Curriculum and Instruction (Science Education) is a master's degree program only and does not lead to initial teacher certification in Texas.

Competencies

1. Professional Dispositions: graduates will be able to display positive professional dispositions during courses and practicum settings.
2. Understanding and Engaging in Research: The candidate is able to identify problems and employ one or more research methodologies to develop solutions or understandings.
3. Planning, Instruction, and Assessment: The candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

UNCONDITIONAL ADMISSION

Requires:

1. Proof of two or more years of relevant experience.
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA on the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.

1. Applicants who have less than 2 years of relevant experience and have a GPA of at least 3.0 and two letters of reference, may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration. MEd in Special Education program applicants may also be admitted on a probationary status with less than 2 years of relevant work experience, and a personal statement of interest.
2. Students granted probationary admission must maintain a 3.0 (B or better) GPA in the first 9 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills “other screening instrument” as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

DEFERRED ADMISSION

An applicant’s admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following.

1. In order to receive educator certification in Texas, you must pass a criminal history background check.If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
2. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Total Hours		**30**

Program Completion

TIME TO DEGREE

The degree must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies. Coursework that is more than six years old at the time of program completion cannot be used toward meeting degree the requirements. Coursework that is more than five years old cannot be used toward state certification requirements for licensure (further restrictions may apply, depending on program).

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education will be evaluated on professional dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by committee on continuation or dismissal from the College of Education.

CHANGES

Program requirements may change as state/TEA certification requirements change.

Master of Education in Educational Leadership and Policy Studies

About This Program

UTA’s Master of Education in Educational Leadership & Policy Studies is a fully online, accelerated graduate program designed to prepare leaders to create high-performing, student-centered learning environments. This 30-credit-hour, non-thesis program equips working educators with the skills and credentials needed to become effective school and instructional leaders. Designed with the flexibility needed by working educators, this 100% online program allows students to balance professional responsibilities while advancing their careers. The accelerated format enables completion in as few as 12 months, providing a streamlined pathway to principal certification.

Students are challenged to explore innovative ways to lead school-level organizations, develop coaching and mentoring skills, promote a healthy organizational culture and climate, and ethically engage their communities—all in the service of student well-being and achievement. Coursework covers key leadership areas such as instructional leadership, human capital, data-driven decision-making, and organizational management in diverse school settings.

Our students combine their theoretical and applied learning through field-based practicums, where they apply their learning in real school settings under the guidance of experienced mentors. This hands-on experience allows them to navigate the complexities of school leadership while receiving valuable feedback and support.

Program graduates are prepared for roles such as principal, assistant principal, instructional leader, and district administrator. With an emphasis on ethical leadership, community engagement, and continuous school improvement, this program empowers educators to lead with vision, integrity, purpose, and passion in today’s evolving educational landscape.

Competencies

1. Candidates will be able to articulate and utilize standard practices for educators in the area of specialization, which include professional ethical conduct, practices, and performance.

2. Candidates will be able to provide instructional leadership to support educators in designing clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.
3. Candidates will be able to demonstrate strategic leadership by guiding a collaborative team to identify a critical need, implement an action plan, monitor progress, and drive school improvement.
4. Candidates will be able to analyze campus data, assess school culture and staff attitudes toward data-driven instruction, and develop a comprehensive improvement plan with actionable strategies to enhance instructional and assessment practices.

Admissions Criteria

Admission to the Master of Education (M.Ed.) in Educational Leadership and Policy Studies is competitive and some qualified applicants may not be admitted if demand exceeds the program's capacity to serve all applicants.

All applicants/students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs. Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UTA will lead to certification in their state.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills "other screening instrument" as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved or accredited PK-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

For certification-eligible candidates, per 19 TAC 228.40, (d), "an EPP shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion."

UNCONDITIONAL ADMISSION CRITERIA

1. Two or more years of creditable classroom teaching experience.
2. Verification of employment if service records do not reflect present employment location.
3. A valid teaching certificate.
4. Undergraduate transcripts with a 3.0 GPA during the last 60 hours or a 3.0 cumulative GPA, the higher of which will be used for admission purposes. *A 3.0 GPA on the last 9 hours of graduate coursework may be considered in place of an undergraduate GPA.*
5. Two professional letters of recommendation, one of which should be from a current or former principal or assistant principal.

PROBATIONARY ADMISSION CRITERIA

1. Applicants who meet the unconditional requirements but have less than two years of creditable classroom teaching experience may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration.
2. Students granted probationary admission must maintain a 3.0 GPA (B or better) in the first nine credit hours of graduate coursework in the College of Education program to be moved from probationary to unconditional status.

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIAL OF ADMISSION

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following:

1. In order to receive educator certification in Texas, you must pass a criminal history background check.
2. If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.

3. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Program Completion

TIME TO DEGREE

The degree must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies. Coursework that is more than six years old at the time of program completion cannot be used toward meeting degree the requirements. Coursework that is more than five years old cannot be used toward state certification requirements for licensure (further restrictions may apply, depending on program).

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education will be evaluated on professional dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by committee on continuation or dismissal from the College of Education.

EDUCATOR PREPARATION PROGRAM GUIDELINES

For certification-eligible candidates, per 19 TAC 228.40, (d) an Educator Preparation Program (EPP) shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion.

OUT-OF-STATE STUDENTS

The Texas Education Agency (TEA) requires candidates seeking certification to complete all practica in a TEA-approved site. Out-of-state students who do not complete the practicum at a UTA College of Education and TEA-approved site and meet all other TEA requirements do not qualify for Texas educator certification. If seeking certification outside of Texas, please work with your state agency to determine eligibility and to complete any additional requirements. Please note that after successful completion of your UTA College of Education degree, you may request a memo indicating your degree completion. UTA cannot recommend out-of-state students for certification and cannot recommend out-of-state students to take Texas certification exam(s). Additionally, UTA faculty and staff cannot complete out-of-state form requests for individuals seeking certification, licensure, and/or endorsements in another state, according to TEA.

CHANGES

Program requirements may change as state or TEA certification requirements change.

Master of Education in Special Education (Advanced)

About This Program

The MEd in Special Education (Advanced) includes a heavy emphasis on teaching and learning with assistive technology, evidence-based behavioral strategies, and research. This graduate program has multiple emphasis areas such as options for initial teacher certification preparation, high incidence disabilities, and low incidence disabilities. Students who successfully complete the certificate coursework, state and program requirements, and required exams will be eligible to apply for Texas EC-12 (early childhood-12th grade) Special Education certification. This program is uniquely focused on the needs of students with disabilities.

Competencies

1. Professional Dispositions: Students will be able to display positive professional dispositions during courses and practicum settings.
2. Understanding and Engaging in Research (EDUC-CO1-LO2): The candidate is able to identify problems and employ one or more research methodologies to develop solutions or understandings.
3. Planning, Instruction, and Assessment (EDUC-CO1-LO3): The candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Admission to the Master of Education program is competitive. Some qualified students may not be admitted if demand exceeds the program's capacity to serve all applicants.

UNCONDITIONAL ADMISSION

Requires:

1. Proof of two or more years of relevant experience.
2. Undergraduate transcripts with at least a 3.0 GPA during the last 60 hours or at least a 3.0 cumulative GPA. The higher of these GPAs will be used for admission purposes. A 3.0 GPA on the last 9 hours of graduate coursework may be considered in place of the undergraduate GPA.
3. Two professional letters of reference. Letters from supervisors are strongly encouraged. Applicants for the MEd in Special Education submit a personal statement of interest. Applicants for MEd in Special Education who are not certification seeking submit only a personal statement of interest rather than letters of reference.

PROBATIONARY ADMISSION

1. Applicants who have less than 2 years of relevant experience and have a GPA of at least 3.0 and two letters of reference, may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration. MEd in Special Education program applicants may also be admitted on a probationary status with less than 2 years of relevant work experience, and a personal statement of interest.
2. Students granted probationary admission must maintain a 3.0 (B or better) GPA in the first 9 credit hours of graduate coursework in the College of Education program to be converted from probationary to unconditional admission.

Program areas have additional requirements including documents for TEA reporting, including: 1) a written response to the given prompt (fulfills "other screening instrument" as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved Pre K-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Master of Education in Special Education (Initial)

About This Program

The MEd in Special Education (Initial Certification) includes a heavy emphasis on teaching and learning with assistive technology, evidence-based behavioral strategies, and research. This graduate program has multiple emphasis areas such as options for initial teacher certification preparation, high incidence disabilities, and low incidence disabilities. Students who successfully complete the certificate coursework, state and program requirements,

and required exams will be eligible to apply for Texas EC-12 (early childhood-12th grade) Special Education certification. This program is uniquely focused on the needs of students with disabilities.

Competencies

1. Initial certification candidates will be able to demonstrate knowledge of instructional competencies including assessment of student learning, ability to plan and deliver instruction, ability to differentiate instruction to meet varying student ability levels and needs and demonstrate professional ethics and dispositions.
2. Students will be able to display positive professional dispositions during courses and practicum settings.
3. The candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Admission to the Master of Education program is competitive. Some qualified students may not be admitted if demand exceeds the program's capacity to serve all applicants. All students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs. Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UTA will lead to certification in their state.

Post-Master's Principal Certification Program

About This Program

UTA’s Post-Master's Principal Certification Program is a fully online, accelerated certification-only program designed exclusively for applicants who already hold a master's degree. This 18-credit-hour, non-thesis program equips working educators with the skills and credentials needed to become effective school and instructional leaders. Designed with the flexibility needed by working educators, this 100% online program allows students to balance professional responsibilities while advancing their careers. The accelerated format enables completion in as few as 12 months, providing a streamlined pathway to principal certification.

Students are challenged to explore innovative ways to lead school-level organizations, develop coaching and mentoring skills, promote a healthy organizational culture and climate, and ethically engage their communities—all in the service of student well-being and achievement. Coursework covers key leadership areas such as instructional leadership, human capital, data-driven decision-making, and organizational management in diverse school settings.

Our students combine their theoretical and applied learning through field-based practicums, where they apply their learning in real school settings under the guidance of experienced mentors. This hands-on experience allows them to navigate the complexities of school leadership while receiving valuable feedback and support.

Program graduates are prepared for roles such as principal, assistant principal, instructional leader, and district administrator. With an emphasis on ethical leadership, community engagement, and continuous school improvement, this program empowers educators to lead with vision, integrity, purpose, and passion in today’s evolving educational landscape.

Competencies

1. Candidates will be able to articulate and utilize standard practices for educators in the area of specialization, which include professional ethical conduct, practices, and performance.
2. Candidates will be able to provide instructional leadership to support educators in designing clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.
3. Candidates will be able to demonstrate strategic leadership by guiding a collaborative team to identify a critical need, implement an action plan, monitor progress, and drive school improvement.
4. Candidates will be able to analyze campus data, assess school culture and staff attitudes toward data-driven instruction, and develop a comprehensive improvement plan with actionable strategies to enhance instructional and assessment practices.

Admissions Criteria

Admission to the Principal Certification Program is competitive, and some qualified applicants may not be admitted if demand exceeds the program's capacity to serve all applicants. All applicants/students must meet university, college, department, and Texas Administrative Code qualifications in order to participate in educator preparation programs. Out-of-state students will not qualify for Texas educator certification.

Program areas have additional requirements, including documents for TEA reporting: 1) a written response to the given prompt (fulfills "other screening instrument" as required by The Texas Education Agency), and 2) completion of Attestation and FERPA forms. In addition, some programs require access to an approved or accredited PK-12 setting. The overall grade point average (GPA) of each incoming class admitted between September 1 and August 31 of each year by an educator preparation program (EPP) may not be less than 3.0 on a four-point scale or the equivalent. Certification programs have additional TAC requirements for GPA (used by the program in addition to, not in lieu of, the requirements stated above).

For certification-eligible candidates, per 19 TAC 228.40, (d), "an EPP shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion."

UNCONDITIONAL ADMISSION CRITERIA

1. Master's degree
2. Two or more years of creditable teaching experience.
3. Verification of employment if service records do not reflect present employment location.
4. A valid teaching certificate
5. Graduate transcripts with a 3.0 GPA or higher.
6. Two professional letters of recommendation, one of which should be from a current or former principal or assistant principal.

PROBATIONARY ADMISSION CRITERIA

1. Applicants who meet the unconditional requirements but have less than two years of creditable classroom teaching experience may be granted probationary admission. The faculty admissions committee may require additional documents (e.g., GRE scores) for consideration.
2. Students granted probationary admission must maintain a 3.0 GPA (B or better) in the first nine credit hours of graduate coursework in the College of Education program to be moved from probationary to unconditional status.

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

Denial of Admission

An applicant may be denied admission if the conditions for unconditional or probationary admission are not met. In addition, if a student was suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic, that student may be denied admission or readmission to an educator preparation program in the UTA College of Education.

Criminal History Acknowledgement

As required by Texas HB1508, applicants need to be aware of the following:

- In order to receive educator certification in Texas, you must pass a criminal history background check.
- If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
- You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

Program Completion

TIME TO CERTIFICATION

Coursework that is more than five years old cannot be used toward state certification requirements for licensure (further restrictions may apply, depending on program).

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education will be evaluated on professional dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/ candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by committee on continuation or dismissal from the College of Education.

EDUCATOR PREPARATION PROGRAM GUIDELINES

For certification-eligible candidates, per 19 TAC 228.40, (d) an Educator Preparation Program (EPP) shall determine the readiness of each candidate to take the appropriate certification examination of content, pedagogy, and professional responsibilities, including professional ethics and standards of conduct. An EPP shall not grant test approval for a certification examination until a candidate has met all of the requirements for admission to the EPP and has been contingently or formally admitted into the EPP. An EPP may make test approval contingent on a candidate completing additional coursework and/or training to show that the candidate is prepared to pass the test if the candidate is seeking test approval from the EPP in an area where the standards and/or test changed since the candidate completed the EPP or if the candidate has returned to the EPP for test approval five or more years following the academic year of completion.

Teacher and Administrator Preparation - Undergraduate Programs

Programs

BACCALAUREATE DEGREES

- Education BA (4-8 Middle-Level ELA/Social Studies Teacher Certification) (p. 491)
- Education BA (EC-6 Bilingual Teacher Certification) (p. 494)
- Education BA (EC-6 ESL Teacher Certification) (p. 497)
- Education BS (4-8 Middle-Level Math/Science Teacher Certification) (p. 500)
- Education BS (EC-12 Special Education/EC-6 Core Subjects Teacher Certification) (p. 503)

Bachelor of Arts in Education (4-8 Middle-Level ELA/Social Studies Teacher Certification)

About This Program

The Bachelor of Arts in Education with EC-6 Bilingual Teacher Certification prepares students to be early childhood and elementary teachers in bilingual classrooms. Course work is tied to Texas Educator standards. Additionally, course work prepares students to take the appropriate Texas certification exams.

Competencies

1. Initial certification candidates will be able to demonstrate knowledge of instructional competencies including assessment of student learning, ability to plan and deliver instruction, ability to differentiate instruction to meet varying student ability levels and needs and demonstrate professional ethics and dispositions.
2. Students will be able to display positive professional dispositions during courses and practicum settings.
3. The candidate is able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Students seeking admission to the College of Education must meet specific criteria established by the College of Education for unconditional admission:

- Satisfy credit hour requirements for admission to a degree plan.
- Application for admission.
- Submit transcripts from each college or university the student has attended (reflecting all current/completed semesters).
- Be TSI (Texas Success Initiative) complete.
- Have a minimum GPA, not less than 2.75, for any applicant, that leads to a cohort average of 3.0 or higher.
- Any other assessment requirements deemed necessary by the College of Education.
- Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Educator preparation program requirements are located on the College of Education website.

Curriculum

Foundations		
General Core Requirements (p. 46)		42
Students must complete specific classes in certain core area.		
For Communication select:		
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
For Language, Philosophy & Culture select:		
ENGL 2309	WORLD LITERATURE	
or ENGL 2319	BRITISH LITERATURE	
or ENGL 2329	AMERICAN LITERATURE	
For Life & Physical Science biology is recommended		
For Mathematics select:		

MATH 1302	COLLEGE ALGEBRA	
MATH 1330	ARITHMETICAL PROBLEM SOLVING	
For U.S. History select:		
HIST 1301	HISTORY OF THE UNITED STATES TO 1865	
HIST 1302	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
Education Foundations		
EDUC 2302	THE PROFESSIONAL EDUCATOR [1]	3

Total Hours		**120**

[1] Satisfies the first-year experience requirement if taken at UTA; if not taken at UTA student must take UNIV 1101.

Program Completion

ELIGIBILITY FOR PROGRAM CONTINUATION

Each candidate for certification must:

- Demonstrate suitability for admission to the education profession.
- Demonstrate knowledge of and adherence to the Code of Ethics and Standard Practices for Texas Educators.
- Demonstrate the speech competencies associated with proficient oral communication in instructional settings. If a student is found to be deficient in these competencies, successful completion of COMS 3315 (https://catalog.uta.edu/search/?P=COMS%203315) or an approved substitute will be required.

- Demonstrate progress through committee assessment of the teaching field(s) or specialization(s) and maintain a 3.0 GPA in all College of Education certification courses with a grade of C or better.
- See College of Education website for additional educator preparation program requirements.

Students/candidates who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Our candidates must have a minimum overall grade point average of 2.75 or at least 2.75 in the last 60 semester credit hours of coursework. Students who do not meet the grade point average of 2.75 should consult a program advisor to determine their eligibility.

FIELD EXPERIENCE

Application for clinical teaching is required a year in advance of your clinical teaching semester.

Early Childhood - 6th Grade ESL and Bilingual Field Experience occurs in the fall semester. Candidates enroll in three on-campus courses and spend one day per week in a public school classroom. In this classroom, they will work with a cooperating teacher and complete assignments from their on-campus courses. Candidates may be offered opportunities for employment as early childhood teaching assistants in a kindergarten setting. To be eligible to participate in EC-6 field experiences, candidates must have:

- Filed a degree plan with the COEd Advising Office
- Completed all core and support system courses
- Met all requirements (GPA, TSI complete, and prerequisite courses)
- Pass a criminal background check

CLINICAL (STUDENT) TEACHING

Early Childhood - 6th Grade ESL and Bilingual Clinical Teaching is a full-time supervised and directed practice in an approved Pre-K- 6th grade classroom. Clinical teachers will have at least two placements. Clinical teaching lasts one semester; it begins with the school district calendar and ends with UTA Graduation.

Candidates must attend a mandatory orientation to become familiar with the Clinical Teaching Handbook and the requirements prior to beginning the clinical teaching assignment. For purposes of determining clinical teaching eligibility for all education candidates, the following must be completed:

- Have a minimum GPA, not less than 2.75, for any applicant, that leads to a cohort average of 3.0 or higher.
- 3.0 GPA in all College of Education certification courses with a grade of C or better in all College of Education certification courses.
- Additional requirements specific to each certification level.

ORAL COMMUNICATION COMPETENCY REQUIREMENT

All students will satisfy the oral communication requirement during the professional development sequence leading to initial teacher certification. Students must complete the Field Experience semester with an acceptable evaluation of oral communication by university supervisors and assigned cooperating teachers in the field.

CRIMINAL HISTORY ACKNOWLEDGEMENT

As required by Texas HB1508, applicants need to be aware of the following.

1. In order to receive educator certification in Texas, you must pass a criminal history background check.
2. If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn this certification from the state of Texas.
3. You have a right to request a preliminary criminal history evaluation (https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/) letter from the Texas Education Agency prior to admission into this program. The Texas Education Agency currently charges a non-refundable $50 fee for this criminal history evaluation.

OUT-OF-STATE STUDENTS

The Texas Education Agency (TEA) requires candidates seeking certification to complete all clinical teaching/practica in a TEA-approved site. Out-of-state students who do not complete the clinical teaching/practicum at a UTA College of Education and TEA-approved site and meet all other TEA requirements do not qualify for Texas educator certification. If seeking certification outside of Texas, please work with your state agency in the state in which you are seeking certification to determine eligibility and to complete any additional requirements. Please note that after successful completion of your UTA College of Education degree, you may request a memo indicating your degree completion. UTA cannot recommend out-of-state students for certification and cannot recommend out-of-state students to take Texas certification exam(s). Additionally, UTA faculty and staff cannot complete out-of-state form requests for individuals seeking certification, licensure, and/or endorsements in another state according to TEA.

PROFESSIONAL DISPOSITIONS

Each student/candidate in the College of Education of UT Arlington will be evaluated on Professional Dispositions by the faculty and staff. These dispositions are identified as essential for a highly-qualified professional. Instructors and program directors will work with students/candidates rated as “unacceptable” in one or more stated criteria. The student/candidate will have an opportunity to develop a plan to remediate any digressions. If digression(s) are not, or cannot be successfully remediated as in the case of an egregious digression, a determination will be made by Committee on continuation or dismissal from the College of Education.

CHANGES

Program requirements may change as state/TEA certification requirements change.

Bachelor of Science in Education (4-8 Middle-Level Math/Science Teacher Certification)

About This Program

The Bachelor of Science in Education with 4-8 Middle-Level Math/Science Teacher Certification offers students a degree in education along with teacher certification allowing graduates to teach math and science in grades 4-8 in Texas.

Competencies

1. Initial certification candidates will be able to demonstrate knowledge of instructional competencies including assessment of student learning, ability to plan and deliver instruction, ability to differentiate instruction to meet varying student ability levels and needs and demonstrate professional ethics.
2. Teacher candidates will be able to display positive professional dispositions during courses and practicum settings, with 1% or fewer demonstrating a violation of dispositional standards.
3. Teacher candidates will be able to design clear, well-organized, sequential, engaging, and flexible learning experiences that reflect best practices, align with standards and related content, are appropriate for diverse learners, and address all required accommodations and modifications.

Admissions Criteria

Students seeking admission to the College of Education must meet specific criteria established by the College of Education for unconditional admission:

- Satisfy credit hour requirements for admission to a degree plan.
- Application for admission.
- Submit transcripts from each college or university the student has attended (reflecting all current/completed semesters).
- Be TSI (Texas Success Initiative) complete.
- Have a minimum GPA, not less than 2.75, for any applicant, that leads to a cohort average of 3.0 or higher.
- Any other assessment requirements deemed necessary by the College of Education.
- Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Educator preparation program requirements are located on the College of Education website.

Total Hours		**120**

[1] Satisfies the first-year experience requirement, if taken at UTA; if not taken at UTA, students must take UNIV 1101.

Program Completion

ELIGIBILITY FOR PROGRAM CONTINUATION

Each candidate for certification must:

- Demonstrate suitability for admission to the education profession.
- Demonstrate knowledge of and adherence to the Code of Ethics and Standard Practices for Texas Educators.
- Demonstrate the speech competencies associated with proficient oral communication in instructional settings. If a student is found to be deficient in these competencies, successful completion of COMS 3315 (https://catalog.uta.edu/search/?P=COMS%203315) or an approved substitute will be required.
- Demonstrate progress through committee assessment of the teaching field(s) or specialization(s) and maintain a 3.0 GPA in all College of Education certification courses with a grade of C or better.
- See College of Education website for additional educator preparation program requirements.

Students/candidates who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Our candidates must have a minimum overall grade point average of 2.75 or at least 2.75 in the last 60 semester credit hours of coursework. Students who do not meet the grade point average of 2.75 should consult a program advisor to determine their eligibility.

FIELD EXPERIENCE

Application for clinical teaching is required a year in advance of your clinical teaching semester.

Middle-level teacher certification candidates participate in field experiences in both their junior and senior years in the program. Candidates receive two placements for field experiences, in an upper-grade classroom and in a lower-grade classroom. Candidates work with the same cooperating teachers both years. During the fall semester of the junior year, field experiences are a minimum of 20 hours. During the spring semester of the junior year, field experiences are a minimum of 40 hours. During the fall semester of the senior year, candidates are in their assigned field experience classrooms one day per week for ten weeks, five weeks at each placement. Candidates are also actively engaged in planning, teaching, and participating in the larger school events. To be eligible to participate in middle-level field experiences, candidates must have:

- Filed a degree plan with the COEd Advising Office
- Have a minimum GPA, not less than 2.75, for any applicant, that leads to a cohort average of 3.0 or higher.
- Completed the required content-area courses
